BOOKS

THE AUTUMN OF THE PATRIARCH

By Gabriel Garcia Marquez. Translated from Spanish ... Gregory Rabassa. Harper & Row. 269 pp. $10.

Reviewed by Christopher Lehmann-Haupt

THIS long-awaited incandescent second novel by Colombian writer Gabriel Garcia Marquez is in a sense a sequel to his first. For if "One Hundred Years of Solitude" was a dream of Latin American history, then "The Autumn of the Patriarch" is a nightmare. It begins with the death of a nameless dictator who has lived somewhere between 107 and 232 years and ruled throughout much of his Caribbean country's horrific history: "Over the weekend the vultures got into the presidential palace by pecking through the screens on the balcony windows and the flapping of their wings stirred up the stagnant time inside and at dawn on Monday the city awoke out of its lethargy of centuries with the warm, soft breeze of a great man dead and rotting grandeur. Only then did we dare to go in."

At the end, the narrator, who seems to be the collective voice of the people, delivers its final judgment of the "great man": "He had learned of his incapacity for love . . . and he had tried to compensate for that infamous fate with the burning cultivation of the solitary vice of power . . . as he discovered in the course of his uncountable years that a lie is more comfortable than doubt, more useful than love, more lasting than truth . . ."

In between the beginning and end, the narrative flows back and forth in time to create out of the chronological jumble the tyrant's terrible story.

Unscrambled and viewed in its broadest outlines, the story can be recognized as a composite history of all Latin and South American dictators. In the beginning of his career, the patriarch is a hero to his people and beloved by his fellow soldiers. But inevitably, he grows apart, sells his country out to the "gringos," enriches himself, murders his opponents and practices nepotism. At the acme of his power he is completely isolated; the peo... longer even remember wh... looks like.

But filtered through Mar... imagination, the story is w... credibly exaggerated, hal... genic. The tyrant's betra... his country to imperiali... volves pumping the Caribbe... to Arizona, and import... wind machine to cool the... wastes that remain. He... rich by rigging the nation... tery, then exterminates th... children he involved in t... ging, then executes the ... he involved in the extermi... He disposed of his most ... henchman by serving h... "with 14 pounds of me... his chest and a sprig of ... in his mouth" at an annu... quet for his generals.

At the height of his po... has grown so ineluctable ... appoints himself "genera... universe," commands the ... break—which it does—and ... his cattle to be born alread... ing his brand—which ... And to compound the ... ness with which all these ... are imparted, Marquez ha... ten his 269-page book in ... (by my hasty count) 200 ... sentences that get long... longer until the final on... on for over 50 pages.

Sometimes these senten... splendid, like the ones in ... the patriarch presents a ... to a young woman he is ... to seduce. ... CHESS

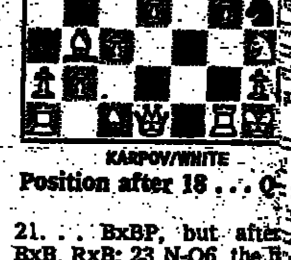
By Robert ...

Anatoly Karpov was dissatisfied with his play in the Torneo del Vino in Montilla, Spain, despite his easy victory without a loss. Chagrined over the many errors in his games, he shook his head ruefully and said: "After every move, the games changed hands. I would be winning effortlessly, then make one mistake, answered by a compensating mistake by my opponent, then make another and so on. I could have been on a seesaw."

I think he was exaggerating a bit, for the only game in which he stood worse at any time was his one with Ricardo Calvo, but it is true that the world champion's usually smooth winning technique was not in evidence.

A Case in Point



His second-round game with Juan Bellon of Spain is a case in point. After drawing the fangs of the dangerous Schliemann Gambit by correct opening play, Karpov missed winning a piece, which would have put the game away quickly. Then he managed to mess his two-pawns-ahead end game, losing his material advantage to find himself in a close end game. Finally rallying to exploit his positional superiority, he staggered on to the victory.

Once White removes the cramping black QN with 12 NxN, he is well on his way *toward consolidating his king* position against attack. Had Bellon proceeded 12 . . . BxN; 13 N-B3, N-N5, he would have been thrown back by 14 P-N3, B-N3; 15 N-R4.

Karpov's combination of 14 N-N3 and 17 P-KB4 rendered his kingside perfectly safe, but Bellon, a pawn down without a future, still had to go on trying. What both players overlooked, however, was that 18 . . . Q-R5 could have been totally refuted by 19 N-K4, winning a piece.

Bellon had the chance to recover his minus pawn by

Defeat Jets, 27-7

Dolphins Win 3d Straight Game

W YORK, Nov. 7 (AP)—Griese threw a pair of ndown passes today and the r defense turned in its sec- straight solid showing as the ins beat the New York Jets.

se threw scoring strikes of ds to Jim Mandich in the period and 16 to Nat Moore he second. Garo Yepremian d field goals of 44 yards e second period and 34 third as Miami won its straight to raise its record . The Dolphins wrapped up victory on Gary Davis's 28- TD sprint with 1:52 to

e Jets, falling to 2-7, were scoreless until 3:34 remain- in the game when Clark es plunged over from the yard line.

e Dolphins' defense showed ame tenacity it did a week when it beat New England, celebrating the return of ative coach Bill Arnsparger, two weeks ago as head coach he New York Giants.

Cardinals 17, Eagles 14

Philadelphia, Jim Bakken, ated by poor snaps on three ious field-goal attempts, boot- a 30-yard field goal midway ugh the fourth period to give Louis a 17-14 victory over horn Eagles.

e winning points were set up a 40-yard screen pass from terback Jim Hart to wide iver Ike Harris which put the on the Philadelphia 11. Bak- kicked a field goal three s later with 8:22 remaining. e Eagles drove to the St. s 11 with 27 seconds to play Dave Hampton fumbled and Cardinals' Steve Okoniewski overed at the 16 with 19 sec- s remaining to insure St. Louis seventh victory in nine games.

e Cardinals, shut out in the t half despite two drives that them inside the Philadelphia drove 58 and 77 yards on their two possessions in the second with Steve Jones and Wayne s scoring on short runs to the visitors a 14-7 lead.

e Eagles came back after Bill recovered a fumble by the rdinals' Pat Tilley at the St. s 38. Quarterback Mike Bo- scrambled 21 yards to put Eagles in scoring position and e Hampton punched it into end zone from six yards out the game at 14.

he Cardinals were plagued by snaps on three field-goal at- pts in the first half. On one, ter Roger Wehrli was hit and adelphia took over. Two plays Philadelphia had a third inches on the Cardinal 49 n Boryla faked into the line d hit split end Charlie Smith pattern for a touchdown. Cardinals drove to the ia 9 twice in the sec- arter but fumbled a snap e three-point attempt and, second field-goal try, an- bad snap forced Bakken to the kick wide to the left. Louis snapped out of its ve doldrums in the second ced by workhorse fullback Otis, who gained 115 yards carries.

is's 20-yard run on St. Louis's second-half drive set up 's two-yard run. Otis ran 0 yards to help set up the dinals' next touchdown, a sev- yard run by Morris.

he Eagles took the ball over the St. Louis 33 with 55 sec- s left and launched a last- drive. The drive was kept by a personal foul penalty d on middle linebacker Tim ney that put the ball on the But Hampton fumbled away Eagles' last chance to win after taking a screen pass from Boryla.

Patriots 20, Bills 10

At Foxboro, Mass., rookie Mike Haynes dashed 89 yards with the first punt return for a touchdown in the club's 17-year history and John Smith added two field goals to propel New England to a 20-10 victory over Buffalo.

Buffalo, now 1-7, with five straight losses, played most of the game without O.J. Simpson, who was ejected in the first quarter for fighting.

Smith's field goals came from 48 and 39 yards and Sam Cunningham, who had his best day in four years as a pro with 149 yards in 25 carries, scored the other New England touchdown on an eight-yard run.

The Bills' points came on George Jakowenko's 31-yard field goal with one second left in the first half and a 6-yard touchdown run by quarterback Gary Marangi late in the game.

Haynes, the Patriots' first-round draft pick from Arizona State, fielded Marv Bateman's 46-yard punt late in the second period at the New England 11 on the third bounce. He broke to his right, scooted up the sideline and ran into the clear after fellow rookie Tim Fox blocked Bateman's last-gasp tackle attempt.

Simpson swept to the right 9:06 into the game and was thrown for no gain by Patriots' defensive lineman Mel Lunsford. Simpson, who set an NFL single-game record of 250 yards rushing against New England in 1973, came up swinging.

The usually calm Simpson hit Lunsford with a right hand. Lunsford retaliated, causing a minor one-on-one scuffle on the field. Simpson was ejected but Lunsford was allowed to resume playing.

Haynes—a 6-foot-2, 193-pound cornerback—nearly returned a punt for a touchdown in a pre-season game against Cleveland. But he spiked the ball at the Browns three after running 71 yards. Teammate Darryl Stingley recovered the "fumble" and ran in for the touchdown.

New England, 6-3, got its first 3 points as a result of an interception by Fox. The rookie safety from Ohio State snared a pass at the New England 42 and returned it 29 yards to the Buffalo 29. Smith followed with a field goal at 4:18 of the first quarter.

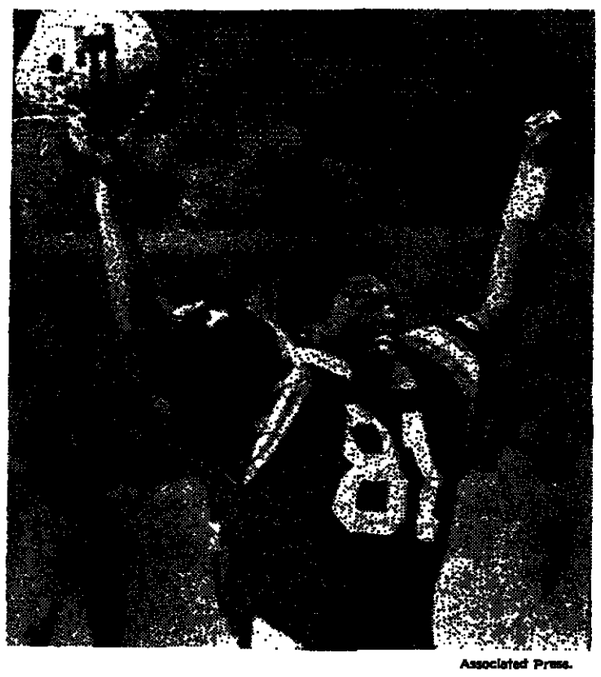
The Patriots scored again midway through the second period on Smith's 12th field goal in 16 tries this season.

Haynes's punt return lifted the Patriots' lead to 13-0, but an interception set up Jakowenko's field goal.

At San Diego, the underdog Chargers will try to hobble galloping Baltimore, winner of seven of the eight games it has played thus far this season.

The Chargers, a more modest 4-4, go onto the field with several statistical deficits. They have gained a total of 2,779 yards this season to Baltimore's 3,151, and they have scored 18 touchdowns to Baltimore's 30.

On defense, the Colts have allowed opponents only 2,245 yards compared with San Diego's 2,721.



The key test faced by San Diego, 23-0 victim of the Pittsburgh Steelers last weekend, will be the strength of its offensive and defensive lines.

Offensive players up front will try to hold back Baltimore's ferocious "sack pack" defenders, who made six quarterback sacks in Monday night's 38-14 victory over Houston.

Despite the lopsided score against Pittsburgh, San Diego coach Tommy Prothro said his "defense was great for 55 minutes." Midway through the final quarter, the score was 3-0, but the end of the game was played in cold rain—a rarity for the Chargers.

San Diego's defenders will face the NFL's best passer in Bert Jones, who has completed 118 of 198 attempts for a 59.6 per cent completion rate and a total of 1,792 yards.

In their last home game, the Chargers gained 502 yards against Houston for a 30-27 victory.

Associated Press.

VICTORY SIGN—Purdue split end is joyous after the Boilermakers upset top-ranked Michigan, 16-14, Saturday.

College Football

No. 1-Michigan Falls In Purdue Surprise

NEW YORK, Nov. 7 (UPI).—Purdue, one of the eight teams that unceremoniously fills out the Big-Ten Conference schedules each fall for perennial powerhouses Michigan and Ohio State, shocked the No. 1-ranked and previously unbeaten Wolverines, 16-14, yesterday on Rock Supan's 23-yard field goal with 4:20 left in the game.

The defeat was the first for Michigan by a Big-Ten team other than Ohio State since 1969 and undoubtedly cost the Wolverines the nation's top ranking, which they have held since the third week of the season.

Tailback Scott Dierking scored touchdowns on runs of 4 and 25 yards to give Purdue a 13-7 halftime lead after Michigan had taken a first-quarter lead on an eight-yard run by quarterback Rick Leach.

Leach put the Wolverines back in front, 14-13, early in the third quarter on a 65-yard scoring pass to wide receiver Jim Smith before Supan booted his fifth field goal of the season. Purdue boosted its record to 4-6.

The winning drive started when Blane Smith recovered Rob Lytle's fumble on Purdue's 29-yard line with just under 12 minutes to go. Purdue quarterback Mark Vitali alternated his running attack with Dierking and John Skibinski carrying the ball and, four plays after Vitali fired a 19-yard pass to Skibinski to the Michigan 11, Supan booted his three-pointer.

Michigan had one more shot at pulling the game out but its drive died on the Purdue 19 and, with 14 seconds left, Bog Wood missed a 37-yard field-goal attempt.

Pitt 37, Army 7

No. 2-ranked and unbeaten Pittsburgh put itself in ideal position to take over the top spot with a 37-7 triumph over Army as Tony Dorsett ran for 212 yards and three touchdowns. The favorite for the Heisman Trophy scored on runs of 4, 32 and 5 yards.

Dorsett's performance gave him his 17th straigth plus-100-yard game and 31 for his career. It also was his eighth plus-200-yard game and pushed his career total yardage rushing to 5,659. Dorsett also claimed his ninth NCAA record, becoming the all-time all-purpose runner—his mark of 6,192 yards surpassed the previous record of 6,003 yards set by Archie Griffin.

UCLA 46, Oregon 0

At Los Angeles, Jeff Dankworth guided UCLA to three early touchdowns, Frank Corral booted three long field goals and the third-ranked Bruins routed Oregon, 46-0, in a Pacific-8 Conference game. UCLA thus won its eighth game of the season; only a tie against Ohio State at Columbus marring the record. And the Bruins extended their unbeaten string to 13 games, tying a school record.

S. Calif. 48, Stanford 24

At Stanford, Southern California quarterback Vince Evans, operating without all-America tailback Ricky Bell, threw four touchdown passes and the fourth-ranked Trojans crushed Stanford, 48-24, to remain tied with UCLA for the Pacific-8 lead. Flanker Shelton Diggs caught three of Evans's scoring passes, including a 56-yarder on the game's third play. Following the first of cornerback Ricky Odom's three interceptions, Evans hit Diggs on a 21-yard touchdown pass and the Trojans led, 14-0, with 3 1/2 minutes gone. Bell, the nation's leading rusher, missed the game because of an ankle injury.

Georgia 41, Florida 27

At Jacksonville, Fla., quarterback Ray Goff scored three touchdowns and passed for two others as seventh-ranked Georgia overcame a 14-point halftime deficit to bury Florida, 41-27, and gain a share of the Southeastern Conference lead. It was a frustrating blow for the Gators, who could have clinched their first SEC crown. The victory propelled Georgia into the driver's seat in the race for the host spot in the Sugar Bowl game.

Texas Tech 14, Tex. Christian 10

At Forth Worth, Rodney Allison staked unbeaten Texas Tech to two quick touchdowns and the fifth-ranked Red Raiders turned back a bold, gambling upset bid by Southwest Conference doormat Texas Christian, 14-10.

Alabama 28, LSU 17

At Birmingham, fullback Johnny Davis bulled through a proud Louisiana State defense to lead Alabama to a 28-17 Southeastern Conference victory with scouts from eight bowls watching. Davis, stung when put on the second team earlier in the season, scored on bursts of 12 and 56 yards as the 15th-ranked Crimson Tide increased its record to 7-2 and virtually wrapped up an 18th consecutive bowl appearance.

Houston 30, Texas 0

At Austin, Houston quarterback Danny Davis scored once and hit a crucial fourth-down pass to set up a touchdown and Lennard Coplin kicked three field goals as the 19th-ranked Cougars defeated 20th-rated Texas, 30-0, in a Southwest Conference game.

Ohio State 42, Illinois 10

At Columbus, fullback Pete Johnson scored four times to become the fifth player in college history to score 50 career touchdowns, leading eighth-ranked Ohio State to its 18th straight Big Ten victory, a 42-10 rout of Illinois that gave the Buckeyes the conference lead.

Georgia Tech 23, Notre Dame 14

At Atlanta, David Sims powered for a pair of second-half touchdowns, giving Georgia Tech a 23-14 upset over 11th-ranked Notre Dame.

Nebraska 14, Okla. St. 10

At Lincoln, quarterback Vince Ferragamo tossed touchdown passes in the third and fourth periods to lead No. 9-ranked Nebraska to a 14-10 Big Eight Conference victory over No. 13 Oklahoma State.

Maryland 21, Cincinnati 0

At College Park, Md., Mark Manges completed 11 of 19 passes, including two for touchdowns, and added 71 yards rushing to lead unbeaten and sixth-ranked Maryland to a 21-0 victory over Cincinnati.

Okla. 49, Kansas St. 20

At Norman, Okla., sophomore quarterback Thomas Lott ran for 195 yards and three touchdowns as 17th-ranked Oklahoma brushed aside Kansas State, 49-20, to keep the Sooners mathematically in the Big Eight Conference title chase.

Brown, Yale Remain Tied For Ivy Lead

PROVIDENCE, R.I., Nov. 7 (AP).—Paul Michalko passed for four touchdowns, two to split end Bob Farnham on plays covering 48 and 29 yards, as Brown defeated Dartmouth, 35-1, yesterday to remain tied with Yale for the Ivy League football lead.

Michalko, who also threw scoring aerials of 40 and 33 yards, completed 19 of 29 passes for 314 yards and a Brown record as the Bruins defeated Dartmouth for the first time since 1955.

At New Haven, Conn., junior halfback John Pagliaro scored three touchdowns, leading Yale to a 39-7 victory over Princeton and setting a Yale record of 15 touchdowns for the season.

Mexican Wins Dewar Cup

Ramirez Brakes Orantes' Tennis Streak at 22

LONDON, Nov. 7 (UPI).—Mexican Raul Ramirez defeated Manuel Orantes, 6-3, 6-4, to win the $100,000 Dewar Cup men's single tennis title yesterday and end the Spaniard's 22-match winning streak.

The Mexican Davis Cup player not only won the $19,000 first prize but boosted his lead in the Commercial Union Grand Prix standings to the point where he is all but certain to win its $100,000 first prize.

Orantes, the 27-year-old lefthander, went into the final with a string of 22 victories and three straight tournament triumphs. But Ramirez hustled him out of his usual game. The Mexican took control at the net and proved too agile and accurate for Orantes, who was defeated in just two minutes over an hour.

Ramirez, 21, lost his opening service but recovered to win the set and was 5-2 up in the second and serving for the set when he hit only other patch of trouble. He missed a match point at 40-30 and then his service in a rally two points later.

Orantes looked set for a comeback when he won his service to love but the Mexican made sure of victory by taking the ninth game on his service for 6-4.

Briton Virginia Wade gave American Wimbledon champion Chris Evert her first defeat since April, beating her, 6-2, 6-2, in the women's final. It was one of the big upsets of the year in women's tennis, and the American's first defeat since April, when she lost to Yvonne Cawley of Australia in Los Angeles.

She made error after error and obviously experienced great difficulty with her timing on this synthetic court. Wade was aggressive and powerful from the first rally to the last.

Evert threatened to make a last-minute recovery when she broke service in the sixth game to love and then won the seventh for 2-5. But she was unable to contain Wade any longer and, after saving one match point in the following game, was beaten on the next by an easy and competent smash.

After the match, Evert said: "I just didn't have it tonight. I was not feeling anything at all. Virginia played great, probably the best match I have ever played against her.

"But then I made 5 per cent of my passing shots instead of my usual 95 per cent because I was mentally very weak tonight. I reckon I get that way about two or three times a year. But it doesn't necessarily mean I lose each time."

Connors Triumphs

COLOGNE, Nov. 7 (AP).—Top-seeded Jimmy Connors needed little more than an hour today to crush Frew McMillan, 6-2, 6-3, to win the $50,000 Cologne Grand Prix Tennis Tournament.

The victory was worth $10,000 and 40 points for the 24-year-old American, who remains fourth overall in Grand Prix standings with 640. Ramirez is first with 823.

Borg Beats Laver

DETROIT, Nov. 7 (AP).—Bjorn Borg of Sweden defeated Australian Rod Laver, 6-3, 6-1, in a match here last night.

Borg, who won $20,000 for first place, took a 3-0 lead in games and was never behind during the match.

In the consolation match, American Vitas Gerulaitis defeated John Newcombe of Australia, 8-5. Gerulaitis lost to Borg, 2-6, 6-3, 6-3, Friday night and Newcombe lost to Laver, 6-7, 6-2.

Olympic Bid

PARIS, Nov. 7 (Reuters).—The International Lawn Tennis Federation announced here yesterday that it would apply for the inclusion of tennis in the 1984 Olympic Games.

ILTF General Secretary David Gray said that the federation's management committee was negotiating with the International Olympic Committee.

The ILTF's formal application will be examined at an IOC meeting after the 1980 Olympic Games in Moscow, he said. Asked if the ILTF would expect professional players to take part in the Olympics, Gray replied: "One can hope that in 1984 the Olympics will have come nearer to our point of view."

Russians Disqualified

PARIS, Nov. 7 (UPI).—The Davis Cup Management Committee voted today to disqualify the Soviet Union from the 1977 edition of the tennis competition for refusing to meet Chile in this year's semifinal.

Committee member Derek Hardwick said, "You can be sure it was a big majority—we needed two-thirds and we are only eight on the committee."

At the same time, committee chairman Harcourt Woods announced that a new resolution will be put to the Davis Cup annual general assembly next July in London proposing that one-year disqualification be made automatic in future for any country pulling out of the cup once the draw has been made.

Youth Gives France 4th Straight International

On My Way 2d, Ivanjica Is 3d

By Steve Cady

LAUREL, Md., Nov. 7 (NYT).—In a race marked by irony and controversy, Youth gave France its fourth straight Washington D.C International success yesterday with a 10-length runaway at Laurel Race Course.

The major irony was that the contest lacked a U.S. representative for the first time in its 28 runnings. Effervescing, the lone U.S. entry, was withdrawn from the field only three hours before post time.

That left eight horses from six countries competing in the $150,000 1 1/2-mile race on a soft grass course that helped produce the third slowest International. It also set the stage for a powerful but controversial stretch run by Youth, the 3-year-old colt owned by Nelson Bunker Hunt of Texas. He had to survive a claim of foul before the victory became official.

Youth angled over from the outside toward the rail as he took the lead in the upper stretch, and it appeared that On My Way, another French horse, had to check stride momentarily. On My Way finished second, a nose ahead of Ivanjica, as the French contingent scored a 1,2,3 sweep here for the second straight year.

It was nearly 15 minutes before the stewards decided to disallow the objection, and make Youth the official winner at $5.60 for $2.

During the wait, Youth had been walked in slow circles by his Canadian jockey, Sandy Hawley, while Elizabeth Taylor stood in the winner's circle to make the trophy presentation. When the green-black silks of Hunt finally entered the enclosure, it meant a third International triumph for the 50-year-old Texan and the second in consecutive years for Hunt, Hawley and Maurice Zilber, the trainer. They won last year's International with Nobiliary, a filly.

With no U.S. representatives on hand, the foreign forces increased their lead in the series by default to 14-11. Every other International had at least two U.S. horses.

Yet there was another irony to this race, when Bloodlines were considered. All three in-the-money finishers, although based in France, were bred in the United States. Youth, a bay son of Ack Ack, is from Maryland; On My Way is from Virginia, and Ivanjica is from Kentucky.

Noble Dancer, representing Norway, finished fourth, followed by Rose Bowl (England), Fujino Pahshia (Japan), Windwurf (Germany) and Janus (Brasil). Youth, a co-favorite with Ivanjica at 9-5, ran the distance in 2 minutes, 46 1-5.

"He swerved in just a shade," Hawley said, "but I straightened him right out. He tends to wait for horses when he makes the lead."

United Press International.

FRENCH TRIPLE—Youth coasts to victory with On My Way second and Ivanjica third.

ttipaldi Finds uda and Hunt eserving Title

LAN, Nov. 7 (AP).—Former d auto-racing champion rson Fittipaldi of Brazil has quoted as saying that Niki Lauda and James Hunt erved to be champion" in the ntly ended Formula One rac- season.

Weather conditions in the n Grand Prix which decided title," Fittipaldi told Milan's Corriere Della Sera, "were tough, but the same for ybody. You must not forget Lauda had suffered a serious ident in August."

Nevertheless, the Brazilian driv- said, "Niki will still be the r to beat in future competi- ."

ttipaldi was also quoted as g he was contacted in Au- by Ferrari to join the an stable, but that "nothing decided."

ttipaldi said that world cham- James Hunt of Britain "is a special driver. He is strong n he attacks with a good car. was fantastic in the second of the last championship. It s to me Hunt has no special ."

earer Birdie Wins sie Golf Tourney

ELBOURNE, Nov. 7 (UPI).—Shearer holed a birdie from ot in the first sudden-death today to win the $62,500 ler Classic Golf title at the l Melbourne.

earer defeated fellow Aus- an Stuart Ginn, whose bid for tle from 15 feet slipped just of the cup.

Foster Fight in S. Africa

JOHANNESBURG, Nov. 7 (Reuters). — Light-heavyweight Victor Galindez of Argentina will defend his World Boxing Association title against former champion Bob Foster of the United States in Johannesburg March 5, promoters announced.

The Great Players Revolution in Baseball Spells Uncertainty for Owners

By Joseph Durso

NEW YORK, Nov. 7 (NYT).—After two days of legalized raids that rearranged the baseball world, the men who run the major leagues went home yesterday and counted the cost in players lost, players gained, cash surrendered and futures mortgaged.

During two draft meetings in 48 hours, they sold or claimed 82 players worth perhaps $40 million in talent, then left New York wondering what lay ahead in next year's phase of the Great Players' Revolt.

"It's here, it's a reality, you have to live with it," said Bing Devine, the free-trading general manager of the St. Louis Cardinals. "What good does it do to sit around crying, 'Look how this wrecks things.' We've had the industrial revolution and the agriculture revolution. Now the baseball revolution, and it's been coming since World War II."

"It's a revolution, but what can you do about it?" agreed Gabe Paul, the even freer-trading president of the New York Yankees. "You can't look back and say it shouldn't have happened. We're paying now for previous inaction. The only question left is how you're going to live with it."

"What next?" asked Dick O'Connell, executive vice-president of the Boston Red Sox. "Ticket prices will go up, for one thing. Every club has just so much money to spend, and they'll spend it to sign the best players available to stay competitive. The Red Sox must watch the Yankees, and the Baltimore Orioles must watch them both."

Power Balance

The immediate headache for all 26 teams in the two major leagues was the balance of power on the field and the survival of the franchise as a business. Beyond that, another headache was gathering: What happens next October when another bunch of players become free agents?

The Oakland A's, the dominant team in the American League this decade, led both leagues in suffering last Thursday when they lost eight unsigned players in the sport's first mass auction of free agents. The Kansas City Royals, who replaced them as the leader in the West this year, lost none. In the East, the Orioles lost four, the Yankees one and the Red Sox none.

In the National League, the world champion Cincinnati Reds stood on "principle" and boycotted the draft. Its chief rival, the rich Los Angeles Dodgers, claimed "talking rights" to eight liberated players, including the Red's ace pitcher, Don Gullett. In the East, the defending champion Philadelphia Phillies lost Dave Cash, but promptly bid for eight other players, including Gullett, Reggie Jackson and five of the defectors from Oakland.

The teams have until Feb. 15 to outbid one another for the first crop of free agents. But, meanwhile, they must make offers to their own players or eventually lose them, too. And everybody now enters the winter trading season without knowing precisely who belongs to whom.

"What Revolution?"

In the center of the whirlwind stood Marvin Miller, the economist who shaped the strategy of the Players Association through the labor negotiations and court battles that won the revolution. He was asked if he felt like Robespierre, and he smiled and replied: "What revolution?"

"I don't think it shook anything," he said, judging the impact of it all. "It's like the arbitration of players' salaries. Everybody said it would lead to mass arbitration. But what it did was to focus the issues better so the owners and players could discuss salaries better. The same thing will happen here. You may not get masses of free agents. You'll probably get players and owners working out more realistic individual agreements."

"In the future," said Richard Moss, counsel to the Players' Union, "this scene will be repeated on a smaller scale, not a larger one. The players and owners will seek their own level of agreements."

Boston Signs Campbell

BOSTON, Nov. 7 (UPI).—The Boston Red Sox became the first team to reap a reward of the major league re-entry draft yesterday when it signed Minnesota relief pitcher Bill Campbell to a four-year contract reported at $1 million.

Campbell, 28, was Boston's first-round selection in Thursday's free-agent draft. He was drafted by 11 other major league teams.

Campbell reportedly asked for $1 million spread over the four years. He played for Minnesota three years, earning $30,000 his last year with the team.

Campbell had a 17-5 record with Minnesota last year, plus 20 saves. He was considered by many to be the best relief hurler in the American League.

Pittsburgh Gets Tanner

PITTSBURGH, Nov. 7 (AP).—Chuck Tanner, manager of the Oakland A's, has been acquired by the Pittsburgh Pirates in exchange for catcher Manny Sanguillen and cash, the Pirates announced.

In a separate deal, the Pirates sold infielder Tommy Helms to Oakland.

Tanner spent one year with Oakland after five years with the Chicago White Sox, where he was named manager of the year in 1972.

Horse Challenge Trophy

NEW YORK, Nov. 7 (UPI).—Kevin Bacon of Australia spirited Chichester over 13 fences without a fault in a brisk 46 seconds to win the Brig. Gen. John Tupper Cole Memorial Challenge Trophy in the National Horse Show.

Observer

Keys to the Kingdom

By Russell Baker

NEW YORK—Dear J.C.,

Here are the keys to the house. You won't need most of them, as nobody ever seems to lock a door when they go out. With all the cops around the place, why should they?

The little thin brass key opens the desk drawer in which the button is kept. I had Betty mark it with a dollop of red fingernail polish for easy identification, as it is very easy to forget and leave lying around where the cleaning women can find it when they are dusting the office at night. Naturally, you don't want the cleaning women to have their finger on the button, as it makes the Russians very nervous, which could create international tensions.

Baker

In case of international tensions, take the key with the initials "H.K." on it and unlock the wall safe behind the Truman portrait in the Oval Office. There you will find Henry Kissinger's travel schedule, which is padlocked, as Henry is very secretive about everything.

The key numbered 88 opens the padlock so you can find out where Henry is traveling and what his en route phone number is. All you have to do then is go to the top-secret scrambler telephone, dial Henry and tell him you are having international tensions, which he will be glad to hear, as he is absolutely nuts about easing international tensions.

* * *

The dial on the top-secret scrambler telephone is unlocked with the funny looking green key labeled "Top-secret scrambler telephone key." Dick had to have this lock put on the dial several years ago as Spiro had gotten into the habit of coming into the office late at night when there was nobody there but the cleaning women and making top-secret scrambled phone calls to people who didn't have unscramblers on their telephones and couldn't understand what he was saying.

It must have been a lot of fun for Spiro and it didn't do any harm, but it sure ran up the phone bill, which got under Dick's skin, as Spiro was only vice-president. Which reminds me of the big skeleton-type key with the damp moss on it. This is the key that unlocks the closet in the subbasement where the vice-president is kept.

Do yourself a favor and don't drop it in the trash can thinking, "The vice-president!—Phooey! I'll never need him again." There's nothing better for sending to funerals than vice-presidents. Anybody can send a blanket of gladiolas, but having a vice-president to send shows you've got clout.

It also saves you from having to spend a lot of time standing around graveyards and getting depressed when you could be getting cheered up.

This brings me to the happy looking yellow keys. The one shaped like a musical note unlocks the storeroom in the attic where the "Hail to the Chief" musicians are kept. When you unlock the door, they automatically roll out a red carpet and play "Hail to the Chief" for you. It can make you feel pretty darn good to be hailed as the chief before hitting the hay after a bad day at the desk.

The other keys unlock the chief's garage, where you'll find your custom-built chief's limousine waiting to drive you through red lights to chicken dinners, and —you're going to love this...

Your chief's hangar, where you'll find your custom-built chief's jetliner waiting to jet you to airports of your choice where the "Hail to the Chief" musicians will be waiting beside a red carpet to make you feel pretty darn good when you get off, and—and this is really out of sight...

Your chief's helicopter pad, where you'll find a variety of chief's helicopters waiting to airlift you slowly on the first leg of a vital mission while cameramen record your historic chopper rise.

* * *

Looking at these old keys brings back some pretty good memories, which make it even harder to give it all up. Did you ever see me being photographed entering one of the chief's helicopters for the first leg of a vital mission? If you did you noticed I kept bumping my head on that low helicopter door, which made everybody laugh at me.

As the chief, I could have done a lot of chiefly things—have the helicopter bombed, order the photographers off the lot, report the laughers to the secret police.

A chief can do these things. That's what these keys mean. I didn't do them. I just laughed along with everybody else. It wasn't chiefly. If I'd been more chiefly, maybe I wouldn't be turning over these keys. It's hard to say. Which brings me to the big iron key, which I never used, as it is the key which you turn if you want to seal yourself into the chiefship, where nobody will ever dare laugh at you. It's had a lot of use, but not by me. I guess I didn't have enough time to get used to chiefsmanship.

Take care,

NAACP Elects A New Leader

NEW YORK, Nov. 7 (AP).—Benjamin Hooks, a member of the Federal Communications Commission, was elected yesterday to succeed Roy Wilkins as executive director of the National Association for the Advancement of Colored People.

The vote by the NAACP National Board was unanimous. Mr. Wilkins, 75, plans to retire next July 31.

Mr. Hooks, 51, of Memphis, said he has "no great novel changes" to propose for the 500,000-member civil rights organization. "I just want to see it bigger and better," he said. Mr. Hooks, an attorney and former Baptist minister, said he will resign his FCC post to assume the NAACP job on Jan. 1, 1977.

Curator of the Poor Man's Erotic Art

By Rudy Maxa

COLUMBUS, Ohio (WP).—As the publisher of Hustler magazine, Larry Flynt is the new king of mass-market working-class raunch, an astonishingly successful entrepreneur who happened to be in the right place at the right time with the right licentious idea.

What Hugh (Playboy) Hefner was to the fifties and what Bob (Penthouse) Guccione was to the sixties, Flynt is to the seventies: a shrewd promoter whose men's magazine, begun only 2 1/2 years ago, is a phenomenal success.

Where others have refused to tread, Flynt has charged ahead. Hustler's readers have been treated to articles rating the massage parlors of major U.S. cities (the writer's expenses alone totaled $3,500) and pictorial features of pregnant women, 50-year-old women, bald women and naked amputees. And in the case of a Hustler model, what she's got is what you see.

The magazine's photographers (who shoot most of the layouts at a private home Hustler maintains near Palm Beach, Fla.), avoid the soft-focus, artsy shots that keep other men's magazines out of the category of medical textbooks.

Flynt, 33, is a promoter in the tradition of a P. T. Barnum. He knows the futility of offering famous women $1 million to pose nude, Hustler style. But when he offers Susan Ford, the President's daughter, or Miss America that $1 million, it makes news, of a sort, the way Flynt made news when Hustler printed the blurry nude photos of Jacqueline Onassis that European *paparazzi* peddled.

Capital Idea

Currently, Flynt is reading ads to place in the Washington news media offering $25,000 to the first 10 women who can document that they are on a congressman's payroll for sexual purposes.

Promotion works. Flynt has kept one eye on court decisions regarding obscenity, the other on sales charts that say he will sell about 2.5 million copies of Hustler a month for about $2 each, making his magazine the third in sales behind Playboy and Penthouse in the field.

In doing that, Flynt, a Kentucky farmboy who parlayed a chain of Ohio go-go clubs into a publishing empire, is shattering a trade tradition: over-the-counter sales, not advertising, pay for the magazine—a good thing for Flynt, since advertisers have largely shunned the magazine, leaving plenty of room for him to promote his own mail-order products.

"My magazine is a mirror that reflects the reader's private fantasy," Flynt says. "I really respond to what the reader is, not what I think he should be. I always went along with the philosophy that the newsstand is the poor man's art museum; the rich have erotic art museums. It's still not a professional magazine, lots of it is really amateurish, but I think the readers identify with it and don't feel threatened.

"Hustler readers are used to getting it told to them just like they would hear it at a neighborhood bar." And that is just what Larry Flynt is: a bar owner who found a fortune in magazine publishing and intends to enjoy the ride.

Meatball Sandwich

At his side since the start of the magazine has been his third wife, Althea Leasure, 23. Flynt spotted her eating a meatball sandwich on a street near the *Ohio State University campus* several years ago.

She was a runaway from an orphanage when Flynt met her, got her a job in one of his Hustler nightclubs and began dating her. She is now Hustler's associate publisher.

Mrs. Flynt, whose editing philosophy was explored in a Hustler interview last summer, acknowledges that Flynt "has been known to strike me, but certainly not dangerously. I've got a very strong personality and I suppose I'm always testing men to find out what I can get away with."

Success has its rewards. Mrs. Flynt, for example, always wanted a heart-shaped bathtub and a house with a rose garden. Upstairs in the $375,000 mansion *Hustler bought* for its two executives, gold water faucets in the shape of swans fill a large, blue, heart-shaped bathtub at her command. Outside the house, around the corner from an enormous swimming pool, is a carefully tended rose garden.

The mansion was completely redecorated for the Flynts, and the pastel rooms are filled with English and Oriental period furniture. Extras include a sauna, whirlpool, wine cellar and a discreet button beneath the dining table that summons the chef.

Only the basement seems out of place.

Chicken Coop

Chicken wire is stretched along the ceiling of the stairs that lead to the basement. The chicken wire holds back some straw. At the bottom of the stairs the reason for the straw becomes clear: Flynt's basement is a replica of the Kentucky *log cabin in which he spent* his youth. A washboard and shovel lean against a wall made of weathered barn siding. A chicken coop is in a corner, across the room from a television set. The walls of the bathroom are stucco, with corncobs *set in the rough, white* plaster.

The basement, Flynt says, reminds him of where he came from.

Flynt had owned eight Hustler bars in Ohio's larger cities. Their attraction was the scantily dressed waitresses, who were encouraged to allow the customers to buy them drinks.

Hustler magazine began as a newsletter for Flynt's nightclubs, which are closed now—"too tacky," Flynt himself admits. While talking with a *major magazine* distributor in New York, he met the former publisher of Gallery magazine, a Playboy lookalike.

The distributor agreed to handle a new magazine, which the Gallery publisher put together in Chicago with money Flynt had made from his bars. Flynt was displeased with the product, finding that it resembled existing magazines too closely.

The result: "Hustler, the Magazine Nobody Quotes," as the billboard outside Columbus airport boasts. The only subjects Flynt says his lawyers have asked him to avoid are "pedophilia, religion, bestiality and bondage, in that order."

Another Winner

This month, Flynt is fielding a more sophisticated entry in the world of men's magazines. It is called Chic, and recent test marketing in Columbus and Washington convinced Flynt he had another winner.

Produced in Los Angeles with a staff of refugees from such publications as Rolling Stone, Oui and San Francisco's City magazine, *Chic* is slickly printed. The December issue (press run: 1 million) features *Norman Mailer interviewing* John Ehrlichman, an assignment that netted Mailer $15,000 and Ehrlichman $10,000.

In the world of men's magazines, Flynt is getting some attention.

In the last year, Flynt and *Hugh Hefner* have partied together. In fact, the upcoming issue of Esquire features Hefner on the cover reading a copy of Hustler.

Penthouse's Guccione, on the other hand, won't give Flynt the time of day.

U.S. Catholics' Communion Rite Questioned on Hygiene Issue

By Marjorie Hyer

WASHINGTON, Nov. 7 (WP).—An American health specialist, who is also a devout Roman Catholic, says that his church is a potential disease spreader because of the way it administers holy communion in the United States.

Catholic priests in this country are required to place the communion wafer in the worshiper's mouth. John Brennan says that in the process, the priest's fingers may come in contact with germ-laden or virus-laden saliva that is then transferred to the remaining wafers and thus to other worshipers. Such a procedure could cause an epidemic—of swine flu, for example—Mr. Brennan says.

He and his wife, Alice, who first *raised the issue with him, want* the U.S. Catholic hierarchy to authorize priests to put the communion wafer in the worshiper's hand to place in his or her own mouth. This alternative is common practice in Catholic churches in 50 countries, including Canada and most of Europe.

Committee's Rejection

Backed by the medical opinion of a Harvard University medical professor, the Brennans persuaded the Administration Committee of the Catholic hierarchy to consider the matter at its meeting here yesterday. But the committee, after discussion, decided against putting the matter before the agenda of a full meeting of bishops here this week.

The committee noted that if *there is a swine flu epidemic in* the United States, each bishop is already empowered to take any *action he sees as necessary to im*pede its spread, including temporary use of the technique of putting communion wafers into worshiper's hands.

Groups in the church have pressured U.S. bishops for years to authorize communion deliveries to the hand, calling them more dignified and more appropriate for adult worshipers than what they derisively refer to as the "feed the baby bird" style of the traditional method.

The U.S. Conference of Bishops has twice considered delivering communion to the hand but both times voted it down. The Rev. Thomas Krosnecki, associate director of the Bishops' Committee on the Liturgy, said the negative vote stemmed from a "fear of irreverence on the part of the laity and fears that the laity would not necessarily welcome such change."

Father Krosnecki said the Brennans' complaint was documented with a statement from Dr. Louis Weinstein, professor of medicine at Harward and an authority on infectious diseases.

Dr. Weinstein agreed with the Brennans' concern about the dangers of spreading infection through the present communion procedure, pointing out that since "the influenza virus is present in the upper respiratory tract, this procedure is fraught with the danger of passing the virus from a person who has the disease to a number of persons who do not yet have the infection."

Sister Marie Rieckelman, a physician who heads the U.S. Catholic Conference Office of Health Affairs here, also agreed that the present communion practice "certainly would be another means of spreading infection under epidemic conditions."

Arabella Churchill outside her squatters' restaurant

PEOPLE: *A Churchill Faces Eviction as Squatter*

Winston Churchill's granddaughter, Arabella, has taken over an abandoned building in London and opened a restaurant for squatters. But London's municipal council says it's going to evict her. "I don't like being called a squatter, but I suppose that is what I am," said the 27-year-old mother of a three-year-old son, Jake.

She was quoted in newspapers as saying she had Greater London Council permission to take over a decaying 19th-century row house in Bristol Gardens. But Richard Balfe, chairman of the council's housing committee, said she didn't. The daughter of Randolph Churchill moved into the house with a German friend, Ben Essig. She is separated from her husband, James Barton, a sheep farmer in Wales. Former debutante Arabella and other squatters have converted the crumbling ground floor rooms into a cozy restaurant serving mostly vegetarian dishes.

"I think squatting is awful when it means moving into somebody else's house, but this is legal," she said.

* * *

Mikis Theodorakis, 51, the renowned Greek composer, says he is considering a move to Sweden, in the face of increasing friction with the local Communist party. He said he was "not afraid of the exterior Communist party [the pro-Moscow faction] but simply felt disgust." He said he had suffered public insults and threats because of the moderate political stand he took after restoration of democracy in Greece two years ago. On legalization of the Communist party in 1974, Theodorakis opted for the moderate branch of the party and called for support of the present government as the only alternative to dictatorship.

Dr. Herbert Fowler, an expert on the mental health problems of American Indians and Alaskan natives, has been awarded the Soviet Union's Lenin Prize for science. Fowler, director of University of Oregon's Wichcloud Center, is the first American Indian ever honored with the prize and the first American winner since Dr. Linus Pauling in 1971. The Whitecloud Center is the only facility for American Indian and Alaskan natives in health research and program development in the United States. Fowler will receive the award, a prize of about $50,000 at a meeting of the Supreme Soviet Academium in Moscow May 15.

The income from Rudyard Kipling's works, estimated at £30,000 a year, is to go to the British National Trust at the request of the author's daughter, Elsie Bambridge, who died in May at age 80. Her will, which has published Friday. The trust, which preserves buildings and other monuments of British heritage, also inherits the Kipling home, Wimpole Hall, Cambridge. The will, dated 1962, without explanation, that Mrs. Bambridge's diaries and those of her late husband and mother be burned.

In Doraville, Ga., an automatic bank teller was assaulted by an angry customer who beat the machine when it refused to return his bank card. Police said the teller "was assaulted and suffered internal damage" when it was attacked by John Hulme, 28, who was charged with criminal damage. A bank official said Mr. Hulme, after complaining, started beating on the machine with a heavy instrument. "Sir, because the machine is not going to get your card back," the bank official told Mr. Hulme.

"It's not going to hurt," replied Mr. Hulme, who returned to the machine later and started pounding on the machine again before his arrest. It was not known if Mr. Hulme got his card back.

No. 29,168 PARIS, TUESDAY, NOVEMBER 9, 1976 Established 1887

Laborites Withstand 3 Votes in Parliament

From Wire Dispatches

LONDON, Nov. 8—The Labor party survived three key votes in Parliament tonight by mustering nearly every member to be present, including a woman who voted while breast-feeding her baby.

The three ballots were held on Labor's proposal to impose a "guillotine"—limiting debate to six hours each on five bills the government wants approved and on the statute books when the new legislative session begins Nov. 22.

The first vote came on the most controversial measure, for applying the gag on two bills. One of these bills would end state subsidies to private schools, thus effectively forcing them to join the state education system. The action would not affect schools such as Eton or Harrow, that are usually private because they receive no state subsidies.

The second bill would ban the "tied-cottage" system in farming under which workers receive free lodging as long as they are working on the farm but are ousted when they quit or are fired.

The government's majority was 5 votes, 312 to 296, in the 635-seat Commons.

Margin of 3 Votes

The margin was cut to three votes, 310 to 307, on guillotining bills to end private practice in state-owned hospitals of the National Health Service and to extend the rights of dockworkers to handle all freight within five miles of ports.

The final key ballot, on a shipbuilding and aircraft nationalization bill, was 311-310 in favor of the government.

The votes varied each time as various splinter groups like the Scottish and Welsh nationalists abstained or voted for or against the government.

Labor commands a maximum of 316 possible votes, compared with 315 for the combined opposition parties.

It was the first test since the government vowed it would carry on despite losing two by-elections last week, which reduced its effective majority in the House of Commons to only one seat.

Prized Legislation

The opposition Conservatives, using all-out to oust the government in a tense climate caused by Britain's economic troubles, launched a major offensive against the five bills that represent Labor's most prized pieces of socialist legislation.

But the Labor party whips got everyone into the lobbies adjoining the debating chamber where, according to Parliament's ancient rules, a member must be present for a vote to count.

Sick members are allowed to wait in rooms opening off the lobbies and nod their heads to register their votes. And this was done by 27-year-old Mrs. Helene Hayman while breast-feeding her two-week-old son.

Mrs. Hayman brought her baby Benjamin to Parliament in a carry cot and parked him in a committee room with a relative to look after him.

She slipped out to feed him and missed the vote on the second bill. Tory tellers relented, however, and counted her vote.

Despite Doctors

Several sick members of Parliament showed up to vote despite orders of their doctors. But one, who said he would have to be brought in on a stretcher, was excused at the last minute because a sick Conservative also was excused.

A similar agreement was made between another sick Laborite and another sick Conservative.

The government had a one-vote majority on the third and final motion as a result of the vote by Frank Maguire, a republican independent from Northern Ireland, who has never spoken in the two years he has been a member of Parliament and who rarely votes, but when he does so, supports Labor.

The government wants to get the five bills onto the statute books before Nov. 23 because any unfinished bills are automatically voted out at that time.

To reintroduce them in the next session could cause delays seriously jeopardizing planned legislation. If the program became hopelessly bogged down, the government, now halfway through its five-year term, would eventually be forced to call a general election.

Therefore, the government tonight sought, and won, a limit on the debating time of the bills. It was a motion to set a time limit on the most controversial bill, to nationalise Britain's aircraft and shipbuilding industries, that not surprisingly was won by only one vote.

Associated Press.

TAKING AIM—A Christian boy, 12, member of the National Liberation party, handling machine gun in Beirut.

Pound, Dollar Drop in Europe

LONDON, Nov. 8 (IHT).—Both the pound and the dollar declined in trading on European currency exchanges today, the pound losing nearly 2 cents.

The pound fell after Chancellor of the Exchequer Denis Healey indicated that the Treasury was raising its estimate of government borrowing needs for next year. Weakness of the dollar was attributed to demand for West German marks. Details on Page 9.

Prepares to Move Into Beirut

Syrian Army Set for Peace Duty

By James F. Clarity

ALEY, Lebanon, Nov. 8 (NYT).—The Syrian Army made final preparations today in this area 10 miles east of Beirut for its entry into the Lebanese capital as the first and most powerful contingent of the Arab force that is supposed to re-establish peace throughout the country.

Syrian officers in the area, where the Syrian Army inflicted heavy casualties a month ago on forces of the leftist Moslem and Palestinian coalition, declined to say exactly when their troops and tanks would enter Beirut.

But an officer, acknowledging that the Syrian forces intend to pass the rightist Christian stronghold of Kahale, a mile and a half west of Aley on the main Damascus-Beirut highway, told newsmen that the Syrians would not hesitate to fire on any Christians who use force to block the Syrian advance.

In the fighting in this area a month ago, the Christians and Syrians were allies. Now, Syria, dominating the Arab deterrent force of purportedly 30,000 men, is apparently trying to assume a neutral role between the two sides in the 18-month-old civil war.

While Syrians said that their military movement schedule was a secret, a Lebanese Army officer attached to the command of the multinational Arab peace force said at a checkpoint here that the Syrian entry into Beirut would be in two stages.

The officer, a captain who said he was under the orders of Brig. Gen. Ahmed al-Hajj, the newly appointed field commander of the force, said that the Syrians would move tomorrow morning to Kahale, the Christian stronghold. "Then, if there is no fighting, they will move the next day into Beirut," he said.

Syrian control of the stretch of highway between Kahale and Beirut would neutralize the last stretch of the main route between the Syrian and Lebanese capitals still under partisan control. The leftist Moslems and Palestinians lost effective control of the highway at Aley in the fighting a month ago.

Principal Task

Taking control of Lebanon's highways is one of the principal tasks assigned to the deterrent force, which was established with the approval of the major Arab nations last month.

To prepare for the advance of tanks and other heavy vehicles into Beirut, the Syrian Army today cleared the highway at Aley of a barricade of huge stone boulders. By nightfall, there was no evidence of movement of troops or armor through the newly opened section. But a few miles from there, at the towns of Bahmdoun and Sofar, at least a dozen Soviet-made Syrian tanks and artillery mounted on tracked vehicles were along the road.

Shortly after sundown, cars winding along an auxiliary road westward through the mountains toward Beirut were the targets of a brief and inaccurate fusillade of heavy machine-gun fire coming, judging from the bright tracer bullets, from a Christian-held area in a valley. A few minutes later tracers coming from leftist-Moslem and Christian areas crossed each other in the sky, brilliant and probably ineffective violations of the cease-fire.

In Beirut itself, there were also continuing violations of the 19-day-old cease-fire, the day after President Elias Sarkis told the nation that there had been "enough of bloodshed and ruin." At about noon, several mortar shells exploded in the section of west Beirut near the headquarters of the leftists and Palestinians.

Chairman In Geneva Reporting To London

GENEVA, Nov. 8 (UPI).—Ivor Richard, chairman of the conference here on Rhodesia, was summoned home to London today to report to Foreign Secretary Anthony Crosland on the state of the two-week-old talks between black and white Rhodesian leaders.

British spokesman David Brighty said Mr. Richard would return here tomorrow afternoon and his quick trip to London did not signify any imminent breakdown of the conference.

Mr. Brighty said that Mr. Richard "will deliver a personal report on the state of the conference and how he sees the future."

The conference chairman, whose regular post is that of British ambassador to the UN, had planned to make quick trips to London to report in person as long as the conference was unable to reach a quick conclusion, Mr. Brighty said.

Mr. Brighty said, however, that in this case London directed Mr. Richard to return there this evening and to make his report tomorrow morning.

Asked if Mr. Richard's being called home indicated fears that the talks here might collapse, Mr. Brighty said, "No." He repeated that such trips had been envisaged as long as a quick breakthrough was not achieved.

'Businesslike' Air

"As I have said before, we have managed to establish a genuinely businesslike atmosphere at the conference," he said. "But it is an open secret that no conspicuous progress has been made in the last couple of days."

The conference ran into an impasse Saturday and yesterday over the issue of setting a target date for independence under majority rule in Rhodesia.

But conference officials said that Mr. Richard met today with his principal legal advisers to see if a compromise formula could be drawn up.

The sources said that there was behind-the-scenes movement toward such a compromise, with the British view and that of the black nationalists edging closer, leaving Rhodesia's white-minority regime isolated over the issue.

The nationalists have held out for Dec. 1, 1977, as the date for formal independence from Britain, according to the sources, but have indicated willingness to permit a slight "slippage" beyond that date if necessary.

The sources said Mr. Richard stuck to his proposal of March 1, 1978, as the best date, but he assured the nationalists that Britain would like independence to be achieved earlier if the necessary legal and constitutional processes could be completed on time.

Rhodesia's minority government, which unilaterally declared its disputed independence from Britain in 1965, now says that constitutionally agreed independence under black rule cannot be arranged in less than 23 months from now.

Rhodesian Foreign Minister Pieter van der Byl warned Mr. Richard yesterday that too early a date could cause panic and a mass exodus on the part of the 270,000 whites in the nation of 6 million blacks.

The white Rhodesian delegation as well as the black nationalists said they would await Mr. Richard's return from London and see what he has to propose.

AP.

Ivor Richard

Vorster Pledges Aid

JOHANNESBURG, Nov. 8 (AP).—South Africa will not cut off arms supplies to Rhodesia if that country's white rulers and black nationalists fail to reach agreement on black-majority rule, Prime Minister John Vorster said here yesterday.

"We do not believe in a boycott or closing the border," Mr. Vorster said when asked whether his nation would impose trade sanctions if the Geneva talks broke down. The South African leader spoke on CBS television's "Face the Nation" show in a broadcast from Johannesburg.

Israel Bid On Europe Role Gains At Unesco

NAIROBI, Nov. 8 (UPI).—Israel won a key victory today to restore its standing in the UN Educational, Scientific and Cultural Organization despite continuing opposition from the Soviet Union and Arab states.

Unesco's general conference approved, 70-0, with 17 abstentions, a parliamentary maneuver to allow only European nations to vote on Israel's application to join the organization's European region.

Conference sources said this device would virtually assure Israel's acceptance, whereas had the full 141-state plenary voted on the issue, the Soviet Union and Arab states might have had enough strength to defeat the application.

Under Arab and Communist pressure two years ago, Unesco's last general conference turned down a similar Israeli request. The United States, charging Israel had been reduced to "second-class status" and denied its full membership rights, promptly cut off its contributions—25 per cent of Unesco's budget.

Senator's Statement

After today's vote, a U.S. senator said he hoped Washington will soon resume its financial contributions to Unesco.

"A continuation of the moderation and minimal confrontation seen so far in the Nairobi Unesco general conference, hopefully, will lead to a full U.S. commitment to the organization in every manner," including monetary, Sen. Dick Clark, D-Iowa, said in a statement.

Sen. Clark is chairman of the Senate Foreign Relations Committee's African subcommittee.

Following today's vote, each European country will be individually and privately canvassed about Israel's application. Conference sources said it was virtually certain that a majority of the European group will approve it and that the full plenary meeting later in the conference will simply endorse the Europeans' decision.

An Israeli spokesman refused to comment on the vote, saying, "It is a matter for the conference."

Arabs Refuse to Vote

The United States, Western nations and Third World countries voted for the resolution. The Soviet Union and Communist nations abstained. Arab nations, showing extreme disfavor, refused to vote at all.

The Soviet Union previously said Israel did not belong to Europe on historical, cultural and linguistic grounds. Without mentioning Israel specifically, Russia today said it had "grave doubts and objections" to one application to join Europe.

Syria said Israel should not be admitted to any group because it did not follow international principles. Iraq also said Israel should be barred from the European region.

China voted for the measure, but added that the Soviet Union should not belong to two regions as it does now—Europe and Asia.

On Saturday, a Unesco commission overwhelmingly agreed to send a Russian-inspired draft on the mass media to a special negotiating committee for restudy.

Western delegates, who had said the draft would lead to state control of the press, said the issue was virtually dead for at least two years and hailed the decision as a victory.

3d World Hopes to Avoid Economic Clash

By Peter Grose

UNITED NATIONS, N.Y., Nov. 8 (NYT).—Negotiators of leading developing countries are seeking means to avoid a bitter year-end confrontation with the industrialized nations, but without easing their pressure for changes in the world economic order.

The Third World bloc at the United Nations has been given gloomy assessments of the work at the Paris Conference on International Economic Cooperation, where representatives of 27 nations are discussing problems of energy supplies, raw materials prices and urgent debt relief for the poorest nations.

The lack of progress at the yearlong conference has been a source of mounting frustration at the 31st General Assembly, which has deferred its full consideration of world economic changes until hearing the outcome of the efforts in Paris.

Disappointment on the evidence so far is adding weight to arguments among the rich oil-producing nations that a significant further increase in the price of oil may be desirable as a new show of the Third World's economic muscle.

Moderate Tone

Diplomats from several developed countries were heartened by the moderate tone in the report to the Assembly's Economic Committee last Tuesday by a co-chairman of the Paris conference, Manuel Perez-Guerrero, Venezuela's minister for international economic affairs. Arguing against premature judgments of failure, he pleaded for further efforts here and in Paris to improve upon what he conceded was meager progress.

However, in remarks at a closed meeting of Third World representatives before delivering his public report, Mr. Perez-Guerrero was far blunter in his assessment. "From the performances so far we have no assurance that there will be a success," he said, according to participants in the meeting.

Mr. Perez-Guerrero, one of the Third World's most influential figures in economic affairs, tried to restrain his more radical colleagues from opening a confrontation in the General Assembly. Even as he spoke—it was Election Day in the United States—there were new elements entering the picture, and he stressed that the goal was more than a "paper agreement which does not transcend into implementation."

Considering the imminence of Jimmy Carter's inauguration as President, diplomats from the developing countries are seeking ways to relax their previously rigid timetable—the Paris meeting is to end Dec. 17—so they can hear from the Carter administration without appearing to ease up the pressure.

Two Fears

Third World experts said their governments had two fears about the economic discussions.

First is that the industrial nations will achieve progress in assuring orderly energy supplies—the one aspect of the Paris conference's work that the developed countries are pushing—while permitting continued delay on debt relief of greatest concern to the Third World.

Second is that the whole complex of economic issues raised at the Sixth and Seventh Special Sessions of the General Assembly could be whipsawed back and forth between competing international conferences as, to a certain extent, they already have been. The Paris conference is an attempt to transfer discussion from the unwieldy General Assembly to a more manageable forum.

The fundamental point of resistance from the Ford administration in the Paris meetings is that the transfer of resources from rich to poor countries should not proceed automatically, as the Third World proposals imply, but should be arranged on a case-by-case basis, conditional upon the recipient countries' efforts to strengthen their economies.

Soviet Violinist Attacked in N.Y.

NEW YORK, Nov. 8 (UPI).—Mayor Abraham Beame today described as "disgraceful" a paint attack on a Russian violinist by two youths during a Carnegie Hall concert.

The incident occurred during a performance last night by violinist Vladimir Spivakov. Witnesses said a young man ran down the right aisle during Mr. Spivakov's first selection, shouted "Remember the Soviet Jews" in Russian, and threw a bag containing red paint at the performer.

One of 30 security men on duty deflected the bag to the stage floor but another youth later ran down the left aisle and threw a paint bomb that burst over Mr. Spivakov's clothes, his Stradivarius and a few members of the audience.

Police arrested Martin Laub, 19, and Paul Shatz, 16. Police said both claimed to be members of the Jewish Defense League.

U.K. Panel Favors Workers Joining Company Boards

LONDON, Nov. 8 (Reuters).—Workers in Britain's main private companies should be given seats on the board, according to a report on industrial democracy to be presented to the Cabinet next month.

Informed sources said today that all 20 members of the government-appointed committee of inquiry have backed the idea of worker directors alongside management in private companies that employ more than 2,000.

The report, now in its final stages of drafting, aims at giving a boost to the country's economic performance and industrial relations.

Prime Minister James Callaghan has stressed his determination to legislate as quickly as possible on industrial democracy. However, pressure on parliamentary time may mean that the report's suggestions do not become law until 1977 or 1978.

The main proposals provide for a three-part board structure. There would be two equal-sized groups consisting of directors on one side and workers on the other and a small number of independents, chosen by the two bigger groups, to provide a balance.

Visit by Senators to A-Plant Reportedly Blocked by Israel

TEL AVIV, Nov. 8 (UPI).—The Israeli government has refused to open its secret atomic facility at Dimona to a delegation of 13 U.S. senators checking safeguards for U.S. nuclear reactors promised to Israel, sources close to the delegation said today.

The sources said that Israel has turned down repeated requests by the senators to visit Dimona, which a congressional aide estimated has produced enough plutonium for 20 atomic bombs. The sources said that the delegation may make a new effort to visit the nuclear site, located in the Negev, 30 miles south of Jerusalem, but Israel is unlikely to alter its stand.

The senators arrived in Jerusalem yesterday on a four-day visit to investigate safeguards for two U.S. nuclear reactors promised to Israel. The delegation also plans to check out safeguards for reactors promised to Egypt and Iran.

The Tel Aviv newspaper Maariv, in an editorial apparently cleared by Israel's censors, hinted that Israel is engaging in nuclear research for military as well as peaceful reasons.

Multipurpose

"Israel has much interest in developing atomic energy for peaceful purposes, but political and security realities prevent her from turning her back on multi-purpose nuclear research," Maariv said.

The newspaper added, however, that the "multipurpose" research would be subject to Israel's often-declared promise not to be the first nation to introduce atomic weapons in the Middle East.

Paul Leventhal, staff counsel to the Senate Government Operations Committee, said last week that Israel's "unsafeguarded" Dimona research reactor plutonium stockpile puts its peaceful nuclear intentions in doubt.

Mr. Leventhal, writing in The New York Times, said that Israel "has gained strategic advantage through calculated ambiguity about its nuclear capability" and has produced plutonium stocks "estimated to be enough for 20 bombs."

He suggested the agreement for the two U.S. reactors should provide for Israel to open Dimona's future operations to inspection by the International Atomic Energy Agency.

"But would Israel, on the assumption that 20 bombs is enough for its own defense, be prepared to submit the Dimona reactor and all spent fuel produced in the future to IAEA safeguards, as well as to forgo future reprocessing, if this were demanded by the United States as a condition of obtaining peaceful nuclear power?" he asked.

Saudis Seeking Water From Icebergs

By Andreas Freund

PARIS, Nov. 8 (NYT).—Saudi Arabia has confirmed that it has commissioned a study on the feasibility of towing icebergs from the Antarctic to the arid desert kingdom where the ice would melt into water for drinking and irrigation.

The project, being undertaken by a French engineering firm, is "under active study," said Saudi Arabia's top irrigation expert, Prince Mohammed Faisal, in a cable received here last week. The prince, a nephew of King Khaled, is chairman of the Saudi Saline Water Conservation Corp.

The French engineers at the Cicero Co., which is preparing the study, hope that it will lead to a contract by the end of the year.

According to François de Broglie, a Cicero spokesman, tentative plans call for hauling a first 35-billion-ton iceberg 5,000 miles through the Indian Ocean and Red Sea at a cost of $90 million. The spokesman said the iceberg would be hauled by a half-dozen powerful tugboats, such as those used in towing oil-drilling platforms. He said cruising speed would be one knot an hour and that the journey could take six months to a year.

Plastic Wrapping

Mr. de Broglie said the slow speed would minimize friction. Besides that, he said the iceberg would be protected against waves, current and the sun by 18-inch-thick plastic wrapping. Even so, he said, the iceberg would lose "close to 20 per cent" of its mass before arrival off the Saudi port of Jidda.

Cicero has calculated that the price in Saudi Arabia of drinkable water from the iceberg would work out to 50 cents per cubic meter, half the price of drinking water obtained through desalting of seawater.

Before the iceberg could get there, however, a tricky problem must be solved. The iceberg would extend about 250 yards under water, but the Bab el-Mandeb Strait at the entrance of the Red Sea is less than 40 yards deep.

Paul-Emile Victor, a French polar explorer who is associated with Cicero in the project, has proposed that the iceberg be cut into 1-million-ton slices. This would be done by lowering electrically heated wires into the iceberg. The sections then could be towed much faster to their destination near Jidda.

18 Months to Melt

The ice would be kept there for melting, which would take up to 18 months. On top of each iceberg slice, lakes would form from melted ice. This would be pumped ashore into reservoirs through a floating pipeline.

The project raises many problems. The right iceberg has to be chosen, of the right size, and rectangular so that it would not tip as it is towed. The spotting is to be done by satellite. Then the solidity of the iceberg must be tested—no cracks, no crevasses. This would be done by sonar instruments carried by a helicopter.

The plastic wrapping would have to be fixed atop the iceberg and towed underneath and around it. Ocean depths and currents must be considered. A tentative course goes northwest, then northeast in a long loop into the southern Indian Ocean, then northwestward and up to the Gulf of Aden.

Arab League Says U.S. Laws Won't Deter Its Boycott

BEIRUT, Nov. 8 (AP).—The commissioner general of the Arab boycott says that the Arab League will ban any U.S. company that refuses to comply with the boycott of Israel because of U.S. laws, according to the magazine Middle East Economic Survey.

The magazine quoted Mohammed Mahgoub as saying that the boycott will not under any circumstances allow foreign legislation to hamper its activities.

"The Arabs are maintaining a tough, uncompromising stance in the face of legislative measures in the U.S. designed to counter the boycott of Israel," the magazine quoted Mr. Mahgoub as saying.

"The Arab states, individually and collectively, will refuse to do business with any U.S. company that declines to comply with the full range of Arab boycott regulations on the grounds that such compliance would violate state or federal legislation in the U.S."

To Make Austerity Palatable

Italy Planning a Crackdown On High-Income Tax Evaders

By Sari Gilbert

ROME, Nov. 8 (WP).—The Italian government has promised a crackdown on this country's numerous high-income-bracket tax evaders that it hopes will make Italy's current austerity program more acceptable to the country's 17 million salaried workers.

The policy was first publicly announced last month by Premier Giulio Andreotti, whose minority Christian Democratic government has been forced to take drastic measures to deal with a declining lira and a 20-per-cent inflation rate, the highest in Europe.

It was reiterated by Finance Minister Filippo Pandolfi, who said in an interview that the government would be using new methods and sharper forms of surveillance to persuade Italy's professionals, merchants and other self-employed to do their fiscal duty.

Tax evasion is a time-honored custom in a country like Italy, which for centuries was dominated by foreign invaders whose taxes were seen as a form of oppression. Hatred of taxation was so intense a tradition that a still popular proverb says "Better a dead man in the house than a tax collector at the door."

Total Withholding

But since 1974, when a new tax reform law authorized total tax withholdings on wages and salaries, most of Italy's salaried workers, about 81 per cent of the labor force, have been paying their income taxes in full.

"The fact that one category, the largest, is now taxed with rigor dramatizes the noncompliance of the rest," said Mr. Pandolfi, who describes the current situation as "socially explosive."

The workers, most of whom belong to the powerful Trade Union Confederation, are demanding that other Italians pay their income taxes as well "and they're *right*," says another of Premier Andreotti's top aides. "How can we expect them to accept the sacrifices of the new austerity program if we don't show ourselves to be committed to increased justice among the country's social classes?"

To show that he means business, Mr. Andreotti announced recently that 172 persons had been accused of or arrested for tax evasion and illegal currency dealings since the beginning of the year, that 400 others are under investigation and that he is now getting daily reports from the commander of the customs and fiscal police, the "Guardie di Finanza."

Big Play to Indictment

Italy's daily papers have thus given big play to the indictment of 11 meat importers for a million-dollar customs fraud, to a $5-million fine for illegal currency operations imposed on Pietro and Giovanni Barilla and to crackdown operations in progress in about 25 Italian cities.

Appearing on nationwide television to announce his government's new austerity measures, Mr. Andreotti also made a special appeal for cooperation to doctors, other professionals and self-employed persons, estimated by Italy's tax collectors' union to cheat the state out of at least $2 billion a year.

Failure by a broad spectrum of Italians to pay IVA, the value-added tax introduced here in 1973 that runs as high as 30 per cent on luxury goods and services, has reportedly cost the country another $4 billion to $6 billion in revenue that it sorely needs.

In Line With EEC

IVA, adopted to bring Italy's indirect taxes in line with the European Economic Community system, was supposed to be a self-enforcing duty applied at every level. But a lack of adequate control mechanisms has led to widespread evasion that Finance Ministry experts say dwarfs traditional income-tax dodges.

"We are, therefore, planning to adopt a new cross-checking system, sharper penal sanctions and semi-random audits among fiscally significant big-spenders, which we hope will lead to a different kind of behavior," Mr. Pandolfi said. Other "incentives" the finance minister and his aides are considering are the publication, starting in January, of all tax returns and a total revision of the 1939 land office registry that will update old real estate values and record about 3 million unregistered properties.

Andreotti Holds Talks

ROME, Nov. 8 (UPI).—Premier Andreotti began a series of meetings with the Communists and other parties supporting his minority government today to draw up new austerity measures.

The meetings, called by Mr. Andreotti in response to Communist demands, were designed to work out compromise austerity measures in time for a parliamentary economic debate beginning Wednesday.

Mr. Andreotti's meeting with Secretary-General Enrico Berlinguer and other Communist party leaders lasted 2 hours 45 minutes, longer than scheduled.

Afterward, the Premier began a meeting with the Socialist party leadership. He also planned to meet Social Democratic, Republican and Liberal party leaders and trade union representatives.

Mr. Andreotti agreed to the consultations with the Communists, Socialists, Social Democrats, Republicans and Liberals because his government relies on their benevolent abstention in Parliament to stay in office.

News Analysis

Rhodesia Blacks, Whites Unsure About Future

By Robin Wright

SALISBURY, Rhodesia, Nov. 8 (WP).—The Rhodesian government announced last week plans to escalate its programs for development and improvement of opportunities and facilities for Africans.

The same week, two white farmers were sentenced in court—to an $80 fine or 25 days in jail—for leasing small sections of their holdings to African farmers, illegal under Rhodesia's Land Reservation Act, which divides the territory into European and African sections.

The paradox and seeming hypocrisy in the two events outlines the "twilight zone" of transition in Rhodesia, where blacks and whites, thoroughly mystified about their future, are not quite sure what to do with the present.

Most Rhodesians now accept that 86 years of white domination are over and that black majority rule is inevitable.

But there are two things they do not know: How it will be achieved — by peaceful negotiations between white government officials and four African nationalist leaders in Geneva, or by a military victory by guerrillas who have been waging a rapidly escalating war from *neighboring* Mozambique and Zambia for four years — and how it will change their lives.

The inability to answer those questions leaves them in limbo, confused and bewildered about the "etiquette of the moment."

For example, the increasingly popular topic of conversation among whites thinking of staying is how well they get along with "their Africans" and how they could do even better in a new Zimbabwe, the African name for Rhodesia. "Yes, indeed, they deserve a better deal," nodded a white Salisbury matron recently.

At the same time, the informal White Feather Club—a group of volunteers who hand in names of friends or acquaintances who have not done their army stints—is gaining momentum.

A little white-haired lady recently strutted through a suburban shopping center in the capital demanding names of men who had not served, scribbling them on a clipboard to be given to the appropriate authorities.

The contrast in the options possible for Rhodesia is further illustrated by some of the new characters in the complex southern African drama.

Shortly after Prime Minister Ian Smith's speech on Sept. 24 announcing surrender of power under the proposals made by Secretary of State Henry Kissinger, a handful of Zambian businessmen crossed into "forbidden" Rhodesia to negotiate contracts with Rhodesian pharmaceutical companies and exporters, designed to go into effect the minute a peace settlement was reached and sanctions lifted.

Yet on a flight via Johannesburg just a few days later came Robert Brown, editor of Soldier of Fortune magazine, the U.S. publication for "professional adventurers" that runs advertisements for Rhodesian Army recruits. He wanted to see a piece of the action and determine just how lucrative "the market" in Rhodesia is.

The growing feeling of uncertainty, which way the future will go, is not helped by the local press. According to an article on the editorial page of the Rhodesia Herald, the prospects for trout fishing in Rhodesia's scenic lakes, surrounded by the fertile hills of the eastern highlands, are superb this season.

What the paper does not mention is the fact a fisherman should carry a rod in one hand and a gun in the other. All the prime fishing sites in Rhodesia are in the heart of the "operational zone," the border areas where guerrilla incursions are escalating at a dramatic rate.

Many things have not changed, including the rule at several local bars that blacks must leave the room when white strippers open their shows—to avoid inciting them at the sight of a white woman's flesh.

But the trauma of uncertainty and uneasiness—not helped by the oppressive humidity and clouds of the current rainy season—is taking its toll. Rhodesia's suicide rate—already one of the highest in the world—has increased since last month, with some tragic twists.

Last week, a naked man jumped from the top of a 20-story building in Salisbury—his second try in two days. The day before, the elevator operator refused to take him to the roof.

His parents later said that was troubled by an abhorrence violence and a sense of guilt.

Rhodesia, for over a dec troubled politically and econo cally, is now troubled with a se of moral uncertainty, doubt bewilderment as both blacks whites explain over and over w journalists hound them for action to the future: "We d know what our future holds."

LEADERS—Jomo Kenyatta, right, shaking hands with his Vice-President, Daniel

Political Unrest Developing

Kenyans Jockey for Successor to Kenyatt

By Alfred Araujo

NAIROBI, Nov. 8 (AP).—A major political row is raging in Kenya—with President Jomo Kenyatta caught in the crossfire by people who have begun an open campaign for the presidency in the post-Kenyatta era.

For the first time in memory, the issue of the succession, which for long has been discussed only in whispered terms, has flared into the open.

At the heart of the controversy is a proposal by a group of members of Parliament, among them senior Cabinet ministers, to amend a section of the Constitution.

The section provides for the vice-president to assume the presidency for 90 days before a presidential election in the event of an incumbent holder of the post resigning, being incapacitated or dying.

The MPs want the section erased altogether—and replaced by a stipulation that the speaker of the National Assembly become acting president in the event of an incumbent holder of the post resigning, being incapacitated or dying.

Political observers here see the proposal to amend the Constitution as yet another salvo being fired in the long-standing campaign by some politicians against the present Vice-President, Daniel Moi.

Mr. Moi, 54, who comes from a minority Rift Valley tribe, the Kalenjin, was picked by Mr. Kenyatta as his Vice-President in 1969. Mr. Moi took over the No. 2 spot at a time when Kenya's tribes were bitterly divided politically.

Mr. Kenyatta's dominant Kikuyu tribe, an industrious and clannish people who played a major role in the country's war of independence against the British, solidly backed the ruling Kenya African National Union party.

The country's second-largest tribe, the Luo, split their political loyalties. While some backed KANU, the vast majority aligned themselves with the leftist-leaning Kenya People's Union (KPU) formed by Soviet-backed Oginga Odinga, who resigned the vice-presidency to start the new party.

Mboya Assassination

After the murder of Luo minister Tom Mboya, a brilliant politician who was widely touted as Mr. Kenyatta's successor, by a Kikuyu gunman in downtown Nairobi in July, 1969, the KPU began an open anti-government campaign.

After a riot by KPU supporters at a rally attended by Mr. Kenyatta in Kisumu in October of that year, Mr. Kenyatta vowed to "crush KPU like flour."

He promptly had Mr. Odinga and his top lieutenants arrested and detained under the Public Security Act and he banned the KPU.

With the KPU out of the way, politics in Kenya became less controversial and more stable. Mr. Kenyatta, in the meanwhile, established his reputation as a conservative, pro-West leader in a capitalist nation.

Mr. Moi was primarily chosen by Mr. Kenyatta as Vice-President to secure the backing of Kenya's numerous minority tribes. Mr. Moi, a poor public speaker who fails to arouse emotions in his audience, has been loyal to Mr. Kenyatta and the government, but a campaign has begun to discredit him and chip away at his powers.

The campaign first became apparent in March of last year, after the assassination of parliamentarian Josiah Kariuki, a Kikuyu and vocal opponent of the government.

Wide Following

Mr. Kariuki's murder—he had a wide following all over the country—threatened to plunge Kenya into chaos. When the issue was raised in Parliament, Mr. Moi, as chief government spokesman, promptly disclaimed any government responsibility for the killing.

It later emerged, in evidence given to a parliamentary select committee, that one of the last men Mr. Kariuki was seen with hours before his death was the head of the General Service Unit, a paramilitary force.

Mr. Moi later apologized for "misinforming" the House.

The police force, which fell under Mr. Moi's Home Affairs portfolio, was transferred to the President's office. Mr. Moi was also stripped of responsibility for immigration affairs.

Observers believe all these anti-Moi moves were engineered by the Kikuyu clique surrounding Mr. Kenyatta to insure that the Mzee (Old Man), now aged at least 84, was succeeded by a Kikuyu.

The campaign against Mr. Moi remained muted until the end of September. Then Kenyans were stunned to read a report political meeting, held at the Valley farming town of Na 100 miles northwest of here tended by three senior Ca ministers, 20 other MPs and eral KANU officials.

A fiery radical MP, K Kimani, proposed an amend to the Constitution denying vice-president automatic su sion rights.

The change-the-Constit group then began holding a of meetings to take their to the people.

Spanish Leftists Say 4 Are Held After a Meeting

MADRID, Nov. 8 (Reuter).—Police arrested four leftist opposition leaders in the southern city of Seville today after they had held a weekend anti-government meeting at the city university, opposition sources said.

The four, two Communists, a Socialist and a Maoist, had led a teach-in at Seville University to inform students of opposition policies and of preparations for a one-day general strike scheduled for Friday.

Among the detainees was Seville worker leader Eduardo Saborido, who was arrested along with Marcelino Camacho, the leader of the Communist Workers Commissions, at a Madrid meeting in 1973.

Sources said both the Workers Commissions and the Socialist General Workers Union were organizing plant meetings throughout Spain to prepare for Friday walkout.

In Barcelona, meanwhile, riot police fired rubber bullets to disperse stone-throwing Catalan nationalist demonstrators from behind a street barricade last night, the national news agency Cifra reported.

Russia Prodded On Helsinki Pact

BRUSSELS, Nov. 8 (AP).—The co-chairmen of the U.S. Commission on Security and Cooperation in Europe said today that the Soviet Union has violated the spirit of the Helsinki accord of last year by refusing to let them into Russia for a discussion of how the agreement is being observed.

The accord was designed to increase security and cooperation in Europe by encouraging human and trade contacts.

Rep. Dante Fascell, D-Fla., and Sen. Claiborne Pell, D-R.I., said they hoped Soviet officials would change their minds about admitting commission members, whose job is to monitor compliance with the accord, in the West as well as the East.

60,000 Britons Rally Against Abortion

LONDON, Nov. 8 (UPI).—More than 60,000 Britons demonstrated yesterday at five rallies organized by the Society for the Protection of the Unborn Child.

Counter-demonstrations by pro-abortion groups at the rallies in Bradford, Birmingham, Glasgow, Bristol and Chelmsford were peaceful, police said.

Quakes in Far East

NEW YORK, Nov. 8 (UPI).—A strong earthquake rocked southwest China yesterday and other temblors rumbled through wide areas of the southern Philippines and central and northern Japan today.

Thousands Flee Clash In Angola

OSHAKATI, South-West A Nov. 8 (Reuters).—Heavy f ing involving tanks and p was reported in southern A today, with thousands of ref streaming across the borde South-West Africa (Namibi

The refugees were quot saying that government f had launched an offe against forces of the rebel for the Total Independen Angola (UNITA).

Troops of the ruling Po Movement for the Liberati Angola (MPLA) combined Cuban forces and guerrill the South-West Africa Pe Organisation in the attac UNITA strongholds, accordi the refugees.

UNITA was one of the na alist forces defeated by Cuban and Soviet-backed M early this year in Angola's war.

A South African official said the refugees "told us" planes, tanks and heavy gun being used against them and fighting is going on in the and in the bush."

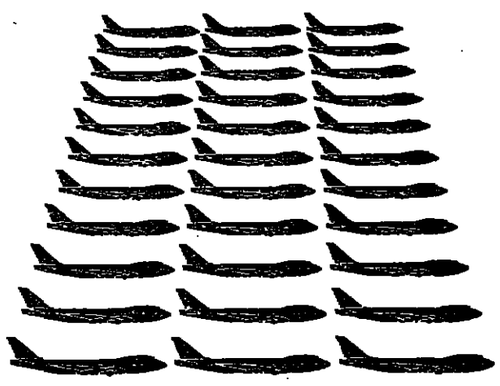
He said that about 3,000 gees had crossed the borde the last few days, bringin 8,000 the number fleeing their homeland this year. are very frightened and d struck," he said. "Mostly are women and children."

The official said the toll in fighting was thought to be

Sources in Oshikango, a miles south of the Ango border, said South African tr using binoculars had seen Or forces taking over small to and villages. Firing could heard, the sources said.

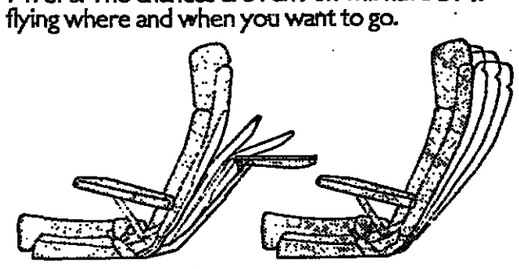
The reported offensive be as Angola prepared for cele tions on Thursday to mark first anniversary of its inde dence from Portugal.



UNITA, led by Jonas Savi has recently stepped up its and-run guerrilla campaign southern Angola, where, acc ing to observers, it has con erable popular support.

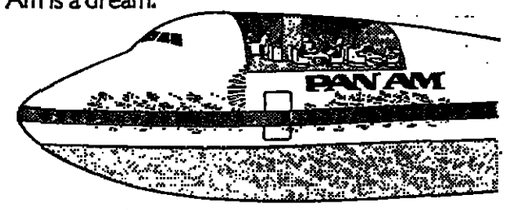
Berlin Escape Foiled

BERLIN, Nov. 8 (AP).—E German border guards fi three shots today to halt flight of an unidentified m over the wall to West Ber police reported.



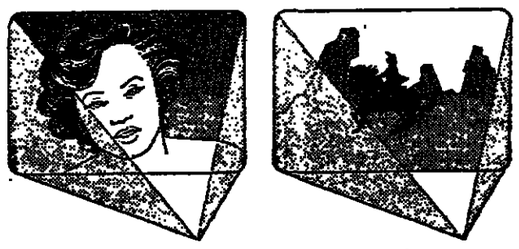
Travel in style.

Pan Am 747 style.



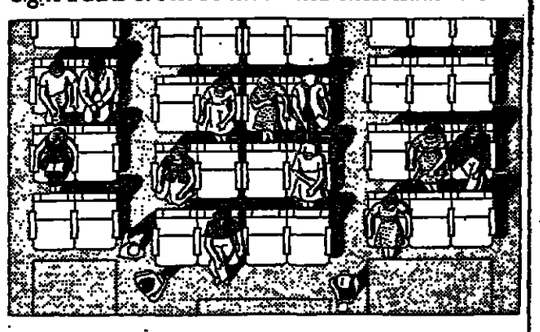
More 747s.

Pan Am has the world's largest fleet of 747s, including the new long-distance record-breaking 747SPs. The chances are Pan Am will have a 747 flying where and when you want to go.



More comfort.

In Economy, Pan Am 747s have generously sized, reclining seats. There's room to work, room to relax. If you want a snooze, you'll find flying Pan Am is a dream.



First Class dining room.

Only Pan Am's 747s have an upstairs dining room for First Class passengers. You can choose from a full menu—for instance, Roast Beef carved at your table, Sole Dugléré or Kebab d'Agneau—accompanied of course by a choice of fine wines. Like all the best restaurants, you have to book early. So ask your secretary to reserve your table when she books your ticket across the Atlantic.

Choice of entertainment.*

Not just one, but two of the latest films when you cross the Atlantic; take your pick. Or a choice of eight tracks of stereo music and entertainment.

More space.

On our 747s, there's room to move around. Plenty of headroom, and space for you to stretch your legs—while you're in your seat or walking about.

So next time you fly, take it easy. Travel in style on a Pan Am 747. And enjoy the comfort of Pan Am's World.

*Regulations require a nominal charge for entertainment in Economy Class.

PAN AM
The worlds most experienced airline.

Limited by Environment, California Condors Dying

By Jon Nordheimer

LOS ANGELES, Nov. 8 (NYT).—No one knows who did the shooting. Or why. Or how many times it will happen again on the shadow side of some low peak where the great birds swing low over brush-covered ridges and make fat targets against cloudless sky.

Someone with a gun several weeks ago could not resist the easy shot. A blast—perhaps several—ripped the air, and a California condor, the largest flying land bird in North America, crumpled and fell, crashing into the chaparral.

A hiker found the wounded and starving bird, and it was taken to the Los Angeles Zoo. There, veterinarians attempted to repair a shattered and infected wing. Finally, they amputated it.

But the infection had spread, and last week the condor died, hastening the decline of the species, a creature without enemies for perhaps a million years before man moved into the canyons and foothills of the coastal ranges of California and challenged its existence.

About 40 Left

There are perhaps no more than 40 condors left in California, a species distinct from its South American cousin. Timid and slow, it has been unable to meet the challenge of a changing environment that has severely limited its range and movements.

A far worse threat to the condor's survival than an occasional perverse hunter is the creature's own inability to reproduce itself. In ages past, when the bird was not threatened by a diminishing food supply or by any natural enemies, a pair of condors could raise half a dozen or more offspring. The mating period and the hatching of a single egg and the care of the fledgling could take up to 18 months. But the ponderous parents mated for life, and the life span of a condor was from 40 to 50 years.

Now there is a suspicion that pesticides are interfering with the birth rate. There is only one active nesting—and a single chick—in all of the condor population this year. Scientists feel that four new healthy baby birds are needed each year to keep this colony at its present endangered level.

Ugly on Ground

It is not too easy for some people to get upset over the threat to this bird. It is, after all, a carrion-eating scavenger, a vulture (Gimnogyps Californianus), a despised reminder of universal doom. The birds generally feed off the bodies of large dead animals. Beyond that, on the ground it is an ugly creature.

It is large and clumsy, weighing about 20 pounds, with black graveyard plumage and a stark, naked head that pulses with Halloween shades of orange and crimson and yellow.

But high in the sky, the condor attains a majesty that is rare among birds in flight.

A nine-foot wingspan and distinct underwing triangular patches of white mark its flight as the bird gracefully rides heat thermals billowing from the shimmering farmlands of the San Joaquin Valley.

Associated Press.

RARE BIRDS—California condors on cliff near Ojai, Calif., in remote area northeast of Los Angeles.

The Department of the Interior has established a 53,000-acre sanctuary for the California condor within the Los Padres National Forest, about 50 miles north of Los Angeles, where the birds favor natural shelter in the pock-marked sandstone cliffs above the 2,000-foot elevation.

On the south side of the sanctuary the Bureau of Land Management has opened an area for gas and oil operations. The impact of the drilling on the condors is difficult to measure, but it is known that the sounds and motions of all human activity disturb the birds. Similarly, little is known about the ultimate effect of the hazy smog that drifts into the area from Los Angeles.

At some future date several condors may be captured and placed in zoos. Their diet will be carefully controlled, their health watched, and it is hoped they will successfully reproduce.

The offspring probably would not be returned to nature. It is doubtful that the young could learn to fly in laboratories and become a success in the wilderness.

A Decade After Fallout Shelters

'Survival Gap' Spurs U.S. Civil Defense Planning

By Norman Kempster

WASHINGTON, Nov. 8.—More than a decade after the backyard fallout shelter boom, a new civil defense debate is developing because of concern that the Soviet Union may be opening a "survival gap" with its own defensive measures.

Two U.S. government agencies are readying interlocking evacuation plans intended to move as many people as possible from likely nuclear target areas to the relative safety of the countryside.

John Davis, director of the Defense Civil Preparedness Agency, said in an interview that because public apathy wrecked earlier programs the current plan is designed to function with a minimum of advance preparation by private individuals.

Mr. Davis said his Pentagon agency has decided that a costly program of building shelters intended to withstand all but direct nuclear hits is unnecessary, although he said the Soviet Union appears to have launched just such a "blast shelter" effort.

He said a complete dispersal plan covering every potential target area should be ready by the mid-1980s. Of course, it will be up to President-elect Jimmy Carter's administration to shape the program after Jan. 20.

Nitze, Schlesinger

One of Mr. Carter's close advisers, former Deputy Defense Secretary Paul Nitze, has viewed the Soviet civil defense program with alarm. So has former Defense Secretary James Schlesinger, with whom Mr. Carter conferred before his foreign policy debate with President Ford. But Mr. Carter has given no hint of his own views on the subject.

The CIA, the Defense Intelligence Agency and other elements of the U.S. intelligence community apparently disagree on the full extent of the Soviet civil defense program and on its implications for U.S. policy. According to a congressional source, the intelligence agencies have been working for months on a joint analysis but have been unable to resolve their differences about some key facts.

The Pentagon likes to say the Soviet Union is spending $1 billion a year on civil defense. This figure has been quoted frequently but a government source familiar with Soviet programs said the number is not very precise and could be off by hundreds of millions.

But there is no disagreement, either within the intelligence agencies or between the Pentagon and its critics, that the Soviet effort far exceeds the $82.5 million-a-year U.S. program.

A comparison of U.S. and Soviet programs fails to answer the key question: What difference does it make to the United States what kind of civil defense the Soviet Union maintains?

A Question

Writing in the November issue of Scientific American, Prof. Sidney Drell of Stanford and Prof. Frank von Hippel of Princeton answered that question by saying: "None at all." They contended that even with the most effective civil defense effort possible, casualties on both sides would be disastrously high in any sort of nuclear exchange.

But Mr. Nitze, Mr. Schlesinger, Mr. Davis, former U.S. ambassador to Moscow Foy Kohler and others contend that the Soviet Union could obtain a strategic advantage by protecting industry and population from some of the effects of nuclear war. They reason that if the Soviet Union could minimize potential losses nuclear war might be no longer unthinkable to Kremlin policy planners.

But an official of the U.S. Arms Control and Disarmament Agency said discussion of the Soviet program was "exaggerated." He said the matter was serious only because "it agitates people in this country."

Nuclear Deterrent

Rep. Les Aspin, D-Wis., a frequent critic of the Pentagon, said that in spite of the greater civil defense effort by the Russians both superpowers retain the ability to devastate each other, therefore "our nuclear deterrent is hardly in jeopardy."

When civil defense last was a matter of widespread public discussion in the early 1960s, the emphasis was on increasing the individual's chances of survival.

The current debate is concentrated on wider strategic questions. If the Soviet Union has an effective civil defense program, so the argument goes, it is only prudent for the United States to follow suit.

Government sources say the Soviet program is intended to protect the Communist party and government institutions, industry and the general public—in that priority. These sources say the Russians have already built blast-resistant shelters for top party and government officials.

Industrial protection comes in two types—dispersal and hardening. Ever since 1931, Soviet economic planning has called for construction of new industrial plants in outlying areas. The objectives have been to develop the largely empty interior of the country and to put industry closer to the sources of natural resources.

Economic Reasons

Although the industrial dispersal program was begun and carried out for purely economic reasons, it provides a civil defense dividend.

For at least 15 years, Soviet civil defense planning has anticipated that much of the population would be moved away from potential target areas if atomic warfare seemed imminent. In 1974, that plan was augmented by a program for construction of blast shelters. However, it will be many years before enough shelters can be built to protect all of the population, according to government sources.

William Baird, chief of general war preparedness for the U.S. General Services Administration, said the key to governmental survival is redundancy. Each major department is instructed to determine how many officials, probably 50 to 100, would be necessary to maintain the department's vital functions.

3 Teams Planned

Mr. Baird said each agency would establish three teams, any one of which would theoretically be able to operate the department. In times of emergency, one team would be kept in Washington, one would be sent to a temporary capital near Washington and one would be sent to another location.

The civil defense plan for the civilian population is largely invisible.

Mr. Davis said after the false starts of the civil defense boom of the 1960s, the government has settled on dispersal as "the greatest life-saving method."

He said the agency is working on a master plan that would provide a place of comparative safety for everyone in potential target areas. There would be no large-scale rehearsals of the evacuation plan. If war seemed likely, people would be told where to go and, if necessary, aided in getting there.

Middle-Class Veterans Shuck Denim Uniforms

Civil Rights Marchers of '60s Reminisce at Atlanta Reunion

By B. Drummond Ayres Jr.

ATLANTA, Nov. 8 (NYT).—They were noticeably older, some turning gray at the temples, others cradling babies.

But the thing that struck hardest was how middle class these veterans had become, standing there in a glossy hotel lobby in their leisure jackets and stylish slacks, their uniforms of dusty denim long since shucked.

Only the stories tipped off that they were the old infantry of SNCC, a hundred or so blacks and whites come together in reunion to relive the 1960s civil rights campaigns of the defunct Student Nonviolent Coordinating Committee.

There was John Lewis, the scar from the beating he took at Selma still visible on his balding head. Like most of the former members of "the movement," he is in his middle thirties now.

Julian Bond

There was Julian Bond, voluble on any subject, still surrounded by good-looking women.

James Forman came down from New York, introspective as ever, but looking in reasonable health now that fear no longer feeds his ulcer.

Mary King made it. So did Stanley Wise. And Charlie Cobb and John Perdew and Gloria Richardson.

Someone said that H. Rap Brown was out of prison and in town. But he never appeared.

Stokely Carmichael? No word. He might still be in Africa.

The last clipping in the thick file on SNCC is dated July 23, 1969, and begins: "The Student Nonviolent Coordinating Committee dropped the 'nonviolent' from its title yesterday and...." Nothing much was heard after that from the organization that originally espoused love and brotherhood to become one of the most powerful civil rights groups in the country.

Out of Job

In a certain ironic sense, the organization worked itself out of a job by helping to bring about passage of the 1964 public accommodations laws and the Voting Rights Act of 1965. After it began toying with violence and strident black power in search of a new cause, Rap Brown went to prison and Mr. Carmichael to Africa.

But the veterans gathered here over the weekend did not want to talk of such things. They preferred, instead, to reminisce about the early days, not that the reminiscences were particularly pleasant.

In Mississippi in the summer of 1964, for example, members of the organization and their supporters endured more than 1,000 arrests, eight beatings, 35 shooting incidents and six murders.

"Those days," Mr. Bond said, "were the high point in our lives. We all know that for intensity and meaning and satisfaction, there will never again be any equal for any of us.

"Just within the past week," he continued, "what we did resulted in the election of a president. I don't like him personally, but I can see that he could not have been elected without black votes."

Testimony to Success

Mr. Bond is himself testimony to the success of organizations such as SNCC. A decade ago, he used black votes to become the first black member of the Georgia House in almost a century. He is now a state senator, representing Atlanta.

Mr. Lewis, who ran SNCC for several years after it was organized in North Carolina in 1960 during some lunchcounter sit-ins, said that most former members were still involved in "good causes."

"They're into elected politics or labor organizing or community projects or the like," said Mr. Lewis, who heads the Voter Education Project, an Atlanta-based group that registers black voters in the South.

Mary King said that she moved to Washington after working as the organization's press officer with Mr. Bond. For the last several years, she and her husband, Peter Bourne, have been working full-time for Jimmy Carter.

Still Involved

"I stayed involved—and boy am I glad," she said.

Mr. Forman, who stayed at the top of the organization's leadership for half a dozen years or so, reported that he had become active in labor organizing.

"We won one war," he said. "Now, we've got to win another. We've got to repeal right-to-work laws."

Mr. Perdew, who spent three months in jail in Americus, Ga., as the result of a 1963 demonstration by the organization, said that he had gone into health care after leaving civil rights work.

Mr. Cobb said he had gone into radio reporting.

"If all this seems so middle class, said James Bond, Julian's brother, "then it's got to make a living sooner or later, particularly if there's no longer anywhere to demonstrate." James Bond is now a city councilman in Atlanta.

France Ousts 4 Tied To Iranian's Shooting

PARIS, Nov. 8 (UPI).—Four young Iranians have been expelled from France in connection with investigations of a near-fatal assault last Tuesday on Iranian Cultural Attaché Homayoun Keykavoussi, police sources said today.

In a press communiqué, the Confederation of Iranian Students protested against the expulsions, saying that they would harm the defense of the two students indicted in the assault.

Compensation To Alleged IRA Backer Barred

BELFAST, Nov. 8 (Reuters).—A judge today blocked a controversial payment of £20,000 ($32,000) compensation to an alleged supporter of the outlawed Irish Republican Army who was injured in a feud between rival factions five years ago.

The British government, whose policy is to compensate victims of civil strife in Northern Ireland, had appealed against the award to 44-year-old Thomas Cahill—brother of former Belfast Provisional IRA leader Joe Cahill.

Thomas Cahill was partly paralyzed after being ambushed by gunmen while working as a milkman in Belfast in March, 1971. The Provisionals blamed the shooting on the Official wing of the IRA.

Judge Maurice Gibson ruled that Thomas Cahill was injured as a direct result of his affiliation with the Provisional IRA.

"I cannot think that Parliament ever contemplated, or that I should countenance, the idea that such enemies of society should be awarded compensation out of public funds for injuries received because of their criminal associations directed toward the destruction of the state itself," the judge said.

Church in Plains Again Bars Black

PLAINS, Ga., Nov. 8 (UPI).—A black activist minister was barred for the second straight week yesterday from Jimmy Carter's home church as deacons locked the doors after giving him a copy of a 1965 resolution barring "Negroes or any other civil rights agitators."

The Rev. Clennon King, who operates a nondenominational mission in Albany, Ga., said he would try again next Sunday to join the Plains Baptist Church.

Mr. King was kept from entering the church services after he attended the men's Sunday school class sometimes taught by the President-elect, who is vacationing and was not present today.

Mr. King, a controversial rights activist-politician, drew criticism from numerous black leaders for his efforts to integrate the church 48 hours before the presidential election.

Independence at Issue

Quebec Election Next Week Causing Economic Concern

By Henry Giniger

MONTREAL, Nov. 8 (NYT).—A legislative election Monday that may set Canada's French-speaking province of Quebec on the road to independence is causing concern about its possible economic consequences.

With polls pointing to a marked upsurge in the voting strength of the Quebec party, which favors independence, a climate of nervousness is developing among those who want to keep Quebec part of Canada and in particular among the English-speaking minority that controls a major part of the financial and industrial strength of the province.

But there is nowhere near the fear that was created by the sudden emergence in 1970 of extremist groups that resorted to violence to advance the nationalist cause. According to still disputed accounts of what happened at the time, armored trucks hauled away money and securities to the safety of Toronto.

Debate Provoked

A decisive victory in the 1973 provincial elections for the Liberal party, which stands for a federated Canada, restored some confidence. But the coming election, in which the Liberals are expected to lose strength, has again raised the issue of independence and has provoked debate on how Quebec has fared up to now as a Canadian province and how it would fare in the future as a separate nation.

Quebec has lagged behind Ontario, its big English-speaking neighbor, in industrial growth, and it has a higher rate of unemployment. Rodrigue Tremblay, head of the Economics Department of the University of Montreal, is a Quebec party candidate in Montreal and contends that only large-scale stimulation of industry by an independent Quebec government could halt the "rot" that he contends has set into the economy.

At a recent meeting of the Quebec Association of Economists, he said that the federal government had favored Ontario over Quebec. "Just look at the automobile industry," he said. "Federal incentives resulted in the establishment of more than 250 small and medium-size companies to supply car manufacturers who were lured into Ontario."

But at the same meeting, Raymond Garneau, the provincial finance minister, declared that independence would mean industrial ruin for Quebec.

Uncertainty Seen

"Do you think that an outside investor is going to put his money into a province where the political situation could remain uncertain for years?" Mr. Garneau asked.

The Quebec party has proposed that a referendum on independence be held after it assumes power. Subsequent referendums were proposed if the party should fail to get a mandate to pursue independence on the first vote.

In campaign speeches, Mr. Garneau has stressed other consequences of independence. He contends that Quebec gets $1.5 billion more a year from the federal government than it contributes in taxes and if those benefits, mostly in the form of unemployment insurance and oil price subsidies, were to be cut off, the new nation would have to resort to a substantial tax increase.

Studies of comparative tax burdens prepared for the Bank of Canada show a considerably higher tax rate for residents of Quebec than for those in Ontario.

High Price Seen

André Raynauld, another well-known economist who is entering politics for the first time as a Liberal candidate in the middle-class town of Outremont, said an independent Quebec is probably viable but that the price that would be paid during a 20-year transition period would be very high.

In an interview, he predicted a drop in living standards and of public services because Quebec would be unable to finance them out of its own revenues. He also foresaw an exodus of firms from Quebec, including the Bank of Canada, the nation's largest, whose charter stipulates that its headquarters must be situated in Canada.

"Quebec would probably have to adopt socialistic controls during the transition," he said. "Why pay for a transition like that? To obtain advantages we already have? We are not slaves, we have powers of taxation and borrowing and we can compete with any Anglophone province."

But Mr. Raynauld and other federalists are having trouble convincing French-speaking students and other young people who adopt a more sentimental approach to the problem and tend toward a leftist nationalism.

Fighting Tactic

Many of them have adopted separatism as a way of fighting what they feel is domination of French Canada by U.S. and other multinational companies or by English Canadians who run the province's banks and large businesses.

The entry of the French into positions of responsibility in the business world is relatively recent after a long tradition of subservience through which they were commonly described as "the hewers of wood and the drawers of water" for English masters.

All studies indicate a continuing majority sentiment in favor of federalism, and the Quebec party under René Levesque, a 54-year-old former journalist and Liberal minister, is having to buck a Liberal campaign that is playing on the anti-separatist sentiment.

Montreal buses display signs exhorting the population to reject separatism and declaring that "only the Liberal party can do it." Mr. Levesque, who has played down the separatism in an effort to reassure voters, predicted that a Liberal campaign of fear would go into high gear in the closing days of the campaign.

Marcos Fires 327 In Armed Forces

MANILA, Nov. 8 (UPI).—President Ferdinand Marcos today ordered the firing of 327 military personnel in one of the biggest mass dismissals in the armed forces since martial law was proclaimed four years ago.

A government announcement said the order to Defense Secretary Juan Ponce Enrile to fire 19 officers and 308 enlisted men for misconduct brought the number of military personnel weeded out since martial law to 1,604.

The most common offenses, according to the announcement, were mistreatment of political detainees and firing weapons while under the influence of alcohol.

IN THE SWIM—Some 700 people took part in the 64th annual Cross-Harbor swim Sunday in Hong Kong's Victoria Harbor. The winner, a boy, 15, made it in 21 minutes. The oldest competitor, a man, 74, died later of exhaustion.

Grain Purchases Are Expected

E. German Harvest Plummets After Drought

By Craig R. Whitney

DRESDEN, East Germany, Nov. 8 (NYT).—A severe drought this year has led to a catastrophic East German grain harvest and the threat of food shortages, adding to the country's economic problems.

The fall mists are already rolling over the hills and fields of Saxony and the farmers—all collectivized since this part of Germany became Communist under Soviet occupation—are trying to salvage every potato, beet and grain of wheat from the harvest.

"The wheat harvest was as much as 20 to 30 per cent less than it was last year," said Siegfried Neubert, an agricultural official of the Dresden District Administration. "We'll certainly be negotiating with the Soviet Union and the United States for grain imports."

Last year, East Germany bought 3 million tons of North American grain. The East Germans will probably negotiate for even more this year, U.S. officials believe.

The economic pinch is not yet visible in most people's daily lives, or on the streets. The shops in Dresden and East Berlin are offering fresh vegetables, potatoes, carrots and tomatoes at the same fixed prices the government set 25 years ago.

Housewives say there have been no noticeable shortages and the only long lines seen recently were for green table grapes from Romania, costing 75 cents a pound and not normally available.

The government has kept consumer prices stable even though costs have risen steeply. The Soviet Union has tripled the price of oil and raised the cost of other raw materials bought by East Germany, and now the drought has added a natural obstacle.

The other countries of Eastern Europe are facing similar problems. In Poland, the leadership tried to double food prices last summer but had to back off after riots and demonstrations. Such an unpopular step is unlikely in East Germany. The government has enough trouble with discontented citizens seeking to emigrate.

The expectation of a difficult phase ahead is thought to be one of the reasons why Erich Honecker, the party leader, also took over the post of chief of state at the end of last month.

How bad things really are out on the farms is hard to tell. The authorities, normally all too willing to escort Western visitors to model collective farms, kept this correspondent away from them and instead arranged a meeting with agricultural officials, in an office in Dresden.

"This year we had the worst drought and heat in recent history," Mr. Neubert said. "Rainfall has been about half the normal amount so far and it still hasn't returned to normal."

He said it was difficult to offer fresh vegetables to consumers. "We had to can a lot of things this year," Mr. Neubert said, adding that the immediate problem ahead is to insure a supply of feed to get cattle and swine stocks through the winter.

East Germany has not had to import meat supplies in recent years and has so far been able to avoid having to slaughter any livestock for lack of feed.

'Straw as Feed'

"We've had to use straw as feed, and we're telling farmers now to plant fallow fields with fodder before the winter begins," Mr. Neubert said. "It won't be easy, but we'll maintain the food supply."

Importing grain from the United States is difficult for East Germany because it has only limited supplies of Western currency to buy it with and is $4.5 billion in debt to the West already. East German marks are not convertible, so the only way the government can get grain is to sell industrial products to the West. This is not easy since most East German exports go to the Soviet Union, which pays in nonconvertible rubles.

Ordinary people with relatives in the West are allowed to receive West German marks, which many promptly take to the nearest Western-currency shop to buy delicacies like quality coffee, wine from the Moselle, milk chocolate or even clothing. No one asks where they got the money. After buying a pound of coffee for $5, a Dresdener said, "the state ends up with the hard currency."

"What it is," he said, "is a black market—run by the government."

After Purge of Chinese Admired by Hoxha

Albania Seems Wary of New Peking Regime

By Jay Mathews

HONG KONG, Nov. 8 (WP).—A small ripple from the great splash of China's October purges has reached Albania, raising new doubts about the small Balkan state's relationship with the giant nation that has been its No. 1 ally.

Enver Hoxha

Enver Hoxha, 68, leader of the country of 2.5 million, did not praise the new Chinese administration of Chairman Hua Kuo-feng in his speech opening the seventh congress of Albania's (Communist) Labor party. Moreover, his telegram of congratulations to Mr. Hua on his appointment as successor to Mao Tse-tung was tardy and unusually terse.

Although the Chinese have continued to praise and give prominent news media attention to Mr. Hoxha's government, the Albanian leader appears emphatically displeased that Mr. Hua has put under arrest four leading Chinese radicals whose policies Mr. Hoxha admired. In the last three years Mr. Hoxha has purged several members of his own administration who represented the kind of pragmatic Communism that now seems to have taken charge in Peking.

Since Tirana broke with the Moscow hierarchy in 1961 and became China's fast friend, it has followed the line of the most orthodox Maoists in China, putting ideological purity before economic progress. It has scorned contact with the West and openly chided Peking for forging ties with the United States and Western Europe.

Criticism in 1971

"It is not possible to use one imperialism in order to oppose the other," Mr. Hoxha said at his party's 1971 congress, in a slap at Mao's efforts to play the Americans and Russians off against each other.

Mr. Hoxha called for more self-reliance, fiercer class struggle and lower wages. He purged Defense Minister Beqir Balluku, then No. 3 in the leadership, and several economic advisers he labeled "bureaucrats, technocrats and liberals."

Last May, Mr. Hoxha announced that he had uncovered a plot by a group of "traitors" to disrupt Albanian relations with China and return the country to the Soviet camp.

The last senior Chinese official to visit Tirana was Yao Wen-yuan, the propagandist and Politburo member who was arrested by Mr. Hua a month ago, along with Mao's widow, Chiang Ching, and fellow Politburo members Chang Chun-chiao and Wang Hung-wen. Mr. Yao and the others are presumed to have encouraged Mr. Hoxha in his attacks on technical experts and veteran bureaucrats, the kind of people the Chinese radicals were trying to root out of their own government.

Up to now, two-thirds of Albania's trade has been with China, and Tirana has accepted large amounts of aid from Peking. There have been rumors that this is now tapering off, but the reticence of both the Albanians and the Chinese to release any reliable data on the subject makes this hard to verify.

The Albanians are clearly worried about the possibility that Mr. Hua will move China back toward closer relations with the Russians and lessen China's advantages in having a close ally in the Balkans. But there is as yet little evidence that the Chinese attitude toward Moscow has softened.

"Both sides, Peking and Tirana, are still interested in close relations," an analyst here said. "But they are both being very cautious."

As if in reaction to the uncertainties they perceive in Peking, the Albanians have taken some steps to soften their traditional belligerence toward their Greek and Yugoslav neighbors. In three decades, Mr. Hoxha has managed to shift its close ties from Belgrade to Moscow and then to Peking. If Mr. Hua displeases him, he may be willing to make another change.

Hoxha Power Extended

VIENNA, Nov. 8 (AP).—The seventh congress of the Albanian party ended yesterday with its leader, Mr. Hoxha, and Premier Mehmet Shehu reconfirmed as the country's top officials, the Albanian news agency, ATA, reported.

Mr. Hoxha has headed the party for 35 years, and Mr. Shehu has been Premier since 1954.

ATA reported no sign of opposition to the Hoxha leadership, which reportedly has entrenched itself in recent years by massive purges of dissidents and officials favoring rapprochement with the Soviet Union. Unconfirmed Western and Communist reports say that several thousand party and government officials have been purged.

Dacca Marks Coup Date

DACCA, Nov. 8 (AP).—The military government celebrated its first year in power yesterday by freeing 2,500 prisoners and political detainees.

Flower Power

AUBURN, Maine, Nov. 8 (AP).—A wild flower once thought to be extinct—the furbish lousewort—may block a $700-million hydroelectric project in northern Maine, a botanist for the U.S. government says.

The plant has "nothing special other than its rarity," the botanist, Richard Dyer, added. But he said it is on a list, scheduled for adoption next year, of endangered species of plant life.

And he noted that under the U.S. Endangered Species Act, federal projects are prohibited from destroying rare or endangered species of plants and animals.

Mr. Dyer said 30 specimens of the plant were found in the 57-mile-long area that would be flooded by the hydroelectric project's two dams on the upper St. John River.

In reference to the plant's survival, Mr. Dyer said that he doubted it could thrive anywhere else. He said that it grows on the roots of host plants and appears to be limited to "a rather specific habitat—almost entirely on the south shore of the St. John."

Environmentalists have raised other objections to the project, notably that it would flood several thousand acres of forest land and that the St. John is one of the last wild rivers in the Eastern states.

The project, designed to produce 1.2 billion kilowatt hours of electricity for the New England region, would create two reservoirs covering about 88,000 acres.

School Bus Crashes

HILPOLSTEIN, West Germany, Nov. 8 (Reuters).—Forty-four children were injured when a school bus crashed today.

U.S., Japan Open Talks o[n] Fish Quotas

To Set Procedures On Periled Harvests

By Andrew H. Malcolm

TOKYO, Nov. 8 (NYT).—[The] United States, having declare[d a] 200-mile coastal fishing zone [ef]fective early next year, ope[ned] bilateral fishing talks with Ja[pan] today in an effort to set procedures and quotas for harvesting of marine life th[reat]ened with depletion.

The talks are but one of [some] 30 pairs of international ne[gotia]tions that must be concluded [be]fore the new U.S. law takes [effect] March 1, if the fishing flee[ts of] these affected countries ar[e to] operate legally in U.S. waters. [So] far, only Poland has rea[ched] agreement.

The negotiations, along [with] a growing number of territ[orial] fishing clashes at sea, un[der]score the increasing value [being] placed these days on the wo[rld's] waters as rich grounds for [pro]ducing proteins to feed the glo[be's] billions of inhabitants.

The talks here are expecte[d to] involve some hard bargai[ning] in the weeks ahead, and als[o] provide a measuring stick fo[r re]lations between these two m[ajor] Pacific allies.

"It's a mark of the maturi[ty of] the relationship between our countries," a U.S. official [said] privately, "that the biggest [issue] for negotiations between [us is] fish."

But at the same time, [the] talks and the American's [move] provide an insight [into] some radically different cult[ural] views on this food.

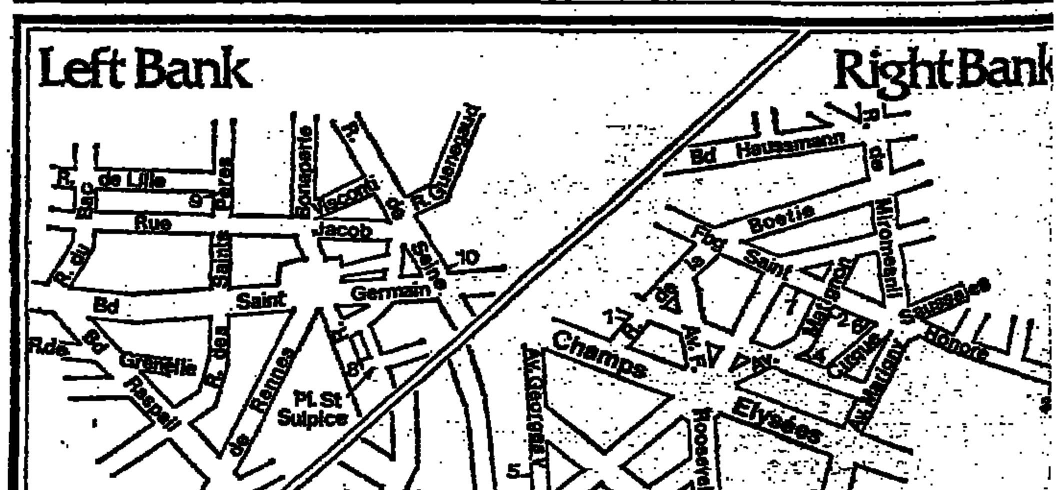
Japan is a resource-poor [is]land nation with a population [half] that of the entire United S[tates] crammed into an area the [size] of California. With less th[an a] fifth of its land arable, the [Jap]anese have for centuries tu[rned] to the seas for their food.

The nearby oceans, which form the same food-gro[wing] function for Japan as the western prairies do for the U[nited] States, are mined intensivel[y for] food. Virtually every inlet [and] large expanse of open water [shows] the signs of farming.

So last spring, when the Congress, concerned about fishing by foreigners and the [lack] of progress at the Law of the [Sea] Conference, acted to extend [sov]ereignty over 197 miles of [what] had been international wate[rs, it] was a disturbing developmen[t to] many in Japan.

EEC Talks Begin

BRUSSELS, Nov. 8 (Reu[ters]).—The United States and the European Economic Comm[unity] countries today opened [talks] aimed at giving EEC fishe[rmen] the right to work off the [U.S.] coast.



Sources said that the [talks] were devoted to technical [and] legal subjects and were des[igned] to pave the way for full [negotiations] later.

2-Hour Power Stri[ke] Set in France Toda[y]

PARIS, Nov. 8 (AP).—Fra[nce's] moderate labor unions are [join]ing the leftist and Commu[nist-]led unions tomorrow in a [two-]hour "warning strike" of [elec]tricity workers against the [anti-]inflation plan of Prime Min[ister] Raymond Barre.

About two-thirds of the s[tate-]owned electric power monop[oly's] 124,000 employees are expecte[d to] join in the first major all-[out] protest against the Barre [plan]. Officials said that there w[ould] be cuts in household and in[dus]trial power supplies throug[hout] France during the two-[hour] morning stoppage.

MacDonald Resigns

International Herald Tribune Announces a New Publisher

NEW YORK, Nov. 8 (IHT).—John Hay Whitney, chairman of the International Herald Tribune, announced today the resignation of Robert T. MacDonald as publisher of the newspaper and the appointment of Robert R. Eckert as his successor.

Mr. MacDonald, 46, who has edited the Paris newspaper for the last 10 years, will leave on Jan. 31 so that he can return to the United States to pursue other interests. Mr. Eckert, 36, also has been president and publisher of the Binghamton (N.Y.) Press-Bulletin and the Evening and Sunday Press, will assume the new duties Jan. 1 of next year.

The International Herald Tribune is jointly owned by the Whitney Communications Corporation—of which Mr. Whitney is chairman—The Washington Post, and The New York Times. Katharine Graham and Arthur Ochs Sulzberger are co-chairmen of the International Herald Tribune. Murray Weiss is the editor.

"It is on behalf of all the owners and directors of the IHT," Mr. Whitney said, "that I salute Bob MacDonald and thank him for a decade of outstanding leadership. Under his guidance, the IHT has achieved a record of consistent excellence and steady growth and has won a unique and distinguished place as a truly international journal. His last year with the paper will see the best performance in its history. We are sorry to lose him.

"We have searched long and hard for the right successor to Bob MacDonald and we are deeply pleased that Robert Eckert has accepted our invitation. His long record with the Gannett newspaper group gives evidence of his deep understanding of newspapers in all of their modern complexity, as well as his sensitivity to the diverse communities they serve. We are pleased to welcome him."

Mr. MacDonald joined the IHT in 1966 after serving as executive vice-president of the New York Herald Tribune, which he joined in 1961. A graduate of Yale University and the Wharton School of Finance, he served in the U.S. Navy and worked for

Robert T. MacDonald

Robert R. Eckert

Shell Oil Co. and International Business Machines before joining McKinsey & Co., Inc., where he specialized in marketing and business planning and development.

Course at Harvard

Mr. Eckert also served in the Navy and graduated from Yale, as well as completing a course in accounting at Harvard Business School. His newspaper experience began before college, as a cub reporter on the Endicott (N.Y.) Bulletin; after Harvard, it included the post of city editor on the Oneonta (N.Y.) Star, operating two weekly newspapers in the same state and acting as bureau chief for the Riverside (Calif.) Press-Enterprise.

Joining the Gannett organization, he had managerial positions in Binghamton, Elmira and Rochester, all in New York, before becoming president and publisher of the Hartford (Conn.) Times and then, in 1971, president and publisher of the three papers within Binghamton Press Co., Inc.

As Arab Unity Drive Improves Egypt-Syria Ties

Israel Hardens Stand on Sinai Pact Violations

By H.D.S. Greenway and Yuval Elizur

JERUSALEM, Nov. 8 (WP).—The apparent rapprochement between Egypt and Syria is causing Israel to take a closer look at alleged Egyptian violations of the interim agreement in the Sinai.

While the Arab world was in disarray over Lebanon, Israel could afford a somewhat tolerant attitude toward what it considered to be Egyptian violations of the January, 1974, pact.

Since the Riyadh and Cairo summits, however, Israel has perceived a new attempt at Arab unity based on hostility toward this country.

The threat is seen as being more psychological and political than military at this stage, but Israel's experience has been that psychological pressures have a way of building quickly into explosive situations in the Middle East. Thus Israel feels it can no longer tolerate Egyptian violations with the equanimity that this country displayed before.

Israel's main concern is that east of the Suez Canal the Egyptians have more than the eight battalions of troops that the interim agreement allows them to deploy there.

Double the Limit

Last summer, Israeli intelligence reported that the Egyptians had more than 16 battalions there. The Egyptians claimed that although there had been a reorganization of units, the number of soldiers east of the canal remained the same.

The United Nations Emergency Force decided that there were 11 Egyptian battalions there.

The UN informed Israel about six weeks ago that three battalions had been withdrawn.

Israel has never given up its claim that there were more than 11 Egyptian battalions east of the canal and Israel claims that Egypt is still in violation of the agreement.

The issues of Egyptian helicopter intrusions and missile sites in the 10-kilometer zone west of the canal have both been resolved to Israel's satisfaction.

The Israelis do not discount the possibility that the growing arsenals of Libya and Saudi Arabia could be brought to bear against Israel in any future confrontation.

Defense Minister Shimon Peres, Chief of Staff Mordechai Gur and the commander of the southern region, Maj. Gen. Herzl Shafir, met here last week with the UN commander, Gen. Ensio Siilasvuo, to discuss the implementation of the interim agreement with Egypt.

If the Riyadh and Cairo summits brought new potential dangers for Israel, they brought new opportunities as well, according to the assessment of Prime Minister Yitzhak Rabin. At a news conference last week, Mr. Rabin said he believed that the Cairo summit marked a change in the position of Syria, which previously had rejected the possibility of negotiating a settlement with Israel.

Three Reasons

Mr. Rabin said he believes that Syria is now interested in a negotiated settlement and he saw three reasons for the change of heart: Syria's failure to gain complete hegemony in Lebanon, the increasing economic and therefore political dependence of both Syria and Egypt on Saudi Arabia, and the gains of U.S. diplomacy.

He said he believed that the United States would increase pressure on Syria to accept a negotiated overall settlement.

One result of the Cairo summit, he said, is a division between Iraq and Libya, both under Soviet influence, on the one hand, while Saudi Arabia, Syria and Egypt are responding to U.S. influence or "inspiration."

Mr. Rabin said that Syria's change of attitude does not necessarily improve dramatically the chances for a settlement. Syria's position might not be acceptable to Israel, he said. In any case, he added, he expects that the United States will also put pressure on Israel for a settlement.

The Israeli press last week quoted Mr. Rabin as saying that Syria has given assurances to the United States that it will not infiltrate its forces into the border region with Israel and another report said that Syria has also promised not to allow the Palestinians back into the border region in force. This is taken as an encouraging sign that a situation intolerable to Israel will not be allowed to develop along its northern frontier.

Uncertain Rivals Picked in Chess

HAIFA, Nov. 8 (AP).—The International Chess Federation has announced pairings for the first round of next year's tournament to pick a challenger for world champion Anatoly Karpov of the Soviet Union.

Soviet defector Viktor Korchnoi was selected to play former world champion Tigran Petrosian of the Soviet Union while American Bobby Fischer was matched against Vlastimal Hort of Czechoslovakia.

But the federation is not sure either of those games will be played. The Soviet Union has demanded that Mr. Korchnoi, who defected in the Netherlands in April, be banned from the tournament, and Mr. Fischer has been engaged in a dispute with the federation over the rules of championship tournaments.

Yesterday, the federation voted to readmit South Africa, which was stripped of membership two years ago over charges of racial discrimination.

What Makes Him Tick?

PONTARLIER, France, Nov. 8 (Reuters).—Police said today that they have arrested a man suspected of breaking into houses and stealing the mechanisms from inside clocks. The thief always left the clock casings behind.

Arab League Bid For Trade Favors Opposed by EEC

BRUSSELS, Nov. 3 (Reuters).—The European Economic Community has opposed proposals from Arab countries for a wide-ranging preferential trade agreement with the members of the Arab League, community officials said today.

The Arab proposal was discussed by experts from the two sides here last week, who met as part of the so-called Euro-Arab dialogue for intensified economic and industrial cooperation.

The community feels such trade relations can be handled within existing arrangements between the EEC and individual Arab states.

Nine of the 20 Arab League countries have preferential trade pacts with the community, but EEC refuses to extend such arrangements beyond the immediate Mediterranean area, saying that to do so would go against its international trade obligations.

The Arabs feel the volume of trade between them and the EEC entitle them to special preferential links. Arab Lague members now represent the biggest single trading partner of the EEC, supplying 30 per cent of its imports and taking nearly 13 per cent of its exports.

High Rises Mingle With Minarets in Baghdad

BAGHDAD, Nov. 8 (NYT).—The radical Iraqi regime is encouraging a radical innovation in its 1,200-year-old Islamic capital: the erection of high-rise buildings.

Bulky apartment houses and other structures have been going up to ease the city's main problem—crowding, which has brought headaches for city officials who are directly under the national government.

"Baghdad is much larger than once was, and we face a lot of difficulties," Abdelkarim al-Nada, the deputy mayor, told a recent visitor. Mayor Ibrahim Mohammed Ismail was said to be suffering from ulcers that have cut down his activity.

Baghdad was the splendid capital of Caliph Haroun al-Rashid in the 9th century, and it has remained something of a magnet in the 20th: Iraqi officials say the population of Baghdad is now 2 million or more, up from 750,000 in 1957.

The Skyline

A traveler visiting Baghdad for the first time in six years finds that new, angular buildings have been shouldering up along the city skyline, among the palm trees and minarets.

The tallest of these minarets do not exceed seven storys, officials say, while Baghdad now boasts two 20-story high-rises—a university building and a state-owned bank building—and other large modern buildings have been financed in part by Iraq's oil revenues, which exceeded $7 billion last year. The country's population is estimated at 12 million.

Modernity is prised by Iraq's regime, which came to power in 1968 and espouses the fervently Arab nationalist doctrines of the dominant Ba'ath party. It also espouses what Deputy Mayor al-Nada calls "the perpendicular tendency" in urban construction—but it is having trouble in persuading some Baghdad residents of the charms of apartment house life.

"Iraqi families must be taught to live together," an intellectual observed recently. The deputy mayor noted that Iraqis have a long-standing fondness for low-lying houses with courtyards that gobble up urban space.

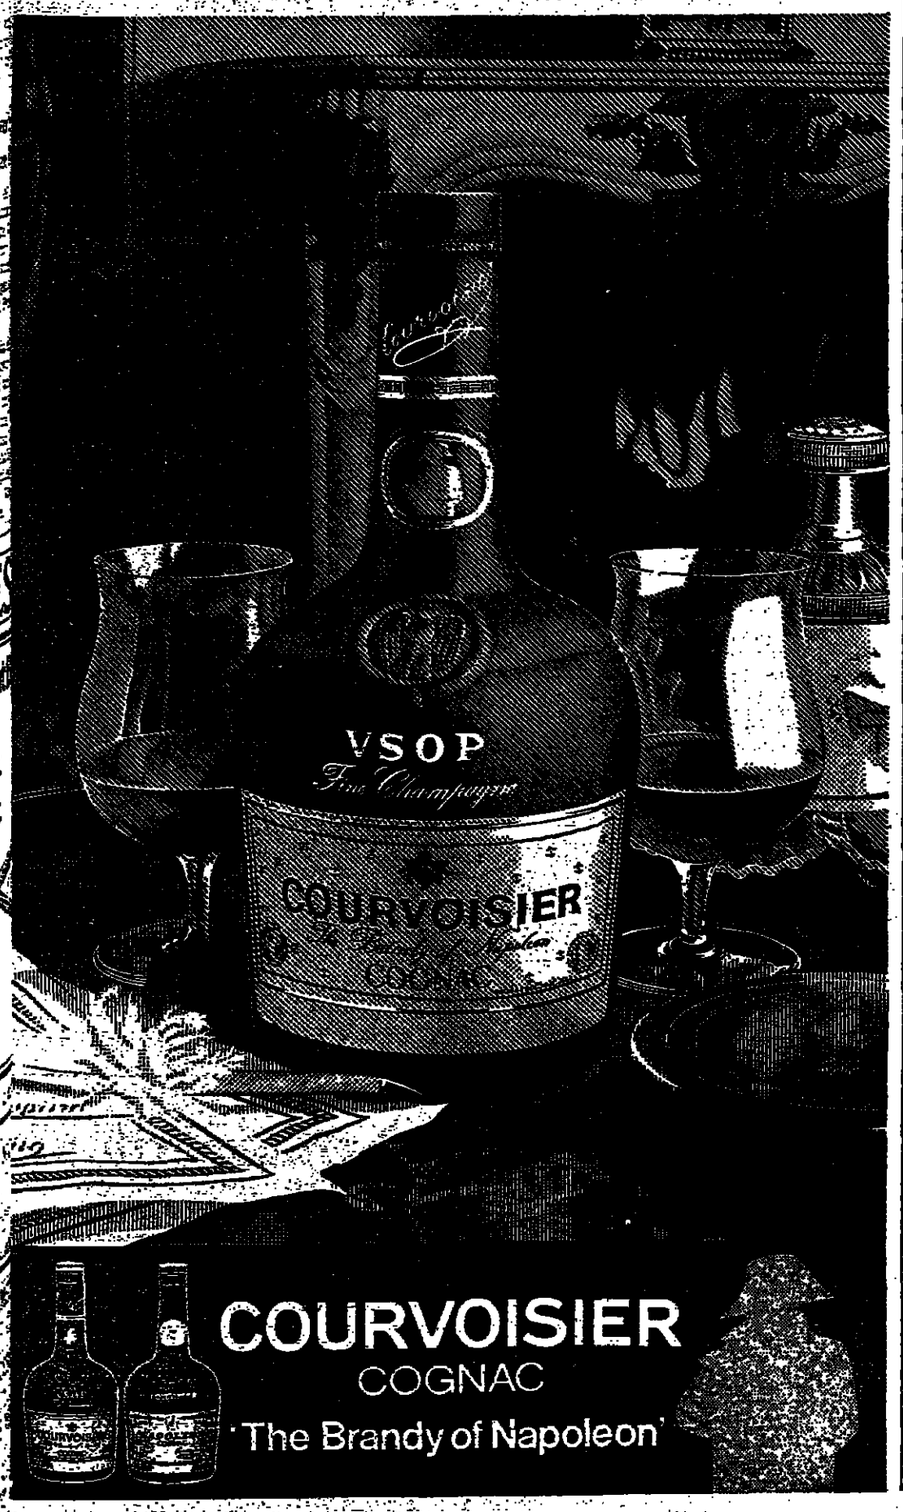
Twentieth-century Baghdad housing has varied widely—from the old-fashioned Turkish-style villas built by the elite in the days of the Iraqi monarchy, which was overthrown in 1958, to middle-class brick houses and to humble workingmen's huts.

Now the government is encouraging the building of modern apartment houses, hotels and other structures by extending easy credit, among other measures. Also, the assets of Islamic religious foundations are being used for investing in new apartments.

In carrying out municipal policies, the mayor and deputy mayor are not as vulnerable to the vagaries of public opinion as, say, New York City's mayor, since they are not elected but appointed—and their administration is overseen by the office of President Ahmed Hassan al-Bakr, who is related to Mr. al-Nada and comes from the same town, Takrit, north of here.

Neighborhood Centers

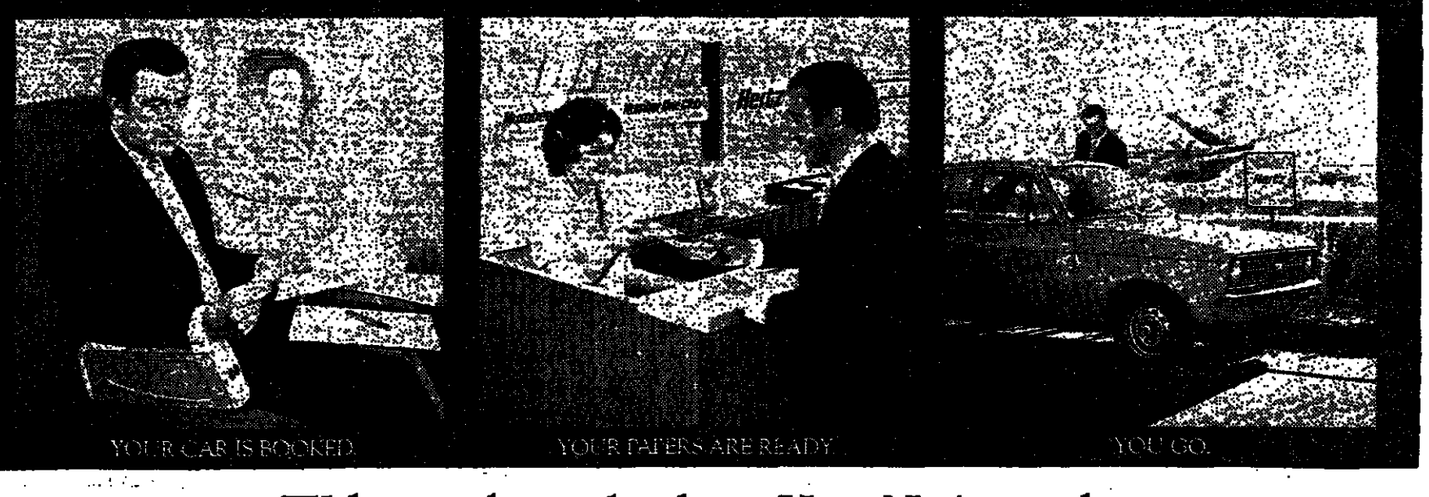
But Mr. al-Nada said his administration tried to be responsive to individual neighborhood conditions through a network of 11 local administrative centers in the capital area.



"We believe in decentralization in administration and centralization in planning," Mr. al-Nada said in his office, which is hung with several portraits of President Bakr.

The local centers' responsibilities include repairing the capital's streets, which were first asphalt-topped in 1928, and the removal of garbage. The deputy mayor said garbage had proliferated in recent years. Hundreds of vehicles carrying watermelons enter the city daily, "and half of what they carry in we have to carry out", in the form of watermelon rinds, he said.

Chad Again Facing Shortages of Food



NDJAMENA, Chad, Nov. 8 (Reuters).—The central African nation of Chad, still suffering from the effects of one of the worst droughts in history, is again facing disastrous food shortages because of lack of rain, United Nations officials reported.

A mission of the UN Food and Agriculture Organization said here that at least 30,000 tons of cereals were needed to feed the population, and that Chad could now count only on international aid for the food.

When a No. 1 man says he's on his way, we're ready for him.

Join the Hertz No.1 Club and we'll be ready for you.

We know what to do when a Hertz No.1 man phones us for a reservation and lets us know that he's on his way to any one of the major airports in Europe or North America.

And we do it. We fill in his rental form in advance. So when he arrives he doesn't need to wait. He just signs, takes the keys and goes. In a thoroughly cleaned and serviced car.

Join the Hertz No.1 Club* and you can phone, sign and go, too. The car you like—Ford Escort, Granada or another fine car—will be ready and waiting. Just phone your nearest Hertz reservation office, or your travel agency, and let us know where and when you want your car.

And your car will be there.

No membership fees. No extra charges. No filling in forms ever again. Why waste time renting cars? Get your application form for the Hertz No. 1 Club at any Hertz counter or office. Or, when you next rent a Hertz car, ask to be enrolled automatically.

Carter's World Outlook

Jimmy Carter struck exactly the right note on international affairs in his Thursday evening press conference. He muted neatly the politically charged tones of his campaign utterances on foreign policy and national security issues, and assumed a careful and responsible position as steward-to-be of the nation's international interests. He seemed aware that his general inexperience in this field and the roughness of some of his campaign pronouncements had generated a considerable and legitimate unease among foreigners as well as Americans, and that he must now address their nervousness directly.

This he did well, we thought, with the aid of several helpful questions. First, he reported briefly on the mechanics of his transition planning. Transition planning is a kind of cottage industry in Washington, and there are any number of savvy advisers available to help a prospective president slide into the office. The orderliness Mr. Carter seems determined to show is itself bound to reassure the various foreign-policy publics, domestic and international. Although he has not named his chief aides, they evidently will be recruited from a group whose experience and competence are established. Indeed, given the sheer numbers of Democrats eager to get at the national security controls, his initial problem may be to keep himself from being inundated by both job applications and policy advice.

* * *

Next, Mr. Carter laid a broad stress on transition continuity. "We will constantly search for a stable and predictable relationship with all nations," he said, "and . . . there will be a substantial amount of continuity as a transition takes place from one administration to the next." This is wise. In domestic affairs, particularly with respect to the economy, there is great pressure, some of it self-imposed, for Mr. Carter to take quick, strong action. But there is no similar pressure and, more important, no real need or opening for such pressure in foreign affairs. The Ford administration is involved in several ripening negotiations—Rhodesia, the Mideast and SALT among them. But since there do not appear to be major divergencies between the Ford and Carter approaches to these questions, it should be possible for the Carter camp to pass the word, quietly as well as publicly, that he intends to keep up the momentum after he has settled in. The emergence of a sudden crisis would, of course, pose a trickier but not unmanageable transition problem.

The most impressive part of Mr. Carter's Thursday evening performance, however, came in his remarks on Yugoslavia and OPEC. On Yugoslavia, he corrected the gratuitous campaign statement in which he had greatly undervalued the seriousness of a Soviet intervention and foreclosed the possibility of a U.S. response to it. He said on Thursday that a Soviet invasion would be "a threat to the entire world" and that he would reserve a decision on what the U.S. response would be. There are a few other campaign gaffes he ought to find occasion to fix—his retrogressive overcommitment to an "independent Taiwan," for instance.

* * *

On the imminent OPEC oil-price increase, a step that could sabotage his plans for domestic economic recovery, Mr. Carter issued a precisely worded warning that such an increase would be "a very serious blow . . . I would hope that all the OPEC nations would be reticent about increasing the price of oil." Does OPEC wish to start off its dealings with a new U.S. president by delivering him "a very serious blow"? At the least, Mr. Carter's words should strengthen the hand of the Ford administration in its efforts to induce restraint. That Mr. Carter, in his first post-election appearance, weighed in prudently on a matter of this delicacy is, we think, a good omen.

Whether Jimmy Carter has a large vision of the U.S. role in the world and whether he can bring to bear the patience and imagination that the conduct of foreign affairs requires are questions beyond answering now. What is immediately important is that he should show a sense of the complexity and interrelationships of events, and that he should go about organizing his approach to them in a manner establishing public confidence. With the Ford administration's help, this seems just what he has set out to do.

THE WASHINGTON POST.

The B-1 and the Election

Secretary of State Kissinger has read the election returns and let it be known that plans for foreign policy initiatives in the Middle East, China and at the Strategic Arms Limitation Talks will be on the shelf for the next few weeks and left for the Carter administration to handle. The Pentagon, it appears, has no such intentions.

The Air Force, evidently with Defense Secretary Rumsfeld's concurrence, is continuing to press—as it has all year—to commit the country to a $20 billion B-1 strategic bomber program by getting production started before the next administration takes office. Rumsfeld was quite right at his news conference to emphasize that it is the Ford administration's legal prerogative to prepare the next defense budget—which Carter, of course, may amend once he takes office—and to go ahead with pending decisions, one of which is whether to order the B-1 into production. The question is not whether it is legal but whether it is wise.

The cost of the controversial bomber has risen to nearly $94 million a plane. The military justification for acquiring this weapons system instead of more austere alternatives at a later date—the existing B-52 bombers retain many more years of life—is challenged even within the Pentagon. Most important, when the defense systems acquisition review committee hands down its judgment on the plane's performance later this month—a judgment that is expected to be favorable, but that cannot decide the larger strategic and economic questions—President-elect Carter will only be weeks from office.

Carter has made it clear that he has doubts about the B-1 and intends to re-examine this and other options in the light of the nation's defense needs and the prospects for a SALT-2 treaty with Moscow.

Vigorous efforts in Congress to shelve the production decision until next year were turned back by an Air Force maneuver. A conference committee "compromise" that prohibits long-term commitment of funds for this purpose also permits the Ford administration to spend about what it had planned to spend on production in the first five months of the current fiscal year, or $87 million a month until February. Experience shows that once production starts on a major weapons system momentum builds irrevocably.

That is exactly what the Air Force has in mind. But it would be irresponsible for the lame-duck Ford administration to take this route instead of leaving the major long-range decision to the president who must cope with the consequences of that decision.

THE NEW YORK TIMES.

International Opinion

Reforms in Spain

In the next week or two probably, and certainly by the end of the month, the Spanish government will face up to the delicate task of persuading some 400 aging members of the Cortes (parliament)—many of them Franco's placemen—to vote themselves out of a job. The signs are that the government is determined to force this first essential measure of reform through the house this month. There are still many stains on the Spanish authorities' record. The Spanish police, nationally organized and often heavily armed, still are shooting or beating up about as many demonstrators now as they were shooting and beating up nine months ago. These are ugly signs and there are many more to be read in the Basque provinces and in Catalonia.

But the government's critics must certainly now give it credit for the tenacity with which it is pursuing constitutional reform. This has to be its first aim; for as long as the Cortes, still encrusted with Franco's nominees, exists so does a formal legal barrier to further reform.

—*From the Guardian (London).*

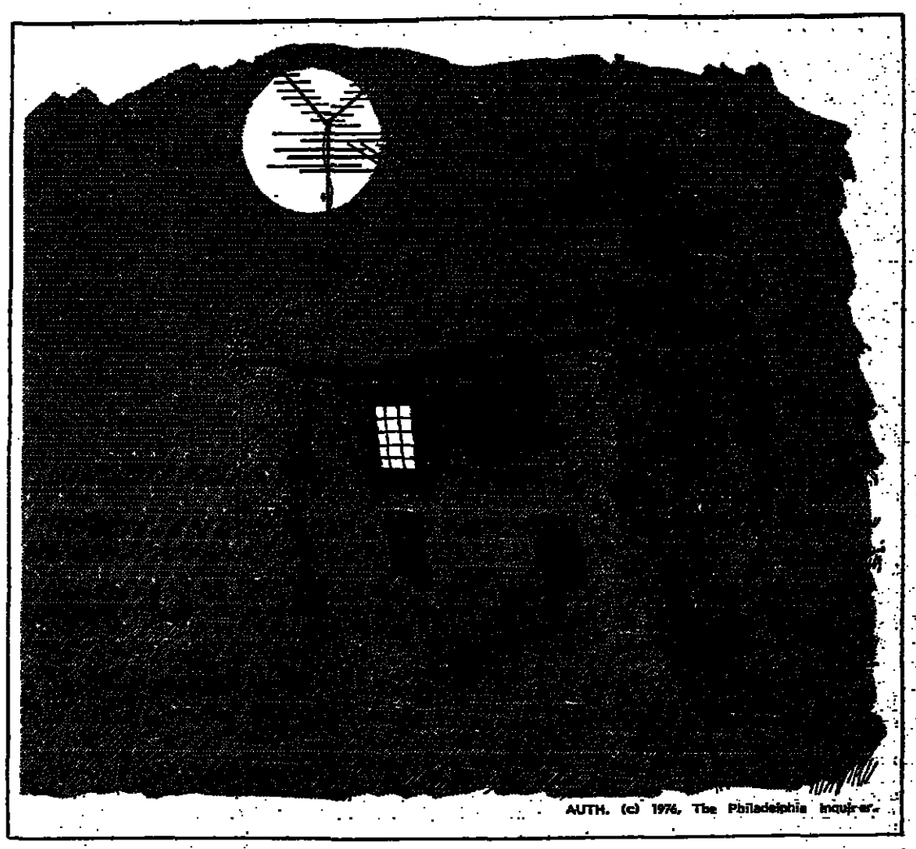
Carter the Unknown

President-elect Carter in spite of all his pronouncements is still a book with seven seals. For instance what does it mean when Carter makes promises, like other populists before him, especially open, honest, moral policies? As far as foreign policy of the United States goes there has recently rather been a certain lack of vigor than a lack of honesty. The incoming president certainly is aware that if you have to deal with totalitarian powers it is not blue eyes but power and decisiveness which count.

—*From the Neue Zuercher Zeitung (Zurich).*

In the International Edition

Seventy-Five Years Ago



November 9, 1901

NEW YORK.—The city seems to be on the verge of a bread war. Huge rival corporations with millions of dollars worth of capital are scheming to absorb the businesses of the small bakeries. Loaves produced by machinery amid hygienic surroundings will be on the market shortly, and it is likely that the prices will be cut by one half. The small bakers are greatly alarmed at the prospect, but don't really know *what to do* about it.

Fifty Years Ago

November 9, 1926

BRUSSELS.—The gala given at the Theatre de la *Monnaie last night by the city of Brussels* in honor of Prince Leopold and Princess Astrid was probably the most brilliant affair held in Brussels since the war. The beautiful gowns, jewelery, uniforms and decorations of the members of Royal families, Belgian and foreign nobility and diplomatic representatives from most of the countries of the world, made a scene never to be forgotten.

Why Keep the Electoral College?

By Anthony Lewis

NEW YORK.—After every close presidential election—1948, for example, and 1960—it is said that the shift of a few thousand votes in a handful of states would have changed the result. The statement is usually a highly theoretical one, because the odds against the necessary votes changing in all the right places are long. But in 1976 it was an entirely realistic possibility. If fewer than 4,000 voters in Ohio and the same number in Hawaii had gone for Gerald Ford instead of Jimmy Carter, Mr. Ford would be taking the oath next January.

The breathtaking closeness of this election raises questions once again about the curious system that Americans use to choose their president: the Electoral College. Electoral votes are allotted among the states not quite in proportion to population; the small states are given extra weight. And within each state the popular winner takes all the electoral votes. These two characteristics make quirky results possible.

Suppose that those 8,000 votes had gone otherwise in Ohio and Hawaii. Instead of winning the electoral vote by 297 to 241, as he actually did, Mr. Carter would have lost, 270 to 268. But he still would have had a popular majority, leading by roughly 1.7 million votes in the national totals.

Felt Cheated

Millions of Americans would inevitably have felt cheated by such a result. Resentments would have run all the stronger because a third candidate with no chance to win himself, Eugene McCarthy, might effectively have determined the outcome. In reality, the McCarthy vote was larger than Mr. Carter's margin of defeat in four states with 26 electoral votes: Maine, Iowa, Oklahoma, Oregon. The imagined shift in Ohio would have made the McCarthy vote decisive also for its 25 electors.

In short, an election in which the popular and electoral votes differed so sharply might have created a problem of political legitimacy. History suggests that it would. Three times in the past, candidates who lost in the popular vote became president—John Quincy Adams in the election of 1824, Rutherford B. Hayes in 1876, Benjamin Harrison in 1888. And the Adams and Hayes episodes left deep political scars: Andrew Jackson's resentment at losing in the House of Representatives, Southern bitterness at the Republican devices that deprived Samuel J. Tilden of victory in 1876.

Legitimacy is a fundamental concern of any electoral system in a democracy, but of course there is no one way to assure it. The French, after many experiments, choose their president by popular vote. In West Germany a legislature chosen by proportional representation elects the chancellor. The British system is election to Parliament in single-member districts, but the legitimacy of that long-standing model seems to be failing under the stresses of third parties and Scottish Nationalists.

The question is whether the uncertainties in the U.S. system, and the possible risk to perceived legitimacy, now suggest a change. Has the whole concept of the electoral vote lost its historical justification? Should Americans choose their president by straight popular vote?

Some years ago the time seemed to have come for such a change. Sen. Birch Bayh, D-Ind., proposed a constitutional amendment for a popular presidential election, and it had wide support. In 1969 it passed the House by well over the necessary two-thirds vote, 339 to 70. But a filibuster by Southern and some small-state senators stopped the Bayh amendment the next year, and it has not got anywhere since.

Election Buffs

The strong arguments for popular election are its simplicity and directness. There are election buffs who enjoy staying up all night making tables of possible electoral votes, but on the whole most Americans might prefer less uncertainty. A national popular vote would almost always make the result clear-cut and swift. (The Bayh amendment also sought to remove other confusions by authorizing uniform federal rules for registering in presidential elections, for getting on the ballot and for counting the votes.)

It is also unarguably true that the original premises of the Electoral College have vanished. The Constitution envisaged no popular vote at all, or parties. The president was to be chosen by a group of Platonic elders, the electors, who would be appointed as each state wished. The present system has developed in spite of the Constitution. History, not the plan of the framers, produced the two-party system, the winner-take-all rule, the decisive role of the large states.

But history has its claims. However unfortunate and ramshackle the electoral system may be, it represents a certain historic balance of forces; and change might alter the balance. That is why the Bayh amendment ran into difficulty. If Sen. Bayh were to push the idea again, the question is whether he would meet less resistance.

One argument against change has been that the big industrial states, which are underrepresented in the Senate, need the political leverage they get from being such big prizes under the winner-take-all electoral vote system. Time may have somewhat reduced the force of this argument. Separate state identities are less significant now than voter blocs—blacks, labor, ethnic groups and so on—and they would still have their leverage in a popular election.

Political and demographic change may also have weakened some defenses of the Electoral College system. The South is much more like the rest of the country now—and mostly eager to join it, not maintain devices of separation. Highways and suburbanization everywhere have reduced regional and urban-rural differences.

On the other hand, a national popular vote for president might make campaigns even more remote from the average citizen than they have already become. Television is most of the game now. But the candidates do make their forays into actual shopping centers and city streets—New York's garment district, and the park in front of the Alamo—and there they have some chance of sensing this huge country's different local feelings and needs. A popular-vote system could further reduce the incentive for live campaigning.

Those are just a few of the considerations that would figure in the debate over any new effort to push the Bayh amendment. Whether there will be such an effort is uncertain. One of the old impulses for reform—the fact that a few presidential electors have refused to vote for their party's candidate—has faded. But there is reason for renewed concern about the possibility of a popular loser becoming president.

A 'Tricky' Transition

By Joseph Kraft

WASHINGTON—The graceful noises issuing from President Ford and President-elect Carter suggest a happier transition than occurred the last time an incumbent president was defeated at the polls. On that occasion, back in 1932 when Roosevelt beat Hoover, the transition was, in the words of Arthur Schlesinger, "confusion in the void."

Still, more than goodwill will be required to get past the present hiatus smoothly. For a number of complex and interconnected problems—notably the avoidance of economic recession at home and abroad, which is linked with the price of oil, and also the Arab-Israeli conflict—will be surfacing as potential time bombs in the next few weeks.

By far the most urgent matter is the domestic economy. The leading indicators have gone down for two months running. Unemployment is hanging high. Final sales are lagging behind productivity, which suggests little incentive for business to expand on its own bat.

Unless there is some kind of external stimulus—presumably in the form of a temporary new tax cut—recession could set in again. But the Ford people would almost certainly want a tax cut partial to business, while the Carter administration, as the President-elect indicated in his press conference Thursday, would want to give demand a shot in the arm by help to consumers.

Complicated Signal

Moreover, the Carterites have expressed the hope that they can stimulate the economy without touching off new inflationary pressures. So Carter faces the problem of sending a complicated signal to the effect that he will not allow the economy to stagnate but that a stimulus should not be taken by the business community as a green light for higher prices.

The continuation of the U.S. recovery is particularly important for allied countries in the industrialized world. All were hard hit by the oil price rise of 1873. Italy is still in an oxygen tent. The French economy is beginning to slip. Britain needs bailing out through an international loan, and the Carter people at least ought to know something about and have a voice in the terms that are now being worked out.

All these countries are apt to be staggered by a new increase in prices when the members of the oil-exporting cartel known as OPEC meet in the last week of December. So, apart from flashing a complicated signal on the American economy, Carter has an equally complicated message to send to the oil producers—notably Saudi Arabia, which dominates the market. He needs to tell them—presumably in concert with President Ford and in secret—that anything but a very gradual increase would entail drastic repercussions.

The problem of the oil price increase leads directly into relations between Israel and the Arabs. In return for a cooperative stance on oil, the Saudis are bound to ask for more U.S. pressure on Israel to settle its disputes with the neighboring states, notably Syria.

The Syrians, having ended the Lebanese civil war, are now free to turn to their dispute with Israel over the Golan Heights. The mandate for the UN observers who presently separate Israel and Syrian forces on the Golan comes up for renewal at the end of this month. Sometime before then, accordingly, the Carter people will presumably want to work out with Ford some loose understanding about next steps in the Mideast.

Similar kinds of understandings could usefully be worked out regarding relations with China. The death of Mao and the emergence of Hua Kuo-feng as his successor means that Washington needs to trace out with Peking a new road toward normalization of relations. At the same time it might be useful to issue a campaign statement by Carter supporting a "free and independent Taiwan," which has unsettled the Peking regime not a little.

Fortunately, there is no special need for doing early business with the Russians. Moscow has already been reassured by the recent visit of that most august of U.S. statesmen, Ambassador Averell Harriman, of Carter's interest in speedily concluding the second arms control agreement (SALT-2), which Secretary Kissinger has nearly brought to fruition. Carter deftly used the occasion of his first press conference as President-elect to correct any misapprehensions some of his campaign statements might have given Moscow about U.S. determination to support the independence of Yugoslavia.

What this says to me is that the transition is apt to be far more tricky than the opening notes of harmony between the outgoing and incoming administrations might indicate. The measure of success lies not in friendly rhetoric but in handling problems that, if left untended, would have serious long-term consequences.

—Letters—

Tax and Sympathy

I read and re-read the front-page spread about Americans deserting Europe, and particularly France, because of the new tax laws (IHT, Oct. 29).

None of us, I suppose, likes to think of himself as rich, especially when the subject at hand is income taxes. Yet my capacity for sympathy is severely strained when I am asked to consider the plight of "the American executive with an income of $50,000, plus $25,000 in allowances," who (says an accounting firm that wants not to be identified) will be asked to contribute significantly to the U.S. Treasury.

Please do not wait for people with a normal or simply adequate income to join this beleaguered executive at the second tea party.

ROBIN CODY.

Sevres, France.

Atonement?

The United States must be atoning for some great sin—to be inflicted, in rapid succession, by a Nixon, a Ford and a Carter. God help America!

JERRY O'CONNOR.

Alhaurin de la Torre, Spain.

John Dornberg From Munich:

Just what kind of force is West Germany's Bundeswehr?

MUNICH.—Though it crops up periodically, the firing of two generals by Defense Minister Georg Leber last week again raises a perennial question: Just what kind of armed force is West Germany's postwar Bundeswehr?

The furor over the firing of Lt. Gen. Walter Krupinski, operational head of the Luftwaffe, and his deputy, Maj. Gen. Karl-Heinz Franke, began innocently enough.

Last spring, it seems, the commander of the "Immelmann" air reconnaissance wing, stationed near Freiburg, requested approval to hold an on-base reunion between his men and veterans of the famed World War II "Immelmann" dive-bomber wing.

Such rallies are routinely encouraged as efforts to imbue the new Luftwaffe with some inspiring traditions. But in this case the Defense Ministry's civilian leadership balked. The trouble was that ex-Col. Hans-Ulrich Rudel, the old wing's wartime commander, would undoubtedly attend too.

Not Ordinary

Rudel is no ordinary veteran. As a Stuka pilot he flew 2,530 sorties, helped lay waste to Rotterdam and Warsaw, destroyed 519 Soviet tanks, three warships, 70 landing craft and was himself shot down 30 times.

He was Hitler's favorite and wartime Germany's most highly decorated officer. Stalin once offered a 100,000-ruble reward for his head.

After a stint as a U.S. prisoner of war, Rudel went to Argentina, where he befriended Perón and arranged a haven for other ex-Nazis. He then returned to West Germany as an active supporter of ultrarightist parties, ultimately banned as neo-Nazi and unconstitutional.

His memoirs are such a glorification of the Nazi era that they are on the index of proscribed books as "injurious to youth," meaning they must be sold under the counter to "adults only" like pornography.

Rudel is, as it is said, "a man who has forgotten nothing and learned nothing." For him to appear quasi-officially on a Bundeswehr base would obviously be incompatible with the lofty aims of a "democratic" air force. Approval for the reunion was denied.

But through a series of flukes and misunderstandings—personal, political, bureaucratic and semantic—the initial order was rescinded.

Two weeks ago the old "Immelmann" group met with the n one for a weekend of dining a wining, singing, flying and reminiscences. Rudel, of cou was there—right in the limeli —autographing copies of books.

Predictably, there were prote But the flurry might have s sided had Gens. Franke Krupinski, the latter Rudel's time flying mate, not attem to justify the affair by say that ex-Nazi Rudel has as m right to speak as ex-Commun now in the Bundestag, specific naming Herbert Wehner, Social Democratic (SPD) par mentary floor leader.

That comparison was patei invalid, for Rudel has co tently identified himself radical and neo-Nazi ca whereas Wehner's total and voted commitment to democ since 1945 is unimpeachable.

More important, however, maligning a member of pa ment as Defense Minister L put it, the two generals "cro a line which no soldier in service of a democracy is ent to cross."

Whether forcible retirem was the right response or, as opposition Christian Democ (CDU/CSU) and many Bun wehr officers maintain, si mands would have sufficed open to debate. So is the q tion whether Leber, reputedly awe of generals and usually soft on them, was flexing muscles.

Grab the Chance?

But since it is not the case of West German gen speaking and acting out of t it does raise questions of w the Bundeswehr is heading.

When rearmament is proffered, by the United St in the 1950s, most observers dicted the West Germans w grab the chance. Report John J. McCloy, the U.S. commissioner, even said he w have "a new army of a mil all eager-eyed, behind me," be to march the length of country with a brass band loudspeaker truck.

No reading of postwar Germany's mood was ever wrong, or has proven to b consistently wrong for so a time.

The overwhelming majorit West Germans, having enough of armies, were t opposed to rearmament. To day some 30,000 of them ann make use of their constituti right to register as conscien objectors.

The new army was to be "d ocratic" and composed of "citi in uniform" trained and enc aged to think for themselves would be under strict civ control and stripped of all t pings that might make it the ject of false-hero-worship or focus of chauvinistic pride.

An entirely new attitude tow military service was cultiv Not only was the Bundesw mission totally integrated NATO, but its role in society redefined. So was the sold role in the Bundeswehr—as a son with basic civil rights human dignity, trained by m ods novel and alien to Ger military tradition.

On balance, these concepts b been successfully impleme since the first volunteers repo for duty in a Bonn garag years ago.

Relapses

Whenever they have not w ed, or there have been rela to past military practices and ttudes toward the civilian lea ship, such as Franke's and K pinski's recent remarks, it because the Bundeswehr was but its officers were not.

An entire generation is approaching retirement age starting to disappear, even am the 270 generals and admi This year, for the first time half-dozen army and air fo colonels and naval captains their mid-40s, too young to h served in the old Wehrma have been promoted to gen and flag-officer rank.

The "Rudel" affair appears opens speculation about the tent to which they may have b influenced by their seniors. Th is no easy answer. But hopefu in their search for traditio which the Bundeswehr does yet have and which all arm supposedly need, they will l elsewhere than among the hei of the Third Reich.

aking a Look at The Fashion Pros

By Hebe Dorsey

RIS (IHT).—At any fashion ollection, the show is as n in the room as on the way—if not more so.

ite oblivious to the warning ge not lest you be judged," fashion crowd—editors and ophers, buyers and assorted ear some of the strangest es around. They scout even fashion designers' one of m recently confessed: "I etimes wonder what some of e women are doing here."

ominated by women, the fash- morphs falls into three groups: first, and most interesting, an abstract, detached, and reaching view of fashion y have their own style, they in tune with the times and play themselves. They are quite capable of sulking an careful trend if they feel it ot for them.

ese sturdy souls are rare, common is the Champion tries to spin as fast as the ion wheel but always finds elf left out in the cold. Be- se she is always looking fashions six months in ad- she cannot possibly ever in step herself at the open-

Losing Battle

ast week in Paris, for in- ce, with hundreds of fashion s crowded out in all kinds of ies, the new trends on the ay were sadly romantic. re there were the editors in ey long skirts when the r was short, short, short. A ng battle, all right.

nually, there is the third and kind—the I-couldn't-care- s, anti-fashion foreign legion, trudge around fashion shows they were headed for the mines. They dress in work shoes, shawls, boots, shirts, all ds nondescript, unrelated,

Fashion pros at the recent ready-to-wear shows in Paris.

Blythe Muna/Sipa Press

oversized and shabby. A sad lot. Of course, this is one way to avoid the issue, but it does raise a question. Can women who dress that way have a feeling for clothes?

Some of the best-dressed people in the fashion crowd are the photographers, both men and women. Since they have to lug cameras, push and shove to take pictures, they often dress in rugged and highly practical outfits. Last summer Lord Snowdon, who carries one camera at a time, wore jeans and jeans jacket to the couture collections. Last week Castelbajac's rough styles were most appropriate—getting into the ready-to-wear shows is often a mob scene.

It used to be that the kookiest-looking journalists were British. Not so anymore. The French have now caught up—but they, unfortunately, lack the British sense of humor.

American fashion editors are usually the most pulled together in a safe, conservative way. But they make up for it with accessories—for instance, dozens of clanging bangles. Italians are very wooly, no doubt because of the marvelous Italian knits.

Customers and fans going to a collection feel they are casting a vote as well. Hence all the "here-here" Saint Laurents at a Saint Laurent collection or all the Chloés at a Chloé show.

Fashion editors are so involved with fashion that they are often unable to tell the forest for the trees. They usually have far more clothes than the average woman but are forever sighing: "I have nothing to wear."

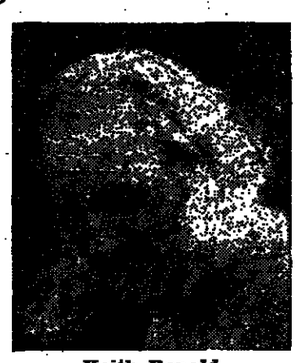
Champion for Mediterranean Seal

By Williard Manus

ATHENS (IHT).—It is an unlikely sight: a helicopter suddenly descending on a cow pasture outside the tiny village of Olympos, an island settlement so remote that the people still wear the traditional embroidered clothes of Greece.

Equally unlikely is the burly, graying Canadian who leaps out of the chopper and rushes down to the harbor to begin talking to the fishermen about seal conservation. At first, the fishermen look at each other in amazement and ask: "Who is this *trellos* (crazy one) dropping out of the sky to lecture about seals?" To them, seals are the enemy. They destroy nets, steal fish.

Yet the Canadian is so persuasive that within half an hour the fishermen have sworn to help him save the Mediterranean seal. From now on, instead of shooting seals, they will simply report the sighting to the authorities.



Keith Ronald, dean of the College of Biology at the University of Guelph, spends his vacations trying to save an obscure species of seal: Monachus Monachus, and studying it in the winter.

Pessimism

The seal is a small link in the threatened life chain and Ronald is not sure if either the chain or the seal can be saved. "I have become a pessimist in my old age." He is 48.

The written history of the monk seal of the Mediterranean dates to Homer, Plutarch, Pliny and Aristotle, who all wrote about it. In mythology, it was under the protection of Poseidon and Apollo, because of its love of the water and its docility, agility and intelligence.

Today, the existence of monk seals is threatened by pollution, over-fishing and exploitation of coastlines. Only 400 to 800 are estimated to be alive in the entire Mediterranean region. Their disappearance would be a tragedy, Mr. Ronald believes. "If the seal can't survive in the Med, then man himself may not be able to. Seals are air-breathing mammals, as we are. They are an indicator species of pollution, a guide to man's survival."

Keith Ronald
. . *seal saver.*

The crux of the problem, he adds, is that any marine mammal which competes with man is always in trouble. Man will not share.

With grants from the National Research Council of Canada and the Canadian National Sportsmen's Show, Mr. Ronald's three-stage program—to establish the habitats of the seals, to put together data on them, and to persuade local governments to set up seal preserves—is well under way. On his campaign trips, Mr. Ronald talks not only to fishermen but also to scientists and government officials.

Headquarters

Headquarters for this campaign is at Guelph, Ontario, where Mr. Ronald has been instrumental in building a topnotch marine biology laboratory. Some 65 seals have been kept in captivity there. Scientists are studying their diving, breathing and communication techniques.

The seal can stay underwater at great depths for as long as 45 minutes, thanks to a mechanism which slows down its heartbeat and restricts the flow of blood from heart to brain.

Mr. Ronald thinks man can benefit from the Guelph research. "Open-heart surgery, for instance, could be revolutionized if the patient were able to slow down his heartbeat to near zero, as the seal does underwater.

"Then, too, man is starting to move back into and under the sea again, using artificial aids like scuba and submersibles. All of these things raise problems of pressure and decompression. The seal, though, can go straight down and straight back up again. It doesn't have any of the wasteful periods we face.

"If we can figure out how the seal does it and adapt these methods for our own purposes, man will be a lot more successful in his exploration of the sea."

As for the whole ecological problem, Mr. Ronald says, "we have 25 years in which to correct 300 years' worth of mistakes. Unless we can seize history now and turn it down a new path, our ecological sufferings will be swifter and more terrible than we can perhaps imagine." In a recent speech, he was blunter. "Whatever happens ecologically in the next 25 years will happen to you, not others. Man has entered for the first time into an era of the *us*, not the *they*. What biologists are predicting will happen to *us*."

ARTS AGENDA: *A French Hearing for Milhaud's 'Orestie'*

The first complete performance in France of Darius Milhaud's "L'Orestie"—his setting of the Aeschylus trilogy in Paul Claudel's translation—will take place Nov. 10 at the Maison de Radio-France in Paris in a concert performance conducted by Maurice Abravanel, musical director of the Utah Symphony Orchestra. Singers in principal parts include Colette Herzog as Clytemnestre, Hélène Garetti as Electre, Michel Philippe as Oreste and Claude Meloni as Apollon, with the participation of the Nouvel Orchestre Philharmonique and the Radio's chorus and children's chorus.

The London Philharmonic Orchestra has left for a three-week tour of the United States, where it will give 15 concerts in 12 cities under its artistic director, Bernard Haitink. Besides concerts in New York, Washington, Boston, Chicago and Philadelphia, the orchestra will perform in seven Midwestern cities. The tour repertory will include Malcolm Arnold's "Philharmonic Concerto," which had its first performance in London on Oct. 31, as well as works by Mahler, Elgar, Debussy, Beethoven, Haydn and Shostakovich.

* * *

The Concerts du Dimanche Matin, a chamber music series introduced last season at the Théâtre d'Orsay in Paris, opened its second season Nov. 7 with a recital by the pianist Claude Helffer. This will be followed on Nov. 14 by a concert by the baritone Max Van Egmond, harpsichordist Ton Koopman and cellist Richte Van Herr Meer; on Nov. 21 by the trio Emmanuel Krivine, violin, Jean-Claude Pennetier, piano, and Frederic Lodeon, cello, and on Nov. 28 by the violin-piano duo of Pierre Amoyal and Pascal Rogé.

* * *

The London Chamber Orchestra conducted by Adrian Sunshine inaugurated a new concert series, the Grands Concerts Pleyel, on Nov. 8 at the Salle Pleyel in Paris. Soloist at the opening concert was the Soviet violinist Oleg Kagan.

* * *

Robert Brown, violinist in the production of Robert Wilson and Philip Glass's "Einstein on the Beach" at the Avignon Festival and elsewhere in Europe this fall, will give a recital Nov. 10 at the American Cultural Center in Paris (3 Rue du Dragon), with a program of works by Glass, Robert Kurka, Robert Parris, Samuel Cytron and Malcolm Seagrave.

Entertainment In New York

NEW YORK, Nov. 8 (IHT).—This is how critics for The New York Times rate new films:

"The Slipper and the Rose," with music and lyrics by Robert and Richard Sherman, is a long, elaborate musical version of Cinderella that Vincent Canby says, "should not be dismissed. It's harmless, but it goes on so long and with so little suspense" that it may well outlast the staying power of even the most patient child as well as the accompanying adult. Richard Chamberlain is the prince, Gemma Craven is Cinderella and the late Dame Edith Evans is the prince's old granny. "The castles are pretty, the costumes are suitably candy colored and the supporting cast is excellent including Michael Hordern, Annette Crosbie and Margaret Lockwood." But Chamberlain and Miss Craven "have impossible roles that are less like characters in a fairy tale than pictures on a jar of peanut butter." The Shermans' music sounds "like they're parodying the worst of the musical theater of the '50s." Director Bryan Forbes, who also worked with Robert Sherman on the screenplay, "has stretched the fable without mercy."

"The Incredible Sarah," with Glenda Jackson in the lead, "is a foolishly romantic movie about the young Sarah Bernhardt," Vincent Canby says. Miss Jackson "is the only reason to put up with the cliché lunacies of this film for more than five minutes. In every other respect it's a disaster seemingly calculated to send women back to the kitchen." Helen Strauss produced it, Richard Fleischer is the director and Ruth Wolff wrote the screenplay.

ravinsky Score ges Unauctioned

ONDON, Nov. 8 (AP).—Igor ravinsky's manuscript score of ballet "Agon" failed to reach reserve price and was with- wn today at Sotheby's auc- n house.

The bidding on the 98-page manuscript stopped at £23,000 ,800). It was expected to ch between £40,000 and £50,-

A spokesman for the firm d that the score would go back its owner, whose name was not public. "Agon" was first ormed in 1957 in New York.

They'll not only give you a new idea about Fiats, they'll give you a new idea about cars.

By simply looking at the Fiat 131 and 132 you can see they're different from other Fiats. They're larger. They're more comfortable. They're more luxurious.

But the most dramatic differences are those you can't see.

To begin with, the 131 and 132 are built to last longer than not only small cars, but other cars in general. (This is no small feat when you consider that, according to a Swedish government study, the average Fiat will last 11.9 years.)

The engines in the 131 and 132 were tested for over a million miles. The valves last twice as long as ordinary valves. The rings last far longer than ordinary rings. The entire underbody is sealed against the elements. The wheels are protected by what we believe is the most advanced rustproofing system in the world today.

The 131 and 132 aren't only stronger than other cars. In many ways they're safer. (Although this may seem hard to believe, the 131 is 30% stronger in torsional rigidity than the old Fiat 124.) The entire passenger compartments of both the 131 and 132 are protected by a steel cage that's indeformable from both the front and sides. The steering column collapses upon impact. The fuel tank on the 131 is safely tucked away behind the backseat.

The 131 and 132 have an improved soundproofing system to make them quieter. And their engines were built to reach maximum torque at low revolutions for longer engine life and better fuel consumption.

For all their luxury, their long life, their sophisticated engineering, the 131 and 132 offer enormous value. To find cars of comparable quality and comparable features, you'd have to spend hundreds, perhaps thousands, more.

But what makes these Fiats most different from other cars is something that's virtually impossible to define.

Simply, the 131 and 132 drive like Fiats. Which means they perform like no other cars in the world.

As you may have heard, Fiat is the European Rally Champion. The winner of one of the most gruelling tests of durability and performance in the racing world. It was a title won not over one race, but over 30 separate races. Won not over one competitor, but over virtually every car maker in Europe.

It's a quality you'll have to see to believe in our bigger cars.

FIAT

Now that United Technologies' registered shares are traded on The London Stock Exchange, here is a summary of what British investors should know about us.

Headquartered in Hartford, Connecticut, U.S.A., United Technologies designs, manufactures and markets high technology products—for commercial, industrial and government markets around the world—with annual revenues of almost $5 billion and more than 130,000 employees.

The corporation operates more than 170 plants throughout the world and maintains marketing representation in 130 countries. Sales outside the United States amounted to $1.4 billion in 1975. In addition, licenses have been granted for the production of more than 50 of our products in Europe, Asia, Latin America and Australia.

We are partners with European industry in the co-production of military aircraft engines for Belgium, Denmark, The Netherlands and Norway.

Three major lines of business

High technology is our basic strength. Here's how we put it to work in the corporation's three major product groups.

Power

Our Pratt & Whitney Aircraft engines are used on commercial jetliners such as the Boeing 747 and McDonnell Douglas DC-10, series 40, and are in service or on order for nearly 200 airlines around the world.

We are the leading manufacturer of engines for military aircraft including the General Dynamics F-16, the McDonnell Douglas F-15 and the Grumman F-14.

We are also an important manufacturer of industrial and marine gas turbines and of propulsion systems for space exploration.

Systems

Our Sikorsky helicopters enjoy a global reputation for reliability in both military use and in commercial applications such as offshore oil production, off-loading of ships, building construction and executive travel.

Our Hamilton Standard Division manufactures aircraft engine controls and other airborne devices, and computer-controlled automotive diagnostic equipment.

Industrial

The name Otis is synonymous with elevators. Our *Otis* elevators and escalators move the equivalent of the world's population every nine days. Our Essex Group is a leading manufacturer of conductors, controls and devices relating to the transmission, distribution and application of electricity.

Managing high technology for our shareholders

Our capabilities as a high technology, multi-market industrial organization continue to be demonstrated in our financial results. Following a record 1975, nine months' net income for 1976 increased 33% on a 47% increase in sales. The 1976 results include those of Otis Elevator which became a subsidiary in November 1975.

	1st nine months 1976	1st nine months 1975	Third quarter 1976	Third quarter 1975
	$000	$000	$000	$000
Sales	3,806,605	2,586,044	1,271,415	864,867
Net income	117,920	88,659	40,672	27,352
Earnings per share:				
Primary	$3.87	$2.96*	$1.26	$0.90*
Fully diluted	$2.76	$2.20*	$0.90	$0.69*
Dividend on common stock	$0.8875	$0.75*	$0.30*	$0.25*

*Restated to give effect to 100 percent stock distribution to holders of record May 4, 1976.

The stock of our our corporation has been listed on the Amsterdam and Brussels Exchanges for almost 20 years. In addition to The London Stock Exchange, we are now also listed on the Exchanges of Frankfurt, Zurich, Basle and Geneva.

For further financial information, write C. William Schick, Vice President–Finance, United Technologies (Europe) Inc., Avenue Lloyd George 7, B 1050 Brussels, Belgium.

ound and Dollar Fall, Gold Price Gains $5

DON, Nov. 8 (AP-DJ)— ng and the dollar declined st Continental currencies in what seemed to be fair- sk trading.

ling's decline was quite after Chancello. Denis y acknowledged over the nd that the U.K. Treasury evising upward its estimate e public sector borrowing ement for the next fiscal beginning next March. nles in some British news- papers suggested that the deficit would total around £11 billion, compared with the Treasury's previous estimate of £8 billion. The increase was attributed to a slowdown in the economy and lower tax receipts and a rise in inflation, unemployment payments and interest costs.

Another indication that inflation in Britain has begun to accelerate was provided today with the disclosure that Britain's wholesale price index rose 1.5 per cent in October to 18.5 per cent above a year earlier while the index for manufacturers' raw materials rose 4.25 per cent in October to 29.75 per cent above a year earlier.

With these unsettling developments the pound fell to $1.6167 from $1.6340 late Friday and to 3.5990 marks from 3.9579. Furthermore, sterling's trade-weighted depreciation against 10 currencies widened to 46.7 per cent below 1971 parities from 45.9 per cent Friday.

Dealers tended to attribute weakness of the dollar against Continental currencies to strong demand for deutsche marks as much as anything. The dollar fell to 2.4117 marks from 2.4222 but was only slightly lower against the Swiss franc at 2.4420 compared with 2.4437. The U.S. currency also eased against the French franc to 4.9810 from 4.9925 but was only marginally changed against the lira at 865.10 compared with 865.25.

Aid From EEC

In Brussels today, Chancellor Healey strongly implied that any further financial assistance for Britain, especially the funding of sterling balances, depends entirely on the outcome of talks between the International Monetary Fund and Britain on a $3.9-billion loan to the United Kingdom.

Speaking with reporters after a meeting of Common Market finance ministers, Mr. Healey said Britain's financial problems were discussed privately among the ministers.

"All expressed willingness collectively and individually" to assist Britain, Mr. Healey said, adding that it is "understood, however, that "discussions cannot get under way until it is clear that IMF negotiations are successfully concluded."

Gold Price Soars

Meanwhile the price of gold soared on European bullion markets today amid growing speculation that U.S. President-elect Jimmy Carter's economic policy could touch off a worldwide inflationary spiral and send investors scurrying for the safety of the yellow metal.

The price of gold's advance was much the same on most European bullion marts—around $5 an ounce up on Friday's closing quotes.

S. Official es Success Trade Talks

NEVA, Nov. 8 (NYT).—Wil- Walker, head of the U.S. ation to the world trade talks said today that the suc- l conclusion of the nego- ns by the end of 1977 re- s a "viable goal."

Walker indicated at a press ng concern that the shift Democratic administration ashington would not slow the tions.

Democratic-controlled Con- and all major private busi- sectors have been closely dated with the development S. trade policy, he noted.

is should enable the new nistration to come quickly to speed" on the trade nego- ns, Mr. Walker said.

he real question," he con- d, is whether the world eco- e recovery will be sufficient ive politicans the needed room to shift policies and the accommodations that governments will have to to bring the trade talks successful end.

Walker said that the c ingredients" of a bargain now taken shape as a result he long preparatory work question now is the ability overnments to deploy the ical strength and skills sary to bring the bargain ution," he said.

Walker did not say her he expected the present negotiating team to be ask- n serve under President Jimmy Carter.

he said that "for the pur- of the negotiations we are harge and are continuing on business."

05 Million Paid r Newspaper ouping in U.S.

TROIT, Nov. 8 (AP).—News r publisher S.I. Newhouse nced today that he has red approximately 97 per of the 7.47 million shares of gan-based Booth News- rs Inc. in the biggest news- purchase in American r—a total of $305 million.

Newhouse purchased about cent of Booth stock earlier year and last month made of $47 a share for the re- ing stock. He paid a total 05 million for the 97 per of the Booth stocks he pur- ased.

a Los Angeles-based Times r Co. had offered $40 a but dropped out of the ng after the later Newhouse

Herald Co. of Syracuse, acting as agent for Mr. ouse, said in New York to- that it would extend the ne on its offer to Nov. 19.

rns to Remain Fed Chairman

SHINGTON, Nov. 8 (AP- —Arthur Burns as expected nnounced he plans to remain hairman of the Federal ve Board.

72-year-old chairman spoke is future plans at a joint ng last week in Dallas of director of the Federal ve Bank of Dallas and its hes. In response to a ques- Mr. Burns replied that he remain at his job," a Fed sman said.

ough Mr. Burns has made it for some time that the elec- of a Democratic president not cause him to step his Dallas statement was hairman's first public com- since Jimmy Carter's elec- victory last Tuesday.

Differs From U.S. Definition

Japan View of 'Joint Venture'

TOKYO, Nov. 8 (AP-DJ).—A growing number of disillusioned foreign firms engaged in joint ventures with Japanese firms are experiencing undreamed of difficulties.

The result has been an increase in the dissolution of joint ventures or a change in the operating agreement between the firms involved.

One U.S. businessman who has followed the history of several joint ventures says: "I've seen people come in here full of vim and vinegar, and I've seen them leave three years later with their heads bloodied. The simple truth is that the Japanese don't want you in here."

Oddly enough, the subtle but effective restrictions that Japan imposes on foreign operations within its borders have in many cases encouraged the formation of joint ventures. Many non-Japanese companies over the years believed this form of organization to be the least complicated way to enter the Japanese market.

Choosing an equity interest in such a venture over the mechanism of a licensing agreement, foreign partners frequently provide their technological knowhow in exchange for access to the sales and distribution of the Japanese partners.

"The Americans see it as a beachhead. The Japanese see it as a vehicle to get technology," explains James Abegglen, president of Boston Consulting Group, Tokyo.

It is not an easy road, no matter what technique is used. According to a poll of 1,774 foreign affiliates in Japan conducted by the Ministry of International Trade and Industry, enterprises in which foreign companies owned interests of 25 per cent or more accounted for only 1.9 per cent of the sales of all Japanese industries as of March, 1975.

There have been some notable joint venture success stories—Coca Cola (Japan), IBM Japan and Asahi-Dow—but, according to some observers, the story from now on may be break-ups rather than marriages.

Japan's need for technology has gradually diminished as the Japanese acquired their own expertise; Japan's recession has dimmed the attraction of the local market for some foreign investors, and, finally, mutual misunderstandings over the ultimate goals of the joint ventures have contributed to a growing number of break-ups.

One private tabulation puts the number of foreign-capital affiliated companies in Japan that withdrew their investments, dissolved joint ventures or became inactive at 26 last year, up from only six in 1972. In the first half of 1976 there were 15 more such dissolutions.

The breakup of a joint venture often does not result in complete divorce of the two former partners. Often it results in a change in the operating agreement, with one firm taking over the complete management of the venture and the other firm sometimes retreating to a fixed royalty arrangement.

Such was the case of General Mills Inc., which last year agreed to substantially change the terms of its 10-year-old joint venture with Morinaga & Co., one of the oldest consumer products firms in Japan.

Both parents retain their 50-per-cent ownership of the venture, called Morinaga-General Mills, but General Mills now receives a fixed amount of royalties from the operation, rather than a percentage.

The transfer of product technology also has been revised, and Morinaga no longer has first priority on food products not now being made by existing facilities in Japan. For example, if General Mills wanted to introduce a new popcorn here, it could market it through its own Japanese affiliate without using Morinaga's sales network.

An American businessman with experience in another venture comments: "An American company's prime mistake is to assume that a joint venture in Japan means that it's 'joint.' You must decide right off the bat whether you'll control it or will put confidence in the Japanese organization."

Trend in U.S. Expected to Continue

Firms to Use Own Funds to Meet Needs

By Herbert Koshetz

NEW YORK, Nov. 8 (NYT).—U.S. corporations will continue to rely heavily on internally generated funds to meet their financial needs next year, according to a study made by the Conference Board and released over the weekend.

The study, based on responses from 54 senior financial executives of leading non-financial companies, will be issued twice a year. The first findings show that 80 per cent of the companies' financial requirements are met by internal funds and the remaining 20 per cent from new bond and equity issues. This pattern has prevailed in 1976 and is expected to continue into next year.

The executives who were queried by the Conference Board, a non-profit research group, came to the following conclusions:

• Corporate financing will take place in an environment in which both prices and interest rates are expected to rise in the next two years.

• Economic recovery should continue in 1977 and 1978, but the rate of growth of the economy is generally expected to slow down in 1978.

5.1% Growth Seen

The executives in the survey predicted an average growth rate in the economy next year of 5.1 per cent. About three-fourths of them see real economic growth averaging between 4 per cent and 6 per cent both in the current quarter and in 1977.

This view matches the Conference Board's estimate of real growth in the range of 3.8 per cent to 5.5 per cent. The executives said that real growth would slow to an average of 4.2 per cent in 1978.

About one-third of the real growth would be less than 4 per cent, and two of the executives predicted a rate of less than 2 per cent.

Executives predicted that the consumer price index would rise to an annual rate of increase of 5.7 per cent in December, 5.8 per cent in 1977 and 6.1 per cent in 1978. None expect it to increase les. than 4 per cent annually in the two years under study.

The executives predicted that the banks' prime rate, now 6.5 per cent, would rise to an average of 7.1 per cent by the end of this year, 7.5 per cent in 1977 and 8 per cent in 1978.

Meanwhile, the National Association of Purchasing Management Inc. reported that its member companies found an increase in output in October from the September level.

E.F. Andrews, chairman of the association's business survey committee, pointed out that the rate of rise in production, although small, was encouraging in view of the slowing rate of rise since last April.

Mr. Andrews said the members reported that general business was continuing to plod along at a sluggish pace. They said that price rises continued moderately, inventories dropped and vendor deliveries speeded up. At the same time, forward order positions were tightening up.

Because of the sluggish pace, Mr. Andrews said, purchasing managers do not expect that the threat of energy shortages this winter will have a really serious impact on their business.

U.K. Agency Seeks Euroloan With 'Aggressive' Low Terms

PARIS, Nov. 8 (IHT).—The British government plans to raise $75 million in a five-year Eurobond issue to be announced later this week. The borrower will be the South of Scotland Electricity Board.

The coupon on the five-year loan is expected to be 8 1/4 per cent.

Continental bankers view the terms as "very aggressive." The outstanding five-year loans of other U.K. government-guaranteed state agencies are currently yielding 8 1/2 to 8 3/4 per cent.

Britain is believed to be unwilling to offer a higher coupon because it wants to preserve its image of a top credit-rated borrower even though the 8 1/4 per cent is already a concession to the fact that it is not.

In July, the last time Britain tapped the Eurobond market, the National Coal Board sold five-year notes with a coupon of 8 5/8 per cent at a time when the European Coal and Steel Community was able to borrow at 8 1/2 per cent for 10 years. Pricing on these two issues pushed the yield on the U.K. loan to 8 3/4 per cent while the Coal and Steel yield rose to 8.61 per cent.

Others Pay Less

Since then, interest rates have fallen and the European Investment Bank is now paying 7 3/4 per cent on its $50-million five-year loan. Thus, the 8 1/4-per-cent coupon on the U.K. loan attempts to preserve the roughly half-point differential that it had already conceded it had to pay over triple-A-rated borrowers.

However, considering the yields on outstanding five-year U.K. paper, bankers question whether investors will be willing to accept a coupon of 8 1/4 per cent. The notes would have to be priced at 99 to bring the yield up to 8 1/2 per cent and 98 to lift it to 8 3/4 per cent.

These yields indicate that the market puts the going rate for U.K. paper at almost a full percentage point over the current "prime" rate of 7 3/4 per cent.

In light of the dispute about where the right rate for U.K. paper is or should be, some bankers believe that $75 million may be too large for the market to accept.

Although the report could not be confirmed tonight, one of the major Swiss banks is said to have refused the invitation to participate as a managing underwriter. The other two major Swiss banks are said to be studying the matter.

Air Fare Rise Seen Following Boost by OPEC

SINGAPORE, Nov. 8 (AP).—Airline passengers should prepare for higher fares if the Organization of Petroleum Exporting Countries boosts the price of crude oil next month.

"For 18 months fuel prices have been relatively stable, but OPEC meets in December," Knut Hammarskjold, director-general of the International Air Transport Association (IATA), told the annual general meeting today.

"This is expected to put an end to the stability. The best estimate seems to be for an increase in crude prices between 10 and 15 per cent. This translates to some $250 to $375 million of additional costs to airlines on scheduled services alone," he said.

Fare increases would be necessary to cover additional costs and the public and governments should be prepared, said Mr. Hammarskjold. He declined to forecast how large the fare increases might be.

Japan Ship Orders Rise by 50 Per Cent

TOKYO, Nov. 8 (AP-DJ).—New orders for ship exports received by Japanese shipbuilders rose about 50 per cent in the first half ended Sept. 30 from the year-earlier period to total 3.14 million gross ton or 256 vessels, the Japan Ship Exporters Association announced.

A spokesman for the association said orders in the fiscal year ending March are expected to be about 5 million gross tons. Orders in fiscal 1975 totaled 394 vessels, or 5.4 million tons, he said.

Japanese Firm's Earnings Gain 40% in Half Year

TOKYO, Nov. 8 (AP-DJ).—Net profit of Ishikawajima-Harima Heavy Industries rose by 40 per cent in the first half ended Sept. 30, the company reported today.

Profit totaled 5.6 billion yen ($18.9 million), up from 4 billion yen in the 1975 first half. Sales rose to 293.8 billion yen from 390.98 billion yen a year earlier.

Sharp Corp., meanwhile, said its net profit rose 130.9 per cent in the first half to 2.6 billion yen from 1.1 billion yen a year earlier.

Sales rose to 144.8 billion yen from 95.3 billion yen. The major manufacturer of electronic appliances and business machines said net profit in the fiscal year ending March 31 will rise 105.6 per cent over fiscal 1975, to 5.61 billion yen.

Lucas Industries Net Up

LONDON, Nov. 8 (AP-DJ).—Net profit of Lucas Industries Ltd. rose to £28.8 million in the year ended July 31, up from £16.7 million the previous year, the company said today.

Sales rose to £719.3 million from £570.2 million.

The automotive and aerospace components producer set a dividend for the year of 7.36 pence, up 40 per cent.

U.S. Firms' Profits Rise by 14%

By Clare M. Reckert

NEW YORK, Nov. 8 (NYT).—American business continued to show solid earnings progress in this year's third quarter, when corporate profits climbed 14 per cent from the year-earlier levels, exceeding the expectations of many financial experts in view of the economic slowdown since midyear, according to a Citibank survey.

Although the lull may linger for the rest of 1976, corporate profits are expected to continue their growth, but at a slower rate. For all of this year most economists are predicting that corporate earnings will be about 25 per cent ahead of 1975.

The year-to-year advance in third-quarter earnings was well below that of this year's first quarter (44 per cent) and second quarter (30 per cent). However, the comparisons in the first two quarters of 1975 were made with the sharply depressed levels of last year's first half.

Third-quarter earnings were down 4 per cent from the second-quarter level, but, as Citibank economists observe, "the apparent slowdown in profits is neither unusual nor terribly disconcerting."

The 1,448 companies covered in the survey had after-tax earnings of $15.9 billion in the third quarter. This compares with $16.5 billion earned in the second quarter of this year and with $13.9 billion in the third quarter of 1975.

Producers' Profit

The third-quarter profits of 958 manufacturing corporations in the survey were 13 per cent higher, at $11.1 billion, than their $9.6-billion total in the third quarter of last year.

Of the 22 categories in the manufacturing list, only the tobacco, rubber and photo equipment-instrument fields reported declines. Gains of the others ranged from 3 per cent for the chemical-plant producers to 74 per cent for textile companies.

Mainly accounting for the setback of the tobacco products group was R.J. Reynolds Industries, the leader in the field, whose profit fell 18 per cent despite a 19-per-cent sales rise. A $40-million swing in pretax earnings between 1975's third quarter foreign-currency gains and the third-quarter losses this year had the effect of reducing net income at Reynolds by $20.4 million.

The four-month rubber workers' strike against most domestic tire plants of the four biggest rubber producers was primarily responsible for that industry's 54-per-cent plunge in third-quarter earnings.

Previous Loss

This followed the group's 17-per-cent drop in second-quarter earnings. Goodyear Tire & Rubber Co., the industry leader, lost $5.3 million in the quarter, its first deficit since 1937.

The automotive industry posted a 72-per-cent gain in the third quarter over the year-earlier level, well above the average for all industries. General Motors Corp., the industry giant, showed a 49-per-cent gain in net income. Ford Motor Co. had its third-quarter profit reduced to $42 million from $56 million a year before, primarily because of a strike.

In the nonmanufacturing sector, trade (including department stores) was down 1 per cent in the third quarter, while railroads had an 11-per-cent setback. Services and amusements continued to be lucrative, with a 31-per-cent profit gain for the quarter.

Airlines and other transportation advanced 59 per cent, reflecting higher earnings of the airlines from heavier summer traffic. This group as a whole (490 companies) had profits of $4.81 billion, up 16 per cent from 1975's third quarter.

Prices on Big Board Decline On Concern for U.S. Economy

NEW YORK, Nov. 8 (IHT).—Wall Street's concern over the state of the economy sent stock prices sharply lower again today, extending Friday's decline when the market took its worst hammering in more than five weeks.

Analysts said continued negative news about the economy and uncertainties surrounding the policies of President-elect Jimmy Carter were overriding factors in today's decline.

Fred Kalkstein, economic-technical analyst at Hugh Johnson & Co., said the "negative news had a steamroller effect after Thursday's rally was cut short."

The Dow Jones industrial average closed down 9.39 at 933.68, extending Friday's 17-point loss.

Volume was relatively light as 16.52 million shares changed hands, compared with 20.9 million shares traded Friday.

Analysts said oil issues suffered on concern over the Carter administration's attitude toward divestiture. Exxon dropped 1 to 48 7/8, Atlantic Richfield 3/4 at 52 3/4 and Mobil Oil 2 at 55 7/8.

In the electronics group, IBM lost 2 7/8 at 259 3/8. Westinghouse, which is being sued by three of its clients over uranium shipment contracts, fell 1 3/8 to 15 1/2.

Among other losers were Boeing, off 1 1/8 at 42, Xerox 1 1/8 to 58 3/8, Owens-Illinois 1 1/4 to 50 and Sears 5/8 to 68 1/4.

Digital Equipment dropped 2 1/2 to 143 1/2 and Pennwalt dropped 1 3/4 to 27 1/2 following an unfavorable report on amphetamines.

Skelly Oil dropped 8 3/4 to 102 1/4. Skelly and Mission Corp. will merge into Getty Oil.

Prices on the American Stock Exchange were lower with the Amex index down 0.75 to 98.97.

A Correction

PARIS, Nov. 8 (IHT).—Because of a transcription error, Banque de Paris et des Pays-Bas was not included in the list of lead managers of Eurobonds in the first nine months of 1976, published in Monday's IHT.

Paribas ranks in 12th place with six issues valued at the equivalent of $205.6 million—three issues in U.S. dollars, two in Canadian dollars and one in guilders. The inclusion of Paribas pushes Kidder Peabody (which had inadvertently been credited for managing a Canadian-dollar issue that Paribas led) out of the top 15.

Paribas continues to rank seventh among managers and co-managers but it should be credited with 38 issues—including five in Canadian dollars—valued at $2.563 billion.

All these securities have been sold. This announcement appears as a matter of record only.

10%
ANNIVERSARY
ACCOUNT
At demand
Interest rate guaranteed for 10 years

Everyone can open an Anniversary Account
Finansbanken is Denmark's leading bank in foreign deposits. For more than ten years, depositors from all over the world have taken advantage of the high interest level in Denmark and the favorable investment opportunities Finansbanken offers. Finansbanken is subject to the strict Danish Banking Laws. The Anniversary Account is an easy, problem-free way of placing funds.

What are the advantages of the Anniversary Account?
- 10 % interest annually
- interest rate guaranted for 10 years
- withdrawals at demand.

Deposits and withdrawals can be made at any time. Capital and interest on foreign depositor's accounts are not subject to taxation in Denmark.
The Anniversary account is held in fully convertible Danish kroner. The Danish currency is a member of the joint European float — the »snake«.

Information about the bank
Total assets more than 1.8 billion kroner
Share capital, paid up 80 million kroner
Reserves 71 million kroner
Liability-capital deposits .... 100 million kroner
Liability-capital, total 251 million kroner
Number of shareholders .... more than 30.000
Number of branches 43

How to open an Anniversary Account
With the coupon below, you can ask for an application form and further information covering the Anniversary Account and other attractive investment offers from Finansbanken. Upon receipt of your application form and first deposit we shall send you our receipt and confirmation for the new account.

Send this coupon to Finansbanken to-day

INTERNATIONAL EXECUTIVE OPPORTUNITIES

Management Consultants

Our client, an International management consulting company based in continental Europe, is planning to develop its activities in North Africa, South America and Asia.

To assist in these plans the company is seeking experienced management consultants to work as Project Leaders. They will be responsible for supervising consultants involved in industrial engineering and/or organisation and methods projects and also for promoting the company's business.

Applicants should have a successful record of achievement in a similar role with reputable management consultancy firms which operate world-wide. They should be fluent in English or French and have a working knowledge of Spanish or Italian. Attractive salaries above the market level will be offered together with excellent benefits.

(Ref: H1263/IHT)

REPLIES will be forwarded direct, unopened and in confidence to the client unless addressed to our Security Manager listing companies to which they may not be sent. They should include comprehensive career details, not refer to previous correspondence with PA and quote the reference number on the envelope.

Importante société de construction mécanique cherche

DIRECTEUR GÉNÉRAL

pour son usine située dans une ville française agréable.

LE CANDIDAT retenu devra être ingénieur diplômé ayant déjà l'expérience de la direction d'une unité de fabrication dans le secteur de la construction mécanique moyenne ou lourde en France.

Le fait d'avoir exercé cette fonction aux USA serait considéré comme un facteur favorable supplémentaire.

La connaissance courante du Français et de l'Anglais est essentielle.

Son salaire annuel est à négocier, mais il ne sera pas inférieur à Fr. 175.000.

Le curriculum vitae résumé, les références couvrant les fonctions déjà occupées et autres détails personnels sont assurés d'un examen strictement confidentiel.

Ecrire Box D. 5,548, Herald Tribune, Paris, qui transmettra.

FOOD BUYER INTERNATIONAL

Leading specialty food importing company based in Northern New Jersey, a subsidiary of a major corporation, is looking for an individual to become assistant to Director of Purchasing.

European born individual with international business background and some food industry experience will be considered.

Thorough knowledge of English a must. For a person whose native language is not French or German a working knowledge of at least one of these two languages is desirable.

This is a challenging opportunity with a successful company for someone who would desire to settle in the United States. Send resumé including salary requirements to:

Alimentation Expansion at Domaine de la Géraudière,

4430 Nantes, France.

ARAB INTERNATIONAL LAWYERS

Recently established Arab Multinational Investment Company, headquartered in Saudi Arabia, requires lawyers for its staff including a senior lawyer with at least ten years' experience in international merchant or investment banking. The company is a lender and investor in Arab countries, is capitalized in excess of a quarter of a billion dollars, and has offices in several Arab countries. It is engaged in Euromarket lending, and therefore seeks lawyers experienced not only in Arabic law, but also in Common law, particularly as related to loan documentation, and merchant or investment banking. Fluency in Arabic and English (spoken and written) is a requirement; fluency in French, although not a requirement, would be an advantage. Travel, at times extensive, will be required.

Compensation includes housing, attractive loan for automobile, and home leave.

If you are interested in challenge and opportunity for future growth, send details of experience and earnings to:

Box 31,749 I.H.T., 28 Gt. Queen St., London WC2.

MIDDLE EAST - ARABIAN GULF

Important French/Arabic air conditioning and electrical engineering company is requiring

GENERAL MANAGER

For Abu Dhabi. The candidate should be engineer in electrical and/or mechanical, experienced in similar employments. He will be responsible for commercial contacts, execution of work, management of administrative departments. English and French necessary, Arabic appreciated. Excellent salary + profit sharing, various advantages. Please write with C.V. to:

CIEC, 9 Rue Terrien Cocherel,
49000 Angers, France.

DRILLING SUPERVISOR

DUTIES: Successful applicant will represent and direct operation on behalf of Delhi on oil and natural gas drilling rigs active in our expanding operations in the Far North East of South Australia.

QUALIFICATIONS: Applicants should have extensive practical experience in supervising drilling operations including control of mud properties, hydraulics programs, running and cementing casing, diamond coring, drill stem testing, control of drilling stock and preparing routine drilling records.

SALARY: Will be negotiated with successful applicant commensurate with qualifications and experience.

FACILITIES: All meals and single status accommodation in the field and air transportation between Adelaide and the field are supplied free of charge by the company.

APPLICATIONS: Please apply in writing with a resumé of employment history, job experience and relevant personal details to:

OPERATIONS MANAGER,
DELHI INTERNATIONAL OIL CORPORATION,
Box 2364 GPO, Adelaide, South Australia 5001, Australia.

BOOKS

WIND IN THE TOWER

Mao Tse-Tung and the Chinese Revolution 1949-1975

By Han Suyin. Little, Brown. 404 pp. $12.95

Reviewed by John Leonard

ONE reads the news from China as if one were reading a science-fiction novel. It's another planet, an entirely different ecology.

What does it mean that Mao's widow, Chiang Ching, has been arrested along with three "leftist" colleagues? Only a few months ago the "rightists" were supposed to be the ones in trouble. Miss Chiang is accused of having gone to the archives and "tampered" with Mao's directives, changing a sentence that should have said "Act according to the principles in the past" into a sentence that said "Act according to the principles laid down." We seem to be talking about the fingernails or the bone splinters of a saint, rather than the words of a man.

Han Suyin certainly pumps for sainthood. Dr. Han, born in China in 1917 of a Belgian mother and a Chinese father, is a novelist ("A Many-Splendored Thing," etc.), autobiographer ("The Crippled Tree," etc.) and essayist ("Asia Today," etc.). She has been working on her biography of Mao for 20 years, visiting China every year, interviewing the principals. Her first volume, "The Morning Deluge, Mao Tse-Tung and the Chinese Revolution 1893-1954," was published in 1[illegible]. "Wind in the Tower" concludes that project.

If this is the man warts and all, then he had no warts. Dr. Han is much taken with the "great vision and fire and poetry, by the elemental strength which is Mao Tse-tung," and tends to gush: "At 60, vigorous and vital, still the same young Mao who at 33 had seen a tornado of peasant power and peasant revolution; Mao walked the Chinese earth, felt the great stir of new life, and encouraged it with all his might." And: "Like Antaeus, he touched the earth and was strong again, vital with the spirit of his people." And: "Mao's contribution to all mankind would be that he opened wide the doors to mass self-understanding and self-humanization. Knowing mankind in its infancy, he did his share to catalyze its maturity."

But "Wind in the Tower" reads for the most part like the minutes of the Chinese revolution, edited down to 400 pages, from the 12-year agricultural policy of 1949 to the Fourth National People's Congress in 1975, with stops along the way at "thought remolding," communes, the Great Leap Forward, the Sino-Soviet split, the Cultural Revolution, nuclear power, Vietnam, Nixon's visit and a seat in the United Nations. The pages bristle with bureaucratic details: The three criteria and the three great differences, the four cleanups, the five good origins and the five bad elements, the first 10 points and the later 10 points and the 10 great relations and the 23 articles and the 36 stratagems not to mention the Su Fan movement, the Hu Feng clique, the Wang Ming line, "economism," "commandism," "rectification" and the February adverse current.

They also bristle with jargon and polemical abuse. Among the many sins for which the 20th century will some day be accountable is what it has done to language. I opened at random from "Wind in the Tower," I found: "...individuals, capitalists, gangsters, hooligans, freaks and monsters of the line," the privileged, rightist bureaucratists, bourgeois fanaticism, petty-bourgeois cretinism, recruitment-lordism, dispersionism, mountaintop-ism, "smash the head," "rebuff the attack" and so on into the dictionary.

Nevertheless, a very human figure emerges of what must be the most stunning feat of social engineering in human history and of an amazing Marxist-Leninist "the mass line" being used by opportunists on the right—Liu Shao-chi trying to control through the party" and a new type of authoritarian state; Lin Piao was trying to use the praetorian army directly. Mao's goal of an unending revolution, with a purge every 10 years to purge there, some of the rioting, a few unfortunate excesses," periodic chaos—the Cultural Revolution—getting out of hand even he knew that what was going on would mean.

"The mass line" meant organizing the masses—the peasants, the workers and the students opposed both. It meant starting from the bottom up, having a revolution every 10 years or so within the party, purging the party of "undesirables," clever bureaucrats, rooting out "revisionist" attitude that "only one small group of human beings is entitled to rule over another much larger group of "inferior" beings," hoping that the masses in the ideological turmoil will discover that they, too, must be educated for brand new, free from old customs, ceremonies, habits and values of the past. Marxism itself is amputated: a permanent revolution exists, a socialism nationalized "perfect for a rendezvous with the existentialists would be."

This, of course, is maddening. And the fact that Mao's writings with its own constant redeposits, is self-sufficiently obtuse is immensely frustrating. Whether such a continuing revolution can survive, even as its folk-heroic pretensions still center is an open question. (What other administration is going to turn the country upside down periodically to see what happens? What other administration would write 100,000 words to refute "the erroneous thinking of Togliatti?)

Another question is whether such a revolution is worth it. Millions of people were killed during those "excesses." Is there something oddly static about the approach: The right behavior of millions of people will arrive at a truth more important than the cash nexus. Is there reason to suppose that this kind of laissez-faire explosion of mass turmoil will work better than a laissez-faire economics of capitalism? Are we talking about methods of bringing up the rate of capital formation, but about human sequences.) Or, for that matter, a laissez-faire psychology of the libido? There's also the question of brutally naïve or dangerous about the notion of "progress" nothing more than a faith in social and economic engineering, darkness in the soul, and no private hell, no need for Confucius to suggest a golden mean of conduct, and also no Freud.

John Leonard is an editor of The New York Times.

BRIDGE — By Alan

The diagramed deal features the "Morocco Coup," allegedly played in King Hassan's palace during an attempt to assassinate him. The bidding is not on record, but it might have followed the course shown in the diagram. Once North has heard a response of one spade to his one-heart opening, the slam becomes a fair bet.

West must have been tempted to double, but as it turned out he was wise to resist the temptation. There did not seem any reason to try for a ruff by leading a singleton diamond, so he led the club king, to his subsequent regret.

It might seem that the slam contract was doomed by the bad trump break, but a funny thing happened to West's trump holding. South discarded a diamond from dummy, took the club ace, and ruffed out West's queen. He cashed the heart ace, ruffed a heart, and threw two diamonds from dummy on club winners.

South led a trump, and West unwisely put up the nine, perhaps distracted by noise of guns firing in the palace. This second-hand high error is often committed by inexperienced players. They have an irrational fear that the declarer will take a deep finesse, but that is not a real danger unless the defenders hold their cards very badly.

The queen won another heart was ruffed, and dummy was entered with a diamond lead. The declarer, who had been playing like a man who could the backs of the card reached this position:

Seahawk safety Al Matthews intercepted a Scott Hunter pass and raced it back 41 yards for a touchdown in the third period, and his fellow safety, Dave Brown, intercepted another Hunter pass to set up a 53-yard scoring run by Smith as Seattle rang up two touchdowns in 36 seconds.

Atlanta scored on field goals of 18 and 21 yards and on a 15-yard pass to wide receiver Alfred Jenkins from quarterback Kim McQuilken, who took over after Hunter was forced from the game when he took a hard block on Matthews's interception return.

The victory left the two teams tied in the NFL West cellar at 2-7. The only other victory for the expansion Seahawks was over the NFL's other new team, Tampa Bay.

Colts 37, Chargers 21

At San Diego, quarterback Bert Jones's three touchdown passes and the running and receiving by Lydell Mitchell powered once-beaten Baltimore to a 37-21 victory over San Diego.

Seldom under pressure, Jones completed 18 of 25 asses for 275 yards before leaving the game early in the final period.

The Colts remained one of three clubs—along with Dallas and Oakland—with an 8-1 record. The Chargers are 4-5.

Two of Jones's touchdown strikes were for 16 and 18 yards to wide receiver Roger Carr. The Colt quarterback opened the scoring in the opening period with a pass play to Mitchell covering 40 yards. On that play, Mitchell took a pass in the flat, faked out Charger safety Chris Fletcher and raced unmolested across the goal.

Besides catching eight passes for 125 yards, Mitchell rushed for 91 yards on 17 sweeps and quick opening bursts.

Vikings 31, Lions 23

At Bloomington, Minn., Rookie Sammy White caught two touchdown passes and set up two scoring runs by Chuck Foreman with long catches to pace Minnesota to a 31-23 victory over Detroit.

White, the 5-foot-11 wide receiver from Grambling, caught seven passes for 210 yards as Minnesota boosted its record to 7-1-1. Detroit fell to 4-5.

White grabbed a 37-yard scoring pass with 1:53 left to play to clinch the victory.

Foreman scored his first touchdown of the game on a two-yard run with five minutes gone in the third quarter to give the Vikings a 17-9 lead. Fran Tarkenton, who completed 17 of 25 pass attempts for 247 yards, hit White with a 27-yard pass to the Lions' 14-yard line five plays before Foreman's TD run.

Rookie Detroit runner Lawrence Gaines, who carried the ball 22 times for 116 yards to record his first 100-yard game rushing, brought the Lions within a point at 17-16 with a one-yard scoring run with 3:54 left in the third quarter.

Broncos 48, Buccaneers 13

At Denver, Haven Moses caught a 71-yard scoring pass to spark a second-half scoring explosion that lifted the Broncos to a 48-13 victory over winless Tampa Bay.

Rick Upchurch also returned a punt 44 yards for what would have been his fifth return touchdown of the year, but the play was called back due to a clipping penalty.

The Broncos, despite being assessed a record 15 penalties, also scored on a 36-yard pass from Steve Ramsey to Otis Armstrong, a 21-yard fumble return by Randy Poltl, a 33-yard interception return by John Rowser and a nine-yard run by Lonnie Perrin. Jim Turner kicked two field goals of 19 and 33 yards.

Tampa Bay tallied on a three-yard run by Louis Carter, and Dave Green field goals of 45 and 35 yards.

Eagles' Bill Bradley is upended as he helps bring down Cardinals' running back Jerry Latin.

Bears Lose to the Wind, Referee and Raiders

By William N. Wallace

CHICAGO, Nov. 8 (NYT).—It was a 17-mile-per-hour wind—plus a mistake by an official—that cost the Chicago Bears a victory yesterday against the Oakland Raiders, 28-27.

Bob Thomas, the Bears' kicker, attempted a 31-yard field goal on the last play of the game and the ball struck the right upright of the goalposts and fell back. Thomas said he kicked the ball absolutely true, but once it was up the wind blew it away. "It wavered," he said, "and then went off to the right."

To err is human and the referee, Chuck Weberling, was in error by his own admission. Roger Stillwell, the Chicago defensive end, picked up an Oakland fumble and ran 35 yards for an ostensible touchdown in the tempestuous fourth quarter. But Weberling had blown his whistle and that stopped the play.

He said later, "It was an inadvertent whistle. I blew the whistle when I shouldn't have, so the only thing I could do was give Chicago the ball. I just blew the whistle when I shouldn't have."

The Bears received the ball on the Raider 39, but on the next play Oakland's Ted Hendricks intercepted a Chicago pass.

Jack Pardee, the Bears' coach, was calm as usual. "They just took a touchdown away from us," he said later. Protest? No, Pardee would accept the defeat.

That was hard to do. The Bears, a young team with a great future, outplayed the Raiders, who have lost only one game of nine this season. Furthermore the Bears, with the wind at their backs, were brilliant in the third quarter as they scored three touchdowns to go ahead 27-21 after trailing 21-7.

But the Bears failed to make the 1-point conversion after the second of those three touchdowns. Gary Huff, the holder for Thomas, mishandled the 7-yard pass from center Dan Neal and the kick was never attempted. "The wind got the ball," Huff said. "It stopped spiraling and knuckled on me. I couldn't put it down."

That also cost the Bears the game. They lost for the fifth time against four victories.

The Raiders thought the outcome was just and worthy. Were they lucky Sunday? "Hell, no," said John Madden, the Oakland coach. "We did what we had to do." Madden made the decision to have the wind in his team's favor in the fourth quarter. "That decision looked good and then bad," he said, "and then good at the end when they missed the kick."

The Raiders scored the winning touchdown on a 49-yard pass in the last period from Ken Stabler to Cliff Branch, a pass tipped into Branch's hands by the defending Bear, Virgil Livers.

Stabler and Branch had combined for a 75-yard touchdown pass in the second quarter, also with the wind in their favor. Although his statistics were impressive—11 completions of 17 pass attempts for 234 yards and three touchdowns—Stabler had a tough game. The Bears dropped him three times for losses but the big Alabama left-hander persevered and made the big play to win.

He was hit hard by Wally Chambers and fumbled on the play the referee aborted. "On the fumble and Stillwill recovery. I was as goofy as a pet coon and I didn't know what was going on."

The Bears, who upset the Vikings last Sunday, were hard to discourage. They scored 20 points during six minutes of the third quarter and in between their first and second touchdowns they accomplished one of the game's most difficult plays, a surprise on-side kickoff. Thomas's dribbling kick was recovered by the enthusiastic rookie receiver, Brian Baschnagel, 11 yards from where Thomas booted the ball.

Chicago kept right on going to the Oakland goal with Walter Payton scoring from the 12.

Payton, the team's offensive star, worked hard, carrying the ball 36 times, an all-time Bear record. The Raiders stopped him and stopped him but he still gained 97 yards.

"The bears are obviously a lot better than many people think," Madden concluded.

Rhodesia Postponement

SALISBURY, Nov. 8 (AP).—An international golf tournament scheduled to start Thursday in the northwestern Rhodesian resort town of Victoria Falls has been postponed because of fear of terrorism.

Defeat 76ers

NBA Sonics Showing A Better Team Effort

SEATTLE, Nov. 8 (UPI).—"Basketball is a team game." Seattle coach Bill Russell likes to instruct. "If you don't understand that, you don't understand the game."

His SuperSonics understood well enough last night to get a passing grade for their 98-91 NBA victory over the Philadelphia 76ers. But Russell is no easy touch and refused to mark the effort with an "A."

"We haven't had a really good game yet," Russell said. "This was one of our better ones, but we still haven't done what I think we're capable of doing."

What the Sonics did was good enough to fend off the tough 76ers and their super forwards, Julius Erving and George McGinnis.

Erving played just over half the game and Seattle had reason to be thankful for that. Erving picked up three quick fouls in the opening two minutes and went to the bench for the remainder of the first half. Without him, the 76ers turned to strongman McGinnis nearly every time down the floor. But Seattle clamped a tight defense on McGinnis, pressured Philadelphia's guards and ran up an 18-point lead in the second period before settling for a 10-point advantage at halftime.

That set the stage for the Doctor's return, and he did not disappoint. He scored 15 points in the third period and brought the 76ers within one point, 71-72, at the end of three quarters.

For the Sonics, it was a strong team effort. And it was their 21st consecutive regular-season victory at home, a streak that goes back to Feb. 8.

Trail Blazers 119, Knicks 93

At Portland, Bob Gross and Lionel Hollins sparked a third-quarter scoring surge to lead the Trail Blazers to a 119-93 victory over the New York Knicks.

It was the fourth straight victory for the Blazers, 6-1 for the season and leading the National Basketball Association's Pacific Division, and snapped a two-game streak for the Knicks.

Gross hit on seven of eight shots in the quarter as the Blazers moved away from a close first half and outscored the Knicks, 38-16, in the period for a 97-68 lead. Hollins contributed eight points in the quarter as the Blazers shot a torrid 68 per cent.

Lakers 107, Kings 96

At Inglewood, Calif., forwards Cazzie Russell and Don Ford lit a third-quarter spark to lift Los Angeles to a 107-96 victory over Kansas City.

Ford scored 11 points and Russell 9 as Los Angeles outpointed the Kings, 34-19, in the third period to turn a 49-45 halftime deficit into a 79-68 advantage.

Russell finished with 24 points, a figure matched by Los Angeles center Kareem Abdul-Jabbar.

Pistons 115, Jazz 107

At New Orleans, Bob Lanier scored 30 points—20 of them in the first half—to give Detroit its first victory in the Louisiana Superdome, 115-107, over the Jazz.

Lanier hit 10 of 13 field-goal tries in the first two periods as the Pistons, 4-5, jumped to a 64-50 lead.

As a team, Detroit hit 62 per cent of its shots through the first three periods en route to an 89-91 edge.

Hawks 107, Cavaliers 97

At Atlanta, 10 clutch free-throw shots in the final two minutes by five Atlanta players held off Cleveland's fourth-quarter comeback as the Hawks handed the Cavaliers their first loss of the season, 107-97.

The victory snapped an eight-game winning streak by the Cleveland club. The Hawks emerged from a tight defensive battle with a 20-19 first-quarter lead, lengthening it to 12 points at halftime.

Atlanta expanded its lead to 20 points—73-53—with 4:21 left in the third period but, as the quarter ended, the Cavaliers made their late move.

Cleveland cut Atlanta's lead to 83-67 at the end of the third period, keeping its momentum in the early moments of the final quarter.

After Michigan's Defeat

Unbeaten College Teams Are Reduced to 6

By Gordon S. White Jr.

NEW YORK, Nov. 8 (NYT).—The total membership in the major college elite group of undefeated and untied teams is six after Purdue upset Michigan, 16-14, at Lafayette, Ind., on Saturday. The perfect records belong to Colgate, Pittsburgh, Rutgers, Maryland, Southwestern Louisiana and Texas Tech.

Pitt became the chief recipient of Purdue's surprise victory that was assured when Rock Supan booted a 23-yard field goal with four minutes to go for the Boilermakers. The Panthers, who easily beat Army, 37-7, for their ninth triumph of the season, had been ranked second nationally behind previously undefeated Michigan. Pitt fully expects to be No. 1 when the weekly polls are announced.

As far as Pitt and Purdue are concerned, the Boilermakers' victory was the biggest upset in college football in many years. But before everyone else goes overboard and infers that Michigan is so powerful that no team should have beaten the Wolverines it should be noted that Michigan has played only one winning team this season. That was Minnesota, which lost to Michigan a week ago. Michigan entered the Purdue game with eight victories over teams that have a cumulative won-lost-tied record of 27-45-1 through Saturday.

But to Alex Agase, the Purdue coach, the victory was "the happiest moment of my lifetime."

Tailback Cried

Scott Dierking, the Purdue tailback who ran for 162 yards against the strong Michigan defense, said, "After the game I didn't know whether to cry or jump up and down. I cried."

Bo Schembechler, Michigan's coach, said, "It hurts a lot more to lose, especially when you win a lot like we do."

Michigan's defeat dropped it from first to second in the Big Ten as Ohio State beat Illinois, 42-10, and moved on top in that league. If Michigan and Ohio State win this week they will meet on Nov. 20 for the Rose Bowl berth, as has happened so often in the past.

After Pitt had beaten Army and the news of the Purdue upset reached Pittsburgh, Army coach Homer Smith said, "Of course I feel Pitt deserves to be rated No. 1. They were No. 2 and the No. 1 team lost and they just beat us, 37-7. That's not tough to answer. Yes, they should be No. 1."

Johnny Majors, the Pitt coach, said, "I'm not going to turn down the honor of being No. 1 if it comes our way. We have as much right to it as anybody else. But we can't sit on it and boast about it."

Cavanaugh Direction

Pitt was also delighted with the return of Matt Cavanaugh, the quarterback who missed the previous three games because of a fractured bone in his right leg. Cavanaugh directed the victory over Army and threw a 24-yard touchdown pass to Willie Taylor in the process. The quarterback also ran 48 yards on an option right to set up Tony Dorsett's third and last touchdown of the game. Dorsett, Pitt's tailback, set more running records, increased his career record for rushing to 5,659 yards and agreed that Pitt should now be No. 1.

Waiting for its chance against Pitt, however, is Penn State. If Pitt gets by West Virginia Saturday, the Panthers will carry an 11-game winning streak against Penn State on Nov. 26. The Nittany Lions, who have regrouped and won five games in a row after three losses, would like nothing better than to put down Pitt, the team that threatens to replace them as the top team in the East and the holder of the Lambert Trophy.

Rutgers doesn't want quite as high a ranking as Pitt claims. But the Scarlet Knights would like a little recognition after their 34-0 victory over Louisville, which extended the longest major college winning streak to 16 games.

Coach Frank Burns said his team deserves a spot in the top 20 teams in the nation. "I've been holding back but now we've played against a team that has met the good ones and we showed we can compete."

Small College Victories

Rutgers has suffered from a schedule that enabled it to gain 7 of those 16 victories against Division II, or small college, teams. Louisville became the ninth major college team to be beaten by Rutgers since the Scarlet Knights began their streak in the fifth game of last season. Rutgers also wants a bowl bid—possibly the Peach Bowl or the Liberty Bowl.

Colgate beat Bucknell, a Division II team, 24-13, to remain unbeaten. Maryland defeated Cincinnati, 31-0, and Texas Tech had an unexpectedly difficult game before downing Texas Christian, 14-10. TCU has not won this season. Southwestern Louisiana beat Arkansas State, one of last year's two undefeated and untied major teams, 23-14. The Southland Conference, of which SWL is a member, has ordered the Ragin' Cajuns to forfeit their first two victories of the year but the National Collegiate Athletic Association only recognizes the fact that SWL had more points than each of its opponents so far this season.

The football scene Saturday followed, in part, the trend set in the presidential election last Tuesday. Not only did Gerald Ford's alma mater, Michigan, lose Saturday, but Jimmy Carter's alma mater, Navy, pulled a mild surprise by beating Syracuse, 27-10. Also, Carter's home state of Georgia produced two of the big victories of the day. Georgia Tech upset Notre Dame, 23-14, and Georgia beat Florida, 41-27.

Sugar Bowl Host

Georgia Tech's victory ended an Irish six-game winning streak and possibly ended Notre Dame's chances for a bowl game. Georgia's triumph over Florida probably assured the Bulldogs of the host spot in the Sugar Bowl since Georgia and Florida are now tied for the Southeastern Conference lead and Georgia won the head-to-head meeting. If coach Vince Dooley's Bulldogs beat Auburn next week, they will play in that Sugar Bowl game. Pitt could be their opponent.

Houston's surprisingly easy 30-0 victory over Texas at Austin ended a 42-game home victory streak for the Longhorns, who have had a really poor season by the standards of those who are always yelling, "Hook 'em." This year, Texas has been hooked.

Rookies Defeat Pros In Golf Team Match

LAKE BUENA VISTA, Fla., Nov. 8 (UPI).—Rookies Bill Kratzert and Woody Blackburn refused to crack under pressure yesterday and beat old pros Gay Brewer and Bobby Nichols in a sudden-death playoff of the $200,000 Walt Disney World Golf Classic-National Team Championships.

Kratzert, 24, sank a birdie putt of less than a foot on the third hole of the playoff and he and Blackburn won the tournament at 29 under par. They won $20,000 each when Brewer missed a putt of about six feet.

With 3-1 Victory Over Canucks

NHL Bruins Maintain Perfect Home Record

BOSTON, Nov. 8 (UPI).—The system paid off again. "Two or three years ago, we would have opened up, and bing, they would have scored and that would have been it," was coach Don Cherry's reaction last night following his Boston Bruins' 3-1 victory over the Vancouver Canucks.

"Now we don't open up," he said. "We're disciplined. This is the system... No one gets excited."

The Bruins kept cool when faced with the possibility of having to settle for a tie with the visiting Canucks. They paid attention to their defense while looking for a scoring opportunity.

In past years, as Cherry indicated, the Bruins' tendency was to concentrate on offense in such situations and let down their defense. But since he took over as coach in 1974, Cherry has been teaching two-way hockey.

Peter McNab notched the game-winnig goal with 1:46 remaining to maintain Boston's perfect home record of six victories in as many games.

"It was a very close-checking game," said the 24-year-old center. "It came down to who was going to get the first break, and fortunately it was us."

It was McNab's third game-winning goal of the season and his 13th goal in 14 games.

"He gets his shots off quickly and his accuracy record speaks for itself," Cherry said. "His goals-per-shot percentage was the best in the league two years ago and he was second last year."

Rockies 3, Black Hawks 2

At Chicago, Wilf Paiement scored midway in the third period to lead Colorado to a 3-2 victory over the Black Hawks.

It was Colorado's fourth victory of the season and its second over the Black Hawks. Dennis Dupere won a crucial draw deep in Chicago ice and Paiement banged a 30-footer past goalie Tony Esposito at 12:33 of the third period for his sixth goal of the season to break a 2-2 deadlock and give the Rockies the victory.

Barons 2, Penguins 2

At Richfield, Ohio, Cleveland and Pittsburgh played to a 2-2 standoff. The Barons wasted no time in taking the attack to the Penguins and dominated the first period. Cleveland was able to get off 10 shots on goal to Pittsburgh's three during the period in which the Barons played uncommonly aggressive hockey.

Sabres 5, Flyers 3

At Buffalo, André Savard and Gil Perreault scored goals on rebounds within a two-minute span early in the third period to lead the Sabres to a 5-3 victory over Philadelphia.

The victory snapped a regular season string of 14 games—12 losses and two ties—in which the Sabres had not defeated the Flyers. It was also Philly's sixth game on the road without a victory this year.

Red Wings 6, Flames 0

At Detroit, neither the Red Wings nor the Flames could manage a goal, making the contest the first scoreless game in the National Hockey League since a Los Angeles-Pittsburgh match on Nov. 23, 1974.

Capitals 4, North Stars 1

At Landover, Md., Hartland Monahan scored a goal and two assists as Washington snapped a three-game losing streak with a 4-1 victory over Minnesota.

Monahan's power-play goal 30 seconds into the second period gave Washington a 2-0 lead after he had assisted on Ace Bailey's first-period score.

The Year of Award-Winner Randy Jones

By Red Smith

NEW YORK, Nov. 8 (NYT).—When Randall Leo Jones was told that he had been voted the Cy Young Award, he said: "After last year, I kind of expected it. I would have been disappointed and frustrated if I didn't win it. I think Koosman is in the same situation I was in in 1975. Last year nobody had to ask, 'Who's Tom Seaver?' This year nobody had to ask who Randy Jones was."

While he talked from his home in Poway, Calif., his wife Marie came into the room carrying their 8-day-old daughter, Jami Helen. Another daughter, Staci, is 2. Randy signaled thumbs up, hung up the phone and kissed Marie.

"I'm going out of my mind," he said.

Then he telephoned Buzzie Bavasi, president of the San Diego Padres, who was getting ready to fly to New York for baseball's first draft of million-dollar players. "Mix yourself a martini," Randy's boss said. "I'll have an extra one on the plane."

"I'll have champagne," Jones said. "It's already chilled."

Bizarre Life

For a pitcher who is about as fast as the postal service, Randy Jones has lived a bizarre life in the National League. Two years ago, his second season out of the bushes, he lost 22 games and couldn't even lead the league in that respect. Bill Bonham of the Cubs and Montreal's Steve Rogers shared the same distinction. Last year he was a 20-game winner, but Tom Seaver won 22 for the Mets and took the Cy Young Award as the best pitcher in the league.

This year Randy's record in midseason was a somewhat implausible 16-3. Then the Padres stopped scoring runs. Randy missed a turn on the road home, drove his car into a telephone pole and came out of that with 30 stitches in his neck and six in his chin. The turn in the road was the only one he missed. Pitching against Cincinnati on Sept. 23 and striving to improve his record of 6-11 for the latter half of the season, he felt something pop in his arm.

Doctors feared a biceps tendon had torn loose, but an operation revealed only an inactive motor nerve that needed rest. While Jones recuperated, an electorate of 24 baseball writers compared his record with those of the Mets' Jerry Koosman (21-10), the Dodgers' Don Sutton (21-10) and Philadelphia's Steve Carlton (20-7). Registering his 22 victories and 14 defeats, Jones pitched 25 complete games, five of them shutouts, and had an eminently respectable earned-run average of 2.74. Without even one debate between candidates, the voters made their choice.

"You think about all you've been through," Jones said. "How you worked so hard, and then you face an operation. I've played a little catch lately and I know now I'm fine. I know it's not all gone in a puff of dust."

As for Koosman, he said, "I'm used to finishing second. In 1967, Seaver won rookie of the year and the next year I was second to Johnny Bench. Last year, Seaver won the Cy Young and this year I'm second again."

Koosman was disappointed, but neither he nor anyone else could question Jones's credentials. Last year, when Jones won 20 of the Padres' 71 victories, his earned-run average of 2.24 was lowest in the league. He worked 285 innings in 1975, walked only 56 batters and hit none. This year he walked only 50 in 315 innings. Control is his secret, the ability to throw strikes that are just barely strikes.

"Those pitches of his that your guys swing at," Danny Murtagh was asked during the summer, "are they really strikes?"

"When they swing," said the Pirates' manager, "they're never strikes."

"If I were a pitcher," said Mike Schmidt of the Phillies, "I'd be embarrassed to go out to the mound with that kind of stuff."

The Phillies didn't score against Jones all season. He shut them out three times.

Art Buchwald

Carter Is Good for U.S.

WASHINGTON—A meeting of the American Society of Humorists, Satirists and Political Cartoonists was held in the basement of the First Baptist Church of Washington last Wednesday morning to discuss the effects of the election on our profession.

Buchwald

Everyone was bullish about the results, believing that Jimmy Carter would provide us with excellent material for the next four years. (Our society always asks what our country can do for us, not what we can do for our country.)

"Any guy who says 'I will never lie to you,'" said one cartoonist, "can't be all bad."

"I'm sorry for Jerry Ford," said another cartoonist, "but I needed Carter's teeth. No one ever knew whom I was drawing when I sketched Ford."

A political satirist said, "The beauty of Carter is that he's the first president we've had that we know lusts after women in his heart. That in itself is a big plus. We've had presidents who did it and presidents who didn't do it. But this is the first president we'll have who doesn't do it but thinks about it a lot."

"What I'm looking forward to," said another political satirist, "is the family. Billy Carter, Jimmy's brother, Miss Lillian and Amy, his daughter, should keep us in business for a year."

A political cartoonist said, "And don't forget we have Sunday school and Plains, Ga., to work with. All we have to draw is a peanut and a Bible and everyone in the country will know whom we are talking about."

* * *

"Carter's administration could be a Camelot for humorists and cartoonists," someone said.

"Of course, we're going to miss Rockefeller," someone else said. "Fritz Mondale is a nice guy, but he's no Rockefeller."

"You can say that again," a columnist said. "But then again, Rockefeller was no Agnew."

"You can say that again."

"What are we going to do with Mondale?" a cartoonist asked.

Another cartoonist said, "When we draw him we'll have to write on his coat, 'Fritz Mondale, Vice-President of the United States.'"

"Dole was easier. All you had to do was draw a guy who looked like Nixon, holding a hatchet in his hand, and everyone knew who he was."

"I don't want to throw a wet blanket on this meeting," another cartoonist said, "but do you realize we're not going to have Henry Kissinger to kick around any more?"

"I forgot that," someone said. "What are we going to do without Kissinger? He was great for laughs."

"And so easy to draw."

I said, "I'm sick about losing Henry. He put bread on our table."

* * *

"There'll never be another Kissinger," someone said.

A stand-up comedian tried to cheer us up. "Forget Kissinger. We've got Pat Moynihan and S.I. Hayakawa in the Senate. They could make up for Henry. We never expected Kissinger to last forever."

"It's funny. I did," I said.

The president of the society stood up. "Can we get on with the business of this meeting? I propose we send a telegram of congratulations to Jimmy Carter and wish him well and tell him that if he makes as many booboos in the White House as he did in the campaign, he'll get no complaints from us."

"I second it," someone said.

"All those in favor, say aye. Opposed? The ayes have it. Herb Block will now lead us in the closing prayer."

Italian Police Recover Stolen Church Painting

MILAN, Nov. 8 (UPI).—The police have recovered a valuable altarpiece by a pupil of Leonardo da Vinci a year after it was stolen from a country church.

They said Saturday the 16th-century altarpiece by Giampietrino, a Madonna and Child between Saint Jerome and Saint John the Baptist, was worth an estimated 700 million lire ($809,000). It was stolen from the parish church of Ospedaletto Lodigiano, 35 miles southwest of Milan.

The police said they found the painting wrapped in plastic garbage bags in a towtruck they stopped for a routine check. The two men in the truck, Dario Bonsanti, 30, and Diego Bottoni, 29, were arrested.

Experts said the painting was in good condition although it appeared to have been kept in a moist place.

Verdun Shells Unearthed

VERDUN, France, Nov. 8 (UPI).—Construction workers yesterday unearthed an ammunition dump containing four tons of German and Austrian World War I shells, according to city authorities.

Johnnie Ray—Still 'Cry'-ing

By Lynn Simross

LOS ANGELES—His name is Johnnie Ray. He was a flower child of the 1950s, long before we knew what a flower child was supposed to be.

He also was a superstar, long before superstars made hundreds of thousands of dollars a performance. He followed Sinatra, preceded Presley, and before some of today's rock stars were born, almost 25 years ago, sent a generation of bobby-soxers into the screaming fits.

In 1951, nobody ever had seen a performer quite like Johnnie Ray, and they dubbed him "Mr. Emotion" and "the Prince of Wails." He was the young man who, when he got up to sing, contorted his boyish face into a painful mask, tugged at his slicked-back hair and cried real tears as he belted out a couple of songs called "Cry" and "The Little White Cloud That Cried."

Johnnie Ray got five gold records (a million recordings sold for each one) before the '50s had ended, but somehow, in the 1960s, he sank into anonymity for most of us almost as quickly as he had risen from it.

Today, Johnnie Ray is back. And, listening to him, it turns out he hasn't been far away at all.

Ray's face hasn't changed much. He is 49 now, but doesn't look it, and he talks about "approaching middle age feeling 31." But he tried some mountain-climbing in Switzerland a few weeks ago on a brief vacation, he adds, and "after that I know better than to think I'm any 31."

Although he insists his voice is better, his onstage antics, Ray says, are "less enthusiastic" than they used to be. "To this day, though," he adds, "I have never done 'Cry' the same twice."

He has no plans to retire and, contrary to popular belief, he has never stopped performing.

"People come up to me in the supermarket and they say, 'Are you still singing?'" says Ray. "They don't mean to be rude, but if you are not on television every 20 minutes or have a hit record every time they turn on the radio or have a film out, they think you've retired.

"Americans are the most overentertained people in the world." Ray says adamantly. "They have more spare time, more money to spend than anybody. And TV. TV just gobbles up entertainers."

Although Ray has spent the '60s and the early '70s entertaining mostly in Europe, Australia, Africa and South America, every year he signs on for engagements in some U.S. spots. "There just aren't that many clubs left here in the United States," he explains, adding that he thinks television has killed them off.

Ray has a new album ready for release in London, and recently he agreed to appear on television, but he turns down more offers than he takes.

"I guess I have to let the people know I'm still here," he says with a chuckle. "I have been here all the time. I just don't believe in doing something just to make money."

In the '50s, Johnnie Ray made money by the handfuls, but not the kind that rock stars get today. He was, according to his current manager Bill Franklin, the first star to get $10,000 for a performance in Las Vegas.

In 1953, when it was reported in a British newspaper that Ray made $31,000 for two weeks of theater appearances in England, a British clergyman complained that Ray earned more money in two weeks than a British farmer could earn in 40 years.

But Johnnie Ray was in his 20s then, and he spent a lot. He also had a huge entourage that he carted around with him. He would play in "Cincinnati one night, and three nights later, open in Australia. I don't know how I managed to keep my head on straight," he says now.

Ray talks about the loneliness of show business, the hours, the way of life. "An inhumane thing to do to yourself," he says. "You have to be possessed.

"I had an unworkable marriage, a lot of hangers-on, and I was terribly lonely." About that time—the early '60s, he says—"I developed a drinking problem."

Johnnie Ray had left Los Angeles, where he came in 1949 from Dallas, Ore., a town of 3,500 people, for New York, spent 13 years there, and returned to the West Coast.

He lived at Malibu "until tranquillity gave way to boredom," then spent 1965 in Spain. At that point, he decided to fire everybody and start all over.

"The loneliness, the isolation of the business" got to him, he says, and he decided "to sort out my life."

"People don't realize," adds Ray, "that I was denied what you might call early manhood. I was a kid those first six or seven years of success. My life consisted of bodyguards, police, security all the time, people tearing at your clothes. Really, the only time I had alone, to myself, was when I was on stage. That's an awful way to live."

He credits his manager with "getting me off the booze" and getting his life in order. Now, says Ray, he plays the engagements he wants to do, and "enjoys financial independence."

He is glad to have a few days, at his home here, having recently returned from an exhilarating but exhausting five-week stint at the Palladium in London.

"But if I sit around here three weeks, I start to get restless," he says.

It seems that Johnnie Ray is having a comeback. His Palladium tour was such a huge success it surprised Ray himself. "I had been saying, 'Please, God, just let me play the Palladium one more time before I retire,' and it happened."

Retire? Is he planning such a thing?

"To what?" Ray asks. "There is no retirement for me. I know my craft. That's the only thing I know. I don't play golf. Oh, I swim in the pool for exercise. I've tried writing, but I'm a terrible writer.

"One thing I learned when I was in my mid 20s, that what they call a teen-age idol isn't going to last. I realized I was going to grow up and I better learn my craft."

Ray shows his guests a little brass plaque, lettered with his name, Palladium and the date.

"This is what I am the proudest of," he says, turning it in his hand. "They give you this for each performance there."

Johnnie Ray already had eight similar plaques. They hang on a wall in a hallway under the five gold records—"Please Mr. Sun," "Little White Cloud," "Cry," "Walkin' My Baby Back Home," and "Walkin' in the Rain."

He is the only American performer to appear at the Palladium so many times.

"I hadn't walked on that stage in 18 years," Ray says of his August-September performance there. "I don't even remember doing the opening performance. I remember doing 'Cry'—I always use that as the closing song. There isn't any music left after that. But I can't remember how many curtain calls there were. I had to stop the act once. There was so much applause I couldn't hear. And people were climbing over the seats and standing in the aisles."

After that, Ray remembers he spent a lot of time at the stage door, signing autographs, a thing he enjoys.

"Then I went back in to the stage. I always go back after a performance and say goodnight to the theater. When a theater is empty, it brings you back to earth real fast. And nothing is more scary than the Palladium empty."

© Los Angeles Times.

Johnnie Ray—"I have been here all the time."

PEOPLE: Mick Jagger Takes Ex-Girl Friend to Court

Mick Jagger

Mick Jagger, 33, of the Rolling Stones, went to court Monday in London to stop his former girl friend, Christine Shrimpton, from making public letters he once wrote to her. (Miss Shrimpton is the younger sister of model Jean Shrimpton.) Jagger has a temporary injunction and wants to make it into a permanent ban to prevent Christine Shrimpton from selling the letters for publication. He is also seeking damages for alleged breach of confidence and infringement of copyright, as well as the return of his letters and all related material. Jagger is now married to Bianca de Macias.

* * *

Rita Luciana Gemignani, a 30-year-old prostitute who has had four babies in four years to avoid serving a 14-month jail sentence, went to prison Monday in Genoa. She told police she was pregnant—they took her to a clinic where tests proved negative. Italian law stipulates that a pregnant woman may not be jailed.

* * *

Margaret Fuller, the 64-year-old woman who fell overboard last week and kept herself afloat for three hours until her ship, the Windsor Castle, found her floating off the Angola coast, is making "good progress" in a hospital in her hometown, Port Elizabeth, South Africa. A spokesman said she would remain under observation for several more days.

* * *

Country and Western singer Tammy Wynette, 32, was admitted to Westminster Hospital in London Monday with bronchitis. She is on a concert tour of Britain. She will be in the hospital for several days, according to a spokesman, and will have to cancel some dates.

* * *

Philosopher Jean-Paul Sartre, 71, accepted an honorary doctorate Sunday at the Israeli Embassy in Paris from the Hebrew University of Jerusalem. "My acceptance of this title, which I regard as a great honor, has a political significance," he said. "It expresses the friendship I feel for Israel since its birth and my desire to see that nation prosper in peace and security."

* * *

Country-music entertainer Roy Clark is making plans for his second concert tour of the Soviet Union. Last winter, Clark was the first country music artist to headline his own show in the Soviet Union.

IN BEIRUT—A Sudanese member of the Arab peace force welcomed to Beirut yesterday.

In and Near Beirut

Rightists Accept Syrian Presence

By James F. Clarity

BEIRUT, Nov. 9 (NYT).—Christian rightist leaders agreed with President Elias Sarkis today in the stationing of Syrian troops of the Arab peace-keeping force in Christian areas of Beirut and its suburbs.

The two principal Christian leaders—Pierre Gemayel of the Phalangist party and Camille Chamoun of the National Liberal party—said after a three-hour meeting with Mr. Sarkis that they had been "reassured" by the President of the necessity of what in effect would be Syrian occupation of Christian strongholds areas under the peace agreement approved at a summit meeting of Arab leaders last month.

While the Syrians estimated to be providing at least two-thirds of the 30,000-man deterrent force approved by the Arab leaders, rightists' objections to an armed Syrian presence in their areas have delayed the implementation of the peace agreement for the last several days.

While the rightist leaders were at the presidential palace in Baabda, on the edge of the capital, demonstrations of protest against the expected Syrian occupation occurred in Christian-controlled areas of east Beirut.

The Phalangist radio said that 15,000 persons participated in the protest, which included the closing of many schools and shops. Witnesses in East Beirut said, however, that the number of demonstrators was closer to 2,000. Leftist-Moslem officials in west Beirut said the demonstration was stimulated by recalcitrant rightist officials.

A group of Christian demonstrators also assembled calmly at the presidential palace to protest the expected coming of the Syrians. No serious violence or injuries were reported in connection with the demonstrations, but they indicated tension among the rightist Christians that could erupt in violence when the Syrians, now assembling their bases in the mountains 10 miles east of the capital, start to move through Christian areas.

The rightist Christians' objections to the stationing of Arab peace-keeping troops in their areas are based on contentions that the rightists themselves are able to control their armed militiamen under the peace agreement. Mr. Chamoun and Mr. Gemayel have said that their militias would adhere to the new accord.

President Sarkis, who is personally in charge of the Arab peace force, and is himself a Maronite Christian, has moved cautiously in implementing the agreement, which stipulates that the force maintain order in all areas of the country.

Checkpoint Yielded

Mr. Sarkis and the Syrians had little difficulty in getting leftist Moslems and Palestinians to agree to cooperate in making the agreement work. Today, Palestinian and Moslem leftist militiamen at a key section on the Damascus-Beirut highway at Aley, 10 miles east of Beirut, quietly ceded control of the checkpoint to Syrian soldiers.

In his field headquarters, a mountain villa along the Damascus-Beirut highway, Col. Tawfiq Jalloul, a Syrian officer who will command troops to be stationed in the Beirut area, said his soldiers and tanks would begin to move toward the capital tomorrow.

He said his troops would move first to the town of Kahale, where a substantial rightist force is still in position. The colonel said he did not expect armed resistance there but, if it erupted, his troops would wipe out the resistance and move on down the highway to Baabda.

5 Deputy Premiers Named

Sadat Forms Super-Ministries To Spur Egypt's Development

By Don A. Schanche

CAIRO, Nov. 9.—President Anwar Sadat streamlined his sluggish government along "super-agency" lines today in an effort to break the bureaucratic and administrative logjams that have frustrated development and put Egypt into a slow spiral toward economic ruin.

He swore in more than two dozen Cabinet ministers and promptly regrouped them under five deputy premiers who will be responsible for pulling together a fragmented and uncoordinated bureaucracy that recently has done as much to block progress as to achieve it.

The new government is the first in a generation to include many who were popularly chosen in freely contested parliamentary elections. Some observers believe that even though their popular mandate is a limited one, because of restrictions placed upon the elections two weeks ago, it strengthens the hands of Premier Mamdouh Salem and his deputies.

Before the elections it was widely believed that the government feared political defeat if it undertook the reforms and tough austerity measures most economists believe are necessary to save Egypt from financial collapse. "They have the muscle to do something now if they are willing to use it," said one observer.

Others were less optimistic about the streamlining, because there were few new faces in the new Cabinet.

Fahmy Reappointed

Foreign Minister Ismail Fahmy, for example, already held the rank of deputy premier and was reappointed to both posts. Gen. Mohammed Gamay retained his post as deputy premier for military affairs and war production.

Two other deputies responsible for domestic social affairs and electric power also were in the previous Cabinet, as were most of the ministers picked today.

But the interest of most observers centered on the fifth deputy, in charge of the critical ministries of economy and finance, as well as trade and production. Most observers believe that the shortsightedness and poor administration of these ministries has been the major obstacle blocking Mr. Sadat's "open door" to foreign investment and economic reform.

The new deputy premier charged with making order out of the often chaotic government departments is Abdel Kaissouny, a London-trained economist and banker who held a similar post under the late Gamal Abdel Nasser in the 1950s and 1960s. Mr. Kaissouny is highly regarded as an economic administrator and planner and has gained wide contacts and respect in international financial circles.

By contrast, the minister of finance who previously held the reins on Egypt's economic development, Ahmed Ismael, was considered an economic lightweight and even "a catastrophe" by many foreign and Egyptian financial experts.

He is a former university professor whose advice to Mr. Salem and Mr. Sadat has been blamed by some observers for setting Egypt's progress toward recovery back by at least two years.

As but one symptom of Egypt's problems, for example, the country has been forced to take on more than $2 billion to indebtedness to international banks, over and above its heavy debt to foreign governments, including the Soviet Union. Interest payments on the back indebtedness have been from 60 to 90 days in arrears much of this year, and financial observers warn that Egypt will have to take on at

Oil Output Up; Price Increase Expected

By Joe Alex Morris Jr.

KUWAIT, Nov. 9.—After three years of declining production, the oil business is booming again around the Persian Gulf.

The refineries are humming at old production levels. Supertankers from Europe and Japan are lining up as they did when production mounted steadily from year to year to supply what seemed to be an endlessly expanding market.

All this was changed abruptly in late 1973 by two factors. The Arab-Israeli war that year resulted in Arab oil boycotts against the United States and the Netherlands, a refining and distribution center for West Europe.

And, more important, the Organization of Petroleum Exporting Countries belatedly discovered its monopolistic power to dictate the price of oil to the world. In the next two years, the price increased fourfold.

The latter contributed—to a degree still disputed by OPEC economists and Western industrialists—to the economic recession in the West during the last two years. Led by the United States, the West now seems to be climbing out of that economic trough.

But increased demand is only part of the explanation for the current soaring producton rates. The main reason is the forthcoming conference of the 13 OPEC nations, due to be held in the Gulf state of Qatar Dec. 15.

Conscious of declining demand, OPEC ministers did not increase prices at their last two ministerial meetings, with Saudi Arabia largely responsible for the freeze.

This time, the atmosphere is different. The Saudis are said to be agreeable to what is called a "nominal" price increase.

Oil experts here say this means a 10-per-cent increase. Some, like former Saudi Oil Minister Abdullah Tariki, now an independent oil consultant here, believe it may go as high as 15 per cent.

Shah of Iran

This is well below what the hardliners, led by Iran, Venezuela and Iraq, think they should get. The Shah of Iran has talked of a 25-per-cent increase, but last weekend indicated he might settle for a minimum 15 per cent. Although the 25-per-cent figure is regarded largely as a bargaining point, there is logic to it from the producers' point of view.

They say that the price of goods they import from the West has risen 35 per cent during the past three years. Take away the 10-per-cent oil-price increase granted in 1975, and that leaves a justified 25-per-cent increase, they say.

The prospect of even a 10-per-cent increase has geared the major oil companies into action. They are filling every storage tank around the world to the brim before the Dec. 15 deadline.

"The pickup in sales has been big," said Mahmoud Adassani, Kuwait's newly appointed gov-

GLOBAL QUAKE RESULTS—Officials stand atop a collapsed paper plant in the Philippines (above) and Greeks camp out (below) after tremors shook Salonika.

Quakes Cause Damage From Greece to Philippines

MANILA, Nov. 9 (AP).—The National Disaster Coordinating Center said today that earthquake damage yesterday to public and private property in at least two southern Philippine towns totaled nearly three-quarters of a million dollars.

There were no reports of deaths or injuries during the earthquake, it added.

The center said 4,310 pounds of relief goods was airlifted immediately to the quake-stricken area, about 500 miles southeast of Manila.

The earthquake, with a magnitude of 6.8 on the Richter scale, shook the eastern half of Mindanao Island and was felt within a 193-mile radius from the epicenter, located about 530 miles south of here.

The center said damage was concentrated in the towns of Hinatuan and Bislig.

2 Quakes in Japan

TOKYO, Nov. 9 (Reuters).—Two weak earthquakes shook Tokyo and nearby areas today. There were no reports of casualties or damage.

Today's tremors followed a series of five earthquakes felt in China, the Philippines, Iran and northern Greece as well as Japan Sunday and yesterday.

In Indonesia, a volcano erupted over the weekend.

In Military Success, Vorster Support

Rhodesia Regime Sees New Hope

By Robin Wright

SALISBURY, Rhodesia, Nov. 9 (WP).—Two major developments in this land's complex, 11-year-old constitutional dispute have led to a new optimism about the course of events should the Geneva peace negotiations break down.

On the political front, South African Prime Minister John Vorster has promised that his country will not boycott Rhodesia if the talks between its white-minority government and four African nationalist leaders collapse.

And on the military front, a major setback to the nationalists in the four-year-old guerrilla war has led to a new wave of confidence among the Rhodesian military.

In a U.S. television interview Sunday, Mr. Vorster announced that his government would not "indulge" in boycotts or border closures against Rhodesia, whatever happens in Geneva.

He indicated that this policy includes the shipment of arms and ammunition channeled through, or coming from, South Africa. Such supplies are vital to Rhodesia's ability to fight the escalating guerrilla war.

Support Was Issue

South African support has been a major variable in the delicate diplomatic negotiations. Mr. Vorster claimed that he did not pressure or threaten the Rhodesian government into agreeing to terms of the settlement proposals drawn up with the aid of Secretary of State Henry Kissinger. But businessmen and government sources here in Salisbury contend that railway links, gasoline supplies and financial aid had all been pressure points during negotiations in September among Rhodesian, British, U.S. and South African diplomats.

Once Rhodesian Prime Minister Ian Smith's government agreed to the principle of black-majority rule, "the doors were suddenly opened again," a Rhodesian businessman explained recently.

The great fear in Rhodesia has been that those doors would slam shut if the Geneva talks broke down, leaving them with no links to the outside world and virtually insuring a guerrilla military victory.

Mr. Vorster's pledge of continued South African support was made shortly after the most effective single offensive in the four-year-old war, a punitive raid by the Rhodesian Army on seven guerrilla camps in neighboring Mozambique.

The attack on Oct. 31 resulted in the deaths of several hundred guerrillas and the destruction or confiscation of nearly 60 tons of military supplies—setting back one faction of the insurgents' campaign at least two months, according to Rhodesian military experts.

A security official said he did not expect another major guerrilla incursion in the northeast until

New Plans For Geneva Discussed By British

By Bernard Weinraub

LONDON, Nov. 9 (NYT).—The British government, seeking to break the deadlock at the Geneva conference on the future of Rhodesia, discussed today a new formula for an independence date in the territory and a possible British role in the transition to black-majority rule.

Ivor Richard, British chairman of the conference at Geneva, insisted late today that he was returning to the talks there without "any great new fresh initiative." But diplomatic sources made it clear that he had spent the day in London in an urgent bid to discuss various British options aimed at breaking the impasse in the two-week-old conference between white Rhodesian officials and four nationalist leaders.

Mr. Richard, who arrived here yesterday, met with Prime Minister James Callaghan and Foreign Secretary Anthony Crosland today. He said afterward that he still hoped the talks would reach a settlement but he expected them to go on in Geneva until Christmas.

"There are very hard issues to get over," Mr. Richard conceded in a news conference at Heathrow Airport before flying back to Geneva late today. "The date on independence is only the first," he said.

Starting Point

Mr. Richard has seized on the issue of a date of independence as a relatively noncontroversial question suitable for starting the conference, which was organized to set up an interim biracial government leading to independence and black-majority rule. Rhodesia's Prime Minister Ian Smith, the leader of the white minority, agreed in September to majority rule within two years.

But African nationalists at Geneva, fearing that Mr. Smith seeks to sabotage majority rule, have demanded independence within 12 months. So far, there have been virtually no signs of conference progress on the date.

Today, Mr. Richard discussed in London what one official termed a "flexible formula" for a date—a plan that would take into account the steps necessary for Rhodesian independence but would not be precommitted to a specific day. Such a formula would defuse the issue of a date of independence and lead to discussion of the more substantive problems of creating an interim biracial government acceptable to blacks and whites in Rhodesia, a nation of 270,000 whites and 6 million blacks.

Mr. Richard said today: "There has to be a draft constitution, constituencies set up and electoral rolls prepared. The only difference between the parties is the assessment of how long this will take... whether this can be done concurrently or consecutively." He said he did not expect a "smooth passage."

British Participation

Discussions here today also centered on a potential British role in the transition to majority rule—a role that the nationalist delegations seek in order to allay suspicions that Mr. Smith will undercut the principle of majority rule. The United States privately supports the African view.

The British, fearing political and even military involvement in southern Africa, are extremely reluctant to make a commitment to participate directly in the transition in Rhodesia.

What the Africans seek is some type of colonial figure—such as resident commissioner or governor general—to oversee the transition and guarantee black-majority rule. Diplomatic sources said that such a move, which needs Cabinet approval, was discussed today by Mr. Richard.

Also discussed today, according to the sources, was the possible overhaul of the interim government structure outlined by Mr. Smith following his talks with Secretary of State Henry Kissinger.

Kissinger, Aides Confer

WASHINGTON, Nov. 9 (UPI).—Secretary of State Henry Kissinger met today with some of his top advisers on Africa, two of whom have returned from the Rhodesian conference in Geneva.

William Schaufele, assistant secretary for African affairs, and John Reinhardt, assistant secretary for public affairs, attended a session of the so-called African Group, a high-level task force that meets with Mr. Kissinger periodically.

Mr. Schaufele, Mr. Kissinger's envoy to the Geneva conference, and Mr. Reinhardt, the highest-ranking black diplomat in the State Department, were also in Dar es Salaam, where they talked with presidents of African "front-line states" bordering Rhodesia.

Wider Participation Seen as Stabilizing

Business Chief Backs Communist Role in Italy

By J.W. Anderson

ROME, Nov. 9 (WP).—The question is whether to give the Communists a greater share of power in the Italian government. The answers are not always the expected ones.

Guido Carli was the head of the Bank of Italy for 15 years and earned a good reputation in international financial circles. Now he is president of Confindustria, Italy's highly influential chamber of commerce and industry. If anybody speaks for Italian business, it is Mr. Carli.

He thinks that it is necessary now to allow the Communists greater participation in running Italy.

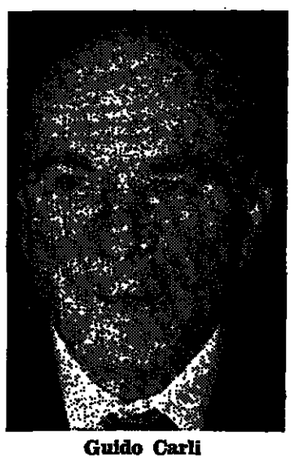
Carrying out the government's austerity program will require a much broader consensus, Mr. Carli says, than the government currently commands. And austerity is now crucial.

Mr. Carli lays out a logic that needs to be taken seriously by the U.S. and West German governments, which have been using their financial leverage to keep the Communist party out of the Italian Cabinet.

Since Premier Giulio Andreotti's Christian Democratic government has only a minority of the seats in Parliament, it stays in power only by grace of Communist votes and abstentions. This situation has already given the Communists a great deal of effective influence, and they have been using it so far in ways that the Andreotti government—and for that matter, the U.S. government—would have to consider restrained and useful.

Mr. Andreotti's austerity program means breaking some of the promises of prosperity and security that Italy's government made in better times.

Inflation Rate



Italy's membership in the European Economic Community has made northern European wage scales the standard for Italy, causing wages to rise much faster than the national economy is growing. Also, Italian wage and social benefits are now indexed to the inflation rate, running at almost 20 per cent this year. That is why Italian exports are a great deal less competitive now than three years ago.

The staggering labor costs are diverting wealth from investment to personal consumption, and from the production of the exports—which provides foreign exchange—to the domestic economy.

Without a sharp and immediate change in Italian policy, Mr. Carli says, the country's balance-of-payments deficit would soar during the next year. Since Italy cannot expect any great improvement in exports next year, it is going to have to curb imports drastically. Mr. Andreotti is now proceeding to effect that by cutting consumer demand, mainly through higher prices and taxes.

As a result, Confindustria's analysts expect the country's economic growth this year to be zero at best.

Mr. Carli believes that the Andreotti austerity plan is a useful beginning, but in its present form will have counterproductive results because it increases the tax burden on industry. The resources to be taken from the consumer will not flow directly into business investment but rather to the government, which will then decide where to put them. The Italian government's record in running this kind of a mechanism is poor—too much patronage, too much money unspent because a vast, inept bureaucracy cannot make decisions.

Guido Carli

By contrast, Mr. Carli argues, Italian industry has a record of fast and flexible response to changing markets. The country does not export only mandolins and ladies' shoes. Italy ranks third in machine-tool exports, behind the United States and West Germany.

How long will it take for Mr.

(Continued on Page 2. Col. 8)

Vote Machine On Holiday

NEW YORK, Nov. 9 (AP).—About 6.4 million voters cast ballots last week in 13,843 of New York State's 13,844 election districts. But no one voted in District 61.

The district, a six-square-block section of waterfront in Brooklyn, had two registered voters, but only one showed up. The two clerks there to watch the voting machine, at $37.50 each, ruled him ineligible because he hadn't voted for three years.

Bea Dolen, director of the city's Board of Elections, said District 61 probably will be consolidated with another district for the next election.

$800 Million for Third World

OPEC Seeks Decisive Role in Agriculture Fund

By Paul Hofmann

VIENNA, Nov. 9 (NYT).—The oilproducing countries are seeking a decisive voice in a new $1-billion undertaking to spur farming in Third World countries that do not grow enough food, officials here say.

The instrument for this development strategy is the OPEC Special Fund, an $800-million facility that the Organization of Petroleum Exporting Countries set up earlier this year.

Lately OPEC has been under mounting pressure from Third World countries without oil to step up its aid to them. Creation of the OPEC fund was a response to such pressure, but the way it is operating indicates the intention of the oil producers to use it for increasing the group's leverage in international affairs.

In the aid project for Third World farming, the OPEC fund is in partnership with the United States and other industrialized nations.

Food Deficits

The director general of the OPEC fund, Ibrahim Shihata, said in an interview here that oil money would help establish a new international fund for agricultural development that would quickly channel assistance to food-deficit countries.

OPEC has offered to contribute $400 million to the new agricultural fund on condition that industrialized nations give $600 million. This target amount for matching money from Western powers and Japan has almost been reached.

The United States has pledged to contribute $200 million.

The project for the agricultural development fund goes back to the World Food Conference in Rome in November, 1974, Mr. Shihata said the new fund would provisionally have headquarters in Rome, but would in all likelihood move to Tehran in 1977 and become a new independent specialized agency of the United Nations system.

Asked why the new agricultural fund was to be split from the United Nations Food and the World Food Council, both based in the Italian capital, Mr. Shihata said "There is too much bureaucracy in Rome."

Same Voting Power

Actually, OPEC clearly wants to control the proposed agricultural fund. The $400-million contribution will give the 13 members of the oil group the same voting power as the industrialized nations will have in the fund's board. This body will also include representatives of Third World countries without oil that are expected to vie with the OPEC group.

No Communist country has so far offered any contribution to the new fund. Mr. Shihata is mentioned as a possible future head of the agricultural fund. He is a 39-year-old Egyptian-born Kuwaiti who holds a doctorate from the Harvard University Law School.

He has taught international law at Egyptian universities and served as legal adviser to the Kuwait fund for Arab economic development.

Mr. Shihata, who has been in Vienna since August, said: "Here I am, administering $800 million with two professional people and two secretaries." This could be done, he explained, because the OPEC fund was working with existing international agencies rather than building a new bureaucracy.

The OPEC fund has earmarked an additional $200 million for balance of payments support for the 45 "most severely affected" countries. No decision has yet been taken on how the OPEC fund will spend the remaining $200 million of its present resources.

"We are shopping around for projects," said Mr. Shihata.

Nepal Narcotics Unit To Enforce Drug Ban

KATMANDU, Nepal, Nov. 9 (UPI).—Nepal will soon set up a narcotics control office to oversee an official ban on the sale and use of drugs in the country, a government spokesman said.

Nepal in the last two years has sought to rid itself of its image as a haven for addicts. A ban on sale and use of hashish and marijuana was imposed in 1974 but it has remained unimplemented because of a shortage of manpower. The law provides for a maximum penalty of 14 years in jail for offenders. It applies to both Nepalese and foreigners.

Production Up In Oil States

(Continued from Page 1)

ernor of OPEC. "The companies are buying in anticipation."

Kuwaiti production is now running at more than 2 million barrels a day, after having dropped as low as 1.5 million.

In Saudi Arabia, demand has pushed the price up from the OPEC standard of $11.51 a barrel to as much as $11.65, experts here report. In addition, the producers are often demanding immediate cash instead of allowing a 30 to 60-day grace period for payments.

Emirates Want Rise

TOKYO, Nov. 9 (AP).—The oil minister of the United Arab Emirates said today his country plans to propose a less than 10-per-cent increase of the price of crude oil at the OPEC meeting in December.

Mani al-Otaiba, UAE minister of petroleum, told reporters that OPEC has no choice but to decide on a price rise at the meeting, but that his country would not support a rise of more than 10 per cent. The price rise should be minimized so that the world economic recovery will not be affected, he said.

The minister came to Japan to attend a two-day seminar, under the theme of "Cooperation Between Japan and the Arab World."

Alternate Energy Sources

PARIS, Nov. 9 (UPI).—The International Energy Agency decided today that its member nations will step up their effort to cut down on oil imports and rapidly develop substitute sources of energy.

The decision was announced after a two-day meeting of the managing board of IEA, which groups the United States, West Germany, Britain, Japan and 15 other major non-Communist industrial nations.

French Assembly Votes $12 Billion For Arms in '77

PARIS, Nov. 9 (IHT).—The National Assembly approved today a $12-billion defense budget for next year, including a special $250-million appropriation for supplementary military equipment.

Defense Minister Yvon Bourges told the assembly during the debate that in spite of the government's austerity plan, the military budget for 1977 would increase by 16.8 per cent from this year, compared with an overall 13.8-per-cent increase of the national budget.

The increases occurred despite the efforts to cut military costs by reducing the number of troops stationed abroad. France has announced that it would withdraw 10,000 troops stationed in West Germany this fall.

The $250-million supplementary increase was made after the assembly's Military Commission criticized the government's authorization for new equipment. This money will be used for acquisition of 20 Mirage F-1s for the air force, 30 AMX tanks for the army and a navy supply tanker.

The defense outlay approved today amounts to about 17 per cent of the national budget. Current plans are to increase defense spending to one fifth of the national budget by 1982.

MARKING 1938 TERROR—A poster of Chairman Mao in Frankfurt is pasted over with a neo-Nazi notice.

Neo-Nazis Mark 1938 Terror Date

FRANKFURT, Nov. 9 (UPI).—Neo-Nazis demonstrated today—the 38th anniversary of anti-Jewish riots—by raising a Nazi flag 50 meters on a smokestack and by decorating the city with propaganda leaflets. On "Crystal Night," Nov. 9, 1938, Nazis staged widespread attacks on Jewish property.

Police reported today that unidentified persons had raised the red, white and black banner on the smokestack of a power station near Frankfurt University's Physical Training Institute. "The flag failed to unfurl, so few passersby actually saw it," a police spokesman said.

Elsewhere in Frankfurt, Nazi posters were glued to ticket-vending machines, lamp posts and walls. The hand-sized posters, depicting a swastika, said in German: "We are here again. Red front perish. Don't buy from Jews."

The posters were signed: "National Socialist German Workers Party, Foreign Organisation, Lincoln, Box 6414, Nebraska, U.S.A." The National Socialist German Workers party was the official name of Hitler's Nazi party.

Six years ago neo-Nazis burned down a Jewish old peoples' home in Munich. Since then there have been several anti-Jewish incidents—especially in Frankfurt, where the majority of the anti-Jewish violence was concentrated on Crystal Night.

Two days ago, 800 Nazi supporters, dressed in black shirts and wearing Nazi insignia, held a six-hour rally in Mannheim to honor Nazi war heros.

Rhodesia Regime Encouraged By Military Success, Vorster

(Continued from Page 1)

after the new year. He said it would take at least that long for the insurgents to regroup and resupply.

The well-planned attack hit five border camps, mainly equipment-storage sites, and two large bases. Because of well-laid psychological groundwork, the raid did not result in a political controversy like the one ignited by the only other serious offensive, one launched early in August, when at least 340 were killed.

Rhodesian officials provided abundant evidence in advance that the guerrilla war had escalated to almost twice the dimensions of just two months earlier—despite the fact that the government had agreed to black-majority rule and negotiations in Geneva with the African nationalists.

Although the government will not issue official statistics concerning casualties on either side, well-informed sources said that only two Rhodesian soldiers were killed in the offensive.

Military leaders now say, with new confidence, that the hot-pursuit action proves their long-time contention—that the Rhodesian Army can contain the guerrillas in the way that the British were able to control insurgents in Malaya (now Malaysia) for 12 years.

Basis of Strategy

Rhodesia is counting on Britain's Malayan strategy to work again. Its operation is based almost entirely on concepts developed in the Malayan campaign, where several key Rhodesian officers fought.

Gen. Peter Walls, the Rhodesian-born career officer who is commander of the army, trained and led a Rhodesian unit that played a major part in Britain's success against Communist insurgents in Malaya. And Maj. Gen. John Hickman, the army's chief of staff, was awarded the Military Cross for distinguished service in Malaya.

More important, perhaps, is the fact that the Rhodesian African Rifles—African regular troops—also served in the Malayan counterinsurgency campaign. They now form the most active unit in Rhodesia's own counterinsurgency campaign.

The army's anti-guerrilla strategy involves four major programs:

- To dominate small communities in the countryside and build up a feeling of security which should result in an increasing flow of information.
- To break up the "Communist organizations" in these areas.
- To isolate the "bandits" from their food and supply lines.
- To destroy the guerrillas by forcing them to attack the Rhodesian Army on their own ground.

A key element involves the "protected villages," guarded enclosures where more than 200,000 rural Africans have been moved, to deny the guerrillas access to the population on whom their survival and success depend. The government has set out to improve the conditions of the Africans in these new villages and win their support.

Among the improvements that the Rhodesians list are piped water, health facilities, electricity, music on a public-address system, improved agricultural techniques and more schools.

But Rhodesia's campaign, in comparison to Britain's operation in Malaya, is much more costly, is harder to staff with a manpower pool of only 270,000 whites, involves a much larger area that is harder to seal off and control, involves majority support for the guerrillas (unlike the situation in Malaya) and must be conducted against the background of UN sanctions, which were not involved in Malaya.

A local journalist, who is a reservist in the Rhodesian Army, observed: "The Malayan strategy may enable us to hold the terrorists, but I doubt we will ever defeat them."

14 More Are Slain

SALISBURY, Rhodesia, Nov. 9 (Reuters).—Six members of a road gang working near Rhodesia's border with Mozambique were robbed and killed by African nationalist guerrillas yesterday, military sources said today. They also said a Canadian—one of several hundred foreigners recruited as soldiers—was slain.

The sources said the work gang was tarring a road in the Honde Valley when a guerrilla group captured the six, tied their hands behind their backs and shot them.

In another incident yesterday, in the Chipinga area of southeastern Rhodesia, security forces shot dead eight guerrillas who, the sources said, had been part of a group responsible for killing 12 African members of a fence-erecting squad last month. Two of the guerrillas were said to be women. It was the first indication that women are fighting with the nationalists.

Gaza Cholera Case

TEL AVIV, Nov. 9 (AP).—Health officials have reported a case of cholera in the occupied Gaza Strip, the fifth case in Israeli-controlled territory in three weeks.

Economic Contrasts

2 Distinct Nations Emerging On Cyprus After Invasion

By Steven V. Roberts

NICOSIA, Nov. 9 (NYT).—For all practical purposes the sovereign and independent state of Cyprus has ceased to exist. Cyprus is two nations now, one controlled by ethnic Greeks, the other by ethnic Turks.

It is almost impossible even to make a telephone call between the sectors. A Greek and a Turk, old friends who both live in Nicosia, met for the first time in years recently—at a trade fair in West Germany.

More than two years after Turkish troops invaded and split the island, the two nations present some striking contrasts. On the Turkish side, which consists of 20 per cent of the population of 700,000 and 40 per cent of the territory, the economy is almost stagnant and the government is broke, but the people seem relieved and even hopeful.

"The Greeks kept us down all the time, and now we want to do things for ourselves," said Necati Sager, head of public information. "It's a childish feeling, but it's very important. People know that the Greek pressures are not on them now."

Cloud of Uncertainty

On the Greek side unemployment is down, exports are up, the hotels are full. But the economic boom has not dispelled a lingering cloud of uncertainty.

"Anybody that has friends or family abroad and can afford to go will go," a journalist said. "What we see now is a long struggle, and we cannot have any hope for a final settlement that gives us confidence about the future, especially about our children. Everyone seems to be thinking about the future of their children."

The Turkish Cypriots feel that the only way to guarantee their independence and security is to sever all ties with the Greek side. High white walls have been built along the border to thwart trade, smuggling, espionage and even conversation. Cypriot money is being squeezed out of the economy, and Greeks are being squeezed out of their homes.

As a result, Turkish Cypriots are completely dependent on their motherland, as they call it. Turkish aid keeps their institutions functioning. Their planes fly only to Turkey, their telephones are linked only to Turkey, their leaders travel on Turkish passports.

Political Favoritism

Moreover, the ethnic Turks have not been able to utilize most of the economic assets captured during the war. Few know how to manage a plastics factory, run a large hotel or export oranges, and those who do know have sometimes been edged out by political favoritism.

Such problems have been aggravated by the Greek side's international boycott campaign. Tourist agencies refuse to deal with Turkish-Cypriot hotels, air and shipping lines refuse to use Turkish-Cypriot ports and archaeologists refuse to dig in Turkish-Cypriot soil.

There are some bright spots for the ethnic Turks. Some big companies have started selling direct to Turkish merchants, bypassing Greek agents. Construction has stepped up. The wheat and barley crops have produced a surplus.

Ahmet Hassan, a fabrics merchant, said that tourists from Turkey were coming regularly and buying goods they could not find back home. In addition, he said, ethnic Turks no longer have to compete with Greek merchants, so they have more customers.

Above all, ethnic Turks said they feel more confident. "The Greeks say we used to live like brothers, but it was not so," Mr. Hassan maintained. "Before 1974, I used to drive to my parents' village, and to get there I had to drive through the Greek area. When I got back I felt relieved. I always had the feeling that something might happen."

'Big Achievement'

"Before 1974 our economy was zero," Mr. Sager noted. "Take our citrus crop. We exported very little this year, but to us it was a big achievement. We handled the whole thing, from start to finish, by ourselves, without the Greeks."

Across the truce line monitored by the United Nations peace force, the ethnic Greeks boast about their economic recovery. Air-passenger traffic is running double that of last year and freight traffic has tripled. Unemployment has dropped from 35 per cent to 15 per cent and foreign currency reserves are as high as before the war. Merchants and traders find the war has forced them to find new markets and new products.

Economists worry that the boom depends partly on a good harvest and on an influx of wealthy Lebanese, factors that could alter quickly. Moreover, Cypriot goods are competitive abroad because wages and prices have remained stable, but now the unions threaten to demand pay increases next year.

Italian Backs Role of Reds In Regime

(Continued from Page 1)

Andreotti's austerity plan to help Italy's economy back into balance?

That depends, Mr. Carli replies, on the government's success in actually redistributing resources for personal consumption into investment. It is a matter of political authority, not technical economics, Mr. Carli emphasizes, and it "requires the participation of all parties, governments, unions." That, specifically, excludes the Communist party and the unions affiliated with it.

What Does It Mean?

"Participation" is one of the carefully nuanced words around which Italian politics revolve. Does it mean Cabinet posts immediately for Communist leaders? Mr. Carli leaves the precise method of participation to the politicians; he is talking about the substance of power.

But would the inclusion of the Communists in the Cabinet set off another panic flight of capital, like the one last spring before the elections? Mr. Carli doubts that it would attract attention, but he does not think it would be a disaster. Italian investors are already well aware of the Communists' influence.

Americans—particularly Secretary of State Henry Kissinger—see the Communists' rising influence as a sign of dangerous instability in Italy.

But the striking thing about the climate here is that a growing many Italians—including country's most eminent business spokesman—think that the reality is exactly the opposite. According to Mr. Carli, stability for Italy now requires a larger role for the Communist party.

Final Touches on Plan

ROME, Nov. 9 (UPI).—Andreotti today put the finishing touches on a harsh package of economic steps prior to a crucial parliamentary debate tomorrow.

After exhaustive meetings the last 48 hours with political and union leaders, Mr. Andreotti faces the final test for his austerity measures tomorrow amid warning strikes called by the three main unions as final demands by party leaders on what should be included.

Mr. Andreotti faced severe criticism from his own Christian Democrat party at a meeting of the party council in Rome this afternoon to approve the document he will place before Parliament. The Communist and Socialist parties also met to discuss their final position after separate meetings with Mr. Andreotti.

A general strike called for the Rome region by Communist and non-Communist unions alike will affect transportation, industry, commerce, schools and many houses tomorrow. The walkout is one in a series organized by the unions, crippling one region at a time as a way of protesting growing unemployment and economic decline.

Egypt Cabinet Regrouped

(Continued from Page 1)

least $300 million more debt this year just to meet the overdue interest obligations.

Until now, foreign banks have been forgiving the delayed interest payments in hope that the rich oil countries would come to the rescue with large cash grants and loans. But despite optimistic talk, no aid has materialized.

House in Order

Both Saudi Arabia and Kuwait, the two main potential benefactors, have made no secret that they are withholding aid, and loans until Egypt gets its economic house in order, and both are known to have pressured Mr. Sadat to get rid of Mr. Ismail.

Today's Cabinet reorganization, while largely a reshuffling of old hands in the Sadat government, brought in an old-new face in Mr. Kaissouny, and it is believed that his presence will go part of the way toward reassuring not only the Arab oil barons, but the international banking community as well.

But in the view of most observers, the task of reorganization and economic development in Egypt is so complex that Mr. Kaissouny's chances of bringing order out of the present chaos are rated at less than 50-50.

Gierek in Moscow

MOSCOW, Nov. 9 (UPI).—Polish leader Edward Gierek arrived in Moscow today and began talks in the Kremlin with party chief Leonid Brezhnev and other Soviet leaders.

150 places where scotch drinkers can order Jack Daniel's.

Scotch drinkers are a tenacious breed. But when they try Jack Daniel's for a change, many are surprised at the gentle flavor they find. Every drop of our whiskey is seeped through 12 feet of charcoal, a process that makes it the unique, favorite sipping-whiskey of America.

Unfortunately, this slow process occasionally makes Jack Daniel's hard to find in some areas. The restaurants, bars and hotels listed below, however, are a few of the places where it is in plentiful supply. At these establishments, scotch drinkers may find that they agree with drinkers of American whiskey on the smoothness of Jack Daniel's.

Over Chances in 1977 Elections

Catalan Catches 'Slightly Cocky Mood'

By James M. Markham

BARCELONA, Nov. 9 (NYT) — The opposition will win in Catalonia and it will lose in the rest of Spain," said Josep Andreu Abello with a vigorous puff on his cigar. "I think it is quite possible."

The former chief justice of the pre-autonomous Province of Catalonia, who is now organizing a new Socialist party, caught the scene, even slightly cocky mood of Spain's second city.

Emerging from a period of suspicion about the chances of getting anything from the central authority in Madrid, Catalonia's agile politicians are warily preparing for the elections promised next year by the government of Premier Adolfo Suarez.

Price for Participation

For the record, every political group from the region's strong Communist party to its ill-defined centrists is demanding the return of the *generalitat*, the autonomous government given Catalonia under the second republic, as a price for participation in the elections.

But privately, leaders of some of the groups acknowledge that Catalans will vote anyway, hoping to wrest from Madrid their historic regional rights.

"We will go to the elections," a leading centrist said. "For our people, who have not had elections in 38 years, we cannot declare a boycott. They will not understand."

Catalonia, as Catalans are quick to tell an outsider, is a special place in Spain. Highly industrialized, it produces a third of the country's gross national product with a sixth of its population. Yet under the Franco regime, Catalan wealth was funneled to Madrid, which was developed as a rival industrial zone.

Catalans, endowed with their own language and culture, consider themselves the most sophisticated of Spaniards. Barcelona, their centerpiece, is considered Spain's most "European" city.

New Confrontation

With elections on the horizon, Catalonia's peculiar political makeup could set the stage for another of the confrontations between autonomy-minded Barcelona and centralizing Madrid that have erupted throughout Spanish history.

For, as Mr. Andreu Abello noted, the Catalan opposition parties —which maneuver elegantly among themselves but unite against Madrid—stand a good chance of winning a solid victory.

A Catalan right-of-center party would be left of center anywhere else in Spain. Catalans attribute the absence of a strong rightist faction to their political closeness to Europe and to the fact that Franco's repression of Catalan nationalism fell heavily on the Catalan upper classes.

Thus Jordi Pujol, a leading banker and publisher, was arrested, beaten and jailed for two and a half years after a concert audience broke into a traditional Catalan hymn during a Franco visit to Barcelona in 1960.

Mr. Pujol, who heads an important group called Democratic Convergence, now works in uneasy tandem with Catalonia's Communist party, called the Unified Socialist party.

There is speculation in Mr. Pujol's camp that Catalonia will produce a strong Communist party, a weak Socialist movement and a fairly strong center-left.

Despite Church Ban, Service For Franco Set by Veterans

MADRID, Nov. 9 (Reuters) — Spain's right-wing Confederation of Civil War Veterans said today it would go ahead with plans to hold a memorial service here on Nov. 20, the first anniversary of Generalissimo Francisco Franco's death, despite a church ban.

Vicente Cardinal Enrique y Tarancon, the liberal archbishop of Madrid, banned the veterans from holding a mass in the Plaza de Oriente, where Gen. Franco used to address rallies, fearing it would be turned into an anti-government political rally.

"If we cannot hold a mass, we shall pray anyway in the Plaza de Oriente," said a spokesman for the confederation, which claims 600,000 members.

"I do not think we need the archbishop's permission to pray."

Valley of the Fallen

The mass had been planned to coincide with a government-organized memorial service at Gen. Franco's tomb in the Valley of the Fallen, 30 miles from Madrid. Ultra-rightists accuse the government of betraying Gen. Franco with its plans to hold general elections open to all parties except the Communists next year.

Confederation sources said they expected about 100,000 persons to attend the Plaza de Oriente service. The government has not said whether it will allow the veterans' gathering.

But political observers said a negative reply would upset the extreme right at a time when Premier Adolfo Suarez is wooing ultra-rightist support in the Cortes (parliament).

The Cortes this month will debate the government's proposals to set up a two-house parliament by universal, direct and secret suffrage.

Meanwhile, in Seville, police released four leftist opposition politicians after questioning.

The four—two Communists, a Socialist and a Maoist—were picked up yesterday after speaking at a Seville University gathering on opposition policies and preparations for a one-day general strike on Friday.

Sadat, Qadhafi Agree to Meet, Arafat Reports

CAIRO, Nov. 9 (UPI).—President Anwar Sadat and Libyan leader Moamer Qadhafi will meet in a bid to resolve their long-standing differences, Palestinian guerrilla leader Yassir Arafat said today.

Mr. Arafat, who has made several trips to Libya and Egypt during the past weeks in an effort to mediate Libyan-Egyptian differences, said he had been successful in arranging the meeting.

"The two Presidents have responded to my efforts and agreed to meet," Mr. Arafat told the Libyan news agency before flying to Cairo today with a Libyan delegation to begin preparatory talks for the Sadat-Qadhafi meeting.

The preliminary talks will begin in Cairo "during the last third of this month, which I hope will be the beginning of a new chapter in the relations between the two brotherly countries," Mr. Arafat said.

A-Supplier Nations Meeting Again on Controls

By David Binder

WASHINGTON, Nov. 9 (NYT). —The Nuclear Suppliers' Conference, which has grown from 7 to 15 countries in the last year, will meet Thursday and Friday in London to discuss ways of improving controls to curb the spread of the capability of making atomic weapons.

Ford administration officials and European diplomats said yesterday that a degree of harmony had developed recently among the major countries that export nuclear technology as a result of recent policy statements by France and the United States.

However, these officials acknowledge that until President-elect Jimmy Carter takes office in January, it will be difficult for the supplier nations to do more than discuss the critical nuclear policy issues in general terms.

Mr. Carter has spoken out for highly restrictive international controls on the export of nuclear technology, especially with regard to commercial facilities for reprocessing spent uranium fuel into plutonium—from which atomic weapons can be made.

Indian Blast

The conference was initiated two years ago in great secrecy by Secretary of State Henry Kissinger in response to India's detonation of an atomic device. The Indians used know-how and materials ostensibly acquired for peaceful purposes from the United States and Canada.

At that time France was negotiating to sell nuclear reprocessing facilities to South Korea and Pakistan, and West Germany was negotiating to sell reprocessing equipment and other nuclear facilities to Brazil.

The South Korean deal was quashed by United States intervention last winter. But the France-Pakistan and West Germany-Brazil deals are still on.

The reprocessing issue has been at the center of the nuclear supplier discussions from the outset.

Limited Guidelines

However, until now the supplier countries have been able to agree only on a limited set of guidelines that prohibit the use of exported materials for atomic explosions and require special restraints on the transfer of reprocessing or fuel enrichment facilities.

These guidelines were adopted in January by the seven founding members of the conference: the United States, Britain, France, West Germany, the Soviet Union, Canada and Japan.

At the next meeting in June six more countries joined the conference after adopting the guidelines. They were: Belgium, the Netherlands, Sweden, Italy, East Germany and Czechoslovakia. Since then Switzerland and Poland have joined.

Ford administration officials said that with France and the United States moving together on sensitive nuclear exports, the only major supplier country that has yet to declare itself in favor of restraint is West Germany.

Group Is Formed To Warn the U.S. On Soviet Policies

WASHINGTON, Nov. 9 (WP). —A group of former high-level government executives has been formed to sound the alarm to the U.S. public about what they consider dangerous Soviet policies.

The group—called the Committee on the Present Danger—will challenge President-elect Jimmy Carter and anybody else who tries to cut the U.S. defense budget next year.

Paul Nitze, former deputy secretary of defense who helped organize the committee, said its objective is to achieve "a clear understanding by the populace of what's going on" in the world as a result of Soviet expansionism.

Chairmen of the tax-exempt committee will be Henry Fowler, secretary of the Treasury in the Johnson and Kennedy administrations; Lane Kirkland, AFL-CIO secretary-treasurer, and David Packard, deputy secretary of defense from 1969 to 1971.

Eugene Rostow, former under secretary of state for political affairs under President Lyndon B. Johnson, was another organizer of the committee.

Former Defense Secretary James Schlesinger encouraged Mr. Rostow to organize the committee, Mr. Rostow said, but has not yet made up his mind about joining it. Former Secretary of State Dean Rusk has joined, Mr. Rostow said.

Free Education For GI Enlistees Ends on Dec. 31

WASHINGTON, Nov. 9 (AP).— Future veterans of the U.S. armed forces are going to have to give a little if they want the government to help put them through college or graduate school when they return to civilian life.

Men and women who join the services after Dec. 31 will not be entitled automatically to the lucrative education benefits accruing to current servicemen and all veterans in recent years.

But the Pentagon and the Veterans Administration are gearing up for an experimental new education program that will provide benefits for servicemen who are willing to put aside at least $50 a month for their own educational fund.

Under the new program, those who join the military after Dec. 31 can gain the new educational benefits by contributing $50 to $75 a month to the VA, up to a limit of $2,700 over the individual's military career. The government will match the contributions with $2 for each $1 invested.

Devlin Spurns Peace Effort

NEW YORK, Nov. 9 (AP).— Former member of Parliament Bernadette Devlin McAliskey said yesterday that the women's peace movement in Northern Ireland is an extension of the British and Irish governments, to which she is "personally, radically opposed."

Mrs. McAliskey said here that the movement is "looking for peace at any price—and the price would be subservience."

She said she has moved "further and further to the left" since she urged creation of a workers' republic during a tour here in 1972. "There is no peace for Ireland this side of socialism," she said. Mrs. McAliskey, is beginning an eight-city U.S. speaking tour.

Ford Post-Vote Call To Nixon Admitted

PALM SPRINGS, Calif., Nov. 9 (AP).—President Ford placed a post-election phone call to resigned president Richard Nixon last week, a White House spokesman acknowledged today.

Assistant Press Secretary John Carlson said Mr. Ford phoned Mr. Nixon at San Clemente, Calif., on Thursday and the two men talked for three to five minutes.

Strauss to Quit As Chairman Of Democrats

Calls False Reports Of Rift With Carter

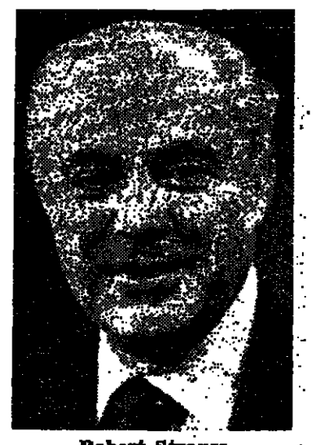
By Myra MacPherson

WASHINGTON, Nov. 9 (WP). —Robert Strauss, the Democratic national chairman, announced yesterday that he will leave his post Jan. 21, the day after Jimmy Carter is inaugurated as president.

The Texas lawyer once analyzed the post he has occupied as: "When the party's out of office, you're the head; when a Democrat is president, you're a goddamn clerk."

Mr. Strauss unified the Democratic party after its 1972 defeat with Sen. George McGovern as its presidential candidate.

Mr. Strauss's chief aide, Mark Siegel, predicted yesterday that there would be a "clean sweep" of the top Democratic National Committee offices. He plans to leave with Mr. Strauss and committee treasurer Edward Bennett Williams has announced that he would not stay after January.



Mr. Strauss said that he has recommended no one to Mr. Carter to succeed him and he fully expects that the new president will "exercise his right" to staff the committee with his own people.

Tour of Duty

Mr. Strauss, who will divide his time between his Dallas law firm and its Washington branch, said, "I've done my tour of duty for four years and I'm tired. I'm looking forward to private life."

He characterized as "totally inaccurate" the opinion of some top-level Democrats that that he had been "totally excluded" from major campaign decisions by Mr. Carter and his Georgia-based operatives.

"That's a lot of typical Washington foolishness. I never had a better political relationship than I had with Carter. I was in touch with him three or four times a week; I always had more involvement than I could take care of... We've got a lot to get done. I will be helping plan the inauguration. I think he's going to be a magnificent president."

Robert Strauss

F-14 Salvage Cost Held $1.7 Million

NORFOLK, Va., Nov. 9 (AP).— Navy spokesmen say it may cost $1.7 million to raise an F-14 Tomcat jet fighter from the 1,800-foot-deep seabed off Scotland, the Norfolk Virginian-Pilot reported.

The plane rolled from the deck of the carrier John F. Kennedy two months ago as the jet was being prepared for a catapult launch. Both crew members ejected safely. The plane's top-secret Phoenix missile was recovered Oct. 30.

The Navy said bad weather barred any attempt to raise the $16-million Tomcat over the weekend. Earlier, two attempts to raise the jet with cables failed when they snapped.

Corsica Blasts, Strike Protest French Arrests

BASTIA, Corsica, Nov. 9 (AP). —Extremists blew up two French television vans and many businesses shut down across Corsica today as part of "Operation Dead Island," a 24-hour protest against France's detention in Lyons of five hunger-striking Corsican autonomists.

The five, sent to a Lyons jail for the Sept. 7 destruction of a Boeing 707 at Ajaccio airport, have refused to eat since Oct. 21. They were hospitalized Thursday in grave condition and have been fed intravenously. Autonomist groups launched "Operation Dead Island" in hopes of pressuring French authorities into freeing the prisoners pending trial.

Mrs. Gandhi to Carter: India Seeks Better Ties

WASHINGTON, Nov. 9 (UPI). —In a congratulatory message to President-elect Jimmy Carter, Indian Prime Minister Indira Gandhi has expressed a desire to improve relations with the United States, the Indian Embassy has announced.

A press release said that Indian Ambassador Kewal Singh conveyed the congratulatory message, plus a separate congratulation from Indian President Fakhruddin Ali Ahmed, to Mr. Carter at Plains, Ga.

Java Volcano Active

JAKARTA, Nov. 9 (UPI).— Java's most active volcano, Merapi, shot clouds of gas thousands of feet into the air and showered volcanic ash on the city of Magelang over the weekend, the Antara news agency reported.

Killer Asks Execution; Utah Court Delays It

SALT LAKE CITY, Nov. 9 (AP).—The Utah Supreme Court issued a stay of execution yesterday for convicted killer Gary Mark Gilmore, despite two requests by Gilmore that he be shot by a firing squad as scheduled in seven days.

The court did not specify the length of the delay, which was requested by two court-appointed attorneys. The court said it would review the case before deciding the length of the stay. The execution had been set for next Monday and the stay occurred the same day that Gilmore had sent the court the second of two requests that he be executed on schedule.

Michigan House Seats

WASHINGTON, Nov. 9 (IHT). —The results of two congressional races in Michigan arrived too late for inclusion in early editions of the Nov. 4 International Herald Tribune. Garry Brown, a Republican, was the winner in the 3d Congressional District, Harold Sawyer, Republican, in the 5th.

U.S. Unit Orders Full Hearings on A-Peril Charges

WASHINGTON, Nov. 9 (WP). —The Nuclear Regulatory Commission has issued a series of orders to insure that allegations by commission employees of safety problems at nuclear power plants will be considered.

The action, taken in three different memorandums, occurred after two congressional committees began investigating charges by several NRC scientists and engineers that their warnings about nuclear safety problems were being ignored by their superiors.

The commission employees said that the most serious of the safety problems, which are highly technical in nature, could lead to equipment failure at nuclear plants and the possible release of lethal radioactivity into the environment.

Some of the problems, the scientists said, involve possible metal fracture under a combination of high pressure and low temperature, electrical failure, fire and failures in safety systems.

A-Licensing Resumed

WASHINGTON, Nov. 9 (AP). —The commission also announced it has resumed full licensing of new nuclear power plants, ending a three-month suspension because of two U.S. Court of Appeals decisions.

The NRC said it was resuming licensing on a conditional basis because of a new rule it proposed to cover the criticisms and subsequent court action.

A City of Quiet Resignation

Dresden Still Rebuilding After '45 Raid

By Craig R. Whitney

DRESDEN, East Germany, Nov. 9 (NYT).—Arthur Lobel, a lathe operator in the government-run Saxon Machinery plant here, has just moved into a two-room apartment in a new six-floor building. The streets are unfinished and rutted and there is no landscaping. But the work of reconstruction is never ended in Dresden.

The baroque splendors of the Saxon capital were almost obliterated in a firestorm after one of the heaviest British-U.S. bombing raids of World War II, on Feb. 13, 1945. The Communist government that took power after the war will not have finished rebuilding until the end of this century.

"We don't hold it against the Americans," Mr. Lobel said, recalling the night in which 35,000 people were killed. "The city was bombed because of the government we had then. The German people were responsible for what happened."

He says he has become "another man" since then. Dresden, too, is not what it was, and some scars will remain forever.

Today it seems to be a city of private lives, led in quiet resignation. The palaces on the Elbe River are half-reconstructed, half-ruined, and in what used to be the commercial center, the Prager-strasse, massive rectangular blocks of modern apartments seem lost among yawning empty spaces cleared of wreckage.

Mr. Lobel saw which way the wind was blowing in 1945 when the Soviet Army marched into the rubble, and he joined the East German Communist party the following year, when he was 21.

Rebuilding the City

"We rebuilt the city stone by stone, with our own hands," he says, "and we're proud of what we did, but we never could have done it without the help of the Soviet people."

What he has achieved in the tiny apartment—a small bedroom almost filled by the double bed, a living room dominated by an enormous, antique television-radio set and a bathroom he shows off for its washing machine and dryer—is material comfort to dull the memory of the years of chaos right after 1945.

He seems to want for nothing. "I'm happy with my job," he says. "I have work, no worries, and that's all I want." He brings home $95 a week and pays only $7 a week in rent, including heat and hot water.

Another Dresdener, not a party member but also content with his life, says:

"The materialistic middle-class mentality is even worse here than it is in West Germany. People want their comfort, and they tune out everything else. The state is so all-pervasive that all they want is to be left alone."

It is almost as if the half-million people who live here expended all their energy in the task of clearing away the rubble and restoring architectural monuments. The castle of the dukes of Saxony is still a scarred ruin. The 19th-century Renaissance-style opera house, designed by Gottfried Semper, has been an empty shell since the night the bombs fell.

"The destruction was so heavy," said the city architect, Heinz Michalk, "that some people thought the city shouldn't be rebuilt at all. Others wanted to sweep away the ruins and create something completely different. We compromised, by maintaining the baroque buildings around the castle and using a modern socialist style for the area outside."

In the Herbert Bochow High School, a modern building in a new town outside the central city, the halls are decorated with children's drawings of Soviet space achievements and a series of collages illustrating "the great friendship of the German Democratic Republic and the Soviet Union."

Some things have not changed. High on the hills of the north bank in Oberloschwitz, there is a neighborhood of spacious 19th-century private houses and elegant gardens that belonged to the rich and privileged.

Privileged Living

It is still that way. The opera singer Peter Schreier lives there, as does Rainer Kunad, a 40-year-old composer who has the privilege of travel from East Germany to the West, something most citizens are denied.

He says he bought his little house on the hill through an advertisement, not through connections. The living room is just big enough to hold his black grand piano, a bookshelf and a small stereo set. His four children live in separate rooms upstairs.

"I can write the kind of music I please," he says, and his latest opera, "Lithuanian Keyboards," had its premiere in the Dresden State Theater. He hopes it will become known in the West.

The destruction did reach Oberloschwitz. But a young student at the Technical University remembers that "as kids, we used to play in the ruins, and the smell of fire and smoke will always conjure up that memory for me."

A U.S. major and his enlisted aide, walking down the Prager-strasse the other day, said they were often confronted with cold stares in Dresden. They came from the small Western military observers' mission in Potsdam and may travel, in uniform, through most of East Germany.

"I think people still remember the bombing," the Army major said. "In other cities people will strike up a conversation with you. In Dresden, they just stare."

German Finds Luxurious Car Can Drive Some to Jealousy

MUNICH, Nov. 9 (AP).—How do relatives, neighbors and fellow workers react when a German Herr Durchschnitt—Mister Average—returns from vacation at the wheel of a $20,000 gold-toned Cadillac and offers no explanation of how he got it?

West Germany's automobile club, ADAC, wanted to find out. For the experiment they picked Herbert Koerner, a middle-income, 35-year-old computer programmer who lives with his wife and two young children in a rented house in Munich.

Mr. Koerner normally drives a Volkswagen station wagon, which he temporarily exchanged for the borrowed Cadillac at the end of his vacation.

"They were struck dumb," his wife, Baerbel, said today in describing her neighbors' reaction to the Cadillac, a rarity here which costs more than her husband earns in a year. "They couldn't figure it out. We were never splashy."

"The car formed a wall between us," Mrs. Koerner concluded at the end of the three-week experiment. "We no longer fitted in."

Some residents of their lower middle-class neighborhood began to avoid the Koerners. A neighbor pointedly slammed her house door shut when Mr. Koerner alighted from his borrowed Cadillac—a car that ADAC's member magazine, Motorwelt, described as a "millionaire's auto."

"Been playing roulette?" an undaunted neighbor wanted to know.

Mr. Koerner's father, a retired plant foreman, was so worried about his son's apparent splurging that Herbert Koerner broke his secrecy pledge for the first and only time.

Mr. Koerner set tongues wagging on the job when he drove into the company parking lot. According to ADAC, there was some annoyance expressed on the supervisory level.

"It's gotten to the point where people are coming to work in Cadillacs," one of his superiors was overheard to exclaim, as it to say, "What is the world coming to?"

"Have you become a director?" a fellow worker asked.

"He went crazy on vacation," a secretary said.

Others speculated that Mr. Koerner had won the national lottery, inherited a fortune, made a killing on the stock market or been hired to add mileage, thereby reducing import taxes on the car.

The Koerners discovered certain advantages to driving a prestigious U.S. car.

The doorman who earlier had shooed their small car away from the loading zone outside a luxury hotel had no objections when they parked the Cadillac in the same spot.

They also found that they could park the big car in no-parking zones without being ticketed.

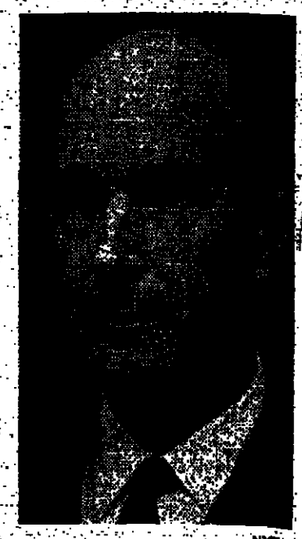
An Alpine resort hotel, which had claimed on the telephone to be fully booked, suddenly came up with a room when the Koerners appeared in their Cadillac.

Suspicious Customs

Customs inspectors at the West German-Austrian border were more suspicious than impressed. Whereas Mr. Koerner always had been waved through the customs control point when he drove his own car, he was stopped and checked on both sides of the border when he crossed with the Cadillac.

After 21 days and 2,610 kilometers, the Koerners let the Cadillac out of the bag at a party thrown for friends and fellow workers.

"They all laughed with relief," Mrs. Koerner said. "I also felt relieved . . . To fit to a car like that, you need money . . . and we just didn't fit, espacially with two small children tagging along . . . I'm very satisfied with our middle-class existence."



The ADAC magazine concluded that, with few exceptions, Mr. Koerner really was not treated better as a Cadillac driver than as a Volkswagen driver.

Story Czar Lived Denied in Moscow

MOSCOW, Nov. 9 (Reuters).—A Soviet foreign affairs journal has condemned as "a pseudohistorical falsification" a new book by Western writers suggesting that Czar Nicholas II and his family might not have been killed by Bolsheviks in July, 1918.

The book, "The File on the Czar," by Anthony Summers and Tom Mangold, British television journalists, was published recently in Britain and the United States and is largely based on papers discovered by the authors.

In the first Soviet reaction to the book, the weekly Novoye Vremya said in a report from its New York correspondent that it had been deliberately published on the eve of the celebrations of the anniversary of the 1917 Bolshevik Revolution.

Patrick Hillery NYT

Hillery Wins Presidency in Irish Republic

DUBLIN, Nov. 9 (Reuters).—Patrick Hillery, who is retiring as social affairs commissioner of the European Economic Community, today was declared president-elect of the Irish Republic.

There was no opposition. His name had been the only one submitted when nominations closed today for the presidential post, made vacant last month by the sudden resignation of Cearbhall O Dalaigh. Formal declarations attesting to Mr. Hillery's status as president-elect were sent to Premier Liam Cosgrave, Chief Justice Tom O'Higgins and other officials.

Mr. Hillery, nominated by the main opposition party, Fianna Fail, is expected to be inaugurated later this month.

Since the Fine Gael-Labor coalition government failed to put up its own candidate, there will be no need for the election which had been provisionally scheduled for Nov. 24.

Mr. O Dalaigh quit in anger after Defense Minister Patrick Donegan called him "a thundering disgrace" for referring controversial anti-guerrilla legislation to the Supreme Court for a ruling on its constitutionality.

Four Years at EEC

Mr. Hillery, 53, has been out of Irish politics since he took up his Common Market appointment four years ago.

First elected to the Irish parliament in 1951, as a Fianna Fail member for County Clare, he has headed four ministries in governments formed by that party.

He was the republic's foreign minister during the early years of the Northern Ireland crisis when Ireland's relations with Britain were at their lowest ebb.

Before entering politics he was a country doctor in the Atlantic coast town of Milltown-Malbay where his father was also a doctor.

Residents of the town say, "He delivered half the people around here—and his father before him delivered the other half."

ıron Gottfried von Cramm, med Tennis Player of 1930s

RO, Nov. 9 (UPI).—Baron ied von Cramm, 67, one best-known tennis players 1930s, was killed today in ıtomobile accident on the Alexandria road, West Ger- Embassy officials said.

von Cramm, who had been ypt on business for a week, sturning from the Mediter- n port when his car collid- th a truck about 20 miles of Cairo. His driver was dled in the accident, the ds said.

von Cramm was Germany's successful tennis player and sgarded as one of the most ıt of his era. He won the h singles title in 1934 and and held the German title 1932 to 1935. He returned n the West German singles in 1948 and 1949.

was the losing finalist at ledon between 1935 and losing twice to Briton Fred and on the third occasion S. player Donald Budge.

only Wimbledon title came 38 when he took the mixed es crown with Hilda Krahl. Mr. von Cramm's career hed from 1930 to 1953, and g the 23 years he won 82 uts of 102 Davis Cup matches in 37 ties.

Many players considered Mr. von Cramm one of the most gentlemanly and sportsmanlike opponents they ever faced, but what should have been the height of his career was marred by World War II.

Mr. von Cramm made no attempt to hide his anti-Nazi feelings, and his views earned him the dislike of Hitler and Himmler. In 1937, shortly after he lost a Davis Cup semifinal match against Donald Budge, the Nazi SS accused him of homosexuality, and he was jailed for several months.

He was freed in 1938, but the furor the charges had caused in the tennis world remained unabated, and the All-England Lawn Tennis Club refused him permission to compete again at Wimbledon.

After the war, Mr. von Cramm played a large role in the rebuilding of West German tennis. After he retired in 1954, he turned to business. At the time of his death he was a partner in a Hamburg import company.

From 1955 to 1961 he was married to Barbara Hutton.

Sir Edward Hedley Fielden

EDINBURGH, Nov. 9 (AP).—Air Vice-Marshal Sir Edward Hedley Fielden, 72, senior air equerry to Queen Elisabeth, died here Monday, it was announced.

He was in charge of air travel for British monarchs for more than three decades and had accompanied the Queen on thousands of miles of flights.

Joseph (Coy) Williams

LOS ANGELES, Nov. 9 (AP).—The man who designed the original "Mouseketeers" hat which became the symbol of Disneyland and Walt Disney Productions Inc. has died at 69.

Joseph (Coy) Williams, co-host of Disney's long-lived "The Mickey Mouse Club" show on television, died Sunday at his home in Burbank, a family spokesman said.

Fire Prevention's Smokey Bear Dies

WASHINGTON, Nov. 9 (AP).—The original Smokey Bear, for 25 years a living symbol of forest fire prevention, died today at the National Zoo and presumably went to what Congress once referred to as "that great honey tree in the sky."

Smokey retired in May of last year and was replaced by another, younger Smokey. Both bears were housed at the National Zoo.

Smokey's death was announced by the Agriculture Department, which had handled the forest fire prevention program through its Forest Service agency. Officials said that the old Smokey died "in his retirement cage" at the zoo.

Turkish Riots Claim 1

ANKARA, Nov. 9 (Reuters).—A 60-year-old man was shot to death yesterday as fighting erupted between left-wing and right-wing Turkish students on university campuses in Ankara and Istanbul, police sources said.

Border Reported Closed in Angola Fighting

OSHAKATI, South-West Africa, Nov. 9 (Reuters).—The flood of refugees from fighting in southern Angola dwindled today and South African officials said Angolan government forces were driving the fleeing civilians back from border areas at gunpoint.

Officials quoted refugees as saying that persons trying to escape were shot as they tried to climb the fence on the border with South-West Africa (Namibia). Bodies were being buried in a mass grave about a mile inside Angola, they said.

Officials said a battle was raging in southern Angola between a combined force of government, Cuban and South-West Africa People's Organization (SWAPO) troops and forces of the rebel Union for the Total Independence of Angola (UNITA).

Refugees were quoted as saying civilians were being massacred by the pro-government forces. Some said they had seen their children shot by troops and young black girls raped.

About 3,000 refugees have crossed into this South African-ruled territory in the last week, most of them old women and children.

The refugees said Cuban and Angolan troops using tanks, heavy guns, and planes had launched an offensive against the guerrillas.

They said they believed the government wanted to wipe out UNITA before Thursday's first anniversary of Angola's independence from Portugal.

UNITA, led by Jonas Savimbi, was one of two nationalist forces defeated by the Cuban and Soviet-backed Popular Movement for the Liberation of Angola (MPLA) early this year in Angola's civil war. The remnants of the UNITA force withdrew to bases in the forests of the south and east.

A South African government official here said refugees had reported that fighting was going on in the towns and in the bush. He said casualties were thought to be high.

South Africans here are voicing fears that the fighting could be a prelude to a major attack on South-West Africa itself.

Jannie de Wet, South African commissioner-general for the indigenous peoples of the territory, said that a Radio Luanda broadcast monitored here had said the pro-Communist government of Angola would help SWAPO "Liberate Namibia" after UNITA had been crushed.

The South Africans fear that, in exchange for SWAPO support against UNITA, the MPLA will assist SWAPO guerrillas with bases and military support in a renewed war to wrest control of this disputed territory. SWAPO guerrilla action south of the border has virtually halted in recent weeks.

South African Defense Minister P.W. Botha today denied Angolan government statements that South African forces had shelled southern Angola in the last few days.

"There is no aggression from our side," he said.

To Curb Dairy Overproduction

EEC to Pay Farmers to Use Surplus Milk Powder as Feed

By David Haworth

BRUSSELS, Nov. 9 (IHT).—Huge subsidies, averaging nearly $5 million a week, are to be paid by the European Commission to farmers who will feed surplus milk powder to pigs and cattle, it was announced here today.

The subsidies are intended to reduce the embarrassing surplus of milk powder in the European Economic Community, the result of overproduction in the dairy industry, which is now a "mountain" of 1.3 million tons. Most of it is stored in France and Germany.

The initiative seems certain to cause controversy. In recent weeks the EEC has been trying to persuade Britain to reduce the gap between the so-called green pound—the method of calculating agriculture prices—and actual exchange rates.

The present system, the commission said, amounts to a large subsidy for the British consumer which is being borne by other EEC states. However, this argument has not prevented the launching of the subsidized milk powder plan for cattle.

A commission spokesman insisted today that this was the cheapest way of disposing of the surplus. If the milk powder is not used it might have to be thrown into the sea, or be disposed of by burning, the traditional fate of many EEC surpluses in the past.

During the past 12 months some of this milk powder has been sent to underdeveloped nations as food aid. But even this stirred controversy when it was found the powder was too rich for people on starvation diets and was causing more medical problems than it solved.

The commission's aim is to reduce the powder surplus through the subsidy at a weekly rate averaging 12,000 tons. The payment mechanism is complicated, but the commission intends the powder to be sold to farmers at below the price of soya beans imported from the United States.

If the plan is successful, therefore, it could bring the EEC into conflict with Washington. The United States is already concerned about falling soya bean exports to Europe as a result of the Common Market's agricultural policies—even though the United States sold five times more farm produce to the EEC than the community exported to the United States.

GERMAN MILKMAN OPENS BUSINESS CONSULTANCY

In Germany, as in 120 other countries around the world, a great many executives monitor significant market movements affecting their business by referring to the Financial Times every working day. When they open its pages they see it not merely as their business newspaper, but as their business consultant too.

These are the executives whose decisions may make or break a company. These are the readers who look to the Financial Times to publish the best world-wide business information available. Concisely, factually and with unbiased comment. And, moreover, it provides, editorially, 32%* more international political, economic and commercial information than any other English language daily newspaper printed in Europe.

It takes an exceptional international network of correspondents to maintain this volume and quality of reporting. But that is what strategy-planning businessmen throughout the world expect of the Financial Times. And that is what they get. Plus foresight and insight of course. Hindsight we leave to the historians.

Consult the Financial Times, free of charge.

We invite you to consult, assess and judge the Financial Times daily for a fortnight. Without charge. Without obligation. Just complete the coupon below and put the Financial Times to work.

*Content analysis of five newspapers. Research Services International, August 1976.

To Attack U.S. Unemployment

The first major question of economic policy that awaits Jimmy Carter's decision when he assumes the presidency in January will be whether to ask Congress for an immediate tax cut to stimulate the recovery and reduce unemployment.

At his post-election news conference last week, Mr. Carter chose his words carefully in saying that he saw "a very strong possibility" that he would recommend a tax cut if the economy continued to drag as it has during recent months. The latest data on unemployment, with the jobless rate going up to 7.9 per cent in October, again demonstrates that an economy that is growing too slowly may actually be in a "growth recession."

In fact, the economy has been in such a growth recession since last May, when the jobless rate got down as low as 7.3 per cent; at 7.9 per cent, it has now gone back above its level of last January. In terms of unemployment, this has literally been a year of stagnation.

Some economists argue that 8 per cent unemployment is now "normal," or only slightly above an acceptable rate, given changes in the characteristics of the labor force, with more young, female and black workers looking for jobs. But chronic unemployment at current levels is unacceptable to the jobless themselves, intolerable on social grounds, and unnecessary or even counterproductive as a means of checking inflation.

High unemployment breeds crime and psychological illness. As the automobile contract settlements show, it intensifies demands by labor for shorter work-weeks—at no less pay—in order to spread the work; and such a "remedy" may worsen inflation rather than alleviate it. The recent rise in the wholesale price index—with the industrial-price component going up at a double-digit annual rate—creates further doubts that slow growth is the answer to either persistent cost-push inflation or unemployment.

If the economy fails to break out of its stagnant pattern by the time Mr. Carter takes office, it would be logical for him to call for a quick and simple tax cut, which could serve as a tonic in both its fiscal and its psychological effect.

Since the economy is still moving forward, though too sluggishly, the tax cut need not, and should not, be too great, with $10 billion probably its outer limit. The reduction should be progressive in its impact, with the greater relative benefits going to lower-income families, and rising with the number of dependents. The cut ought to be simple to legislate promptly and should not involve the permanent loss of tax revenues that may be needed to pay for Mr. Carter's social programs, once these have been carefully planned and enacted.

The effect of such a cut would be to increase the deficit for the current fiscal year, while the economy is still underemployed. But, if this helped to launch the economy into a more rapid rate of growth it would reduce the deficit in the next fiscal year. Most important, it would break the pattern of stagnation and be a first installment toward discharging Mr. Carter's campaign pledge to attack unemployment—a pledge that did much to elect him President.

Runaway Terrorism

The CIA apparently ended its sponsorship of anti-Castro terrorists in the 1960s. But the apparatus created for that purpose subsequently took on a life of its own and now constitutes a formidable problem of public safety and diplomacy for the United States as well as Cuba.

Trained in terror by the CIA and assured that their method as well as their cause was honorable, the anti-Castro exiles recruited in the early 1960s were understandably reluctant to go along when the United States began moving toward coexistence with Havana. For many, the 1973 anti-hijacking pact, under which the United States assumed a formal obligation to limit exile attacks, was the last straw. At least 100 bombings have since taken place around Miami, many targeted against U.S. officials investigating exile terrorism. Long a holdout, the exile group representing Bay of Pigs participants came over to terror last year; it asked only that the violence be conducted outside the United States. The repeated attacks on Cuban officials and property outside of Cuba are the result. These culminated in the death of 73 people when a Cubana Airlines plane was blown out of the sky in October. Mr. Castro responded by renouncing the hijack treaty—a step serving the exiles' purpose of undermining U.S.-Cuban relations. The exiles are also suspected of killing, at Chilean bidding, the former Chilean ambassador in Washington, Orlando Letelier.

It is no surprise that Fidel Castro, for one, doubts that the terrorists run their own affairs, and while there is no reason to believe Castro's charge that the CIA is sponsoring today's terrorists, there is also no way of denying the past intimate CIA connections with many of these men. If those connections are past, however, they suggest an appropriate U.S. response. The CIA surely has good files on the terrorists, most of whom are U.S. citizens; the FBI, which is responsible for investigating their many activities in Miami, also must have information. The terrorists are evidently careful to conspire abroad so as to stay beyond the reach of U.S. law. But the United States should cooperate fully with the intelligence and police services of the Latin and Caribbean countries where the terrorist groups plan and work. The fear of being embarrassed by former agents is hardly justification for failing to pursue, by all legal means, persons bent on taking lives by terror—and bent on undercutting U.S. diplomacy, too.

One can appreciate the feeling of betrayal which must grip exiles who find their former sponsors turning against them. But the United States must distinguish between the respect that it owes these men for their past service, and the obligation of any government to be the master of its own policy. Americans must also ponder the disquieting conclusion that covert action is not a machine that can be switched on and off at the operator's convenience. The United States may well have turned the switch; but like an overheated engine, the terrorist operations apparently kept right on running, eventually developing a capacity to operate on their own. This is an argument for confining covert action to the most desperate and urgent situations and for conducting it in a way that takes into account the possibility of later loss of control.

THE WASHINGTON POST.

'Fraternity and Love'

It has been a very long time since the situation in Lebanon has been marked by an atmosphere of "fraternity and love." Yet it was that phrase President Elias Sarkis chose to use in appealing to his tragically divided countrymen to accept what comes very close to a Syrian occupation of Lebanon.

To the leftist Moslems and Palestinians who were being killed by Syrians or trying to kill Syrians only a few weeks ago, it will be hard to accept the forces from Damascus as trustworthy neutrals. Even among the Lebanese Christians whose position was so improved by the Syrian alliance before the current cease-fire, there is now suspicion of the Syrians, stemming from the fear that these foreign and Moslem troops may yet make as abrupt a turn against the Christians as they previously had made toward them.

How will the Syrian occupation of Lebanon affect the military and logistical situation? The Syrians may dream of annexing Lebanon, but any such effort would probably unite all the contending Lebanese factions in opposition, while it would risk swift economic retribution from Saudi Arabia, whose economic power made the present precarious cease-fire possible.

On the broader Middle East problem, dominated by the continuing confrontation between the Arabs and Israel, the Syrian occupation raises new questions. Jerusalem has already made it plain that it does not intend to sit idly by and let a situation develop that would permit Palestinian guerrillas to use southern Lebanon as a base for military operations against Israel. Any effort to do that could precipitate major Israeli participation in the Lebanese crisis, with widespread and dangerous possibilities.

What seems more likely is that once the Syrians are the unchallenged military masters of Lebanon, they will try to use that fact to improve their diplomatic position in renewed negotiations with Israel. The whole tangled problem may be brought back to Geneva and a conference in which Moscow and Washington as well as Arabs and Israelis are represented.

These possibilities make it particularly urgent that President-elect Carter give top priority to his Middle Eastern policy as he prepares for his January inauguration. The developments flowing from Lebanon's present fragile peace may be the first severe foreign policy test of the Carter administration.

PARIS—Despite the fact that cold weather has been prevalent for some time and that winter is at hand, the Paris cabs and omnibus companies are as dilatory as ever about heating their vehicles. Cabmen have no authority in the matter and would be fined if they were to heat their carriages without orders from the company. Company officials are aware of the problem and have said that something will be done. When?

Fifty Years Ago

November 10, 1926

LONDON—Brazil, with its 4,000 miles of Atlantic seaboard, and an area as large as that of Europe, is about to create a political capital in the interior, the Observer reported here today. Brazil intends to let its chief city, Rio de Janeiro, remain the Paris-like cosmopolitan city that it is. The projected new capital is to be established in the State of Goias, north of Rio. No name, as yet, has been chosen for the new city.

'They Can't Say I'm Not Concerned.'

Europe's Festering Racial Woes

By Jonathan Power

LONDON.—A West Indian friend of mine sent this letter of complaint to Scotland Yard and the Home Office: "On Saturday, July 3, 1976, in Portobello Market at about midday, I had just bought a pound of apples, given two away to a friend's children, eaten one, and had one left in a paper bag. Under the flyover, on my way down from the corner of Portobello Road, I was stopped quite aggressively and assaulted by a police officer who said that I looked like someone who smoked drugs and could be see what was in the paper bag. The brown paper bag, he said, was associated with drugs. I told him there was an apple in the bag, though I refused to show it to him, as to me it was a humiliating and harassing request, without any reasonable grounds. There were hundreds of people in the market, all with similar bags of fruit and vegetables. There could have been no other grounds for stopping me, other than a frivolous desire to assert his power over a black man."

It was only two months later that the area around Portobello Road erupted into riot. One hundred and fifty persons were badly injured, most of them policemen. The annual Black Carnival had blown its fuse. No one should have been surprised. Tension had been mounting for months. My friend's confrontation had become an all too regular experience for many immigrants. There had been the renewed emotive interventions of Enoch Powell earlier in the year. Then, in the spring, a wave of violence against London's foreign population. Three were murdered. If all this was not enough there were, during the summer, the almost nightly television pictures of young blacks fighting the police in South Africa's Soweto.

The British experience, however, is not unique. In every major northern European city there are large immigrant concentrations. In France they are Algerians. In Belgium, Moroccans. In West Germany, Turks. In the Netherlands, Surinamese. Fifteen million in northern Europe altogether. Alien, sometimes fearful, often rejected, they are the raw material for racial confrontation.

Violence, or the threat of violence, is beginning to permeate right through many of the major European cities. In 1972, the residents of a poor neighborhood in Rotterdam rioted. Dutch workers, bitter at the competition from Turkish immigrants for scarce housing, burnt down several Turkish lodging houses. Violence flared again this summer. In Schiedam, a Dutch boy was stabbed by a man rumored to be a Turk. A large gang of young Dutch then went on the rampage and raced into a Turkish neighborhood smashing Turkish shops and setting fire to a mosque. In France, in 1973, an insane Algerian murdered a French bus driver in Marseilles. In the weeks which followed Arabs were attacked and beaten. Eleven Algerians were killed, most in southern France but some as far away as Metz and Paris. In July, 1975, there were bomb attacks simultaneously at the "Amicale des Algériens en Europe" in Paris, Lyons and Roubaix.

This year tension has built up around a spate of expulsions. France expels around 3,600 immigrants in an average year. It is an arbitrary weapon of policy that bypasses the normal legal channels. Used, as it has been this year, to get rid of dissident immigrants who have been organizing rent strikes in the government-run hostels, it smacks of intimidation.

Opinion polls in all the European countries confirm the mounting displeasure with the foreigners in their midst. That they are here to do the jobs that Europeans no longer want to do is an article of faith held by detached intellectuals and by company personnel officers. For most Europeans they are here to take advantage of our wealth-creating system, to compete for our scarce housing, and to partake of the social services. When social reality and psychological prejudice are so far apart, and when the "culprit" is so easily identifiable and locatable, there before us is the best recipe in the sociological book for turbulence.

That the outbreaks of violence so far have been localized and relatively small is probably easily explained. First, there is the social stability of the European postwar system, strengthened in particular by the economic expansion from which most people have benefited. Secondly, immigration has helped European job mobility. The native workers have been able to move up a peg or two—they may not acknowledge why it has happened, but that does not detract from the sense of achievement. Thirdly, there has been the reluctance of first-generation newcomers "to get involved." By and large they have kept a low profile. Fourthly, and more to measure, has been the patient legwork done by various social and church agencies, trade unions and action groups. They vary in their effectiveness from country to country. In Belgium, the trade union record is quite good; in Britain, it has been appalling. In Britain and the Netherlands, the community action groups are impressive, whereas in France and West Germany they are much less sophisticated.

At least two of these factors are changing. The most obvious is the deep economic insecurity into which Europe has been plunged. This does not mean that Europe will suddenly decide to send all its immigrants home. After more than two years of recession it is clear that immigrants do jobs that native Europeans would rather be unemployed than do. But they were becoming easy targets for those who may need a scapegoat for society's ills.

Another recession like the one we have just gone through could raise white hostility to unpleasant proportions.

The other major factor that is changing is the age structure of the immigrant population. And it could not, because of the changed economic situation, be happening at a worse time. Many of the migrants who came in the early 1960s now have teenage children who have spent most of their lives in Europe. And they are not particularly thankful for having the opportunity to work in Europe rather than starve in Jamaica or Algeria. It matters only marginally whether they have a European nationality (as do Commonwealth immigrants) or they don't (as do most of the others). At bottom they feel they have a right to a job, social mobility, and respect. They're touchy, "fusey," and they can easily be set off. Put them in a tight situation and the unpredictable might happen.

—Letters—

True Misers?

In Mary Blume's entertaining piece about the meaning of money in France (IHT, Oct. 30-31), she says the psychiatrist René Held describes misers as "still at the anal stage of development and. . . likely to suffer from constipation."

In view of precisely that, Miss Blume might perhaps have found a less compromised authority to quote on the subject of money in France than Gertrude Stein. At this late date I can no longer recall where I read it (Toklas? Hemingway? Elliot Paul?) but I do recall with absolute certainty reading, and from an authoritative source, that in James Laughlin, the publishing (New Directions) scion of the Jones-Laughlin steel family, Gertrude Stein believed to have found the one and only true miser fit for comparison with herself.

Berlin.

Ojukwu Breaks Silence

A Call for Nigeria To Reintegrate Ibos

By Harold King

Seven years ago the giant nation of Africa, Nigeria, end a civil war that held the attention of the world for 30 mont

The Ibo minority in revolt constituted the intellectual a technical elite of the country. They supplied the bulk of people responsible for running the public administration, railways, the roads, the telephone, the postal services, factor and docks.

Since the end of the civil war, the Ibos, who are Christi have been more isolated and boycotted than ever. T charismatic leader, the gifted organizer Gen. Emeka Ojuk today, for the first time in seven years, breaks his long si in our columns.

On a visit from Abidjan, the Ivory Coast, to Paris talked frankly with an old friend, veteran journalist Ha King, former bureau chief for Reuters in Paris.

PARIS—Reports from Africa this past week indicate that the black continent will be among the main areas of concern for President-elect Jimmy Carter and the rest of the industrial West.

From the sands of the Sahara to the streets of Soweto, instability ravages the continent. Even that giant of African nations, sprawling Nigeria, once regarded as the linchpin of stability and progress, is now characterized by unachieved economic targets, and muddle and confusion among shifting political palliatives.

Observers attribute part of the malaise and stagnation to the failure of the energetic and hard-working 15 million Ibos to pull their weight in the economic battle.

It was with this in mind that I sought out Gen. Ojukwu, who once not only led the Ibos of Nigeria but extracted from them an effort of revolt that baffled the world.

Failure

I asked him what he considered the explanation for the failure of Nigeria to achieve what had for so long been expected of it.

Remarking that "everything about Nigeria is gigantic, her potential and her problems," Gen. Ojukwu said:

"I have always believed that none of Nigeria's political or economic possibilities could be achieved until her disparate strands were pulling together in the same direction at the same time and towards the same goal. But this can only be done by persuasion, not by coercion. It is in this respect that every previous regime in Lagos has failed, and most notably that of the now departed Gen. Yakubu Gowon."

I asked the general whether he had not himself contributed to these difficulties when in July, 1967, he launched a secession movement from Nigeria for the whole of the oil-rich eastern region. Why did he do this?

"The secession of Nigeria's then eastern region into the Republic of Biafra," he said, "was never, as was widely alleged, an offensive act against the Republic of Nigeria. It was a defensive act by the Ibos, an ethnic group of some 15 million souls, to protect themselves, as they saw it, against a specific series of hostile policies operated by a specific regime in the fe capital of Lagos.

"The motivation of myself, my fellow easterners, cond the general, "was never so sive as such. It was an a desperate self-defense by a ple already by that time sub ed to a series of injustices by then dictator in Lagos and felt they must expect even m

"The whole episode, with its attendant suffering to many people on both sides, med directly from Gen. Gow complete insensitivity and ineptitude. Today, nine later, the regime that dro all to the ultimate theft and act of secession is their s and disgraced. The situation 1967 no longer obtains, but scars left behind have sti be effaced."

Gen. Ojukwu left no doub my mind that for him the ing of the scars essentially for the complete reintegration the Ibos of the east into mainstream of Nigerian pol and economic life.

Such reintegration seem most disinterested observer separable from Gen. Oju return to active life in Ni I asked if this would not the specter of secession agai

A Return

Gen. Ojukwu said, "Nin seventy-six is not 1967. N nic group in Nigeria is singled out for destruction ther do I see the present rian leadership remotely bling that of Gowon. Ye course, I would like to It is my home. I am sure is a lot I could contribu Nigeria's prosperity and piness."

There seems little doubt the time has come, regardin future welfare of Nigeria, the welfare of Africa, fo Lagos government to re itself with Gen. Ojukwu, s man and incarnation of the The much desired reconcil of all racial elements of th gerian nation can only be ac ed, if it is to be achived the lives of the present ge tion, through the active, on spot cooperation of Gen. O and the Ibos, failing which perts on Africa say, the fu ing of Nigeria on the hig of prosperity and demo freedom is in danger of wrecked for good.

Where the Quarrel Points

By C. L. Sulzberger

ANKARA.—The emotional impact of the Greek-Turkish quarrel over Cyprus and contradictory claims on Aegean air and sea space has produced distressing effects on the foreign relationships and the internal stability of both countries.

In terms of ties with other nations, both disputants have to some extent (more in Greece than in Turkey) weakened their connection with NATO. Each is suffering from a massive popular case of anti-Americanism and each is also courting the Soviet Union. As a result, Western unity and defense have been seriously damaged and the future of these ancient, bickering neighbors has been placed in jeopardy.

If they don't in the end destroy each other—and NATO to boot—they may very well destroy themselves. While one Greek opposition leader, the demagogic Andreas Papandreou, calls simultaneously for war with Turkey, severing all ties with the United States and the Atlantic Alliance, even hinting Greece should obtain nuclear arms by its own means (presumably a terrorist raid), Turkey disintegrates politically, socially and economically.

Greece at this moment technically has the strongest parliamentary government in the West with a big majority for Premier Caramanlis. Nevertheless, despite his personal preference for close ties with both the United States and NATO, the pressure of public opinion has forced Caramanlis to delay a new military bases agreement with Washington and to start bilateral talks with Moscow.

Turkey is likewise engaged in a Soviet flirtation which was tangibly confirmed when Ankara permitted a Soviet aircraft carrier to pass through the Dardanelles into the Mediterranean. One of the two Turkish labor union federations openly acknowledges its preference for a Marxist type of social-economic system.

The Turks have an old record of antipathy toward the Russians but during the early years of Kemal Ataturk's revolution relations with Moscow were warm. The current wave of affability has produced approximately $1 billion of Soviet economic assistance that will be paid for by exports over a long term and on a low-interest basis.

Parallel to a new look at the Soviet Union, rising hostility toward the United States and internal pressures, the Turks have also developed friendlier relations with the Third World, above all the Arab states. Last year Ankara supported an Arab resolution attacking Zionist "racism" in the UN Assembly, despite previous Turkish sympathy for Israel.

Undoubtedly this government's intention is to improve its ultimate position vis-a-vis the West by flirtations with the East, a kind of implied blackmail. One reason for this is to hint to the European Community that it had better give Turkey treatment comparable to that now being meted out to Greece, whose full membership is under negotiation.

Turkey realizes that it faces more potential danger from its Soviet neighbor than from any other quarter, since Greece is hardly a major military threat. Also, Ankara knows it relies on Western (primarily U.S.) equipment to keep its armed forces up to date.

These fundamental facts are hard to escape. Nevertheless, if an excited public opinion continues to press for changed essential policies in Greece and Turkey, facts could be forgotten. Passion is one trait vigorously shared in both lands.

Such passion is being continually heated up by the political opposition in each case—by the momentarily weak but clever and potentially dangerous Greek Papandreou, and by the strong, vigorous and shrewd Turk, Bulent Ecevit. The Turkish government, moreover, is decidedly weak.

Premier Demirel depends upon an unstable coalition catering to a supernationalistic minority tion. Every time this demonstrates its jingoism, reeks to outflank it from and the Demirel Cabinet along behind.

The wholly irresponsible in both countries helps steady push toward Therefore now—and so level—bilateral negotiations ed by Turkish and Greek in Bern and Paris meet in chological atmosphere able to settlement.

About all the two sides is that the situation is ex and that the United Sta somehow responsible that fore the existing U.S. mil base structure in each co should be reduced.

Turkey's students (often t alyst for trouble) are Turkey's major alliance—th United States and NATO disrepair. Turkey's economy case of the staggers. And Tur voting public is in such a disc ed state as a result of scr lated and continuing crises the prospects of choosing majority government at the lot box are presently most

minous Sign for West

Kremlin Giving Civil Defense For A-War Highest Priority

By Peter Osnos

MOSCOW, Nov. 9 (WP).—ould catastrophe ever strike Soviet Union in the form of nuclear attack or biological-emical warfare, a vast apratus now exists here to minise the damage. The Kremlin s made civil defense a top rity item, directed by scores senior generals and involving entire population down to the allest schoolchildren.

"Civil defense is a system of asures," asserts the authorive Soviet handbook on the ject, "directed toward protect the population, creating nec-ary conditions for maintain the stability of the national nomy in wartime and, if the emy uses weapons of mass de-uction, performing rescue and gent emergency restoration rk."

That all seems reasonable ough given mankind's develop-nt of terrible armaments with guarantee that they can al-ys be restrained. Yet there is reasing concern among many stern military experts that So-t civil defense may have inous implications for the ture.

The extensive construction of ilian air raid shelters, the U.S. cretary of the Air Force, omas Reed, said in September, ay mean that the Kremlin be-es that nuclear war is still a ssibility—and is planning to in it by holding down its ca-alties.

Bunker Network

By expressing alarm, these estern and particularly U.S. ex-erts want to dramatize the fact at the Soviet Union with a ge network of underground nkers, enormous food stock-iles, dispersal of vital industries d paramilitary organization of rkers, could be better able to thstand a nuclear war than the ited States.

Defense Secretary Donald msfeld, in the Pentagon's re-rt for the fiscal year, noted a sturbing "asymmetry" between e level of Soviet ability to cope th attack and that of the United States, "that bears direct-y on our strategic relationship . . d on the credibility of our de-rrent posture."

Two questions arise from all is: Is the Soviet outlay for il defense truly as extensive portrayed by the Pentagon? d if so, does the Kremlin re-rd as the purpose of the pro-gram to make destruction tolerable for itself in a war that it may be emboldened to instigate?

Regretably, no outsider's answer is going to be satisfactory. The Soviet Union considers the details of its civil defense effort as secret. Most of the data about expansion therefore comes from Western intelligence agencies. As to the purpose of the program, a recent publication of the main political administration of the Soviet armed forces put it this way:

"Soviet civil defense does not incite, does not promote and does not provide impetus to war... therefore there is no basis for the 'forecasts' of Western experts that a strengthening of the civil defense of the U.S.S.R. will lead to greater 'inflexibility' of Soviet foreign policy and even to aggravation of international tension.

'Real Barrier'

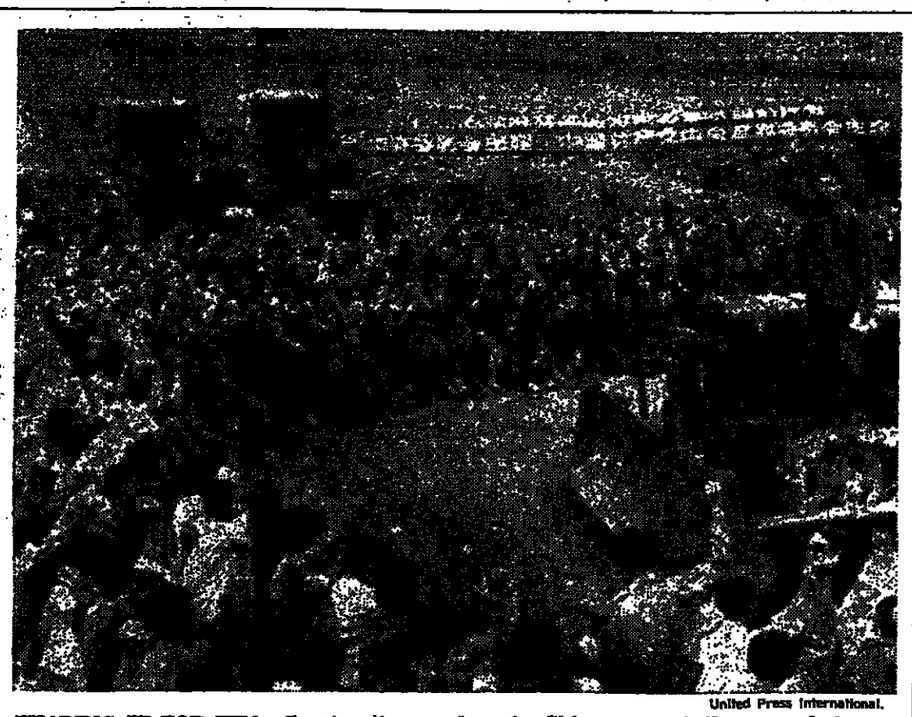
"Improving Soviet civil defense, raising its effectiveness, is just one more real barrier against the imperialists unleashing a new world war..."

While denying that its intentions are aggressive, the Kremlin does confirm in that statement that improvements in civil defense are taking place. What that means, according to Western sources, is construction of underground grain bins so large that they have railroad sidings, a "hardening" of bunkers throughout the country and the placing of electric, water and gas utilities deep underground.

Western intelligence agencies estimate that about two-thirds of new Soviet industrial capacity is outside urban areas and that facilities exist for continuing arms manufacture as well as other essential goods after a nuclear onslaught. The program of "war survival" has been valued by a U.S. expert at the equivalent of about $65 billion in the past 10 years.

There is no question that a reorganization of the civil defense program was undertaken in 1972 —about the time that the first strategic arms accords with the United States were signed. Col. Gen. Alexander Altunin was named as the head and made a deputy minister of defense on a par with the leaders of the country's regular military branches.

Under Gen. Altunin's supervision, the dissemination of civil defense instructions in factories and schools, public lectures and the press has been stepped up. "We have to reach the point," he said in a speech, "where every Soviet citizen will be firmly convinced that there is a defense against any, even the most modern weapon..."



Pupils Terrified

A magazine said last November that all workers would be required to complete a 20-hour course and pass tests on such things as self-protection, first aid and safeguards against nuclear glare. Several enterprises have been criticised for overzealousness, "terrifying the pupils rather than propagandizing the ways and means of defense."

How effectively these preparations would be employed in the event of war is the imponderable. Calculations by Western analysts that as few as 7 million Russians would be killed in a nuclear attack with a modicum of warning —considered an acceptable risk— are based on predictions of maximum success with evacuation.

But given the confusion and panic that would inevitably accompany so grave a threat, efficiency would probably be much reduced.

Even now there are serious shortcomings. According to the Soviet Army newspaper Red Star, a factory in Kiintsy was much praised for its civil defense program. Then a meeting was arranged with the workshop that had the best record in preparedness competitions. It turned out that the nonmilitarized units existed only on paper, no one had ever actually taken part in exercises and the workers did not know what they were supposed to do at the alarm signal.

HEARING IT FOR HUA—Construction workers in China support the new chairman.

Chinese Press Starts Big Buildup on Hua

By Fox Butterfield

HONG KONG, Nov. 9 (NYT).—China today lauded Hua Kuo-feng, the new chairman of its Communist party, using the most superlative terms yet applied to him in what seemed to be a major effort to build up his standing with the Chinese people.

An editorial in the army newspaper described Mr. Hua as "loyal, selfless, open and straightforward, modest and prudent." It also said Mr. Hua, who was appointed last month to succeed the late Mao Tse-tung as chairman, was "democratic in his style of work, unassuming and approachable, and good at uniting with comrades to work together."

The editorial asserted that Mao himself had "trained, selected and arranged for Comrade Hua Kuo-feng to be the successor." According to Chinese Communist sources, several of the terms used to describe Mr. Hua were those Mao himself had used in a conversation last winter with one of his most trusted aides to explain his choice of Mr. Hua.

The laudatory language appeared designed both to make it seem that Mr. Hua had a popular mandate and to increase the Chinese people's familiarity with him.

Only a year ago Mr. Hua, a career party administrator, was virtually unknown to most of China's 850 million people. China still has not disclosed any official information on Mr. Hua's personal or political background, not even when or where he was born or whether he is married.

Today's editorial also claimed that before he died, Mao warned Mr. Hua about the ambition of his wife, Chiang Ching, to succeed him. Miss Chiang and three other leftist associates were arrested last month when Mr. Hua was named chairman.

According to the army paper, Mao told Mr. Hua "the story of Liu Pang [the founder of the Han Dynasty in 206 BC], who just before his death perceived that Empress Lu and others of her clan were conspiring to betray the nation and usurp power." Empress Lu, the first of China's dowager empresses, took over after her husband's death, but her family was massacred after her own demise a few years later.

First Indication

The account of the conversation about Empress Lu was the first official indication that Mao harbored fears that his own wife might try to become chairman after his death. The editorial did not say exactly when Mao conveyed his warning to Mr. Hua.

The editorial also charged that after the death of Premier Chou En-lai last January, the four leftists "did their utmost to push their own person into the post of premier."

Analysts here noted that it was the second editorial praising Mr. Hua in the army paper in the last two weeks, and said it suggested strong backing for him in China's armed forces.

Chinese Treating Acupuncture's Faded Image

By Jacques Leslie

HONG KONG, Nov. 9.—Five years ago the first Americans allowed to visit China brought back seemingly wondrous tales of the use of acupuncture to combat everything from deafness to chronic pain.

James Reston, a New York Times columnist who was one of the first U.S. journalists to visit Communist China, reported from Peking that after an emergency operation there to remove his appendix, Chinese doctors stopped the "considerable discomfort" in his stomach by inserting and twirling acupuncture needles in his calves and right elbow.

Such stories established the legitimacy of acupuncture in the minds of many Westerners, and the technique became popular in the United States and Europe. But almost as quickly, quack doctors claiming knowledge of acupuncture moved to cash in. The result was that after the initial burst of acceptance for acupuncture, its reputation declined.

Modest Step

Now the Chinese government has taken a modest step to improve acupuncture's tarnished image. China has provided free equipment and authorized three Chinese doctors trained in acupuncture to participate in seminars here to teach Western doctors the technique.

The seminars are run by a Swiss company named Medicon, which specializes in arranging medical study tours. Twenty Western doctors attend each seminar, taking 63 hours of courses over two weeks.

Medicon first tried to set up courses in Taiwan to teach acupuncture to Westerners. But these ended in failure, and the doctors' tuition fees had to be refunded.

"The Taiwan doctors offered lots of theory but very little practice," explained Ernst-Uwe Winteler, Medicon's representative here.

Mr. Winteler then tried to set up seminars here. But virtually all of the "50 or 60" Chinese acupuncturists that he contacted here were quacks, he said.

"I was on the verge of giving up."

He subsequently met representatives of a mainland Chinese trading firm, and they agreed to help. Mr. Winteler believes their motives are to rescue the technique's reputation and to sell acupuncture equipment to the Western doctors after they are trained.

Medicon hopes to schedule acupuncture seminars here through the end of next year. The doctors now taking part are German, Swiss and Austrian. But Mr. Winteler said he hopes to offer courses for U.S. doctors beginning in April.

Russia Tops U.S. In Nuclear Arms, China Tells UN

UNITED NATIONS, N.Y., Nov. 9 (AP).—China said yesterday that the Soviet Union is ahead of the United States in nuclear armament.

"Soviet strategic nuclear arms have greatly exceeded those of the other superpowers in quantity," Chinese Ambassador Huang Hua said in a disarmament debate in the UN General Assembly's Main Political Committee.

"Soviet conventional armed strength is also developing rapidly with a drastic increase in the quantity of its tanks, artillery and military aircraft," he declared.

In China's bitterest attack on the Soviet Union here since Mao Tse-tung died last month, Mr. Huang charged that the Soviet Union was talking of détente and disarmament merely to cover up its military expansion.

As for the "two superpowers," the Soviet Union and the United States, he said that their "strategic arms limitation talks have become a fig-leaf for covering up the promotion of strategic arms development."

Japan and Russia Set Final Accord On MiG's Return

TOKYO, Nov. 9 (UPI).—Japan and the Soviet Union reached final agreement today on the return of the MiG-25 fighter plane in which a Soviet Air Force officer defected to Japan, the Foreign Ministry announced.

A ministry spokesman said a Soviet freighter will dock Friday at the port of Hitachi, 70 miles north of Tokyo, to pick up the supersonic plane.

Earlier, the Tokyo Kyodo Kaiun Co., which serves as Japanese agent for Soviet vessels, said the freighter Taigonos left Vladivostok today for Hitachi and will take the plane back to the Soviet Union.

The agreement ended a dispute between the Soviet and Japanese governments over the plane, which was landed Sept. 6 at Hakodate City, 500 miles north of Tokyo, by Soviet Air Force Lt. Viktor Belenko, 29.

Lt. Belenko was granted asylum in the United States. In defiance of Soviet demands, the Japanese government decided to make an inspection of the MiG and called in U.S. experts to help.

News Service Folds

NEW YORK, Nov. 9 (AP).—The NIS, a 24-hour radio news service operated by the National Broadcasting Company for the last 16 months, will cease operations by mid-1977, NBC announced.

Knesset Defeats No-Confidence Vote on Economy

TEL AVIV, Nov. 9 (AP).—The Israeli government defeated a parliamentary motion of no confidence in its fiscal policies today, but made little progress toward ending an outbreak of labor unrest in which 115,000 workers are on strike or work slowdowns.

The motion won only the support of the four Communists in the Knesset who had sponsored it. The rightist Likud bloc abstained, refusing on principle to support a Communist motion, but attacked the government as harshly as the leftists.

The labor crisis began with a slowdown by the 16,000-member engineers' union and deteriorated when the government overrode labor-union protests and slashed subsidies on basic commodities such as bread and eggs, raising their prices by 20 per cent.

Russia Asserts West Interferes Over Emigration

MOSCOW, Nov. 9 (AP).—The Soviet Union issued a sharply worded defense today of its policy on emigration and asserted that Western calls for the release of some of its citizens constitute "interference in the internal affairs of the U.S.S.R."

An unsigned "statement" transmitted by the Tass news agency said the Soviet Union "completely and attentively" studies all requests by citizens to leave the country for reunion with relatives abroad.

"Refusals [of exit visas] occur in an insignificant number of cases when the citizen announcing a desire to leave the U.S.S.R. had access in the course of his duties to work or information presenting a state secret," the declaration said.

Asserting that each state has an inalienable right to protect its secrets, the statement said: Regardless of whether somebody likes or dislikes it, any attempt at pressuring competent Soviet organizations into changing their decision is viewed as interference in the domestic affairs of the U.S.S.R."

The statement followed strikes at government institutions last month by a group of Moscow Jews who have been denied exit permits on the grounds that they know state secrets.

Portrait of Sartre Reveals More Than Was Intended

By Thomas Quinn Curtiss

PARIS, Nov. 9 (IHT).—"Sartre par Lui-Même" (at the St. André des Arts, 14-Juillet-Bastille and 14-Juillet-Parnasse) is a three-hour interview with the grand dragon of existentialism, photographed by Alexandre Astruc and Michel Contat. The recording of an influential literary figure of the age is a step in the right direction. Although it would have been possible to film them, such giants of literature as James Joyce, Eugene O'Neill, Maxim Gorki, D'Annunzio, Schnitzler and Theodore Dreiser went to their graves leaving no such portrait. Countless politicians have been done in depth before the cameras, but until very recently—until television realized the value of such exposure—literary men have been ignored.

In this sense, the Astruc-Contat undertaking is notable but the film itself shows a lamentable lack of skill. The sound track is so poor that it is, at times, inaudible. It is surprising that the usually resourceful Astruc has made this film flat and dull.

Most of it was shot in 1972 in Sartre's Montparnasse apartment. There he sits, chain-smoking, surrounded by yes-men and a yes-woman, Simone de Beauvoir, airing his familiar opinions and, on the verge of 70, swearing allegiance to the class struggle. It begins with an address he delivered to a crowded hall in which he announced his determination to aid in the overthrow of bourgeois society. An attempt at autobiography follows. As he talks of his parents, his childhood and his schooldays, his recollections are illustrated with photos from the family album. The historical background of his career is represented by much used newsreel clips of World War I, the Russian revolution, the Spanish Civil War, Daladier's return from Munich, World War II, Nazi-occupied Paris, and the colonial wars. More interesting are the newsreel extracts in which he appears in the pre-war cafés of Saint-Germain-des-Prés, attending the rehearsals of his plays, visiting Cuba after the Castro takeover—Che Guevara lights his cigar—hawking his revolutionary publication in the streets and being escorted into a police van and preaching as he stands on an oil drum.

The restricted camera range induces a form of claustrophobia in the spectator. As one sits before the master and his disciples, *listening to their talk about* reforming the human condition, they seem themselves uncannily isolated, opinionated to the point of impregnability, any free discussion, any controversy, any broad exchange of ideas being ruled out. There is something of the genial professor in Sartre's delivery and he emerges as an appealing personality, even touching in his odd, naïve declarations. He expresses the hope that his book on Flaubert will one day serve the masses, forgetting Flaubert's hatred of the mob and the fact that Flaubert's books of a hundred years ago have never become "popular" reading. This recalls an incident when in 1968 Sartre spoke to a body of revolutionary students, proclaiming his solidarity with their cause. An impudent youth called out, "Merci, papa!"

Thus, this portrait is probably more revealing than intended. As a political prophet its subject is exposed as a back number, a zeitgeist behind the times, though a resumé of his past will be of historic aid to coming generations.

* * *

The Cluny Théâtre—now known as the Cluny-Palace—on the Boulevard Saint-Germain is over a century old. It was here that Zola's "Les Héritiers Rabourdin," inspired by Jonson's "Volpone," had its premiere in 1874. The play failed and the playhouse turned to the production of broad farces and became a sort of neighborhood Palais-Royal, specializing in military comedies and boudoir vaudevilles—"La Cocotte Bleue" and others of the ilk earning fortunes. It was taken over by the cinema after World War I and has since been rebuilt into two auditoriums. This comes to mind as the current occupant of Salle II resembles the sort of fare that replaced Zola.

Its title is "L'Aile ou La Cuisse," directed with vim and vigor by Claude Zidi. The stars are France's favorite funnyman, Louis de Funès, and a new contender for that throne, Coluche.

The Zidi scenario serves as a springboard for their wild antics. Funès—whom illness has kept from the screen for too long—returns in fine fettle, his former irascible self. Spluttering with comic indignation at each contretemps, he is the editor of a gourmet guide book, endowed with the power to bestow stars on restaurants—and to withdraw them. For his gastronomic spying, he disguises himself—now as a sweet, little old lady, now as a grandee with flowing mustache, now as a chauffeur. The plump Coluche is his wayward son who would rather be a circus clown than follow in his papa's footsteps. The mainstay of the film is the relentless war that the professional taster wages on a shady manufacturer of prefabricated foods. "L'Aile ou La Cuisse" is amiable box-office stuff, transformed into a merry romp by its stars.

Associated Press.

Sartre stands on oil drum to address workers.

Americans Dispute French Diagnosis

Is Mummy of Ramses II 'Infected'?

By Boyce Rensberger

NEW YORK (NYT).—Ramses II, which is undergoing tests by French scientists in Paris for what was said to be an infection threatening its preservation, may actually be suffering from nothing more than a case of "diplomatitis."

American and Egyptian scientists familiar with the mummy say that there is nothing wrong with it, that the infection story was invented to provide an excuse for violating an old tradition that the still-venerated mortal remains of ancient Egypt's rulers are not removed from the country or disturbed more than necessary.

The incident, in which the 3,250-year-old mummy was given a televised state reception complete with an honor guard at Le Bourget airport and a welcoming speech by a Cabinet minister, has reportedly angered much of the Egyptian scientific and cultural community.

The Egyptian scientists and some of their American counterparts say the infection story was worked out by President Valéry Giscard d'Estaing of France and President Anwar Sadat of Egypt. The critics say the original plan was to put the mummy on display as the centerpiece of the vast exhibition about the reign of Ramses II (1292 to 1225 B.C.) that closed recently in the Grand Palais museum in Paris; the mummy was never displayed.

Last year, when the exhibition was being planned, French officials hoped to get the mummy for display, but the Egyptian cultural authorities refused. No royal mummy had left Egypt before, certainly not to become a curio for a gawking foreign public.

Until the days of King Farouk, who was deposed in 1952, royal mummies were not exhibited even in Egypt. Today they can be seen at the Egyptian Museum in Cairo, but they remain respectfully shrouded up to the neck.

Last December President and Mrs. Giscard d'Estaing reportedly made personal pleas to President and Mrs. Sadat to release the mummy. Presumably as a goodwill gesture, Mr. Sadat agreed, and the Egyptian scientific and cultural authorities were told that French experts who had examined the mummy had found it to be deteriorating because of bacteria or fungi and urged that it be removed to Paris for further tests and treatment.

Egyptian and American experts strongly doubt that the mummy's preservation is threatened, and some call suggestions of infection a scientific fabrication to serve diplomatic ends.

"My opinion is that they are not deteriorating due to bacteria or fungus or anything else," said Dr. James Harris, a University of Michigan researcher who has been examining the royal mummies almost annually for 10 years.

"I really feel," he said, "the are so coated that it would b absolutely impossible to infec them. The French wanted the mummy very badly, and I frankl think it was scientifically di honest to say the mummy ha some infection."

That view is corroborated b Ibrahim Nawawy, a mummy ex pert at the Egyptian Museu Nawawy, now in Washington ac companying a Tutankhamen e hibition at the National Galle said the Ramses mummy was good condition.

The mummy remains unc guard in an "aseptic chambe in a laboratory of the Musée l'Homme in Paris.

French Charge Americans With Rudeness, Jealousy

By David R. Zimmerman

PARIS (AP).—Charges about the health of the Ramses II mummy have escalated into a squabble, provoking what one Paris newspaper called "a little international war" among France, the United States, Britain and Egypt.

The latest round erupted when The New York Times said that Egyptian and U.S. experts doubt that the conservation of the mummy is threatened; some feel the "infection" is an invention designed to serve diplomatic ends.

A similar charge was leveled three weeks ago by the Times of London in a Cairo-dated story which said that Egyptian scientists believe the body of Ramses II suffers little more than a loose toe and that shipping it to Paris for treatment was a political stunt.

French mummy experts not only denied the charges but accused both the Americans and the British of being rude and jealous, and said a key reason Egyptian mummies are in such terrible shape is that the Americans opened sarcophagi too often in the past to take X-rays.

"A nauseating and uncalled-for attack," Christiane Desroches-Noblecourt, head of the Egyptian antiquities section at the Louvre, said of the newspaper articles. "I am disgusted by these commentaries, which are as unfounded as they are discourteous."

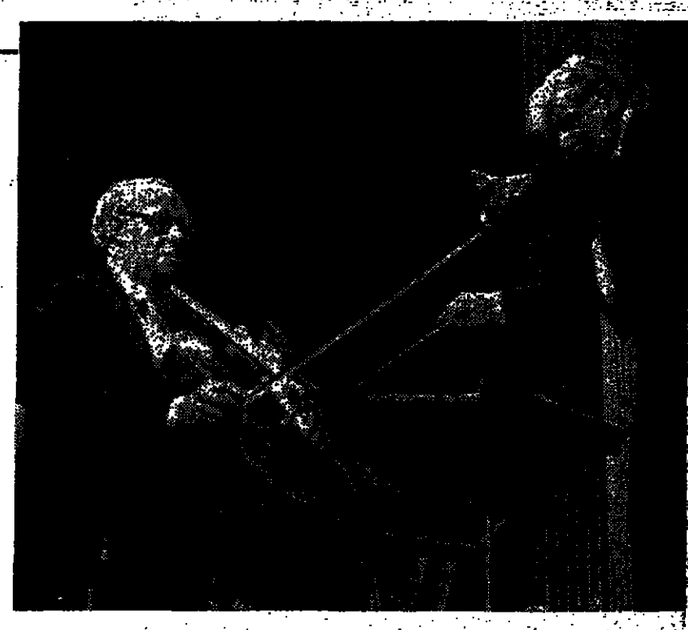
Mrs. Desroches-Noblecourt, who was instrumental in having Ramses II flown to Paris from Cairo on Sept. 25, said, "Very simply, the Americans are jealous that French scientists are the most qualified to treat the mummy and assure him eternal life sheltered from deterioration. They are annoyed, just as the English are, that Egyptian civilization essentially was revealed by French scientists."

She added that experts at the Musée de l'Homme, where Ramses II has been placed in a sterile surgical theater, have already found "microorganisms, fungi and modern insects which have caused grave damage" to the mummy.

Prof. Lionel Balout, in charge of the mummy team at the museum, confirmed what Mrs. Desroches-Noblecourt said, adding that next week journalists will be allowed to look at Ramses II to see for themselves what poor shape he is in.

Slava and Lennie in Paris

By David Stevens



PARIS, Nov. 9 (IHT).—There seemed to be two concerts in one last night at the Théâtre des Champs-Elysées. For one thing, the program was downright schizophrenic, but effectively so, with two romantic concertos sandwiched between a pair of Darius Milhaud's jazzy, early-1920s scores. For another, the simultaneous emotional input of Mstislav Rostropovich and Leonard Bernstein in action on the same platform threatened to be more than the framework of a single concert could stand.

Yet, in the major work on the program—Schumann's Cello Concerto—these two high-powered artists vied with each other in discretion and sensitivity to produce a performance of great beauty. Rostropovich, who has been known to all but grab the baton out of the conductor's hand in his eagerness to do everything, confined himself to a few urgent glances toward different sections of the Orchestre National de France, while playing with astonishing richness and variety of tone, and Bernstein concentrated on being a model accompanist, although hardly a perfunctory one.

Both men let themselves go much more in the richly vigorous, post-romantic melancholy of "Schelomo," Ernest Bloch's "Hebrew rhapsody for violoncello and large orchestra," which can hardly ever have received a performance of such intense conviction, or have been received with *such rapture by an audience.* Needless to say, the general enthusiasm included an almost interminable round of embraces that overflowed from Slava and Lennie to most of the orchestra's first desks.

The concert opened with "La Création du Monde," Milhaud's most successful assimilation of jazz into his own musical language, with Bernstein coaxing some fine playing from his 17 soloists. After Bloch's dense textures, "Le Bœuf sur le Toit" was a welcome release, with Bernstein dancing his way through Milhaud's somewhat overlong succession of South American rhythms. The orchestra was not as alert or precise as it might have been, but the mood was right.

The Milhaud works added a historical note to the concert, too, for they were both presented to the public for the first time in the same theater as the scores of ballets that involved the collaboration of such as Jean Cocteau, Fernand Léger and Blaise Cendrars. They returned last night as memento of one of the most fertile epochs in Parisian music life.

Mstislav Rostropovich and conductor Leonard Bernstein in Paris Monday night.

U.S. 'Cultural Imperialism' And Mideast Television

By Thomas W. Lippman

CAIRO, Nov. 9 (WP).—Scene 1. A hot night on the waterfront in Dubai. Three dozen men sit on chairs outside the Binyas Cafe, drinking coffee. The usual hum of Arabic conversation and clack of backgammon pieces are missing. The men are watching a documentary film about skiing in California on a big color television.

Scene 2. A quiet evening in the office of the Israeli military censor in Jerusalem. The duty officer and his assistant are watching "Kojak." Israeli television does not carry "Kojak," but the censors aren't watching Israeli TV. They are watching a Jordanian channel that is popular in Israel because of its American programs.

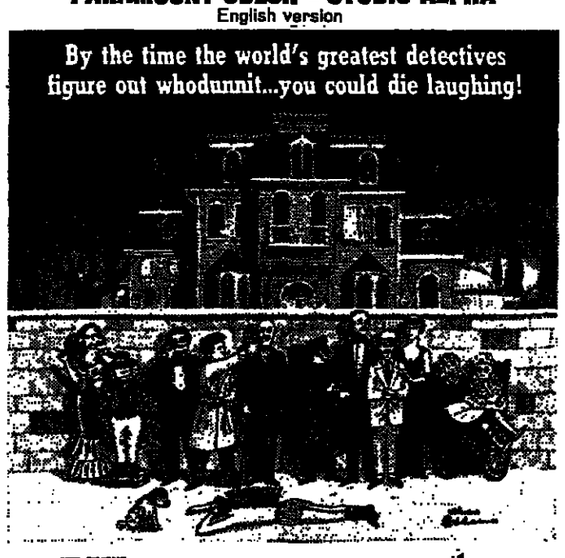
All around the Middle East, in a trend that an Egyptian journalist jokingly calls "cultural imperialism," U.S. television programs are being shown on government-controlled outlets to an ever expanding audience.

The favorite shows appear to be police dramas, situation comedies and cartoons. There are no sophisticated ratings to show whether the audiences prefer them to locally produced fare, but the Western shows are evidently highly popular.

Jordan television took out full-page newspaper advertisements to announce its new fall schedule, featuring "Petrocelli," "Young Dr. Kildare" and "Wide World of Sports" in addition to several shows from Britain.

In Iraq, not noted for its cultural ties to the United States, the government used the occasion of the national day celebrations in August to inaugurate color broadcasting and announce that four new shows would be on every week—"Mary Tyler Moore," "Love on a Rooftop," "Needles and Pins" and "Police Story."

Here in Cairo, the Moslem holy month of Ramadan was marked by nightly showings of "Tom and Wonsan," "Barnaby Jones," and "Kojak."



The spread of television as an instrument of entertainment as well as of propaganda has brought with it some oddities.

In Kuwait, for example, a popular item is a rooftop antenna shaped like the Eiffel Tower.

Newspapers in Israel carry detailed program listings for Jordanian television. The Israelis say they do not obtain the information directly from Amman, but pick up the schedule together.

Not to be outdone by the oil-rich states of the gulf, poverty-stricken Egypt is also going into the color television business. According to official announcements, testing of color transmission equipment is now going on, and the first locally made color receivers are to go on the market next month.

PARIS, WEDNESDAY, NOVEMBER 10, 1976

EEC Steel Firms Curb Imports From Japan

BRUSSELS, Nov. 9 (AP-DJ).—Steel makers in the European Economic Community have agreed on measures that will effectively curb exports of certain steel products from Japan to EEC markets for a five-month period, industry sources said today.

The measures concern principally merchant bars, wire rod and reinforcing bars made by small Japanese producers.

Steel producers in the community feel that importers should be "persuaded" not to purchase such steel products from small Japanese makers over the five-month period, which is understood to have started this month, sources said.

These sources noted that while the major Japanese steel producers have committed themselves to holding their exports of rolled steel to 1.22 million tons, the small makers, accounting for under 10 per cent of Japan's total steel output, have not offered to curb their exports.

30% of Shipments

Without producing exact figures, steel sources said merchant bars, wire rod and reinforcing bars produced by the small Japanese companies now amount to 30 per cent of the shipments from third countries to the EEC market of such special products.

Prices of the Japanese products are offered at levels substantially below those of EEC producers, the sources said.

Industry officials said many steel producers in the community, especially in Belgium, are "very much hurt" by these Japanese shipments offered "at ruinous prices."

The officials said community steel makers simply acted in self-defense by adopting the measures which will be applied individually by steel companies in bilateral contacts with importers.

Compensation Given

But it appeared clear that individual steel makers in the EEC have the steel industry's backing in offering certain premiums, rebates or other benefits to importers to compensate them for halting purchases of the Japanese products.

The EEC has already expressed concern over growing shipments of Japanese steel to the Common Market and to areas outside the community which the EEC considers traditionally its own market.

The steel industry sources said the EEC will probably press for an extension of the Japanese export controls and will seek the inclusion of the small Japanese steel makers in the restraint program during talks with Japanese industry officials in Brussels on Thursday.

Steel industry officials stressed that the import controls were needed because "many of our producers specialising in these specific products face bankruptcy" unless they are protected.

Japan Seeks European Import Boost

TOKYO, Nov. 9 (Reuters).—Japanese government and business leaders today agreed on the need to increase imports from Europe by stimulating the domestic economy, simplifying import procedures and easing other non-tariff barriers.

Officials said the agreement emerged in talks here between Toshio Komoto, the international trade and industry minister, and Toshiwo Doko, president of the Federation of economic organisations (Keidanren).

Mr. Doko recently led a federation delegation to Western Europe and later told the Japanese government about strong feelings building up there over the growing Japanese trade surplus with Common Market countries, estimated at $4.2 billion this year.

Mr. Doko met Prime Minister Takeo Miki yesterday, and apparently got down to more detailed discussions on how to correct the trade gap when he met Mr. Komoto today.

Action Before Summit

The trade minister told Mr. Doko that he would like to work out measures to reduce Japan's trade surplus with the European Economic Community by Nov. 20, when an EEC summit meeting is to take place, officials said.

Japan fears that measures against its exports may be decided at the summit meeting if it does not act beforehand.

Mr. Komoto and Mr. Doko agreed that Japan would cooperate in meeting European requests for simplification of Japanese import procedures and easing of other non-tariff barriers so that the flow of European goods could be increased, officials said.

The government plans to improve its certification system for imported cars, and there was agreement that imported vehicles should be excluded from the most rigid emission control standard proposed for 1978, officials said.

If the emission standards were fully enforced, they would keep out virtually all foreign cars, they said.

There was also agreement at today's meeting that intensive Japanese export drives must be avoided in some overseas markets.

The Cabinet council of economic ministers today approved several measures to help revive the Japanese economy, including making more money available to the national railways and the telephone system so they can speed up construction projects.

Funds will also be given to smaller businesses, and public works expenditure is to be increased.

A proposed income tax cut to boost consumer spending will be considered at a Cabinet council meeting on Friday, Cabinet sources said.

Japan Car Firm Shelves Plan for Output in Europe

TOKYO, Nov. 9 (Reuters).—Mitsubishi Motor Corp. has indefinitely postponed its plan to produce cars jointly with Chrysler Corp. in Britain, France and Spain, because of strong opposition in these countries, company spokesman Usamu Yamauchi said today.

Mr. Yamauchi, chief of public information, said that public reaction to the plan, originally broached by Chrysler, was strongly adverse, apparently because it was feared that the to-parts to be supplied by Mitsubishi would increase unemployment.

Reaction to the plan was particularly unfavorable in Britain, because Chrysler U.K. Ltd. is receiving financial support from the British government, he said.

Mr. Yamauchi said Mitsubishi's dealers in those countries also opposed the plan, because local production of cars would adversely affect sales of Mitsubishi's own small cars.

Mitsubishi has therefore had to postpone indefinitely the plan, which was intended to bypass growing criticism of Japanese car exports and avert possible car import restrictions in those countries, he said.

Europeans Cool on U.S. Stocks

NEW YORK, Nov. 9 (AP-DJ).—Foreign investors in U.S. stocks have taken what appears to be a decidedly cooler stance after providing significant net buying muscle to U.S. equities in 1975 and earlier this year.

"They still rank the U.S. market No. 1," says Robert Lamorte, international economist and portfolio strategist at Jesup & Lamont Inc., "but they have slowed their net purchases dramatically."

Mr. Lamorte, who recently returned from discussions abroad with a number of investors, says their buying slowdown "could preclude the Dow Jones industrial average from attaining the 1,100 to 1,200-level in early 1977." He concludes, in fact, that the changing attitudes of investors abroad will act as a ceiling on stock prices here over the next six to nine months.

The international currency situation is playing a role in shaping attitudes toward U.S. stocks and Mr. Lamorte does not expect currencies to stabilize until next spring, so, he said, "we would expect the substantially reduced rate of net foreign common stock purchases to continue."

He believes the market, as measured by the Dow Jones industrial average, may remain in a range between 850 and 1,050 well into 1977 because of "the lack of sufficient new money" to push it upward.

During most of the recovery from the market low in late 1974, foreigners provided new money for the market at an unprecedented rate. In 1975, foreign investors bought nearly $4.7 billion more U.S. stocks than they sold. In the first six months of this year, their net buying amounted to nearly $2.3 billion.

Latest figures available from the Federal Reserve Board account for foreign trading only through August, but they show decided slippage in buying enthusiasm from abroad. Europe, in fact, was a net seller of U.S. stocks in each of the four months starting in May.

Only continued net buying by Middle East investors kept foreigners' stock transactions from slipping into the minus column in August, but even in the Middle East net buying has slowed sharply. Net buying from this area slowed from $286 million in June to $209 million in July and to only $92 million in August.

Total net purchases by foreigners in August were ony $88 million, down from $233 million in July. In the first four months of this year, foreign net purchases had averaged $478 million a month.

The Fed's latest figures are preliminary, subject to change and two months old. Mr. Lamorte says, however, that his recent discussions abroad with Swiss, French and German investors "indicate that the substantial reduction in foreign net stock investment in the United States during the last several months is going to continue."

One factor helping send some foreigners to the market sidelines, he says, has been the flight from the British pound, the Italian lira and the French franc, and the coincident rise in the relative value of the West German mark and the Swiss franc.

"The Swiss and the Germans have been losing money on their holdings of U.S. securities," he says. "Their currencies have been appreciating while our stock market has been going sideways, essentially, since February. This results in losses to them when they translate their dollar-denominated assets—in this case, stocks—into their respective currencies."

Federal Reserve figures show the Swiss were net sellers of U.S. stocks in June, July and August. The Germans were net sellers in May, June, July and August.

Mr. Lamorte remains a long-term stock-market bull, but believes it may be late next year before the Dow Jones industrial average breaks convincingly above the 1,050-level. "Foreign investors say they aren't going to do much selling and are just slowing down their buying," he says, "but this change is important because they've represented so much of the total net purchasing since 1974.

"My own feeling is that the market will have to move lower to raise investor purchasing power, and that this is the phase we're currently seeing."

For California Land Developer

Sealed Bids May Settle Take-Over Fight

LOS ANGELES, Nov. 9 (NYT).—The hotly contested battle for control of Irvine Co., an obscure California land developer, has taken an unexpected twist as it became known that the use of sealed bids to determine the company's eventual owner was being explored.

Irvine is the target of a tense take-over battle between Mobil Oil Co. and Cadillac Fairview Corp. of Toronto, and fast-moving developments yesterday prompted the Orange County Superior Court to postpone action on the sale of the company until at least tomorrow.

Meanwhile, Irvine said that it had rejected a third offer, from a group of investors that included Charles Allen jr., a Wall Street investment banker best known for his take-over and development of Syntex Corp.

To deal with the heavy interest in the concern, legal sources said the judge and lawyers for the Irvine Foundation, the majority stockholder, and Irvine Co., in a 20-minute meeting yesterday, agreed to attempt to develop alternative methods of selling the company. Use of sealed bids heads the list of options, they said.

Accord Sought

"I think the Irvine people would like sealed bids, but it's possible Mobil and Cadillac Fairview won't like it because it might deprive them of coming up with a final offer," an Irvine Co. official said. "The judge will meet with representatives of the two companies Wednesday, or possibly Friday, to see what kind of agreement can be made."

Mobil started the bidding for the company almost two years ago, offering $24 a share, or a total of $201 million.

But this offer was challenged as inadequate by Joan Irvine Smith, granddaughter of the founder of the company, who owns 22 per cent of the stock, and she took the matter to court in Orange County. She was seeking to overturn acceptance of the Mobil offer by directors of the Irvine Foundation, which owns 54 per cent of the stock.

After a trial on her suit began in mid-September, Cadillac Fairview, one of Canada's largest land developers, suddenly entered the picture and offered $265 million, or $31.50 a share, in cash and notes.

Then Mobil came back with a second offer, also of $31.50 but all in cash.

Cadillac then increased its offer to $269.2 million, or $32 a share, in cash and notes last Friday. Then, after being consulted by directors of the Irvine Foundation, and a pause of several hours, Mobil came back n Friday with an offer of $273.5 million, or $32.50 a share.

The Cadillac Fairview offer on Friday was nominally $279.8 million, or $33.25 cents a share, comprised of $159.8 million in cash and $120 million in notes. But the company reserved the right to buy back the notes at a discount of 8.75 per cent, which made the total offer equivalent to $269 million, or $32 a share. The Mobil offer is all in cash.

Offer Rejected

Meanwhile, directors of the Irvine Foundation yesterday rejected an even higher offer—of $285.6 million, or $34 a share, in cash, notes and "other considerations."

It was made by a Detroit company, SMRH & Z Inc., which is headed by New York financier Charles Allen jr. and Alfred Taubman, a real estate developer.

A spokesman for Irvine Co. said the offer had been rejected because not enough cash was involved.

The object of the take-over race is a company that owns the largest single parcel of land within a major metropolitan area in the country.

Known as the Irvine Ranch, it consists of more than 70,000 acres fronting on the Pacific Ocean. Most of the land is undeveloped. The portion that has been developed includes a carefully planned "new town" with choice residential and industrial sites and the University of California campus.

The community is one of the most sought-after by new home developers in southern California, and has been the scene of frenzied lotteries and fire-sale campouts by families hoping to buy one of the few available homes there recently.

Curbs on Imports of Autos Urged by British Lawmaker

LONDON, Nov. 9 (AP-DJ).—The British government should impose blanket controls on foreign car imports "as a matter of dire urgency," Douglas Hoyle, a Labor party Member of Parliament said today.

Mr. Hoyle said the latest new car registration figures, showing imports with a 42.2-per-cent share of the market last month, proved that restrictions on car imports are "long overdue."

As soon as the government acted to cut back on foreign cars entering Britain, Mr. Hoyle said, British manufacturers would be forced to increase production to meet home demand, thus providing jobs which would be of benefit to the overall economy.

"The longer the government waits the more people are going to lose their jobs in Britain," Mr. Hoyle said.

Despite his protests, and those of other politicians and union leaders, no action to restrict car imports in Britain is likely for a number of reasons.

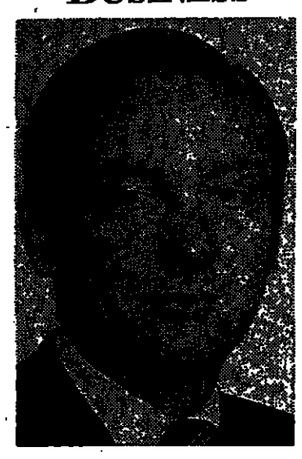
Mainly European

Most of the increase in foreign car sales this year has been of cars imported from other member countries of the European Economic Community. In the first 10 months of this year, sales of Common Market cars in Britain rose to 267,956, or 24 per cent of the market, from 223,752, or 21 per cent, a year earlier.

As a member of the EEC, Britain would find it extremely difficult to impose curbs on imports from other EEC countries. Such action is even more unlikely at a time when government is seeking aid from EEC countries to overcome its financial difficulties.

Also, virtually all of the rise in EEC car sales has been due to imports by British units of the big three U.S. car makers from other European units of these companies.

Until now most calls for import controls have been aimed at Japan and Eastern Europe. However, sales of Japanese cars in the first 10 months of this year have totaled 108,345, or 9.7 per cent of the market, little above year-earlier sales of 99,062, or 9.3 per cent of the market.



Sales of Eastern European cars have actually fallen so far this year, to 16,646, or 1.5 per cent of the market from 17,371, or 1.6 per cent in the first 10 months of 1975.

Merrill and Montagu Form Bullion Concern

LONDON, Nov. 9 (AP-DJ).—Merrill Lynch & Co. and Samuel Montagu & Co. announced today the formation of a new precious metals trading company and the establishment of U.S. operations.

The new company, Merrill Montagu Inc., will engage in all aspects of bullion trading and will commence operations Nov. 15.

People In Business

James Tappan

General Foods Corp. announced that James Tappan has been elected a corporate vice-president and named president of its European operations. He had been managing director of Procter & Gamble, Ltd., in Britain. He succeeds James Whitcom, newly appointed as president of General Foods' Latin American operations.

* * *

William Holding has been appointed president and managing director of Bank Morgan Labouchere NV. He succeeds Peter B. Smith, who has been appointed senior vice-president of Morgan Guaranty Trust Co. in New York. Mr. Holding is also a vice-president of Morgan Guaranty International Finance Corp.

* * *

The Swedish Match Co. of Stockholm has named Rossie Lindquist as marketing director. He will be responsible for marketing both the lighter and match divisions throughout Europe and North America.

DISPOSAL OF INDUSTRIAL PLANT & MACHINERY

Prices Fall Again on Wall Street

NEW YORK, Nov. 9 (IHT).—New York Stock Exchange prices posted another decline today after a late afternoon rally attempt failed to slow the downhill slide.

Analysts attributed the drop to the impact of predominantly negative news on the U.S. economy. They also said a sustained stock market rally is unlikely while uncertainties over policies of President-elect Jimmy Carter persist.

The Dow Jones industrial average closed down 2.91 at 930.77, as 19.21 million shares changed hands, compared with 16.5 million shares traded yesterday.

The market failed to sustain a strong opening, which came primarily in reaction to recent selling pressure that sent the Dow Jones industrial average down more than 27 points during the two previous sessions.

Once again, however, there was little news to provide an impetus for trading. Declines outnumbered advances by about 870 to 560.

Analysts said high unemployment and a sharper-than-expected rise in the wholesale price index, both reported late last week, accounted for some of the selling pressure on stocks.

Among the weaker blue-chip and office-equipment issues were Xerox, off 1 1/2 at 56 7/8, and Burroughs, down 2 at 84 1/2. National Semiconductor lost 3/4 to 27 3/4, while Digital Equipment rose 1/8 to 48.

Motor issues were generally lower. General Motors surrendered 1/8 to 70 3/4 and Ford 1/2 to 55 3/8 but Chrysler was unchanged at 19.

Oils were mixed. Exxon fell 3/8 to 48 1/2, Gulf Oil 1/8 at 25 1/8, while Texaco gained 1/4 at 25 7/8 and Continental Oil 1/8 at 34 1/4.

Associated Dry Goods fell 5/8 to 30 7/8. The company expects lower third-quarter earnings. Columbia Pictures Industries, which reported lower fiscal first-quarter operating earnings, dropped 1/8 to 4 1/4. Anaconda fell 1 1/8 to 25 5/8.

Among the bright spots were Evans Products, which gained 1 1/8 to 12 3/8. Evans is offering to exchange preferred stock for common stock.

MGM rose 1/2 to 15 1/8 after declaring a year-end stock dividend of 9 per cent and Owens-Illinois was up 1/2 at 50 1/2.

U.S. Steel moved ahead 3/8 to 46 3/4, Norton Simon rose 1/8 to 20 5/8 and Zale Corp. rose 1 to 12 1/4.

Liggett Group dropped 5/8 to 32 5/8 and Bendix was off 1/8 at 39 1/2.

Soybean futures again led all farm commodity futures in a decline on the Chicago Board of Trade.

Soybeans were down 9 1/2 cents. Wheat lost 8, corn 5 1/4 and oats 3 1/2. Soybean meal declined nearly $3 a ton, but soybean oil was virtually unchanged after a closing rally.

Ireland Gets Loan Totalling $300 Million

LONDON, Nov. (Reuters).—The Republic of Ireland has arranged a $300-million medium-term credit to finance part of its expected budget requirement for 1977, the four banks arranging the credit said.

The loan is the largest single syndicated borrowing from the international banking market so far undertaken by Ireland, the banks said.

The four banks are Allied Irish Investment Bank, Citicorp International Group, Manufacturers Hanover and S.G. Warburg.

U.S. Oil Firms' Profit Rises 9 Per Cent in Third Quarter

SAN FRANCISCO, Nov. 9 (Reuters).—Third quarter profits of the 25 largest U.S. oil companies totaled $2.98 billion, or 9 per cent higher than the $2.73 billion in the 1975 third quarter, the American Petroleum Institute said today.

This increase was lower than the profit rise of 418 industrial corporations, excluding oil companies, whose earnings increased more than 21 per cent during the third quarter, it said.

The institute, which released the figures at its annual meeting here, said the highest third quarter profit among the oil companies was posted by Exxon, with $635 million, although this was down from Exxon's third quarter 1975 net of $660 million.

Standard Oil of Indiana showed the second-highest profit in the third quarter, with earnings of $253.1 million, up from $229.7 million a year earlier.

Third was Mobil with third quarter net of $252 million compared with $231 million in the 1975 third quarter.

The institute said that in terms of stockholder equity, the profitability of the oil companies was 14.5 per cent in the first nine months of 1976, compared with 13.3 per cent last year.

The institute attributed the higher 1976 earnings to increased prices for crude oil and natural gas and to improved profit margins on refining, marketing and chemicals.

With higher capital outlays, the investment tax credit also contributed to the improved 1976 profit showing.

Offsetting these factors were larger expenditures for exploration and drilling, increased taxes resulting from elimination of percentage depletion, changes in the U.S. tax treatment of foreign earnings and the inability of companies to fully recover cost increases, the institute said.

Owens-Illinois To Sell Stake In Fiberglas Corp.

TOLEDO, Ohio, Nov. 9 (AP-DJ).—Owens-Illinois Inc. will dispose of about $75.4 million of Owens-Corning Fiberglas Corp. common stock that it owns, eliminating most of its stake in the company.

The plan, announced yesterday, apparently will satisfy the terms of a 1973 federal court consent decree that required Owens-Illinois to divest itself of most of its Owens-Corning stock before the fall of 1978.

The block of stock involved in the transaction represents about 8 per cent of Owens-Corning's total outstanding common.

Owens-Illinois said it is offering to exchange a total of 1,226,016 shares of Owens-Corning common for 1,362,240 shares of Owens-Illinois common. The exchange ratio is 0.9 Owens-Corning share for 1 share of Owens-Illinois.

Train couplings, trucks, turbines. What do they have in common?

Very little at first sight, but +GF+ if you look twice

Say a power station starts running in South America. Consider trucks put to rough handling in the Middle East deserts. Or up in the Alps for that matter. Imagine those flashy inter-city trains speeding across Switzerland. The common trait to all this? Built-in +GF+ know-how and *+GF+ quality products.*

Take for instance turbine housings made of high-grade cast steel, crankshafts, truck wheels or any of the seventy-odd +GF+ castings used by the automotive industry. Our process engineers and the men in the shop are at home with all of them.

16000 people in Switzerland, throughout Europe, in the USA and in Japan make sure that George Fischer Limited enjoys a reputation second to none, when the right answers to tough problems are needed.

So it's only obvious that the trade mark +GF+ crops up when the experts talk about the largest steel foundry ever built. And that also holds for Pelton turbines, high performance machine tools, textile looms, pipe fittings, plastic valves… and a host of other products.

+GF+
George Fischer Limited
Schaffhausen, Switzerland

P 413/4

From November 23 to December 3, 1976, at the SWISS EXPO, Swiss Industrial and Technological Exhibition, Cairo, Hall 4, Stand 401

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. f—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Pound and Dollar Rise in Europe

LONDON, Nov. 9 (AP-DJ).—Sterling and the dollar rose against Continental currencies today in a reversal of yesterday's trend.

Dealers said much of the buying of the two currencies originated in Switzerland and West Germany. One dealer said that Continental central banks seemed to be active, and there may have been a concerted effort by authorities to encourage buying of dollars and sterling.

The pound rose to $1.6287 from $1.6167 as its trade-weighted depreciation narrowed to 46.2 per cent below 1971 parities from 46.7 per cent yesterday.

The dollar rose to 2.4185 deutsche marks from 2.4117, but it finished unchanged against the Swiss franc at 2.4420. The dollar advanced to 4.9837 French francs from 4.9810.

U.S. Corn Crop Is Seen Higher

CHICAGO, Nov. 9 (AP-DJ).—Prospects for the U.S. corn crop improved slightly during the past month, while those for soybeans fell slightly, Conrad Leslie, the private crop analyst, said yesterday.

Mr. Leslie estimates that, based on Nov. 1 growing conditions, U.S. farmers will harvest a record 5.98 billion bushels of corn this fall, up 1.4 per cent from his month-earlier estimate, and up 1.7 per cent from the Agriculture Department's forecast as of Oct. 1.

The soybean crop will be about 1.24 billion bushels, down slightly from the official Oct. 1 estimate and down 1.5 per cent from his own month-earlier projection, Mr. Leslie said.

Continental Bank of Chicago is the bank that provides fast and efficient service.

Continental Bank of Chicago is here in Europe for many reasons. And one of them is to provide your business with a channel for handling financial requests with accuracy and without delay.

We're committed to providing clients throughout Europe with fast, efficient financial services. We constantly monitor our foreign remittance, payments and collections systems to make sure they're operating with accuracy and dispatch. And we're a leader in expediting foreign exchange transactions.

It's this two-fold commitment of speed and accuracy that makes Continental the bank of opportunity wherever in the world we serve.

In Europe: Antwerp, Brussels, Liège, Dusseldorf, Munich, Frankfurt, London, Piraeus, Athens, Thessaloniki, Madrid, Rotterdam, Amsterdam, Milan, Rome, Paris, Vienna, Geneva, and Zurich.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend areshown for the new stock only.

European investment in U.S. securities.

A special report by the International Herald Tribune during the week of Nov. 29, 1976.

European investments in stocks, corporate bonds, government bonds and notes now represent almost 70% of all foreign portfolio investments in the United States.

Stocks constitute the most important part of these investments. In 1975, the U.S. Department of the Treasury estimated European investments in U.S. stocks at $26 billion, an increase of almost 50% over 1974.

To study the reasons for the growing interest on the part of Europeans in the U.S. market, the International Herald Tribune plans to publish for the first time, during the week of November 29, 1976, a special in-depth report entitled "European Investment in U.S. Securities."

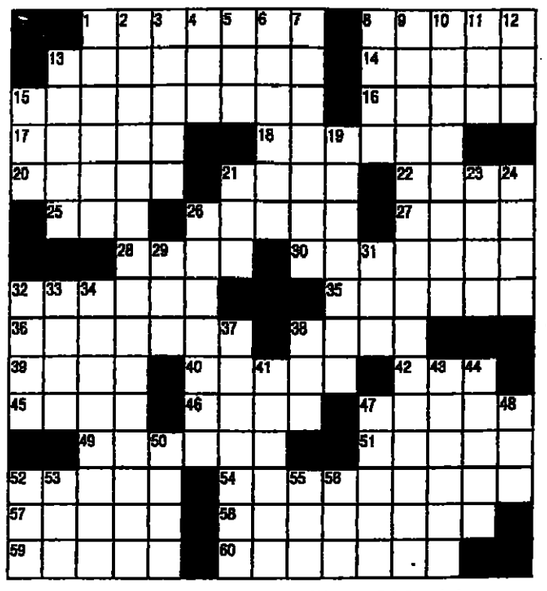
An important section of this report will be devoted to the kinds of investments that appeal to Europeans. At the same time, the report will look at American securities listed on the European exchanges. The report will also examine attitudes toward corporate profits in the U.S. contrasted with views in Europe.

In addition to regular distribution with the newspaper, this report will be sent by the International Herald Tribune to:

900 key investment professionals who act as either heads of U.S. investments, portfolio managers of U.S. securities or analysts with responsibility for following U.S. companies at the major financial institutions in Europe.

800 Eurobond and Eurocurrency money managers in Europe,

300 of the most important directors of business, finance and government organizations throughout the Middle East.



U.S. corporations or European financial institutions interested in advertising information should contact:

In Europe:

DENNIS THE MENACE

BOOKS

TERRA NOSTRA

By Carlos Fuentes. Translated from Spanish by Margaret Sayers Peden. Farrar, Straus & Giroux. 778 pp. $15.

Reviewed by Larry Rohter

THE year Columbus first landed in America, say the history books, was the same year Ferdinand and Isabella, soon to be titled "the Catholic Monarchs" by Pope Alexander VI, conquered the last of the Moorish kingdoms of Andalusia and expelled the Jews from Spain. One act opened a new world; the other two, argues Carlos Fuentes in this massive, brilliant and frequently grotesque novel, destroyed a civilization and assured that the order later transplanted from Spain to the new realms would be rigid, sterile and suffocating.

Fuentes, a novelist, essayist, journalist and lawyer-diplomat who now serves as Mexico's ambassador to France, has for years lamented "the double mutilation Spain imposed on herself through the eradication of the Arab and Hebrew components of her culture." From that policy of extirpation arose the obsession with racial, religious and political purity that culminated in Philip II—who dominates the pages of "Terra Nostra" as he did the history of Europe and America during the second half of the 16th century.

The Philip of "Terra Nostra" shares many traits with his historical counterpart, despoiler of the Netherlands and patron of the painter Hieronymus Bosch, king of Spain and Portugal, or, as he preferred to be called, *El Señor*. Consumed by a "lacerating asceticism" that makes him fear life and sex as much as death and God, he is indecisive about affairs of state and indifferent to the needs of his subjects. He prefers, instead, to devote his time to prayer and the construction of El Escorial, the "palace and monastery, fortress and necropolis" to which he transports the mummified remains of his ancestors.

But "Terra Nostra" is no more a historical novel than Thomas Pynchon's "Gravity's Rainbow" is a World War II adventure yarn. Throughout it, the fantastic becomes commonplace and history is altered: in the 1570s, Columbus has not yet sailed, and Philip, the son not of Charles V and Isabella of Portugal but of Philip the Fair and Juana the Mad, is married to Elizabeth Tudor, who will return to England and send her armadas against him.

What Fuentes has created here is another history, a hidden, occult, symbolic history in which past, present and future converge in hallucinatory splendor. The time separating epochs melts, the barriers between continents disappear as Philip's three bastard half-brothers, bearing the stigmata of six toes on each foot and scarlet crosses on their backs, suddenly materialize at the Cape of Disasters and deliver to Philip both the diary of Tiberius, the degenerate emperor of Rome, and the chronicle of a victim of t U.S.-Mexican War of 1999.

The outcome of this other h tory, however, is ultimately t same as our own, as Ludovi the idealistic theology stud who is the guardian of the th bastards and Philip's nemesis sometime lover, discovers wh he visits a classical scholar Venice. At the Theater of M ory, Ludovico is shown "an known world where Spain destroy everything that previ ly existed in order to reprod itself: a doubly immobile, dou sterile gestation, for in addi to what could have been those burning temples, see eagles fall, see how the origi inhabitants of the unknown la are subjugated—your count Spain, imposes another impo bility: that of itself... see h it hides itself in a mausole and from there governs in name of death... Look: centu and centuries of living de fear, silence, the cult of appe ances, vacuity of substances, times of imbecilic honor, see th the miserable realities, see th hunger, poverty, injustice, ig rance: a naked empire that im lines itself clothed in gol robes."

This vision of horror—and consequences of it—have affe Mexico perhaps more than other nation in Latin Amer For it was in Mexico— or "N Spain," as it was called du colonial days—that the Spa fascination with death and struction merged with the A devotion to ritual violence human sacrifice. Cosmopoli though Fuentes may be as a re of a childhood spent as must Argentina, Uruguay, Chile, Br and the United States as in M ico, he has felt the pull of Mexican past—and has respo ed to it with bitterness, anger cruel humor.

It may well have been Fuent intention to make "Terra Nos the supreme, all-embracing p of modern Spanish-language tion: the Great Latin Ameri Novel, as it were. That is tainly the impression conveyed the apocalyptic finale of "T Nostra," in which characters ed from novels by Julio Cort Gabriel Garcia Marquez, M Vargas Llosa, Jose Donoso Alejo Carpentier sit aroun table in Paris ("all good L Americans come to Paris to d on Dec. 31, 1999, playing " Poker" ("I have five of a k United Fruit, Standard Oil, P Corporation, Anaconda Co and ITT") while they await end of the world.

If that was indeed his then Fuentes has come very c to succeeding. "Terra Nostra" once savage and erudite, as c plex and contradictory as L America itself, and Fuentes's dacity in appropriating for book the figures who symbo the best writing of an entire ment is fully justified. The of the Latin American writer, Fuentes in "La Nueva Novela panoamericana," is to force his into "a permanent, dialect confrontation, by means of guage, between change and s ture, renovation and traditi events and discourse, the visio justice and the vision of trag With "Terra Nostra," Fuentes has done exactly that.

BRIDGE — By Alan Truscott

Those who brood on their disasters at the bridge table long after the event sometimes make an embarrassing and irritating discovery: That the winning contract had eluded them in the bidding, and also in the immediate post-mortem.

This was the fate of the South player, on the diagramed deal from a recent championship.

After West's three-club preemptive bid, South balanced with three hearts, and was raised to game. This seemed likely to end the auction, but East produced a bid of four spades that was more rash than brave. South blinked a little and doubled, counting his chickens, but West retreated to five clubs. This contract would have been doubled and defeated 800 points, but unfortunately for South, North persevered to five hearts.

The club king was led, and the declarer put up the ace from dummy, fearing the worst. The worst duly happened. East ruffed and returned a spade for his partner to ruff. West played the club ten, encouraging his partner to ruff but not running any risk. East ruffed and returned another spade. West scored the fourth trick for the defense and East eventually scored the diamond king for down three.

The bidding had made it virtually certain that West held a void spade, and it was quite likely that he held eight clubs. South decided later that he might have tried the effect of ducking the opening club and ducking again if the trick and perhaps two.

If East judged this situ correctly he could ruff the trick and allow the defense score all their four tr quickly. If he ruffed the sec round of clubs the result w again be down two. But if ruffed the third round So would overruff, draw trumps escape for down one.

On balance the play of the ace at the first trick was r ing the only real hope of ma the contract. But it was weeks later before it occurre South that six no-trump w have been unbeatable from e side of the table.

AP.

Rams' running back John Cappeletti (left) is caught by Bengals' linebacker Jim LeClair (on ground) and safety Marvin Cobb.

Anderson Shines in 2d Half

By Dave Brady

CINCINNATI, Nov. 9 (WP).—Ken Anderson and his Bengal receivers had something less than a hot hand last night during the first 30 minutes in the 27-degree weather of Riverfront Stadium. But they came back for a 20-point quarter, their most productive third quarter of the season, on two touchdown passes by Anderson, one to running back Booble Clark, who also scampered for one, and a 20-12 conquest of the Los Angeles Rams.

The Rams underwent the shock of a 67-degree drop in temperature from the 94 degrees they left in Los Angeles on Saturday. They also suffered their second defeat of the season and now hold only a half-game lead in the NFC West over San Francisco (6-3). Los Angeles is 6-2-1. Cincinnati, two-game leader of the AFC Central, is 7-2.

Rams' quarterback James Harris was not able to complete a touchdown until the last nine seconds when he connected on a 17-yard pass to wide receiver Ron Jessie. Until then, Los Angeles was held to 19 and 23-yard field goals by Tom Dempsey in the first and second quarters.

Fumble Recovery

The Bengal defense twice stopped the Rams up close in the fourth quarter, on a recovery of a fumbled reception by Jessie at the Cincinnati eight-yard line and on another recovery of a fumble by running back Lawrence McCutcheon at the goal line. Both fumbles were caused by savage tackles.

The Rams tried everything to try to get something going on offense. At the finish, coach Chuck Knox was sending in an occasional formation that called for no setbacks and five receivers.

The Bengals ranked No. 1 in total defense and No. 1 in passing defense in the most recent statistics for the AFC. The Rams had been leading the NFC in rushing and were fifth in passing for a No. 5 ranking overall.

The Rams rolled up the yardage again last night, but mostly betweeen the goal lines.

The Rams held the Bengals to 57 total yards in the first half, but that was mainly because Anderson missed his first six passes, completed only 2 of 12 for five yards, and his receivers dropped four of his throws.

Clark's Birthday

In the second half, Anderson hit on 9 of 14 for 137 yards and two touchdowns, one of 30 yards to tight end Bob Trumpy and the other of 17 to running back Clark, who was celebrating his 26th birthday.

Still, it was the defense that was given credit for turning the game around for the Bengals in the third quarter.

From the Rams' 28-yard line, Harris attempted to pass but was tackled hard by defensive end Gary Burley and fumbled. Several players had shots at the ball before Bengal cornerback Ken Riley recovered on the Los Angeles nine-yard line.

Capitalizing on the Rams' dismay, Anderson on first down sent wide receiver Isaac Curtis in motion to his left to cause some uncertainty among the Rams and sent Clark cutting sharply to his right, and he scored.

Dick Allen
. . . on the move.

Allen Leaves Phillies Again

PHILADELPHIA, Nov. 9 (UPI).—Dick Allen is leaving the Philadelphia Phillies again, this time probably for good.

The Phillies announced yesterday they had received official notification that the controversial first baseman has declared himself a free agent. That means Allen will go through a special free-agent draft, expected to be held this week at the general managers' meeting in Palm Springs, Calif.

Allen, who had signed a 1976 contract last Sept. 2, notified the Major League Baseball Players Association Friday that he would exercise his option to become a free agent under the new players-owners agreement.

Under that agreement, a player with at least six years in the majors who did not sign a 1977 contract by last Aug. 9 can declare himself a free agent.

The 34-year-old Allen appeared in only 85 games this year, hitting .268 with 15 home runs and 49 runs batted in while suffering from a sore right shoulder that forced the team to place him on the disabled list twice.

The controversy that has followed Allen during his career surfaced again this year. He reportedly left the team without permission on at least two occasions. Phillies general manager Paul Owens and manager Danny Ozark had said that Allen would not be in a Phillies uniform next year.

Under the complex system spelled out in the players-owners agreement, if two or more teams select Allen's negotiating rights, the Phillies will receive a draft pick in the June, 1977, free-agent draft from the team which eventually signs Allen.

Allen joined the Phillies as a rookie in 1964, but was traded to the St. Louis Cardinals in 1969. He also played with Los Angeles and the Chicago White Sox before returning to Philadelphia last year. Allen has 346 career home runs.

Dolphins-Steelers Is Big Game This Weekend

By William N. Wallace

NEW YORK, Nov. 9 (NYT).—and at Pittsburgh, will be the best game in the National ootball League on Sunday.

hose teams, winners of the four Super Bowl games, have same won-lost records, 5-4, d the one that does not win on nday will be eliminated from playoffs—realistically if not thematically.

here are several teams with r backs to the wall as far as offs are concerned and the lphins are one of them. Nat ore, described by coach Don Shula as the maker of "the big play" for Miami all season, is gone because of a broken foot bone suffered in the Jets' game last Sunday.

So the Miami wide receivers will be a new pairing, Freddie Solomon and Duriel Harris, a rookie. Howard Twilley, who had paired with Moore through Miami's first seven games, was lost for the year on the Sunday before last.

Defensive Team

The Steelers, who dropped four of their first five games, have pushed their backs away from the wall thanks to the defensive players. They have not been scored on in the last 13 periods and they have not given up a touchdown in 17.

After the Steelers beat Kansas City, 45-0, the Chiefs' MacArthur Lane said, "That is about as good as I've ever seen anybody play. I'd say that might be the best defense in history."

The Dolphins cannot expect their running game to go far against Pittsburgh. So Bob Griese, who certainly can pass but prefers not to, will be throwing the football to Harris and to Solomon, a second-year pro on the sick list most of this season.

Griese said, "Freddie has the potential to be great. It's important to know what receivers will do in critical circumstances, how they react to the unexpected. With younger guys you wait longer to see how they react. Then you react to them."

Simpson's Ejection

O.J. Simpson was appalled at being thrown out of the Bills-Patriots game by Gordon McCarter, the referee, after Simpson took two wild swings at Mel Lunsford, the defensive end. Ejection was a first in football for Simpson.

He said, "The whistle had blown and two of the guys on me let me go. But this guy [Lunsford] kept me and slung me on my head. You can't allow a guy to hit me after the whistle."

Simpson thought that Lunsford, too, should have been sent to the sidelines, or better than that, both sides given offsetting personal foul penalties and no one thrown out. Lunsford was dressed and gone before reporters could reach him after the game.

When Mike Haynes returned a punt 81 yards for a Patriot touchdown, it brought to mind a play last summer in a preseason game. Haynes, a rookie, made a 71-yard return but spiked the ball at the 3-yard line thinking he was in the end zone. No touchdown. "My friends still ride me and call me 'Spike,'" Haynes said.

Sammy White, the Vikings' rookie receiver, did something similar against Detroit on Sunday. Heading for the end zone after catching a 52-yard pass from Fran Tarkenton, White held the ball aloft in one hand and Lem Barney tackled him. There was a fumble and no touchdown.

White caught six other passes, two for touchdowns. What did Bud Grant, the Minnesota coach, have to say? "He won't do that again."

Fantastic Passer

Tommy Prothro, the San Diego coach, recorded another vote for Baltimore after the Colts trounced the Chargers, 37-21. "The Colts," Prothro said, "are the best we've played and I've never been as impressed with a quarterback as I was with Bert Jones. He's a fantastic passer."

A little practice on the sidelines helped the Cardinals, another playoff contender with backs against the wall, to get by the improving Eagles, 17-14, without their injured offensive stars, Mel Gray and Terry Metcalf. The winning points came on a 20-yard field goal by Jim Bakken.

It was his fourth attempt. Poor snaps from the center, Tom Brahaney, to the holder, Roger Wehrli, ruined the first two and Bakken kicked the third way wide of the goal post. "After the third," Bakken said, "the three of us got together and practiced snaps. We got our timing and coordination and our rhythm. It takes three men to coordinate a field goal. When you make it, all three take the credit. When you miss, all three have to take the blame."

Pittsburgh Rises to the Top of College Football

United Press International.

Purdue kicker Rock Supan (No. 20) and holder Paul Beery celebrate after field goal defeated top-ranked Michigan.

Latest Surveys Drop Michigan to 4th

By Gordon S. White Jr.

NEW YORK, Nov. 9 (NYT).—Pittsburgh yesterday became the first major college football team from the Northeast to be ranked No. 1 in the nation in 17 years when the Associated Press panel of 63 sports writers and broadcasters, and the United Press International board of coaches, named the undefeated and untied Panthers to the top spot in the weekly poll.

Pitt moved up to second in the AP list after its third victory of the season and remained there behind undefeated Michigan for six weeks. Then Purdue upset Michigan, 16-14, last Saturday as Pittsburgh was beating Army, 37-7, for the Panthers' ninth triumph of the year.

Coach Johnny Majors' Pittsburgh team received 49 first-place votes and 1,226 points in the AP poll. Each of the AP electors names a list of the top 15 teams in the nation and points are based on 20 for first, 18 for second, 16 for third, 14 for fourth, 12 for fifth, then 10 to 1 points for sixth through 15th places.

Michigan dropped from first to fourth place. The University of California, Los Angeles, moved up to second and Southern California to third. UCLA, which is undefeated but once tied, received seven first-place votes and 1,093 points. The Trojans, with one loss, had two first-place votes, also, but 860 points.

Others Undefeated

Texas Tech and Maryland, the other undefeated and untied teams in the top 20, finished fifth and sixth with Georgia, Ohio State, Nebraska and Alabama filling out the AP top 10.

Rutgers, undefeated and untied and having the longest major college winning streak at 16 straight victories, was very disappointed as it failed to break into the top 20 after beating Louisville, 34-0, Saturday. The Scarlet Knights were 22d in the poll and have yet to crack the top 20 during their streak.

Pitt, which developed as a national power during Majors' four seasons there, is the first team from the East to be selected No. 1 since the undefeated and untied Syracuse team of 1959 finished as the unofficial national champion. That team, coached by Ben Schwartzwalder and led by Dave Sarette at quarterback and the late Ernie Davis at tailback, beat Texas, 23-14, in the Cotton Bowl for a perfect 11-0 season.

Davis, a sophomore in 1959, won the Heisman Trophy in 1961 as a senior. Pitt has its Heisman candidate, Tony Dorsett, who is favored to win the award as the outstanding college player of the season. Dorsett and Majors went to Pittsburgh the same year—1973. These two have had the most to do with the resurgence of the Panthers.

Dorsett has set a major college career-rushing record and many other National Collegiate Athletic Association marks in his four seasons, during which the Panthers went to the Fiesta Bowl in 1973 and the Sun Bowl last year. Pitt is sure of a trip to either the Orange, Sugar or Cotton Bowl when the invitations go out on Nov. 20.

Pitt won the national championship in the second AP poll in 1937 when it finished No. 1 with a 9-0-1 mark and with Marshal Goldberg as its star. In 1963, the Panthers finished 9-1 and third in the poll. Only three other Northeastern teams have finished No. 1 since then—Army in 1944 and 1945 and Syracuse in 1959.

The powerful and undefeated Penn State teams under coach Joe Paterno never managed to reach the top although the 1969 Nittany Lions were second and the 1968 Penn Staters were second in the UPI poll and third in the AP list. Penn State's 1973 team, possibly Paterno's best, finished fifth.

The top ten teams in the Associated Press college football poll, with first-place votes in parentheses and total points, follow.

	Pts
1. Pittsburgh (49)	1,226
2. UCLA (7)	1,093
3. So. California (2)	860
4. Michigan (2)	816
5. Texas Tech (1)	772
6. Maryland (2)	656
7. Georgia	620
8. Ohio State	541
9. Nebraska	503
10. Alabama	270

The United Press International board of coaches top 20 college football teams, with first-place votes and won-lost records in parentheses, follow:

	Pts
1. Pittsburgh (20) (9-0)	404
2. UCLA (8) (8-0-1)	373
3. So. California (2) (7-1)	286
4. Michigan (2) (8-1)	247
5. Texas Tech (7-0)	224
6. Georgia (8-1)	196
7. Maryland (8-0)	182
8. Ohio State (7-1-1)	151
9. Nebraska (7-1-1)	142
10. Missouri (6-3)	35
11. Houston (6-3)	23
12. Alabama (7-2)	18
13. Tulsa (6-3)	8
14. Oklahoma (6-2-1)	6
15. Florida (6-3)	4
16. (Tie) Iowa State (7-2)	3
Arkansas (6-1-1)	3
18. Baylor (4-2-1-1)	2
19. (Tie) Notre Dame (5-2-2)	1
Brigham Young (7-3)	1
Wyoming (7-3)	1

Note: By agreement with the American Football Coaches Association, teams on probation by the NCAA are ineligible for top 20 and national championship consideration by the UPI board of coaches. Those teams on probation this year are: Mississippi State, Michigan State, Long Beach State and Southwestern Louisiana.

Note: Southwestern Louisiana's victory over Cincinnati was ordered forfeited by the Southland Conference, but the NCAA continues to carry the loss on the Bearcats' record.

King Undergoes Surgery

LONG BEACH, Calif., Nov. 9 (UPI).—Tennis player Billie Jean King underwent knee surgery today. She is expected to be back on the courts in about six weeks, her doctor said.

Finest Start for Veteran, 37

Giacomin Is Leading NHL Goalies in Shutouts

By Parton Keese

NEW YORK, Nov. 9 (NYT).—Look who is leading the National Hockey League goalies in shutouts: that gray-haired, 12-year veteran, Ed Giacomin. He leads the Detroit Red Wings to Nassau Coliseum tonight to play the New York Islanders. A little over a year ago, Giacomin was claimed on waivers from the Rangers and now the 37-year-old goaltender is off to his finest start in 12 NHL seasons.

Sunday night in Atlanta, Giacomin gained his third shutout of this campaign, as the Wings tied the Flames, 0-0, equaling his total for the last two seasons in which he appeared in 70 games. Giacomin, with 54 career shutouts, is within two of Tony Esposito's mark for active goalies, and he holds the league's fourth-best goals-against average.

"He's still got a lot of life in him," said Billy Dea, the assistant coach of the Wings. "Eddie's been in the nets for all four of our wins."

When Giacomin and Phil Myre, Atlanta's goalie, battled to their scoreless tie, it was the first in the league since Nov. 23, 1974, when Pittsburgh and Los Angeles failed to score. It was the 139th such tie in NHL history.

Giacomin was in the nets when the Wings blanked the Islanders, 5-0, Oct. 22 in Detroit. It seemed a good possibility that he would be pitted against Glenn Resch, the Islanders' netminder, who leads the league with a 1.71 goals-against average.

Right behind Rsch in the goalie statistical race is Gerry Desjardins of Buffalo. The former Islander goalie has a 1.75 average in 10 games. Third is Ken Dryden of the Montreal Canadiens, last season's Vezina Trophy winner, whose figure is 2.21.

After Giacomin is Billy Smith of the Islanders, 2.57; Mike Palmateer of Toronto, 2.67; Gilles Gilbert of Boston, 2.71; Myre, 2.81; Rogie Vachon of Los Angeles, 2.94; Gary Simmons of Cleveland, 3.00; John Davidson of the Rangers, 3.07; Dunc Wilson of Pittsburgh, 3.09; Michel Plasse of Colorado, 3.13; Esposito, 3.14, and Bernie Parent of Philadelphia, 3.16.

Goal a Game

Although the NHL season has yet to reach the quarter mark, two high-scoring forwards are making fans think about goal-a-game records again. Steve Shutt's 16 goals in 16 games for Montreal and Don Murdoch's 15 goals in 15 games for the Rangers are the ones most responsible for that.

Maurice Richard, the Canadiens' rocket, was the last player to accomplish the feat when he scored 50 goals in a 50-game season in 1944-45. Phil Esposito, the Rangers' captain, came close in a 78-game season when he scored 76 for the Boston Bruins.

In total points, Montreal's Guy Lafleur, last season's leader, heads the list with 13 goals and 13 assists for 26 points, while Shutt is 16-9 for 25; Marcel Dionne of the Kings, 12-12 for 24, and Larry Robinson of the Canadiens, 3-20 for 23.

Toronto Trial

A Toronto court judge ruled yesterday that trials for assault charges against four Philadelphia Flyers would be held in June after the close of the NHL season.

A defense attorney argued against January dates for Don Saleski, Joe Watson, Mel Bridgman and Bob Kelly, contending that it would cause "a terrible disruption to the hockey club" and would be "punishing the team in mid-season when it should be concentrating on playing hockey."

Concentrating is what the Flyers seemingly are not doing this season, especially on the road, where they have not won in six games.

Road Schedules Are Disturbing Pro Basketball Players

By Sam Goldaper

NEW YORK, Nov. 9 (NYT).—...g plane rides, often late at ...ht, long waits at airports, ...ks at midnight and unfamil... by with visiting courts have ...de it very difficult for pro ...sketball teams to win on the ...ad. It may be even worse this ...son with the National Basket...ll Association's new format, in ...ich teams play each other only ...ur times.

...ith the season almost three ...eks old, 15 of the 22 teams are ...ying .500 or under overall. The ...lwaukee Bucks have lost all ...e road games, the Atlanta ...wks and Seattle SuperSonics ...ve each been beaten in all four ...d the Chicago Bulls and Kansas ...y Kings three each. Visiting ...ms have won 29 per cent, 27 ...ories and 65 defeats.

"Some of the losing is because ...ms are feeling their way and ...aking in new players," said ...d Auerbach, the president and ...neral manager of the Boston ...tics, who won their first four ...mes and lost the next four. ...t the big thing is the new ...hedule. It is terrible. The ...ticks and the Celtics were vio...ntly opposed to the format. It ...ds building up rivalries within ...nferences and the traveling ...ts are prohibitive."

...But more important, the wear ...d tear of the players is bad. ...ey're in Houston one night and ...ston the next. It hasn't really ...own yet, but wait until the ...ason progresses, watch the toll ...kes. The format will have ...be changed next season."

The Sonics have a 21-game winning streak at home over the last two seasons and the Trail Blazers have won 12 in a row at home.

The problem of winning on the road drew similar comment from Al Attles, the Golden State Warriors' coach, and Al Bianchi, the assistant coach of the Phoenix Suns, who have lost five of six road games.

"What disturbs me the most," Attles said, "is that we have lost three home games and this season, more than ever, it's going to be more difficult to win on the road. You just can't afford to lose at home."

Bianchi said: "Winning at home will be extra important this season, because there is going to be a lot of losing on the road."

The Knicks returned from their Western swing with two victories, three defeats and Lonnie Shelton as their center. The 6-foot, 8-inch-tall rookie from the University of Oregon earned accolades from Denver to Portland from coaches, opposing players, general managers and television viewers for his play in the last four games. In those games, he scored 62 points, grabbed 44 rebounds, blocked 19 shots and made 19 steals, 6 each against the Denver Nuggets and Kansas City Kings.

In the Knicks' 119-93 loss to the Trail Blazers Sunday night, Shelton scored 15 points, had 14 rebounds, made four steals and blocked seven shots, league high for the season in one game. His big trouble is that he fouls too much. He picked up five in each of the road games.

The Atlanta Hawks, in need of a big man for several seasons, have been getting some surprising play from Tom Barker, a fourth-round draft choice from the University of Hawaii by way of Minnesota and Southern Idaho Junior College. With Steve Hawes sidelined with a cracked shin bone and Randy Denton slowed with a back injury, the 6-11 Barker got a chance to play and responded with 89 points and 81 rebounds in the last five games. His opponents during that stretch were Tom Burleson of the SuperSonics, Bill Walton of the Trail Blazers, Artis Gilmore of the Bulls and Bob Lanier of the Detroit Pistons.

N. Ireland Expected to Top Belgium in Soccer

By Brian Glanville

LONDON, Nov. 9 (IHT).—It should not be beyond the powers of Northern Ireland to add another point to the one they bravely acquired in Rotterdam when they play in Belgium tomorrow. The Netherlands fielded a strong team against Northern Ireland, including Cruyff and Neeskens. Belgium cannot match that strength.

The revival of the Irish, after their pathetic exhibitions in the British Championship last May, can be put down to Danny Blanchflower and George Best. Blanchflower was a captain of the Irish in the 1958 World Cup, when they knocked out the Italians, then reached the quarter-finals in Sweden before being eliminated by France.

Now Blanchflower is the manager, characteristically putting the emphasis on boldness and attack, just as he did in his playing days as a right-half with Spurs and Ireland.

Best, has come back from the United States, largely mended his ways and, although some of his galvanic speed has gone, still had enough virtuosity left to match Cruyff in the game in Rotterdam. Add the busy, determined presence of such young Manchester United stars as Sammy McIlroy, David McCreery and Jimmy Nicholl, and you will see there is plenty of substantial aid.

Belgium, even if it recalls that talented and energetic ex-Bruges player, Van Gool, to play midfield—he is now with Cologne—is very much a team in transition. Like Ireland, it has changed its manager, but to less effect. It will place much reliance on François Van der Elst, who seems to be quite one of the best in Europe as an attacking right-back, a deep-lying outside-right, or simply a right-sided midfield man. He was one of the outstanding players of last May's Cupwinners Cup final in Brussels when he helped Anderlecht to beat West Ham.

Observer

Back to the World

By Russell Baker

NEW YORK—With its usual obtuseness, the world kept right on doing its things while we were all in deep political immersion here in the United States. For those interested in catching up, here are some of the things that happened:

Western Europe had a very dry summer. The Arabs did not raise the price of oil, but the price of gasoline went up anyhow, and everybody says the Arabs will raise the price of oil next month, which means the price of gasoline will go up some more. Elizabeth Taylor remarried Richard Burton, then redivorced him, began spending a great deal of time in Washington, and became engaged to be married.

Baker

Mao Tse-tung died. Mrs. Gandhi decided India could do without elections for a while longer. Big-car sales were good. The Super Bowl was played in Miami... or was it New Orleans? There was a bad earthquake somewhere and typhoons and hurricanes killed a great many people in the Philippines and Mexico.

During October an asteroid had a near-miss with the earth, passing within 750,000 miles of the blue planet. A British scientist urged astronomers everywhere not to send signals across space to advertise life on earth, lest they be picked up by hostile forces which take it in mind to plunder earth. During the summer New York City had "a gonorrhea alert." Jimmy Connors won several televised tennis matches.

* * *

The British pound was buffeted, which is the currency correspondent's way of saying it shrank to such a point that bankers were calling it "the British ounce." The Italian lira was also buffeted. There were rumors in Swiss banking circles and shady Bahamian insurance companies that both Britain and Italy were for sale, and that there were no takers.

Princess Margaret and her husband, Lord Snowdon, were separated. Carlo Gambino died nonviolently. Vietnam's attempt to enter the United Nations was blocked by the United States. John Ehrlichman and Spiro Agnew published novels and Ehrlichman subsequently entered prison. Martha Mitchell died. Rumors that the Beatles would again band together in song proved untrue. Mary Hartman had a nervous breakdown on the David Susskind show. The price of coffee soared.

* * *

In less time than it takes to dispose of the New Hampshire primary, Sweden turned out Premier Olof Palme. West Germany re-elected Chancellor Helmut Schmidt and China was outfitted with a brand new totalitarian government. Young men began wearing their hair shorter. The Egyptian President granted an exclusive interview to Barbara Walters during her first appearance as co-anchorperson on the ABC network news.

An expensive new fighter plane fell off a U.S. Navy carrier deck off Britain. Political prisoners in a wide variety of nations were tortured off and on throughout the year. In Moscow, Jewish demonstrators were put aboard a bus by plainclothes policemen, driven to woods on the edge of town and beaten up.

Almost everyone at the Bellamy household in Eaton Square was much the worse for World War I, but James had become peculiarly detestable and Hudson was simply insufferable. Something interesting appeared to be happening in Spain, but it was hard to tell what. The World Series was not canceled on account of winter, nor the ice hockey championship playoffs on account of summer, nor the basketball championship playoffs on account of irresolvable scheduling conflicts with the Olympics, tennis at Wimbledon, stock car racing at Daytona and a general public inability to remember where the Super Bowl had been played.

* * *

That was when the people of Northern Ireland and Lebanon continued shooting each other, as well as complete strangers, for intensely patriotic reasons. The telephone company applied for another rate increase. So did the monopoly which controls the supply of electricity in New York.

Exxon and Mobil undertook a number of extraordinarily difficult and expensive technological tasks all over the world for reasons which, they suggested publicly, were largely philanthropic. The wine grapes of Western Europe appeared to be the finest in many a year.

Frank Sinatra was married.

'People here are starving. Kids hit people over the head in the street to get 40 cents for a hamburger... This is going to be a beautiful family resort.'

Atlantic City—A Better Class of Decay

By Molly Ivins

ATLANTIC CITY, N.J. (NYT).—Sometimes, decaying resorts develop a certain rich, plummy, Tennessee Williams decadence. But in order to have decadence, some elegance is required.

Here in Atlantic City, people steal the quarters out of the "Help Fight Leukemia" donation cards at the checkout stands and merchants have taken to scotch-taping them in.

That said, Atlantic City was probably the pleasantest place in the country to be last week, with the possible exception of Plains, Ga.

The people make it so. The mood is euphoric and ecstatic. What happened here election night, when New Jersey voters approved casino gambling for Atlantic City, was like what happened in New York City last Fourth of July. People laughed and sang and danced in the streets. Strangers hugged one another and the whole town partied all night long.

Everyone is so friendly and smiling. "The town is naturally high," said William Ten Vrink, the chief of police.

"This whole town changed in 24 hours," said Abe Braha of the Hamilton Gallery on the Boardwalk. "If you saw it, you know the outlook is entirely different. I think property values went up by 25 per cent as soon as the vote was known."

Beautiful

"Just look out there," he added with pride, as an appropriately beautiful Atlantic Ocean rolled onto what was not, in truth, a very clean beach. "Is there anything that beautiful in Vegas?"

The initial celebration seemed almost selfless, a genuine outpouring of civic excitement. But plain old greed is already beginning to rear its head. Conversations have an eerily comic resemblance to Monopoly games. "If we buy the property on Ventnor and put up a hotel . . ."

"They'll get over it," said Chief Ten Vrink. "It's like Christmas. You always think maybe the box you're opening will have a sable in it, but it turns out to be a tablecloth. People with little dabs of property they bought for $9,000 10 years ago figure they're going to get offered a million dollars for it. We'll all calm down in a bit."

Reese Palley, who operates one of the few "class" art galleries on the Boardwalk and who is the resident eccentric, was more excited about the city's political reform than about casino gambling. For years, Atlantic City has been saddled with an anachronistic commissioner form of government and the leadership has been both leaden and corrupt. Last week the voters approved a charter revision that will give the city an elected mayor next May 1.

Dynamite

"So it's not just a new ball game, it's a whole new city," Mr. Palley said. "Well, the question is whether we can handle it, and my guess is not. I don't know of any community that's ever been given an opportunity like this, plus the capital to do it all with. The euphoria feels so good, and I'm not against it. I walked around for a day and a half in a daze myself, but it's like giving dynamite to children."

But, he added, "I suspect that both the opportunities and the responsibilities will be taken over by out-of-towners. Of course, we'll all be better off, but the really big money, the really big projects—we don't have either the capital or the planning ability here in Atlantic City."

The euphoria here is all the greater because the city's situation was desperate. Mayor Joseph Lazarow, generously bestowing credit on everyone who helped get the referendum passed, gave special praise to Sanford Weiner, a California referendum expert who was hired for $35,000 to run the $1-million promotional drive for casino gambling.

"Weiner said it all on election night," Mr. Lazarow recalled, "when he said: 'It's not just casino gambling or no casino gambling in Atlantic City, it's life or death for Atlantic City.'"

The Other Side

Behind the sleazy gimcrackery of the Boardwalk is something much grimmer; something desperate, ugly and hopeless. There one sees the Atlantic City of 50 per cent unemployment, the roving dog packs, the acres of slums that were razed and where nothing was ever built again, the broken windows and burned-out apartments.

The sourness of even these sections has been touched by hope and by a new friendliness. Blacks approach white strangers wandering there to warn them that it is not safe for them to be in that part of town at night.

On election night, Mr. Weiner also said that "the only reward I really want is for you to prove that the Council of Churches was wrong, that we can have casino gambling and a clean city." The council had opposed casino gambling for fear it would bring in organized crime, prostitution—the whole Las Vegas scene.

Family Resort

"'Las Vegas East,' we hate that term," Mr. Lazarow said. "This is going to be a beautiful family resort. People ask us about crime. We're already looking at crime. People here are starving. Kids hit people over the head in the street to get 40 cents for a hamburger. Their mothers don't work, their fathers don't work. I listen to the police radio every night. That's where we find the criminals: in the hamburger joints, eating. This is a filthy type of street crime that comes from want. If it is caught early enough, we can prevent the other kind from coming in. Prostitutes only work where they're tolerated."

Chief Ten Vrink is more realistic, saying that "we never denied it would bring in more prostitutes."

A policeman under his command said: "It'll bring in a better type of prostitute, cleaner. If ours carried brooms, you'd think a witch had crashed."

"From a law-enforcement point of view," Chief Ten Vrink said, "it will be hard. From an economic and social point of view, we just have to have it. I was born and raised here. I know. Prior to the referendum, we had the kind of crime problems that go with a decaying city. Now we'll get the kind that go with a growing city. The nice thing about having growing problems is that you get the increased tax base and the money to fight with. We're going to take it head on."

Marisa Berenson, granddaughter of designer Elsa Schiaparelli, and James Randall, whom she will marry on Nov. 21. Randall, 35, is from Texas and is, of course, a millionaire (aviation, insurance).

Frontoni/SIPA.

PEOPLE: *Sex, Civil Rights Don't Mix at Federal Level*

A woman who loses a job or pay raise for refusing to have sex with her boss cannot sue him for damages under the U.S. Civil Rights Act, a federal judge ruled Monday in Newark. U.S. District Court Judge Herbert Stern dismissed part of a suit brought by Adrienne Tompkins, 31, a Bayonne, N.J., stenographer who alleged that she was fired from Public Service Electric and Gas Co. after resisting her supervisor's advances. In his ruling, Stern said that sexual attraction is a natural part of life and that federal—as opposed to local—courts cannot become involved. He said that a man who makes sexual activity a condition of employment should be sued for extortion or charged with rape or assault.

* * *

Henry Moore, 80, was on hand Tuesday afternoon for the unveiling in Luxembourg by Queen Elisabeth of his bronze monument to a united Europe. The sculpture will be on permanent loan to the grand duchy. The British sculptor sees the donation as his way of supporting his country's membership in the European Community.

* * *

Singer Charles Aznavour was charged Tuesday with concealing income from the French income tax inspectors. He has already been charged with breaking currency exchange and customs laws. The complaint was filed in Versailles, where Aznavour has a home. He is charged with hiding over 3 million francs of income in show business revenues and real-estate profits.

29,170 * PARIS, THURSDAY, NOVEMBER 11, 1976 Established 1887

... Billion in Arms, Vehicles Left in Vietnam, U.S. Says

WASHINGTON, Nov. 10 (AP). ... North Vietnamese troops captured more than 550 U.S.-made tanks, over 1,300 artillery pieces, 1.6 million rifles and enough other military equipment to field an entire army, air force and navy, a Pentagon report showed yesterday.

The newly declassified report provided the first detailed breakdown of an estimated $5 billion in U.S.-supplied military hardware that Hanoi's forces took over when South Vietnam's government collapsed.

"A substantial amount of this equipment could be unserviceable," the Pentagon said.

"The list does not take into account the degree of damage inflicted on portions of the equipment left behind by retreating Republic of Vietnam forces during the final days."

Shortly after the fall of South Vietnam, spokesmen told Congress that they calculated about $2 billion of the $5 billion worth of military equipment taken by North Vietnam was in serviceable shape.

Military officials have said that aircraft, tanks, armored personnel carriers, ships and some other gear likely would be of value only until they needed spare parts, which would not be available from the United States.

Among the items listed were 48,000 military radios. U.S. Army, National Guard and Reserve forces are still suffering from a lack of radios.

Other Equipment

The list made public by the Pentagon includes:

A total of 550 M-48 medium tanks and M-41 light tanks, 1,200 M-113 armored personnel carriers, 1,330 howitzers and large-caliber self-propelled guns, 791,000 M-16 rifles, 857,580 other types of rifles and 15,000 machine guns.

Also included are 63,000 light anti-tank weapons, 47,000 M-79 grenade launchers, 12,000 mortars and 90,000 .45-cal. pistols.

The inventory also includes 430 UH-1 helicopters, 36 larger CH-47 Chinook helicopters, 73 F-5 fighter planes, 113 A-37 light bombers, 36 propeller-driven A-1 bombers, 90 transport planes, 212 miscellaneous aircraft, 130,000 tons of ammunition and 42,000 trucks.

Without going into details, the Pentagon list spoke of 940 naval ships and other craft. Most of these were small patrol-type vessels and river warfare craft.

Some of this hardware has been spotted by U.S. reconnaissance satellites as it was being moved into North Vietnam.

The North Vietnamese used some of the A-37 bombers in driving Cambodian Communist troops from several small islands in the Gulf of Thailand shortly after the collapse of anti-Communist forces in South Vietnam and Cambodia, intelligence officials have reported.

Associated Press.

Among things U.S. left in Vietnam: 550 M-48 tanks.

... Little progress is expected when the U.S. and Vietnam begin talks in Paris tomorrow. Story Page 2.

Tory Move Curbs U.K. Delegation To France

LONDON, Nov. 10 (Reuters).—Prime Minister James Callaghan, trying to insure his Labor government's survival in Commons, has been forced to leave behind three Cabinet ministers he had wanted to take with him to Paris for talks tomorrow with President Valéry Giscard d'Estaing, sources said today.

The three ministers' votes in Parliament could not be spared after the opposition Conservative party refused today to honor a tradition that lets ministers go abroad without a reduction of the government's effective voting strength.

The tradition involves "pairing," a system under which an opposition party pairs one of its members with the departing minister in an abstention agreement.

The Conservatives decided against pairing with the three ministers for a crucial debate scheduled for tomorrow. For the debate, on proposed nationalization of the aircraft and shipbuilding industries, the Conservatives would agree to pairing for only Mr. Callaghan and one other minister, the sources said.

This means that Mr. Callaghan must leave behind Chancellor of the Exchequer Denis Healey, Trade Secretary Edmund Dell and Agriculture Minister John Silkin. The three ministers will join the Paris talks on Friday.

Majority of One Vote

Mr. Callaghan's Labor government has an effective majority of only one in the Commons and thus is subject to strong pressure from Mrs. Margaret Thatcher's Conservative party.

Under normal circumstances, opposition parties agree to as much "pairing" as possible and this allows Cabinet ministers to go abroad on business.

The sources said that the Conservative party's refusal to pair more than Mr. Callaghan and one other minister was made known today after the government had pointed out that both it and the French government regard the summit talks tomorrow as an important beginning for a new and warmer relationship between the two countries.

The French President will have with him a host of senior ministers at the banquet that he will be giving for Mr. Callaghan tomorrow night at Rambouillet, southwest of Paris.

Meanwhile, Labor learned that it may get voting support in Commons from an unexpected source—former Conservative minister Enoch Powell.

Indicating that he might cast his future votes to help the government in its survival struggle in Commons, Mr. Powell said in a draft issue of a speech that he views continued Labor rule as preferable to a Conservative return to power.

He said he prefers Labor's policies on the economy, immigration and the European Economic Community.

Last night, the government got help from other quarters and achieved a 16-vote majority in voting in Commons on Conservative amendments designed to emasculate Labor's education bill.

The government won its 16-vote edge because minority parties' delegations, like the 11 Scottish Nationalists, had little interest in the Conservative amendments. The bill was one of five key measures that Labor wants enacted before Nov. 28, when Commons' new session will start.

Without Firing a Shot

Syrian Units Enter Beirut In Arab Peace Force Role

By James F. Clarity

BEIRUT, Nov. 10 (NYT).—Columns of Syrian tanks and combat troops entered Beirut today without firing a shot, taking up commanding positions surrounding the capital and effectively starting Syria's military occupation of virtually all of Lebanon in an effort to end its 19-month-old civil war.

The Syrian advance, which involved at least 60 heavy Soviet-made tanks, dozens of mobile artillery units and 5,000 soldiers, was made under agreements approved by the major Arab nations.

The Arab leaders, in meetings last month in Saudi Arabia and Egypt, approved the creation of a multinational Arab peace-keeping force of 30,000 men. But today the force, which is overwhelmingly dominated by the 23,000 Syrian troops already in the country, consisted only of Syrians. No new troops supposedly being sent by other Arab nations were involved and none are expected here soon.

The largely inactive Arab peace-keeping force of 2,300 that has been here since June took no part in today's operations.

Effectively, Syria today began to complete the military occupation of Lebanon it began in June, when it intervened in the civil war with troops and tanks to help rightist Christians against the leftist Moslems and Palestinians whom Damascus had previously supported.

The Syrian operation, which marked the first time the Lebanese capital has been under foreign military control since 1958, when the U.S. Marines were called in to prevent a feared coup d'état, positioned their forces at a key crossroads in East Beirut near the line separating the warring factions. The advance also placed Syrian tanks, troops and artillery on the northeast edge of the city and near the airport on the capital's southern side.

The Syrians, apparently ac-

WELCOME IN LEBANON—A smiling Christian resident of Kahale greeted advancing Syrian troops, now part of the Arab peace-keeping force taking up positions all over Lebanon, with coffee yesterday. Kahale was one of the strong points in east Beirut that was held by the Christian National Liberals of Camille Chamoun.

Levi Cites Party's Soviet Ties

FBI to Pursue Probe of U.S. Reds

By John M. Goshko

WASHINGTON, Nov. 10 (WP).—Attorney General Edward Levi has decided that the FBI can continue its 38-year-old pursuit of the Communist party, despite a reported finding that the party's activities do not fit Mr. Levi's guidelines for the conduct of domestic security investigations.

Informed sources said yesterday that a secret Justice Department review had concluded that the 4,000-member Communist Party-USA is not engaged in activities likely to result in violence—the guidelines' criterion for continuing a domestic security probe of an organization or its members.

However, the sources continued, the review did find evidence of close contact between the party and agents of the Soviet Union. On that basis, they said, Mr. Levi ruled that the FBI can continue its surveillance of the party under separate top-secret Justice Department rules for combating foreign-intelligence activities.

Mr. Levi's decision is expected to have an important impact on FBI morale. Bureau executives are known to have been concerned that an order to terminate the investigation of the Communist party would have dealt another blow to the FBI's already battered prestige.

The investigation, begun in 1938, acquired major symbolic importance in the cold war after World War II. For 30 years the Communist party has headed the list of organizations marked for the priority attention of the FBI's investigative resources. However, there have been no successful prosecutions of U.S. Communist party members since several were convicted on conspiracy charges early in the 1950s.

The late FBI director J. Edgar Hoover, perhaps seeking to portray his bureau as the ultimate guardian against Communist spies and subversives, once called the party the foremost symbol of the "Red menace" within the United States.

More recently, the party has figured prominently in relations about how Hoover's crusades against political unorthodoxy led the FBI into abusing its power through the so-called counter-intelligence program (Cointelpro) involving harassment and intimidation of alleged radicals.

These abuses led Mr. Levi last spring to issue his guidelines prohibiting domestic security investigations based on vague or arbitrary suspicions. The guidelines specified that the FBI must have evidence of actual or potential violence before probing a domestic political group's activities.

Socialist Workers

In September, Mr. Levi applied the guidelines to order a halt to the FBI's probe of the Socialist Workers party—a small Trot-

UPI.

Edward Levi

skyite political party that had been investigated by the bureau for 38 years. That probe had failed to turn up any evidence of wrongdoing by the party or its members.

Parallels between the Socialist Workers and the Communist party had led to speculation that Mr. Levi would call off the investigation of the Communists.

The bureau's most recent public description of Communist party activities says they include such things as supporting détente, "taking advantage of the present economic situation to attack capitalism publicly" and trying to influence workers through the "endeavoring to gain public recognition as a legitimate political party." All such activities are legal.

As a result, the sources said, continued surveillance of the party could be justified only if the FBI were able to offer convincing evidence that the party is closely allied to a potentially hostile foreign power and might act to further its aims.

While the Socialist Workers case was under review by Mr. Levi, the FBI is known to have offered evidence that that party had been in contact with foreign radical groups of a violent type and had contributed small amounts of money to some of those groups.

Lack of Proof

However, Mr. Levi ruled that the FBI had failed to provide proof that the foreign groups had controlled the party or had influenced it in a way that would lead the party into violent activities. Accordingly, he decided that there was no justification for continuing surveillance of the party under the Justice Department's guidelines on restricting foreign intelligence groups.

Although officials of the Communist party could not be reached for comment, the party consistently has denied that it is controlled by Moscow or has any formal ties to the Soviet Union beyond the bond of a common political ideology.

That contention, the sources said, was contradicted by evidence offered to Mr. Levi's review group by the FBI. Even though the FBI admits that since the 1960s the party has not served as a vehicle for recruiting Soviet intelligence agents, the sources said, Mr. Levi ruled that the party's alleged Soviet connections justify its investigation.

The Justice Department's guidelines for probing foreign-intelligence activity are believed to say that it includes not just the gathering and transmitting of intelligence but such other covert actions on behalf of a foreign power as the spreading of propaganda and trying to influence government officials through bribery, blackmail and recruitment.

Provided Margin in at Least 7 States

Study Says Black Vote Gave Carter Victory

WASHINGTON, Nov. 10 (AP).—Blacks gave Jimmy Carter 94 per cent of their votes in the U.S. presidential election last week and provided him with the margin of victory, a study reports.

The Joint Center for Political Studies estimated that 6.6 million blacks voted for Mr. Carter, with their votes providing the Democrat's winning margin in at least seven states.

In a survey of 500 sample precincts in 23 states, the center found that black voters gave Mr. Carter an edge over President Ford in Missouri, Pennsylvania, Ohio, Louisiana, Texas, Mississippi and Maryland. Those states have a total of 117 electoral votes. Mr. Carter's margin of victory was 27 electoral votes.

About 70 per cent of all registered blacks went to the polls in this election, compared with a turnout of less than 60 per cent in 1972, according to the center.

Support for McGovern

A 1972 survey by the center showed that 87 per cent of the blacks who voted supported the Democratic presidential candidate, Sen. George McGovern of South Dakota.

In the seven states, the center said:

- Mr. Carter received about 298,000 votes from blacks in Pennsylvania, where he defeated Mr. Ford by 123,372 votes.
- In Ohio, Mr. Carter won by 7,586 votes and received 285,000 votes from blacks.
- Mr. Ford lost Missouri to Mr. Carter by 71,510 votes; the Democrat won 135,000 black votes in that state.
- Mr. Carter won 295,000 black votes in Texas, where his margin of victory was 207,334.
- Black support for Mr. Carter in Louisiana totaled 274,000 votes and gave him a 77,153 vote edge.
- Only 11,537 votes separated Mr. Carter and Mr. Ford in Mississippi, where 135,000 black voters supported Mr. Carter.
- Mr. Carter won Maryland by 86,638 votes; blacks cast 180,000 ballots for him there.

The center describes itself as a nonpartisan group that aids public officials from minority backgrounds.

But Rejects Bilateral Israel Talks

Sadat Affirms Desire for Peace

CAIRO, Nov. 10 (UPI).—President Anwar Sadat said he will sign a peace agreement with Israel, but not through bilateral talks with the Jewish state because the "Arabs will stone me."

The Geneva Middle East peace conference, the Egyptian head of state told a visiting U.S. congressional delegation yesterday, remains the only acceptable forum for resolving the 28-year-old Arab-Israeli conflict.

Mr. Sadat also said he was looking forward to good relations with the administration of President-elect Jimmy Carter.

The 12-member delegation, from the Judiciary Committee of the House of Representatives, is in Cairo as part of a study tour of Middle East and African countries. It is led by Rep. Walter Flowers, D-Ala.

'All I Ask'

"All I ask is that Israel withdraw from the lands she occupied in 1967. Let us all sit, in Geneva, and end the state of war for the first time since 28 years in a peace agreement," Mr. Sadat said.

A delegation member asked if he could relay Mr. Sadat's thoughts to Israeli Prime Minister Yitzhak Rabin. Mr. Sadat agreed.

"Tell him that we, on the other side, are prepared for peace. But to have a lasting peace, it has to be based on sound foundations . . . it should be based on justice. I am prepared to conclude this peace, and let's hope that he too is prepared to accept the same thing," Mr. Sadat said.

But, Mr. Sadat said, any bilateral talks between Egypt and Israel were out. "I am the only man in the Arab world who can do that, but believe me, the Arabs will stone me," Mr. Sadat said.

"Over the past 28 years there have been four wars . . . hatred, blood and massacres. You cannot now ask me to sit with Rabin with all this in the background," Mr. Sadat said.

Mr. Sadat today swore in the newly formed 32-member Cabinet of Premier Mamdouh Salem.

Following the ceremony, held at the Abdin presidential palace, Mr. Sadat presided over the Cabinet's first meeting to give the ministers guidelines on their future tasks, officials said.

Blacks Unmoved, Whites Hopeful

New Effort at Geneva Talks Draws Conflicting Reactions

GENEVA, Nov. 10 (NYT).—A new effort by Ivor Richard, British chairman of the conference on the future of Rhodesia, to break the deadlock over the date for independence under black majority rule provoked sharply differing reactions from the white delegation and the four black leaders representing the nationalist cause.

After a series of separate morning meetings with Mr. Richard, who is ambassador to the United Nations, the black leaders emerged saying that there had been no progress and that they remained adamant that independence must come within 12 months of the end of the conference.

However, Pieter van der Byl, foreign minister in the white-controlled government of Prime Minister Ian Smith, said after seeing Mr. Richard in the afternoon that the conference was "looking a bit better."

Mr. van der Byl would not elaborate, but his remark was attributed to the chairman's having apparently suggested a way to outline the processes for reaching independence day without actually setting a precise date by which independence must be proclaimed.

Mr. Richard, who returned last night after a 24-hour visit to London for consultations, told reporters at the end of the day that in his meetings with the delegations some of the ground explored was "new," while some was "well worn."

The "well worn" was the rehashing of positions on date issue, which, a British spokesman later said, was "almost entirely" the subject of the chairman's private discussions with the delegation leaders.

The Rhodesian governmental delegation maintains that 23 months will be required under a projected biracial interim government to complete the constitutional and other processes for the transfer of power. Neither blacks nor whites are ready to accept formally the 15 months suggested by Britain.

It is to get away from this numbers game and on to the more fundamental question of the composition of the biracial government that Mr. Richard is seeking a formula on the date issue that both sides can accept.

Mr. Richard said that "some progress" was made today at the two-week old talks although, he said, "it is painfully slow."

Mr. van der Byl is pleased at the attempt to get away from the numbers game. His delegation has maintained that trying to fix a date for independence before knowing how the transfer of power was to be effected is to "put the cart before the horse."

Sources close to Mr. van der Byl say that it is essential to bring a "new dimension" into the

As Workers Stage Protests

Andreotti Calls for Austerity, Warns of Cutoff of Credit

From Wire Dispatches

ROME, Nov. 10.—Premier Giulio Andreotti announced a harsh austerity program today at the beginning of a parliamentary debate, warning that Italy must put its economy in order or risk a cutoff of foreign loans.

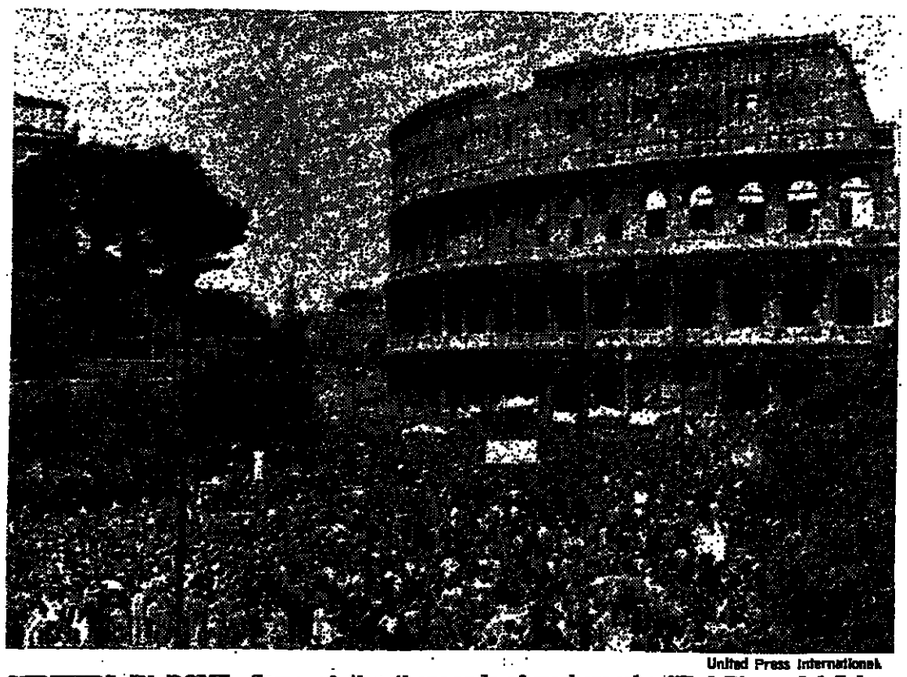
The Christian Democratic Premier said he planned to raise $5.7 billion by means of additional taxes and price hikes to meet creditors' recommendations.

"Our foreign debt has risen in three years from $7 billion to $17 billion," Mr. Andreotti said in a speech opening a three-day debate in the Chamber of Deputies.

"A debtor who is so burdened does not easily find additional credit, and we are in absolute and urgent need of credit," Mr. Andreotti said.

Meanwhile, more than a million workers in the Rome area staged token strikes against the government's austerity program.

The strikes, which are to continue in all areas of Italy over the next eight days, have little chance of influencing Mr. Andreotti as he already has a virtual guarantee that the Communist and Socialist parties will not oppose him.



Mr. Andreotti will try to raise the money by decreeing that people whose incomes are not taxed at the source (doctors, lawyers and shopkeepers) pay three-quarters of their estimated 1978 taxes next year, by raising value-added tax (on goods and services at each stage of production) and by slowing down automatic raises.

He said the two key targets of government policy were to bring government spending under control and reduce unit production costs, among the highest in the world.

The Premier said the task of reducing unit labor costs was complex, "but possible and necessary."

He said the outcome of negotiations between unions and em-

STRIKERS IN ROME—Some of the thousands of workers who filled Piazza del Colosseo yesterday to listen to a speech by union leader Giorgio Benvenuto during a walkout.

...onn Defense Head ...aken to Hospital

BONN, Nov. 10 (Reuters).—Defense Minister Georg Leber was taken to hospital today, causing a parliamentary debate on the dismissal of West Germany's two top air-force operational commanders to be posted.

A government spokesman said Mr. Leber, a central figure in the controversy, was suffering from acute abdominal inflammation.

UN Votes Sweeping Censures Of Apartheid, Israelis, West

By Peter Grose

UNITED NATIONS, Nov. 10 (NYT).—The General Assembly yesterday approved a sweeping campaign of pressure against South Africa's policy of racial separation, but significant abstentions may mar its potential impact.

Leading Western powers and Israel were condemned in resolutions as "collaborators," politically, economically and militarily, with the South African government—despite denials by these countries of such a role and despite their warnings that such linkage *would only force* their abstention from the campaign against racist policies and dissipate the strong international consensus against those policies.

Included in more concrete detail than in previous years' resolutions were recommendations for economic and financial boycotts of South Africa, a ban on sports competition with South African athletes and a call on the Security Council to enforce an arms embargo, a step that in the past has always been vetoed by Britain, France and the United States.

2-Week Debate

Votes on 10 resolutions occurred at the end of two weeks of debate on apartheid, a debate that African delegations have heralded as the centerpiece of this year's General Assembly.

The resolution condemning Israel for maintaining military and economic links with South Africa was the most controversial, producing 20 negative votes and 28 abstentions alongside 91 votes in favor. The United States and other Western governments fear that the Arab countries will attempt to use this Assembly action in their propaganda campaign against Israel, much as they did last year's condemnation of Zionism as a form of racism.

The resolution "strongly condemns the continuing and increasing collaboration by Israel with the South African racist regime as a flagrant violation of the resolutions of the United Nations and as an encouragement to the South African racist regime to persist in its criminal policies."

The United States and its traditional allies were joined by a scattering of Third World governments from all continents, including Mexico, Iran, Malawi, Swaziland, Singapore and Fiji, in opposing or abstaining on this resolution.

Israel refused to participate in any of the votes. South Africa has withdrawn from all the work of this Assembly.

One resolution called the South African government "illegitimate," having "no right to represent the people of South Africa."

Italians Face New Squeeze

(Continued from Page 1)

ployers on this question would determine the size of the government subsidy for employers' Social Security contributions, to assure the international competitiveness of Italian industry.

The only way to raise the money to do this, Mr. Andreotti declared would be to raise value added tax.

Local Assistance

He also promised action to assist local authorities, whose debts are estimated to total about $30 billion, particularly by converting short-term debts into medium-term ones.

Before he spoke thousands of workers marching through Rome to the ancient Colosseum for a protest meeting as banks, stores, buses, civil servants and teachers all went out of action at various times—and the city center became clogged with automobiles as nonstrikers tried to reach work.

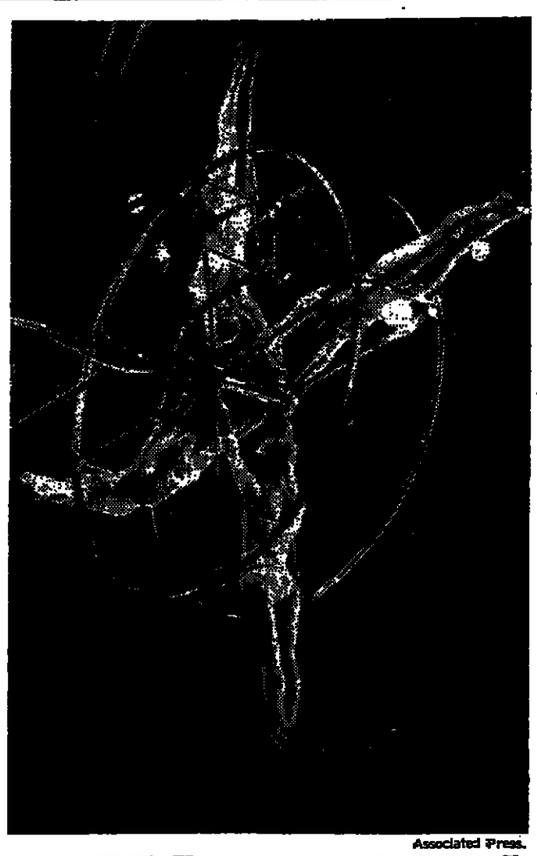
Although the Communists and Socialists are expected to abstain in the tax-bill vote, their leaders, Enrico Berlinguer and Bettino Craxi, were not scheduled to speak during the debate as a signal that full responsibility lies with the Christian Democrats.

IMF Pressures

Foreign Trade Minister Rinaldo Ossola, former director general of Italy's central bank, said recently that if the country continued on its present path, its deficits could not be financed by more foreign loans.

And the International Monetary fund (IMF) told the government that it would have to do more to brake inflation and make Italy competitive, according to Treasury Minister Gaetano Stammati.

The question now confronting Mr. Andreotti's government, the Communist party and almost everyone else is: How can this be done?



In its first austerity package, the government decided to increase the price of gasoline by 25 per cent and also order price rises for electricity, telephones, mail and other services.

It stopped a steady run on the lira by imposing a 7-per-cent tax on purchases of foreign currency and adding other credit restrictions.

But almost all sides in Italy, from the Christian Democrats to the Socialists and Communists and from industry to union leaders, have been saying publicly that more must be done.

One issue is Italy's pay escalator, which increases wages automatically every three months in line with the cost of living and has been widely blamed for adding fuel to the inflationary fires here.

But any moves to freeze or change the escalation clause, which have been urged by the IMF, are certain to run into difficulties with the unions, which regard it as their safeguard for stable incomes.

FLYING HIGH—Women acrobats of the Moscow Circus perform on "flying wheel" during show in Paris.

Syrian Troops Enter Beirut As Part of Arab Peace Force

(Continued from Page 1)

cording to plan, did not move into the heart of the city today to try to separate the armed militias facing each other across the line that divides Beirut into armed camps. The rival sides in Lebanon have killed at least 35,000 persons in a war that involves a struggle for political power, religious hatred and the presence in the country of nearly half a million Palestinians, including thousands of armed guerrillas.

Highways Control

While the Syrians have not disclosed their plan of operations, they are widely expected to move into the center of the city in the next few days to separate the militiamen opposing each other along the confrontation line. They are also expected to take control of the highways running from Beirut north to Tripoli and south to Sidon, both cities controlled by the leftist Moslem forces.

The opening of the main Beirut-Damascus highway is also expected in the next few days. In addition, Syrian forces were reportedly moving today to take control of areas in the mountains northeast and southeast of the capital that have been involved in the factional war. Another aim of the occupation is the reopening of the airport, which has been closed for five months.

Technically, the Syrian forces, as part of the so-called Arab deterrent force, are under direct command of President Elias Sarkis, who was elected in May with strong Syrian support. The forces were supposed to have white painted vehicles with troops wearing white or green helmets. Today, as Syria's 81st Brigade prepared to move down at dawn from the mountains near the town of Aley, 10 miles east of the capital, the soldiers and their equipment were the usual mottled brown camouflage color.

With the first light coming up from the mountains behind them, the brigade began to move. First, an armored car with a company of infantrymen on foot carrying machine guns and grenade launchers moved about a mile west to the town of Kahale, a rightist-Christian stronghold during the war. The Syrians found only a dozen rightist militiamen hurriedly packing their equipment to leave. With Kahale clear, the Soviet-made T-62 tanks, with their helmeted machine-gunners gripping their weapons, began grinding down the slope toward the capital.

While the Syrians were dismantling barriers and taking up positions on the edge of the city, violence flared briefly in the heart of the capital. Shelling from the rightist side of the city killed at least three persons, including the crew of an ambulance, on Hamra Street, once this city's most fashionable area, now a grubby open marketplace.

Carter Is Asked To Give Mideast Role to Kissinger

From Wire Dispatches

JERUSALEM, Nov. 10.—Sen. Abraham Ribicoff, D-Conn., recommended today that, after taking office as president, Jimmy Carter appoint Henry Kissinger as a special envoy to negotiate peace in the Middle East.

"I don't know anyone in the world who could do a better job than Secretary of State Kissinger," Sen. Ribicoff said at a news conference marking the end of a four-day visit to Israel by 13 senators. He declared that Mr. Kissinger is the only statesman in the world who has the trust of both Arab and Israeli leaders.

Sen. Ribicoff said he was airing the proposal for the first time. Six other senators at the news conference said his idea "has merit."

The 13 senators came here to check on safeguards against possible conversion to military use of two nuclear reactors promised to Israel. A government spokesman said that Israel has been giving them all the information they want despite a ban that keeps them, like other foreigners, from visiting the secret nuclear p'ant in Dimona.

Sen. Howard Cannon, D-Nev., agreed, saying: "We can get all the information we need without going to Dimona." But Sen. Robert Griffin, R-Mich., said: "I'm disappointed . . . We will continue to gather information and draw conclusions later on." The senators leave tomorrow for similar fact-finding visits to Egypt and Iran.

Egypt Hangs Two For '75 Coup Bid

CAIRO, Nov. 10 (AP).—Saleh Sarreya, a Palestinian, and Hassan Anadoly, an Egyptian, were hanged yesterday for leading a coup attempt against the regime of President Anwar Sadat in April of last year, the newspaper Al Ahram reported today.

Their group's attack on a military college here killed 11 persons and injured 27. The prosecution said in court that they planned to arrest President Sadat and change the Egyptian Constitution. Other defendants received prison terms.

Another Palestinian, Salah Amry, was sentenced today to death for taking part in an attempt to assassinate former South Yemen Premier Mohammed Ali Haitham in Cairo in August. Saleh Issa, head of the South Yemen Airlines office here, was sentenced to life imprisonment. South Yemen Consul Mohsen Hussein was freed on grounds of diplomatic immunity.

Coup Leader Named Burundi President

BUJUMBURA, Nov. 10 (Reuters).—Lt. Col. Jean-Baptiste Bagaza, who seized control of Burundi in a bloodless coup 10 days ago, has been appointed President of the country.

The move was announced last night in a communiqué issued by the 30-member Supreme Revolutionary Council.

50 From Vietnam Reach Australia After 2-Month Sail

DARWIN, Australia, Nov. 10 (Reuters).—A group of 50 Vietnamese refugees has arrived in Australia on a 35-foot fishing boat which they sailed for two months over 2,000 miles to escape Communist rule. The boat was equipped with a small diesel motor.

The 18 men, 13 women and 19 children have been granted temporary entry visas. En route here, the group made four stops—in Singapore, Jakarta, Bali and Western Timor.

The only English-speaking member of the group, Vu Ba Van, told newsmen that before their departure late in September from Vung Tau, Vietnam, "We kept the trip secret. We had to. If anyone had told the Communist security forces that we were leaving, it would have been the end of our lives."

Mr. Van, 28, said that among the features of life in South Vietnam since the Communist takeover 18 months ago are tight restrictions on hiring practices, a rise in unemployment, high inflation and low wages.

Exodus Via Thailand

BANGKOK, Nov. 10 (AP).—A total of 33,489 Indochinese refugees have left Thailand to settle in 17 different nations since the fall of Cambodia, Vietnam and Laos, a representative of the UN High Commission for Refugees said today.

176th SALT Meeting

GENEVA, Nov. 10 (UPI).—U.S. and Soviet negotiators at the Strategic Arms Limitation Talks today held a 45-minute meeting, the 176th of the second and current round of the talks which began Nov. 21, 1972.

As Greece, Spain, Portugal Seek Entry

EEC Officials Fear Expansion May Slow Unity

By William Drozdiak

BRUSSELS, Nov. 10 (WP).—The prospect of incorporating Greece, Spain and Portugal into the European Economic Community by the early 1980s has provoked concern here about the political and economic limits of the Common Market and its long-sputtering crusade for European unity.

Most EEC officials want to anchor the three fragile democracies to the Common Market, but an increasing number wonder how the community can absorb poor south European countries when *only one member, West Germany,* displays solid signs of an economic upturn. Others, notably Britain and Italy, linger in the doldrums.

Greece plans to become the EEC's 10th member in 1981. Portugal is expected to submit a request for membership late next month after a tour of European capitals by Premier Mario Soares, and Spain will probably follow suit after parliamentary elections next year.

"We can't really turn them down if they fulfill the conditions of democracy," a high official in the Common Market Commission said. "But with 12 countries instead of nine, what happens to further European integration? All bets for economic and monetary union will certainly be off."

Other Problems

Other Commission officials say that any dreams of early European unity had already been shattered by the 1973 accession of Britain, Ireland and Denmark, as well as the undermining of European prosperity by the energy crisis and world recession.

Some feel that the "cold shower" of Greece, Portugal and Spain joining the community as a bloc would prod reform of the Common Market's decision-making machinery. At present, any EEC decision requires unanimous approval by all nine governments.

The Greek government has firmly rejected a merger of its candidacy with those of the Iberian countries and has accelerated membership talks to avoid being forced into group negotiations.

Top market officials admit, however, that they "cannot exclude the possibility" of bloc entry, particularly since the three countries suffer similar economic woes deriving from poor farm productivity and immature industries.

"We have to be careful," an official said. "We already know that we can't offer Greece something we would refuse to give Portugal or Spain."

Financial Strains

Looking past the tortuous negotiations, some Commission officials fear that the financial strains of expansion could stretch the community beyond the breaking point.

"Nobody has figured out how much enlargement will actually cost," another market official said. "Member governments have thought mainly about political considerations."

Ostensibly, the motive for the intensive membership campaign waged by Greek Premier Constantine Caramanlis is to link Greece irrevocably to Western Europe, thus solidifying its nascent democracy and reducing chances of another coup d'état like the one that produced the 1967-74 colonels' dictatorship.

Rough Commission estimates indicate that Greece should gain up to $300 million a year from various subsidies granted by the Common Market's social, regional and farm funds. Spain and Portugal would also profit from community assistance, meaning a heavier aid burden for such wealthy countries as West Germany, the Netherlands and Denmark. The new outlays would also reduce the amount of EEC funds available to aid Britain and Italy.

Many analysts believe that a 12-nation Common Market would face a dilemma—whether to engage in massive capital transfers from rich to poor community countries, diluting the wealth of the Common Market but providing greater economic balance, or to continue pursuing largely national economy policies that would probably widen the chasm separating the Benelux countries, West Germany and Denmark from Britain, Ireland and the Mediterranean members.

Serious Negotiations

Casting aside the cautious stance of the Commission, which favors putting off further expansion until the Common Market recovers economic equilibrium, EEC foreign ministers overruled a Commission proposal last February to delay Greece's bid for membership. Negotiations began in earnest in September.

Last year, EEC heads of state approved the granting of about $200 million in financial aid to Portugal to help its troubled transition to democracy. Mr. Soares, whose Socialist party received crucial support from West European Social Democrats to stave off the challenge of Portuguese Communists, is expected to be greeted warmly when he visits Common Market capital this winter.

EEC governments have assumed a wait-and-see attitude toward Spain and its struggle to mold democratic institutions. But it appears probable that after free elections for a new national parliament next year, Spain's request for membership would be accepted.

Police Directed to Insure Order

Spain Said Set to Curb Strike Tomorrow

MADRID, Nov. 10 (UPI).—Government sources warned today that police will act with "utmost energy and firmness" to maintain public order during a one-day, nationwide general strike called for Friday. They said police have been ordered to arrest all strike pickets.

The strike is part of a "day of struggle" proclaimed by Communist and Socialist labor groups to press for a monthly raise of 6,000 pesetas ($85) for all Spanish workers and the scrapping of an economic austerity program announced by the government last month.

The warning followed a meeting yesterday of the Public Order Council, a coordinating body consisting of Interior Minister Rodolfo Martin Villa and the commanders of the various police forces.

The "day of struggle" is backed by the Platform of Democratic Organizations, an alliance grouping most of Spain's left-of-center political parties, labor and regional groups. Friday's program is opposed by Christian Democrats, liberals and other moderate parties.

Government sources said they expect the strike to be only partly effective.

Some labor groups in the autonomy-minded Basque and Catalonian regions have said that they will not join the walkout because it was called by labor leaders in Madrid who did not consult regional organizations.

Police last night fired rubber bullets to scatter hundreds of demonstrators in the town of Reocin in the northern Asturias Province, injuring an unknown number. They arrested several persons.

The demonstrators were marching to a pit where 214 coal miners have been staging a sit-in at the bottom of a 650-foot-deep shaft to press demands for a pay hike and the nationalization of the mining company.

In Madrid, meanwhile, the rightist, 500,000-member Confederation of Civil War Veterans asked the government to authorize a memorial rally in the Plaza de Oriente on Nov. 20, the first anniversary of Generalissimo Francisco Franco's death. Government sources said the rally might be allowed. The official memorial service will be at Franco's tomb, outside Madrid.

World Group's Backing

BRUSSELS, Nov. 10 (AP).—The International Confederation of Free Trade Unions today announced its support of Spanish labor's general strike call.

The ICFTU, the world's largest non-Communist labor group, said the strike Friday will be a expression of the Spanish workers' desire to break with the government-controlled trade unions and to establish genuinely democratic organizations.

Policeman Jailed

EL FERROL, Spain, Nov. (Reuters).—A captain of Spain paramilitary Civil Guard police force was sentenced to a milita prison here today for failing act against an anti-governme demonstration, legal sources sa

Capt. Luis Alonso, commanding of the Civil Guard barracks the Basque town of Tolosa, w charged by the army last mon with indiscipline, and was orde to serve a two-month jail te

The charges stemmed from decision not to break up a ban Basque nationalist demonstrati in Tolosa on Sept. 27, the sour said. The Tolosa City Cou later resigned to protest charges against Capt. Alonso.

Polisario Claim

ALGIERS, Nov. 10 (UPI).—The Polisario front movem said today its troops killed Moroccan soldiers in attacks Moroccan positions in the form Spanish Sahara last week.

HITLER'S PLANE—Martin Caldin with the 1935 Junkers tri-motor he found rotting on an airstrip in Ecuador and had restored in Miami. Plane once belonged to Hitler.

Opening in Paris Tomorrow

Little Progress Expected in U.S.-Hanoi Talk

WASHINGTON, Nov. 10 (AP).—The United States and Vietnam are opening talks on the prospects for friendly relations, but U.S. officials say that substantive progress is doubtful.

The talks will begin Friday at an undisclosed site in Paris. The U.S. delegation will be headed by the deputy chief of mission of the U.S. Embassy in France, Samuel Gammon. Tran Haon, the second-ranking official of the Vietnamese Embassy, will head the Hanoi delegation.

"We're going to be hard-nosed but not belligerent," a U.S. official said yesterday. "It's not going to be a friendly meeting."

The talks will be the first between the two countries since the Vietnam peace agreement was signed in 1973.

The procedure will include the reading by each side of a prepared statement with no spontaneous exchanges.

The United States wants an accounting of the 800 U.S. servicemen still listed as missing in action in the Vietnam war and has made this a precondition for progress toward normalized relations.

Peaceful Role

U.S. interests go beyond seeking an accounting of missing men. Officials believe that the possibility for a peaceful Vietnamese role in Southeast Asia will increase if Hanoi has a stake in friendly relations with the West through diplomatic trade and economic ties.

It is understood that the State Department will keep representatives of President-elect Jimmy Carter appraised of developments in Paris. Officials say that any major decisions on relations with Vietnam must await the installation of the Carter administration in January.

They say that Hanoi is likely to assume a similar strategy.

On the same day the Paris talks open, the United Nations will take up the Vietnamese application for admission, according to Vietnamese officials, who expect a vote to be taken in the Security Council Monday.

Application Veto

President Ford and Mr. Carter agree that the United States should veto the Vietnamese application in the absence of an accounting for missing U.S. servicemen.

Officials say that they do not expect any developments in the Paris talks Friday that would preclude a U.S. veto in the Security Council next week.

Vietnam's chief interest in opening talks with the United States is obtaining war reconstruction aid, which Washington promised in the 1973 peace agreement. But the Ford administration retreated from that pledge after Hanoi's invasion and conquest of South Vietnam months ago.

The two countries have been exchanging notes on the possibility of opening talks since April and have been haggling over the date for the last month.

Dissident Angolan Guerrillas Reported Retreating to East

OSHAKATI, South-West Africa, Nov. 10 (Reuters).—Dissident Angolan guerrillas locked in fierce fighting with Angolan government and Cuban forces for the last five days are trying to retreat into the bush to escape their opponents' superior firepower, South African officials here said today.

Refugees fleeing across the border into South-West Africa from the battle zones said the Angolan government wanted to crush dissident forces in southern Angola by tomorrow, the first anniversary of the country's independence from Portugal.

The South African officials said the guerrillas of the Union for Total Independence of Angola (UNITA) had begun their withdrawal in the face of the pro-government armor and artillery.

Observers said the UNITA troops would probably try to withdraw to the east and the thick bush near the Caprivi strip and the Zambian border. From there the guerrillas, who are led by Jonas Savimbi, would try to continue their hit-and-run war against the Angolan government, the observers added.

The South African officials said fighting continued today as UNITA groups launched determined rear-guard actions against forces made up of Cuban and Angolan troops and South-West Africa People's Organization (SWAPO) guerrillas.

Refugees told reporters that the pro-government forces were using scorched-earth tactics, destroying crops and livestock in a wide area of southern Angola.

Some 3,000 refugees have crossed into South-West Africa in the last few days, but officials said the flow now has virtually stopped.

Those who did arrive said the government forces were trying to seal off the border to stop the exodus. The refugees reported that people were being shot as they tried to climb the border fence with the bodies being buried in a mass grave about a mile inside Angola.

Since the beginning of the year some 8,000 refugees have sought refuge here, mostly old women and children.

South Africans fear that if the UNITA forces were routed Angola would repay SWAPO for its help against UNITA by assisting with bases and military support in its South-West Africa (Namibia) guerrilla war.

Even Foes Saying His Mark Indelible

Can State Dept. Forget Kissinger?

By Bernard Gwertzman

WASHINGTON, Nov. 10 (NYT). —Henry Kissinger's departure as secretary of state next Jan. 20 has already begun evoking nostalgia at the State Department, where he has ruled for the last three years like a stern but respected schoolmaster.

"You wonder who will replace him and you wonder if the place will ever be the same again," a senior assistant said the other day.

Mr. Kissinger was not loved by the 12,000 in the department and overseas and he was not in love with the bureaucracy either. But now, with little more than two months to go in office, even his detractors are saying that, with his flair for the dramatic, his demanding criteria for excellence and his ability to appoint good men to important jobs, he has left a mark on Foggy Bottom that will never be erased.

Jimmy Carter's victory has already caused a problem for virtually every foreign embassy here, whether it liked the Ford administration's policy toward its government or not, at least each embassy knew what it was and had grown accustomed to it.

Carter Policy

Now, the ambassadors and senior diplomats have come under pressure from their governments to report whether Mr. Carter will alter U.S. foreign policy toward them and their regions.

Several ambassadors have discreetly asked for appointments with Mr. Carter but, so far, he has refused to meet with any foreign representatives. An ambassador pressed by his government for a clarification of Mr. Carter's policies flew last week to Athens, Ga., to consult with Dean Rusk, the former secretary of state, who has been a personal adviser to Mr. Carter on foreign affairs. Mr. Rusk was able to say that he did not expect any dramatic changes in foreign policy once Mr. Carter took office.

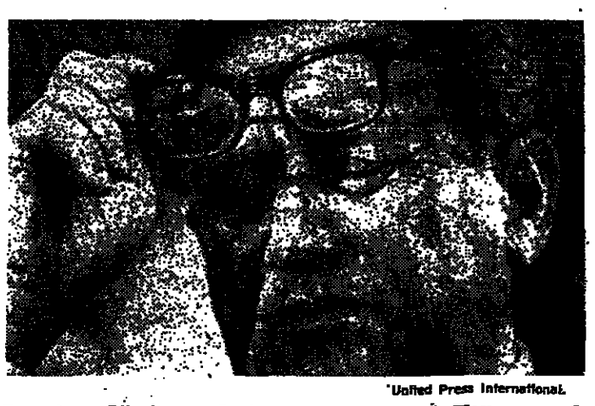
Mr. Rusk, who served for eight years as secretary, has declared firmly that he would not return to Washington.

Mr. Kissinger, who appears to enjoy teasing his aides and reporters about his future, has so far kept his plans to himself. Everyone expects him to sign a fat book contract and begin writing his own history of the foreign policy of the Nixon-Ford years.

Last week, however, Mr. Kissinger was his usual bantering self when he ran into reporters. Coming out of a party at the Soviet Embassy marking the 59th anniversary of the Bolshevik Revolution, he said, "I'm being considered for chief of protocol."

Early Name

One of the early names on everyone's speculative list for the job of secretary of state was George Ball, who was under secretary for Mr. Rusk for several years and who has been one of the leading critics of this administration's foreign policy.



But Mr. Ball's name was dropped from consideration because his views on a Middle East settlement ran afoul of U.S. Jewish leaders who say that they told Mr. Carter's advisers last summer of their opposition to him. It is, of course, possible that Mr. Carter will personally revive Mr. Ball's name, but this is doubtful.

In the next few weeks, messages will go out to all the 120-odd U.S. ambassadors around the world reminding them that they will be expected to submit their resignations to Mr. Carter so that he can, if he wishes, replace them with his own men. Likewise, the presidential appointees in the department, who include all the assistant secretaries in charge of regional bureaus, must offer to resign also.

The ambassadors are predominantly career officers, with about 30 per cent political. Two of the politicals have already asked for their resignations to be accepted immediately by Mr. Ford: Richard Helms, the former director of Central Intelligence, now ambassador to Iran, and William Saxbe, the former attorney general and Ohio senator, now ambassador to India.

The acid test of Mr. Carter's approach to foreign affairs in the view of many Foreign Service officers will be if he keeps to his campaign pledge to appoint professionals to key posts. It has been suggested that the term "professional" in Mr. Carter's interpretation may be more inclusive than that usually meant in Washington.

Usually, a professional appointee means someone currently in the Foreign Service, but Mr. Carter might widen it to include academics and businessmen and former officers who have competence in the field.

Ford Advisory Group Urges Pay Raise for Federal Aides

By Warren Brown

WASHINGTON, Nov. 10 (WP). —The chairman of the President's Advisory Committee on Federal Pay called yesterday for an immediate 50-per-cent increase in salaries paid to career federal executives who now receive a maximum of $39,000 yearly.

Jerome Rosow, the committee chairman, also said that the present $63,000 annual salary for Cabinet members should be raised to $100,000 a year and that the President's $200,000 annual salary should be increased by an "adequate" amount.

Mr. Rosow made his recommendations to the Commission on Executive, Judicial and Legislative Pay, which meets every four years to recommend to the President salary changes for top government officials. The commission is holding two days of public hearings on executive salaries.

Mr. Rosow was one of 13 persons to testify yesterday before the commission. He said that the pay changes he recommended were needed to halt the flow of top government officials to private industry.

Effect on Quality

Management officials in the executive, legislative and judicial branches are leaving because they have had only one 5-percent pay raise since 1969, Mr. Rosow said. As a result, pay scales for ranking government officials have fallen so far behind those for their counterparts in private business that "direct financial comparisons are becoming meaningless," Mr. Rosow said.

"Any comparison with private-sector executives dwarfs federal executive pay," said Mr. Rosow. "This unfavorable comparison must have an effect upon the quality, service and motivation of federal political appointees which is adverse to the needs of the nation," he said.

Mr. Rosow made the point that fringe benefits for career jobs in government—federal motor pools and other privileges, especially in overseas posts—cannot be directly compared with those in the private sector—stock options and bonuses, for instance. He said that for this reason he limited his comparison to annual salaries.

The 12 other witnesses—while not making specific suggestions—agreed that executive salaries must be raised in order to attract top talent to government service.

"I would not have any difficulty getting presidential appointees," said Robert Hampton, chairman of the Civil Service Commission. "But, with the present salary levels, I would have problems getting the right presidential appointee," he told the nine-member panel.

Mr. Hampton said that the belief that talented and experienced persons are willing to give up lucrative private jobs to enter lower-paying government service because of "psychic rewards" is "a lot of bunk."

He said that the reality is that the government "has been gutted of its top career managers in the last three or four years to the degree that we have been looking at [for recruitment] much younger people who are capable, but who do not have the type of experience that is essential for these jobs."

The affected jobs are those ranging from GS-15, or middle management, to GS-18, the top rung of the federal career ladder, Mr. Hampton said. Also affected is a category of mostly low-level presidential appointees, he said.

Seoul Trial Date

SEOUL, Nov. 10 (AP).—The Seoul appellate court said last weekend that it will start a trial of 18 prominent dissidents on Saturday.

Some Recounts Not Covered by Law

The Electoral College: A New Flaw Cited

By Warren Weaver Jr.

WASHINGTON, Nov. 10 (NYT). —If national elections get any closer than the one held last week, the country may face an interregnum of political confusion and uncertainty because more than half the states have no specific machinery for recounting a presidential vote.

A study by the Library of Congress has found that only 16 states have laws that provide for recounting the vote cast for presidential electors, as opposed to candidates for federal, state or local office.

Under federal law, the result of a presidential election's recount in a state "shall be conclusive and shall govern in the counting of the electoral votes as provided in the Constitution," but only if that state has provided a system for such a recount and conducted it promptly after the election.

As a result, a recount in a state with no law covering the presidential election would not be binding, and an attempt to cast that state's vote for the winner of the recount or for his opponent would be subject to court challenge and inevitable delay.

Legal Tangle

If recounts of this kind took place in one or more states with large electoral votes, the identity of the next president could remain unknown for weeks or months while the courts attempted to resolve the legal tangle.

This is only one of the problems posed by retention of the imprecise Electoral College system as a basis for deciding presidential elections. Among others are:

• The possibility that a presidential candidate, while receiving fewer votes than a rival, would be elected because he carried by narrow margins some states having large electoral votes and thus frustrated the apparent will of the electorate.

This has happened three times in history, most recently in 1888. It could have happened this year with a shift of fewer than 10,000 votes in two states, giving President Ford the victory despite the fact that he would still have run more than 1.5 million votes behind Jimmy Carter.

• The fact that the electors of any state, once chosen by the voters, are under no legal obligation to cast their votes for the candidate under whose banner they ran. In 1972, one Republican elector voted for the Libertarian candidate and in 1968 one voted for the American party nominee.

In the wake of the close 1968 election, a campaign to abolish the Electoral College, thus solving all these problems, was pressed in Congress. A proposed constitutional amendment carried the House easily but stalled in the Senate. Its chief sponsor, Sen. Birch Bayh, D-Ind., has promised to renew the effort, in the next Congress.

The 16 states with laws establishing machinery to recount the popular vote for presidential electors are: Colorado, Connecticut, Delaware, Iowa, Kansas, Maine, Massachusetts, Michigan, Missouri, Nevada, North Dakota, Pennsylvania, South Dakota, Tennessee, Texas and Virginia.

Four states—Alabama, Louisiana, Vermont and West Virginia—have recount laws that are specified as being inapplicable to the contest for presidential electors.

The 30 other states have general recount statutes that do not mention electors and thus would be of doubtful effectiveness in providing the "conclusive" result called for by the federal law.

Federal Deadline

Another problem involves the fact that most state recount laws do not conform to the federal requirement that the final outcome of the election must be determined six days before the electors officially meet. That meeting is scheduled by law for the first Monday after the second Wednesday in December, this year Dec. 13.

The Iowa statute conforms precisely. The Connecticut and Tennessee laws require action by the end of November, which would always come within the federal schedule. Three other states—Texas, Delaware and Kansas—allow state recount decisions too late to conform to the federal law.

In the 1960 presidential election, a court-ordered recount in Hawaii shifted the state's three electoral votes from Richard Nixon to John Kennedy, well after the electors had met, but the move attracted little attention or controversy because it did not affect the outcome of the election.

'Legion Disease' Puts Hotel Out of Business

PHILADELPHIA, Nov. 10 (UPI).—The famed Bellevue-Stratford Hotel said today that it will go out of business a week from tomorrow because of bad publicity associated with the mysterious "Legionnaires' disease," which killed 29 visitors last summer.

William Chadwick, vice-president and managing director of the 72-year-old hotel, said at a news conference, "The continuing public reports linking the hotel to reports of the illness have been ruinous to its business."

Urged Investigation

Laird Says He Warned in '70 Of S. Korean Lobby in U.S.

By Richard Halloran

WASHINGTON, Nov. 10 (NYT). —Former Secretary of Defense Melvin Laird said yesterday that he had warned the State Department in 1970 to be careful of a covert South Korean lobby and had suggested to the department that the Justice Department should be asked to investigate the legality of the operation.

Mr. Laird also asserted that a wide-ranging Korean lobby had improperly tried to undermine a 1970 decision by the Nixon administration to withdraw 20,000 of 60,000 U.S. soldiers then stationed in Korea.

In a telephone interview here, he said that he had warned the South Koreans that their lobby was acting improperly and was jeopardizing a U.S. plan to spend $1.7 billion to modernize South Korea's armed forces.

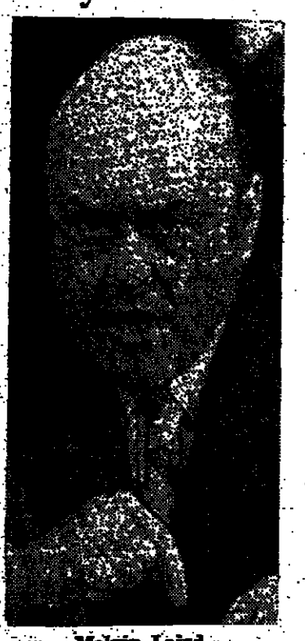
Mr. Laird's comments were the first from a senior U.S. political leader acknowledging the existence of the covert Korean lobby and scrutinizing it publicly. Other officials have commented on the lobby, but without allowing attribution.

To Counter Decision

Mr. Laird, also confirmed reports that Korean and U.S. officials lobbying efforts in 1970 in an attempt to reverse the decision to withdraw troops and that its primary objectives was to influence congressional policy.

Now senior counselor for national and international affairs for the Reader's Digest Association, Mr. Laird said that the Korean lobby covered a broad spectrum. He agreed that it included the activities of Park Tong Sun, a Korean businessman who is suspected of having bribed members of Congress; agents of the Korean Central Intelligence Agency posing as diplomats; questionable actions by Korean diplomats and similar actions that were reported in recent news accounts. Park Tong Sun is known in the United States as Tongsun Park.

Although he suggested a Justice Department investigation in 1970, it was not until 1973 that the FBI began inquiring into the actions of the Korean lobby and not until last year that the investigation picked up speed.



State Department officials said recently that "bureaucratic lethargy," not a deliberate cover-up, was presumably responsible for the delay in the investigation. A Department of Justice spokesman declined to comment.

The Justice Department is presenting evidence to a federal grand jury that could lead to indictments of congressmen for accepting bribes and other persons for violation of laws that require unofficial foreign agents to register with the Justice Department. Mr. Laird said that "the Koreans tried to get people stirred up in Congress to reverse the decision" on troop withdrawal. He added, "I got a little sore a couple of times with the lobbying that was going on."

"My resentment and my concern was that they were going against something we had decided was the policy of the U.S. government" in an attempt to bypass the administration and go directly to Congress, he said.

In Los Angeles, former Rep. Richard Hanna says that while he was still a Democratic member of Congress from California he became a silent partner of Mr. Park in an import-export venture that brought him $60,000 to $70,000 over three years.

Mr. Hanna said that he did not believe there was anything illegal about his relationship with Mr. Park. But he said that in the years following the 1971 agreement, he became "uncomfortable" about the propriety of the partnership. "There came a time when I recognized this was not so good," he said.

Melvin Laird

Mr. Hanna's relationship with Mr. Park is being investigated by the Justice Department.

Mr. Hanna said that he realized that his business relationship with Mr. Park "raised the specter" of conflict of interest because the import-export concern dealt in federally subsidized rice, among other commodities.

Doles Rest in Rio

RIO DE JANEIRO, Nov. 10 (AP).—Sen. and Mrs. Robert Dole are here for "rest, sun and sightseeing" following the senator's defeat as President Ford's running mate.

2 Boys Held in Killing Of D.C. Embassy Aide

WASHINGTON, Nov. 10 (Reuters).—Two teen-age schoolboys have been arrested and charged with the murder of a Soviet Embassy aide early last month, the police said today.

Sergeo Stepanov, a 54-year-old maintenace man at the embassy, was shot and robbed outside a grocery store on Oct. 2. He died from his wounds three weeks later. The names of the youths, aged 16 and 17, have not been released because they are minors.

Seeing to your safety

Passengers boarding flights at busy airports may wonder why their carry-on baggage is no longer opened and searched for contraband. The reason is probably because a Philips Dynafluor IV inspection system is being used to improve airport security control.
Developed from Philips long association with X-ray and television technology, Dynafluor IV is a high-definition X-ray fluoroscope that projects an image of the entire baggage contents for examination on a TV monitor.
It is extremely efficient; a trained operator can thoroughly inspect up to 1200 bags per hour on a continuously moving conveyor belt, and there is absolutely no danger of radiation to either baggage content or personnel. In fact, leakage radiation is less than the earth's background radiation level.
Dynafluor IV is one of a number of X-ray inspection systems developed by Philips for security control at airports, postal depots - any place, in fact, where an innocent looking package may well conceal a danger to public safety.
Whether on land, sea, or in the air, you will find Philips technology working in the interest of public safety. Baggage and parcel inspection is one example. Here are some others.

1 Security for Metro passengers. The new Paris Metro stations of Etoile and Défense are equipped with extensive closed-circuit television networks to maintain optimum train and passenger flow. Platforms, escalators, turnstiles, in fact, all strategic positions are under constant TV surveillance from a central control room at each station. The controller can check that all train doors are closed before signalling departure, direct passengers to non-congested escalators and perform routine surveillance. Passenger announcements can be made via a built-in Public Address system and an H.F. telephone system provides contact with train drivers. The majority of the installations were supplied by Philips.

2 Telephone pillars of Philips roadside communication system are becoming a familiar sight along highways the world over. Positioned at strategic intervals along the roadside, they enable emergency calls for assistance to be acted on immediately. The system is 2-way, so caller and operator can converse freely, and automatic indication of the caller's location enables the operator to direct the appropriate rescue service to the precise point of emergency. The flexibility of Philips roadside communication system enables networks to be designed to suit virtually every traffic-density condition.

3 Safety under the Elbe. Peak-period traffic routing in the new Elbe Tunnel at Hamburg is performed by lines of light embedded in the road surface. The number of lanes in either direction can be changed to suit traffic conditions, the light lines serving to direct incoming traffic and to indicate lane boundaries. Glare is avoided by regulating the light intensity to suit day or night driving conditions. The Elbe Tunnel light guidance installation is the first of its type in Europe and, together with the associated high-mast and catenary lighting installations, was supplied by Philips.

If you would like to know more about the scope of our activities, mail the coupon; or write to Philips Industries, GAD-EMB-2/room 16, Eindhoven, Holland.

Facetious Fund-Raising to Fight Cancer

Pauling Offers Malignant Mice for $138

By Wilham Chapman

WASHINGTON, Nov. 10 (WP). —It won't appeal to just anyone, and in fact the idea is slightly frivolous, but for a mere $138 you can buy a cancerous mouse—from Dr. Linus Pauling, no less.

Dr. Pauling hit on this ingenious, if somewhat chilling, gimmick in pursuit of funds for his Institute of Science and Medicine in Menlo Park, Calif. His brainstorm was transformed into an advertisement in the Wall Street Journal that begins with this eye-catching headline: "For sale —one thousand mice with malignant cancer—$138 each."

If the offer is not exactly serious, the intent is. The two-time Nobel Prize-winner has been trying for years to get funding for his research into the possibility that vitamin C can be used to fight cancer.

The government, which doles out some $600 million annually in the war on cancer, takes a dim view of this theory and regularly rejects his grant applications at the National Cancer Institute.

To make ends meet, Dr. Pauling

NYT.

Linus Pauling

has embarked on a private fund-raising campaign and hit on the idea of selling, mostly facetiously, the malignant mice he uses in experiments at the Menlo Park laboratory.

According to Richard Hicks, the institute's executive vice-president, it costs about $138 to buy and care for a mouse and to induce malignancy by exposing it to ultraviolet rays.

Mr. Hicks hastens to add that no donor has actually requested the proferred prize and that the institute does not really expect to be mailing out the mice. But if it helps raise money, he assures us, the promise of the ad will be kept.

"Every year, we ask them [the National Cancer Institute] for some support and every year we're turned down," Mr. Hicks said. "We think that some of this money should go for the research on methods other than the traditional ones like chemotherapy and radiation.

"Dr. Pauling feels that with the proper amount of nutrients to treat cancer, the deaths from cancer in this country could be reduced from 20 per cent of all deaths to 2 per cent."

Research Project

As promising evidence, he points to a recent research project which, he says, suggests that vitamin C—or ascorbic acid—extends the life of patients afflicted with cases of terminal cancer.

The testing was done in Scotland on 1,100 patients. Those who received 10 grams of ascorbic acid lived 4.2 times as long as those who were not given any.

"Those who were given it," Mr. Hicks said, "not only increased their longevity but their appetites returned and they experienced enhanced feelings of well-being."

At the Menlo Park institute, he added, Dr. Pauling and his associates also are discovering that quantities of vitamin C and other nutrients are helpful to mice afflicted with skin cancer.

Why won't the government grant-dispensers lend assistance?

"My guess," Mr. Hicks says, "is that they are used to doing only the traditional things, that they feel safest doing things in a traditional way, and don't want to try anything else.

"But in 10 to 15 years, I'd bet that if a doctor doesn't give cancer patients vitamin C or some other nutrients he'll be accused of malpractice."

At the National Cancer Institute, a spokesman said that scientists there generally are skeptical of the nutrient theory. "We've investigated it a little bit ourselves and we can't show anything with it," he said.

An official at the Department of Health, Education and Welfare who is partly sympathetic to Dr. Pauling's theory said that the institute's reluctance to support Dr. Pauling is based on a deeply imbedded resistance to vitamin research generally.

State Dept. Fails to Find Proof Of Illegal Acts by Iran Agents

WASHINGTON, Nov. 10 (AP). —State Department officials said today that an inquiry had failed to turn up evidence confirming "any illegal or improper activity" by Iranian diplomats in the United States.

Spokesman Robert Funseth said that despite the findings, Iranian Embassy officials were advised by the department about "what we consider illegal or improper."

This issue arose last month when the Shah said in a television interview that Iranian agents were checking on subversive activities by Iranians in the United States and that their activity was known to the U.S. government.

Continuing, according to Mr. Funseth, is a separate investigation into allegations that South Korean intelligence agents have harassed Koreans in the United States and a third probe into charges of payments by South Koreans to members of Congress.

The announced completion of the Iranian investigation comes within a month of a meeting of Iran and other oil-producing nations in Qatar to take up possible price increases. A boost could step up inflation again.

"We found no evidence confirming allegations of illegal or improper activity," Mr. Funseth said. "The Iranian Embassy has assured us that none of their officials are committing such actions."

The Shah, appearing on a U.S. television program last month, said Iranian agents in the United States were checking up on the activities of Iranian students and "anybody who becomes affiliated with circles, organizations hostile to my country."

Asked if the police force, known as Savak, was operating in the United States with the knowledge and consent of the U.S. government, the Shah said, "I think it is."

Chad Rebels Said To Split Up, May Free Mrs. Claustre

ALGIERS, Nov. 10 (AP).—The rebel movement in northern Chad announced yesterday that dissident rebel leader Hissen Habre, who has held a French woman hostage for more than 2 1/2 years, has been deserted by his forces in the desolate Tibesti Mountains.

The announcement, by the Algiers office of the Chad National Liberation Front (Frolinat), raised hopes that the hostage, archaeologist Françoise Claustre, and her husband, Pierre Claustre, would soon be released.

Mrs. Claustre could be freed before Christmas, a Frolinat spokesman said today. Responding to a question by a French radio interviewer here, the spokesman said: "You can hope that Françoise Claustre will be freed well before Christmas."

Mr. Claustre drove alone into the Tibesti region last year in an attempt to bargain for his wife's release and was in turn taken prisoner.

A spokesman for Frolinat leader Abba Siddik told correspondents, "Mme. Claustre is under the authority of Frolinat." Mr. Siddik, who is backed by Libya and Algeria, has repeatedly denounced Mr. Habre for holding Mrs. Claustre despite a $3-million ransom paid for her by the French government.

Mr. Habre's followers, some 5,000 Tibesti tribesmen, have long fought their own war against the Chad government while also fighting the Frolinat guerrillas, who control large areas of eastern Chad.

3d Try on F-14 Fails After 70-Mile Tow

WASHINGTON, Nov. 10 (WP). —The third attempt to haul the F-14 Tomcat fighter out of the ocean failed when the landing gear to which the recovery line was attached snapped, the Navy said yesterday.

The commercial recovery ship Taurus had dragged the 28-ton plane 70 miles through the ocean depths into shallower water off the Orkney Islands, north of Scotland, when the right landing gear broke off, officials said. The plane then sank back to the bottom under about 120 feet of water four miles off the islands, according to the Navy.

10 Die in Zagreb Crash

ZAGREB, Yugoslavia, Nov. 10 (UPI).—A passenger train rammed a commuter bus at a rail crossing today, killing 10 and injuring 20, police said.

Brezhnev Urges Closer Ties in Wake of Elections

MOSCOW, Nov. 10 (Reuters). —Soviet Communist party leader Leonid Brezhnev said yesterday that, now that the U.S. and West German elections were over, the time had come for more effective international cooperation on major issues.

But the Kremlin leader, speaking at a dinner for Polish party chief Edward Gierek, said that Moscow would not relax its guard and that the Warsaw Pact would continue to strengthen its forces.

"Now that the elections have been held in such countries as the F.R.G. [West Germany] and the U.S.A., we should like to hope for more effective interaction in the solution of major problems both in bilateral relations and in international life in general," he said in a speech reported by Tass news Agency.

But, "powerful and well-organized forces are persistently at work in the world of capitalism against the relaxation of tension," he added.

"We consider it our duty to strengthen our socialist community, our alliance which is a reliable instrument for protecting the revolutionary gains of our peoples."

Mr. Brezhnev and Mr. Gierek ended two days of talks today, devoted to expanding cooperation between their countries, Tass said.

3 States Seek Halt Of FAA SST Plan

NEW YORK, Nov. 10 (UPI).— Three states appealed to federal court today to block a plan by the Federal Aviation Administration that would exempt supersonic transport aircraft like the Anglo-French Concorde from current international noise standards. New York Attorney General Louis Lefkowitz said.

Attorneys for New York, Illinois and Massachusetts moved in U.S. District Court in Washington for a preliminary injunction to block the FAA action, Mr. Lefkowitz's spokesman said.

According to Mr. Lefkowitz's office, the FAA has directed the U.S. representative to the International Civil Aviation Organization to propose barring SST international noise limits until 1984. It would also exempt SSTs built after 1984 from future noise regulations if they are certified for operation prior to 1984, Mr. Lefkowitz said.

Minn. Governor To Shift to Senate

SAINT PAUL, Minn., Nov. 10 (AP).—Gov. Wendell Anderson, a Democrat, said today he will resign and have himself appointed to the U.S. Senate, succeeding Vice-President-elect Walter Mondale.

Gov. Anderson, 43, said in a statement that his resignation will elevate Lt. Gov. Rudy Perpich to Minnesota's highest office, and Mr. Perpich, in turn, will appoint him to the Senate.

Gov. Anderson would face a Senate election in 1978, when Sen. Mondale's term expires.

But Some Japanese Protest

Hirohito Is Feted on 50-Year Reign

By Andrew H. Malcolm

TOKYO, Nov. 10 (NYT).—Some Japanese today celebrated the 50th anniversary of Emperor Hirohito's reign.

Others did not. Some even protested.

And the feelings behind those attitudes mark some deep changes in this affluent land a half-century after a young man was allowed to grow his first moustache, was permitted to marry and then ascended the throne of his father on Dec. 25, 1926. Today's celebration commemorates the date of his formal coronation in 1928.

It has been the longest reign of any Japanese emperor in recorded history. During it, Japan became the preeminent military power in Asia, launched World War II in the Pacific, became the only nation to experience atomic bombing, suffered military defeat and occupation, rebuilt the country and established a powerful economy.

Joys, Sorrows

The Emperor said today in a rare reflective moment in public that "as I look back over the past 50 years, I recall many joys and sorrows. Above all things, I am deeply impressed that the people, after having overcome national crises and ordeals, have become what we are today."

"Wowever," the Emperor, 75, added, "when I think of the many victims and their families of the last war and as I still see the scars of that conflict, my heart is filled with great sorrow."

Then, in an unusual warning, the Emperor said, "I believe that we should not be blinded by the prosperity of the moment. The world changes second by second and our country will have to deal with many problems in the future." He did not elaborate.

He spoke, standing, before about 7,500 government officials, diplomats and other guests, also standing, at a modest government-sponsored anniversary celebration in the Japan Martial Arts Hall, an auditorium near his palace.

Three 'Banzais'

At the hourlong ceremony, a series of dignitaries praised and congratulated the Emperor, an orchestra played, a children's chorus sang and Premier Takeo Miki, who is approaching his second anniversary in office, led the throng in three loud "Banzais!" or "Long live the Emperor."

The government and many schools then closed for a half-day holiday to mark the anniversary of the Emperor, who under the postwar Constitution has no governmental powers and is only the "symbol" of the Japanese state.

But outside the hall stood another kind of symbol. Ten thousand of riot policemen with helmets, sticks and shields stood guard against violence by leftists protesting the ceremony and the institution of the Emperor. Another 20,000 armed policemen were on duty throughout the nation.

More than 6,000 protesters gathered at rallies throughout the capital. At least 12 were arrested in brief scuffles, but several long parades were held without major incident.

Communist Diet (parliament) members and many Socialists boycotted the celebrations. They hold the Emperor responsible for Japan's participation in World War II.

Few of Japan's 124 emperors, whose lineage runs back into prehistory, have held the real reins of power. Most Japanese now believe that prewar militarists elevated Emperor Hirohito to a "human deity" to further their own political ends.

A generation of Japanese remembers the Emperor's photograph in a special case at school and how, during a fire, saving the photograph was more important than even escorting the youngsters to safety.

Japanese calendars carry the year of the current Emperor's reign. And 62-year-old Takeo Fujikura still thinks of his old army rifle as the Emperor's property.

Japanese Is Spoken

It was not until the war's end, when Japan's sovereign broadcast the surrender statement, that Mr. Fujikura discovered the Emperor spoke Japanese. No average citizens had heard him speak before.

That generation remembers how Tokyo streetcar conductors announced the approach of the palace front gates and how every rider rose, faced the palace and bowed deeply.

It is those Japanese, educated before the war, who hold the Emperor and his wife, Empress Nagako, in the highest respect and affection.

"When I hear him speak," said Reiko Tsuzuki, 23, a Tokyo secretary, "he sounds a little dumb or like a robot. Also, I am worried about his age." But the Emperor's health appears good.

No Access

His isolation by the Imperial Household Agency also causes concern. "We Japanese have no access to him yet," said Yasuko Ikeda, a 20-year-old student, "even though he actually talked to the townspeople of Williamsburg [Va.] on his U.S. visit last year."

Still, there are few here who would abolish the institution of the Emperor, who is seen as a kind of national father figure in a country where fathers are highly respected.

"The Emperor system," Miss Ikeda said, "has been the ground on which all Japanese have lived."

Political Violence Claims 19 New Dead in Argentina

BUENOS AIRES, Nov. 10 (UPI).—The army announced today that security forces killed 12 leftist guerrilla suspects, all but two of them in raids following the bombing of a provincial police headquarters.

A fireman was killed and 10 police officers injured yesterday night when two explosions rocked the provincial police headquarters in La Plata, 35 miles southeast of the national capital. One of the injured was the assistant police chief of Buenos Aires Province, who was reported in critical condition.

The army announced 16 guerrilla suspects including five women were killed in three separate actions today in the Buenos Aires and La Plata areas. It also said two suspects were killed in a raid near La Plata yesterday.

The latest incidents brought Argentina's death toll in political violence to 1,120 for the year.

Air Travel Group Has Price Plan

SINGAPORE, Nov. 10 (Reuters).—The International Air Transport Association (IATA) has drawn up a contingency plan to increase air fares if oil prices rise again next month, secretary-general Knut Hammarskjold said today.

He told a news conference at the end of the three-day IATA annual conference here that members hoped that the Organization of Oil Exporting Countries would not make the expected increase at next month's OPEC meeting.

But if the increase did occur "Measures have been taken in order to be able to take immediate action," Mr. Hammarskjold said.

Conference sources said that a 10-per-cent increase in aviation fuel following an oil price rise could lead to an increase in air fares of about 2.5 per cent.

$100-Million Search for Life

6 Viking Scientists Disagree Over Their Findings on Mars

By Thomas O'Toole

WASHINGTON, Nov. 10 (WP). —The $100 million the United States spent on instruments to search for life on Mars has produced nothing but disagreement over whether the instruments found what they were looking for.

That was as clear as a pink Martian sky after a two-hour press conference yesterday in which six scientists discussed what their findings mean to them.

Four said they did not know if life exists on Mars. One said flatly that the Vikings had not found life. The sixth said he felt they had discovered primitive microbes living in the soils of Mars.

One of the few things the scientists agreed on was that they have found no remains of death on Mars. None of the six quarreled with the finding that there is nothing in the two soils (Chryse and Utopia) where the Vikings dug to suggest the fossils that would confirm the existence of life on Mars.

Power of Instrument

"Our instrument could have detected dead organisms anywhere from 100 to 1,000 times fewer in number than there are in poor earth soils, like the soils of Antarctica," said Dr. Klaus Biemann, of the Massachusetts Institute of Technology, who designed the instrument that looked for dead organic matter on Mars. "We did not find any organics. There doesn't seem to be a mechanism that accumulates organics on Mars."

Dr. Biemann, who has said it is hard to have life without death, concluded that the Vikings failed to find life on Mars. He noted that they had searched for life and death only in two small places on Mars, which does not "exclude the presence of living things elsewhere on Mars." But he emphasized that almost all earth soils are rich with the fossils of dead organisms. The two Mars soils are not.

Dr. Biemann thinks three other instruments found an exotic chemistry in the soil that is alien to the earth, catalyzed by some unidentified super-oxidant in the minerals of Mars and activated by the sun's searing ultraviolet light that penetrates the thin Martian atmosphere all the way to the surface.

"But even if I think we can explain this in terms of chemistry, we must still reproduce these actions in our laboratories," Dr. Biemann cautioned. "And even if we do that, we can only come to the conclusion that from these two places where we landed on Mars the data we have can be explained by inorganic chemistry."

Hard Shells

Cornell University's Dr. Carl Sagan disagreed with Dr. Biemann, saying that he thought that what was found could not be explained by an exotic chemistry. Dr. Sagan suggested that the Vikings had discovered primitive life forms that spend their lives behind hard shells to protect them from the killing rays of ultraviolet light.

Dr. Sagan conceded he had no proof for the microbes, but he said that Dr. Biemann had presented no proof that they do not exist. Dr. Sagan said the instruments that looked for life found something and Dr. Biemann's instrument did not. The reason, he suggested, was that the life-seeking instruments were more sensitive than Dr. Biemann's instrument, which was searching for signs of death—fossils.

Pointing out that scientists have found earth soils containing as few as 1,000 living organisms mixed with 1 million dead organisms, Dr. Sagan said that both the living and dead organisms in such soils would be beyond the range of Dr. Biemann's instrument.

"It is perfectly possible to have so few microbes that their dead organic ancestors go undetectable on Mars," Dr. Sagan said. "There are a few Antarctic soils with just these numbers of living organisms and dead fossils."

Cannibals Unlikely

Dr. Sagan suggested two reasons for the failure to find dead organisms on Mars. He said the living organisms might be cannibals, choosing to eat their dead kin, but he called this explanation "unlikely." He also said that Martian microbes could have evolved with a hard shell around them in order to retain what little liquid water there is on Mars and to protect themselves from ultraviolet radiation.

When they die, he continued, they lose their shells and the ultraviolet light from the sun wipes away traces of the fossils. Other Viking scientists admit this explanation is possible, since laboratory tests show that ultraviolet light of the kind that reaches Mars breaks the bonds that join carbon and nitrogen atoms together in living and dead organisms.

Dr. Sagan went on to say that the Viking biology instrument that looks for organisms metabolizing and exhaling gas found these signs when it tested the sample at 70 degrees Fahrenheit (21 degrees centigrade), but almost lost them when the sample was heated to 120 degrees Fahrenheit (49 degrees centigrade).

"A difference of only 50 degrees [Fahrenheit] and everything grinds to a halt?" Dr. Sagan asked. "That smells more like biology than any chemistry I can think of. Klaus Biemann's catalyst must be very sensitive to temperature."

For his parting blow at chemistry, Dr. Sagan said he doubted that results with the Viking soil samples tested in an instrument that looks for photosynthesis could be explained by chemistry. He pointed out that all the chemical explanations involved oxidation, a decomposition of matter. Photosynthesis involves reduction, which is the synthesizing of matter and the opposite of oxidation.

Even Dr. Biemann said the photosynthesis results were hard to justify by chemistry. "It's hard to associate it with oxidation since it is a reductive process."

The other scientists found it hard to say anything about what they think they found. Dr. Ames Research Center's Vance Oyama has said he leans to the chemical explanation. Biologist Gilbert Levin said he leans to biology.

Frankie Carbo, Former Convict, Boxing Boss, Die

MIAMI BEACH, Nov. 10 (AP) —Frankie Carbo, 72, onetime underworld boss in a boxing organization, is dead after a long fight with diabetes.

Carbo died yesterday at a hospital here. He had been paroled from a 25-year federal prison term because of the disease.

In 1960, while serving a two-year sentence for undercover boxing activities, he refused to answer 30 questions asked by Senate investigators looking into the sport.

Truman Gibson, former head of the International Boxing Club in Illinois and New York, told the committee that the club paid $45,000 a year for Carbo's good will.

In 1961, Carbo was sentenced to 25 years in a federal penitentiary after being convicted of conspiracy and extortion. Prosecutors said he tried to muscle in on the earnings of welterweight Don Jordan after the boxer won the world championship in 1958.

L. Alfred Jenny

NEW YORK, Nov. 10 (NYT) —L. Alfred Jenny, 91, a railroad engineering consultant who served two five-star generals in the World Wars, died Sunday in Englewood, N.J., Hospital.

The Swiss-born engineer joined the staff of General of the Armies John J. Pershing in 19 as an adviser on port and railroad problems and subsequently was placed in charge of the port and terminal facilities for the American Expeditionary Force in France.

Col. Jenny was recalled to active duty in 1943 and went to North Africa with General of the Armies Dwight D. Eisenhower as administrative chief for transportation problems.

Wealthy Nations Said to Ignore UN Drug Fight

GENEVA, Nov. 10 (UPI).—The United States deplores a lack of cooperation by West Europe and oil-producing nations in financing the fight against drug addiction in the world, two congressmen on a fact-finding tour said yesterday.

"There seems to be a lack of cooperation by many nations of the world on addressing the mounting problem of drug abuse," Rep. Lester Wolff, D-N.Y., chairman of the House Select Committee on Narcotics Abuse and Control, said at a news conference. He spoke after seeing officials of the UN Fund for Drug Abuse Control.

"The lack of contribution from Western Europe and oil-rich countries is a disgrace as well as a shocking and tragic commentary on the insensitivity of their governments," a committee member, Rep. James Scheuer, also Democrat from New York, added.

Rep. Wolff also criticized the Soviet Union and China for failing to support the UN fund. He praised the UN activity for its efforts to control opium production.

He said the total world contribution to the fund over the last four years was $25 million, of which $19 million came from the United States and Canada.

Free Chocolate Feast

RHEIMS, France, Nov. 10 (UPI). —Chocolate lovers enjoyed a free feast here after a truck overturned and its contents were looted.

U.S., EEC End Talks On Fishing Rights

BRUSSELS, Nov. 10 (AP).— Representatives of the United States and the European Economic Community ended a three-day meeting today, the first round of negotiations on how much fish the Europeans will be permitted to catch within the 200-mile zone that goes into effect off U.S. shores on March 1.

A spokesman for the European Commission, which is the EEC executive body, said another round is due in three or four weeks, probably in Brussels.

Mail the coupon now for your copy of our new brochure on the JAL Executive Service, the first and still the most comprehensive package of business aids for the businessman visiting Japan. It makes sure you get all the help you need before you go, on the way and when you arrive.

PARIS THEATER

Zeffirelli's 'Lorenzaccio' —Images Minus the Drama

By Thomas Quinn Curtiss

PARIS, Nov. 10 (IHT).—Last night Alfred de Musset's "Lorenzaccio"—or at least part of it—reopened the Comédie Française's Salle Richelieu to the public (the theater has been closed for two years for restoration).

The Richelieu delights the eye as do the Franco Zeffirelli tableaux of Renaissance opulence and grandeur on stage. But the play, on this occasion, was not compelling. Despite depiction of lust, conspiracies and revenge, it grew drowsy in recitation, the narrative moved along slowly and heavily.

Musset wrote "Lorenzaccio" in 1833 when he was 23. Due to its length—it is twice as long as the average play—and its diffuse dramaturgy, it was never performed during his lifetime. In 1896, the redoubtable Sarah Bernhardt, who had already played Hamlet, decided to tackle the role of the Florentine redeemer, a frail and dissipated youth, who feigning cowardice, becomes the intimate companion of the tyrannical duke so that he can slay the villain and liberate his beloved city.

Sarah Bernhardt edited it into a star vehicle and played it triumphantly in Paris and London. Bernard Shaw denounced both play and production as romantic rubbish, but Shaw was a questionable authority on French drama. Knowing little of the language, he disparaged Racine and cited Brieux as the greatest playwright of France since Molière. He could never take Sarah very seriously because she, he complained, reminded him of one of his aunts.

In the 1950s Gérard Philipe undertook the role of Lorenzaccio at the Théâtre National Populaire, contributing a marvel of interpretation, his own yearning romanticism in harmony with that of the Musset hero.

At the Comédie Française, Claude Rich, an actor of exquisite refinement, is the Florentine. It is not that he is too mature for the part—for his is an ageless face—but he is more whimsical than romantic. With his twistings and turnings, with his simian leaps, bounds and sulking in a corner, he transforms the brooding rebel into a sort of slender specter, the returned ghost of a treacherous court jester. In other words, into a fantastic. He speaks with such a quavering timbre that if one closes one's eyes—one often does—the impression is that of an imitation of John D. Rockefeller sr. responding to greetings on his 97th birthday. These lackadaisical utterances are contrasted with the pent-up venom and fury with which he delivers the stormy tirades.

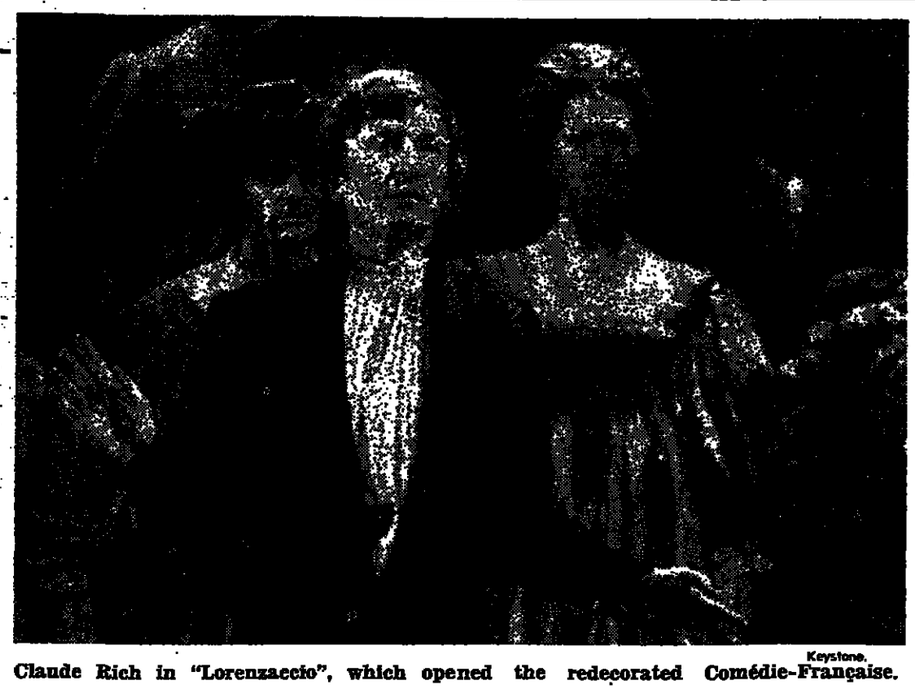
Jean-Luc Boutte's Alessandro de Médicis is more consistent and forceful, a blustering bully from the start to his last amorous rendezvous. The sustained strength of this characterization dominates. Geneviève Casile's Marquise Cibo is a lovely vision; Michel Etcheverry, always a dependable player, is the crafty cardinal to the last drop of acid hypocrisy. The veteran Louis Seigner is the lamenting old bear of the Strozzi clan.

This "Lorenzaccio" is to be seen rather than heard. As spectacle it is superb. The decor is impressive and the costuming lavish. Zeffirelli reveals the Renaissance in images that will linger in memory: the shadow of foliage on the old castle wall in the moonlight, the palace banquet with the red glow of underlighting in a sequence by candlelight and the operatic finale—the inauguration ceremonies of Florence's new duke. The musical accompaniment by Maurice Jarre with its street songs and madrigals aids in recreating a vanished civilization. Zeffirelli reveals the face of a golden age, but he never awakens Musset's drama.

* * *

"Equus"—Matthieu Galery's adaptation of Peter Shaffer's London and New York success—is a triumph of performance and production over script at the Théâtre d'Orsay. The outstanding feature of the local presentation is the disclosure of a novice actor, Stéphane Jobert, a karate champion whose training lends grace and precision to his stage comportment. The disclosure is double. Not only does he strip himself naked to reveal his classic physique—as requested by the climactic scene—but, more important, he accomplishes an acting feat of a high and difficult order, humanizing in as far as that is possible the distraught protagonist of Shaffer's hit.

The play was suggested by a news report of an adolescent English boy who had been taken into custody after deliberately blinding six horses. Judged dangerously insane, he submits—in the play—to psychiatric treatment. At first the boy remains resolutely mum, but the doctor slowly wins his confidence and the boy confesses how he was led to commit the brutal crime.



He has always been obsessed in his fantasies by images of horses. It is common knowledge that the horse is often a sex symbol—the horse having been worshipped as a god in many primitive religions. But it has taken Shaffer an interminable time to explain this simple fact. The boy, like many boys, haunts the stable. A girl lures him to the hayloft—but the seduction is unsuccessful. In hysterical panic over his impotence, the boy avenges himself on the true objects of his desires.

The theme is perhaps one for Arrabal or even Tennessee Williams. Shaffer is unable to remove it from the consultation chamber. As the boy relates his woes, the telling incidents of his past are re-enacted up to the ghastly crime. But they are retold—in the John-Dexter-Riggs O'Hara collaborative production—in stylized form. The horses are men sporting wired equine masks and hoofs who stamp noisily about, viewing the unsuccessful seduction with contemptuous tosses of their invisible manes.

Jobert's portrayal of the thwarted horse-lover is creative acting, bringing a lyricism to the role that the author has strained in vain to express. He opens the character by means of a passionate sincerity that defeats the incipient absurdities of his assignment. This is most notable in the forced sequence of his wild ecstatic ride on the back of a horse-man, the playwright having failed to supply the necessary winged words for the exploit. Here the actor, not the dramatist, is the poet.

François Perier scores as the attentive doctor, Catherine Hubeau as the unwittingly destructive temptress, Monique Melinand, as the troubled mother, Marcel Cuvelier, as the puritanic papa, and Christine Guerdon, as the nurse, are all effective under the excellent Dexter-O'Hara direction.

The public is likely to be attracted by the fine acting and novel staging of this bizarre drama, produced under Jean-Louis Barrault's auspices.

Sri Lanka Shows Its Gems, Sweden Shows Its Fangs

STOCKHOLM, Nov. 10 (UPI).—A steady stream of Swedes visited the exhibition of jewels at the Sri Lanka Embassy today but it was the guards—three of the deadliest snakes in the world—that took the visitors' breath away.

Three snakes encircled the "Star of Lanka," a 392-carat blue star sapphire worth $429,000, on display behind plated glass, the highlight of the show.

The snakes—a Ceylonese saw-scale viper *(Echis carinatus)*, a tropical rattlesnake *(Crotalus durissus terrificus)* and an Argentinian horned viper *(Cerastes cornuta)*—are there to deter thieves.

"We selected the most poisonous, the most aggressive and the fastest snakes in the world for this job," said Stockholm snake expert Olle Rosenqvist. "Together, these three species form a lethal triangle impossible to crack.

"I put them on the edge of starvation for a week and they are in top shape right now, stuffed with poison. Each one of them is capable of seven fatal bites. With those three together, death is 100 per cent certain within 10 minutes."

"The snakes are most beautiful, but if I had the choice I would pick the sapphire," said a woman in her 60s.

The exhibition, which opened yesterday, is part of a Sri Lanka State Gem Corp. project to establish European markets.

Frank and Barbara Sinatra

Living the 'Nearly Perfect Life'

By Charlotte Curtis

NEW YORK (NYT).—For weeks now, while supposedly big-time partygoers danced on a social season consisting mostly of public benefits and openings, Frank and Barbara Sinatra have been out on the town restoring New York's reputation for real glamour.

If they weren't at the Joshua Logans for dinner or the Robert Wagners, they were in the country with the Morton Downeys or Mike and Jan Cowles. Or at the "21" Club, being celebrated by other regulars.

As always, while Sinatra was singing at the Westchester Premier Theater, he hired a bus and rode such pals as Claudette Colbert, Mollie Parnis, Martin and Arlene Gabel and Mayor and Mrs. Abraham Beame up and back for a concert. A butler and waitress passed the caviar, the salmon, the smoked sturgeon and the champagne. At the theater, there was dinner and the best seats in the house. Afterwards, it was off to a restaurant for Italian food.

But the best postconcert invitation of them all is back to their New York apartment, where they put up their feet, rehash the day's events and send out for pizza. Theirs is an extraordinarily luxe private world.

Barbara Sinatra says she's "the happiest," and Frank Sinatra says, "What's this about happy? I'm the happiest," and it doesn't matter who's right. Since their wedding last summer, an extravaganza topped by the exchange of his and her Rolls-Royces, they have been living the nearly perfect life. Or, as she puts it in that soft-spoken way of hers, "He's turned every single day into Christmas," showering her with jewelry, clothes and furs.

"It knocks me out," she said, fingering a new gold choker set with antique Roman coins. "Maybe I appreciate it more because I didn't always have all this."

Well, maybe. But the utterly soignée Barbara Sinatra is a sentimental lady to whom material things are not what it's all about. What matters is the sense of caring and, as virtually everybody in the Western world knows by now, Frank Sinatra cares.

He reads that a stranger's house has burned down and he writes a check. A friend mentions a new kind of shaver or perfume and it arrives gift-wrapped within 72 hours. He walks into a store and when the bills are toted up, the salesperson rings up a week's profits. And, like some grand emir, Sinatra is about to extend his beneficence to an economically troubled country.

England

He sings in England next spring, and before signing the contract he ordered that the tickets be priced so ordinary people could afford them. Aside from a $100,000-benefit for battered children, those concerts are to do no more than break even. "I don't want to take money out of the country," he said flatly.

But that's months from now. In the meantime, the Sinatras have abandoned New York, leaving it in considerably better financial shape than they found it, and are back in Palm Springs, creating yet another party season in and around the newly refurbished Sinatra compound.

"Do what you want," Sinatra told his bride about the house. "Do it exactly the way you want it, and then I want to see it."

Since the compound was a bachelor's quarters for years, what it needed was a little rearrangement. A new master bedroom. New dressing rooms. New closets. A bathroom for Mrs. Sinatra. A combination breakfast-sitting room where the old bedroom used to be. An area, complete with minikitchen, that may be closed off from the rest of the house. And a new color scheme from pale, pale oyster and the beiges through caramel brown and taupe. All together, a proper setting for a dazzling blonde as well as one of the finest collections of American art in the country.

"I've taken a guest room and I'm turning it into an office for Frank," Mrs. Sinatra said. "I'm getting a photo from every one of his movies for the walls. It's going to be his place—a private place next to the screening room where he can be alone. I'll probably never set foot in there."

When the Sinatras are in residence, whether in New York, Palm Springs, Los Angeles or the place high in the San Jacinto Mountains, their sound system plays grand opera and the classics. Nothing by Sinatra because he doesn't like to listen to himself. But the living legend does hum now and then, mostly in the shower.

In the kitchen, Sinatra is his own best Italian chef, dishing up marinara and two kinds of clam sauce, and chicken with little potatoes and onions.

Sinatra is enthusiastic about his wife's clothes, and he delights in the way she looks. A tall, classic beauty, she lives in tennis dresses (for those three sets she plays before lunch) and sports clothes during the day.

At night, she likes caftans and clouds of chiffon. She was married in a Halston. In New York, she wore lots of Mollie Parnises. Her jewelry, including a giant pear-shaped engagement ring, is spectacular. And she rarely goes anywhere without a handsome gold ring on the little finger of her right hand.

"It's the Sinatra crest," she said. "I really love it."

Associated Press.

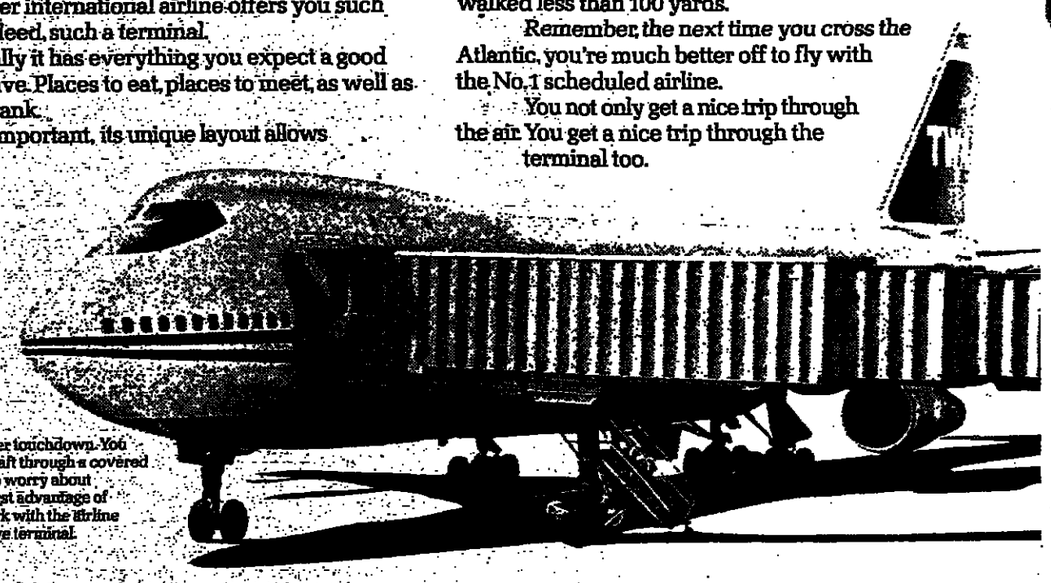
Frank and Barbara Sinatra after their wedding.

Why you're much better off when you arrive in New York with TWA.

Because you arrive at TWA's own terminal.

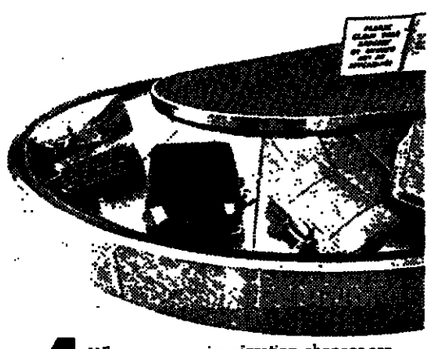
A very advanced building, designed by world-famous architect Eero Saarinen, offering its own International Arrivals facilities for the exclusive use of TWA passengers.

No other international airline offers you such privacy or, indeed, such a terminal.



Naturally it has everything you expect a good terminal to have. Places to eat, places to meet, as well as shops and a bank.

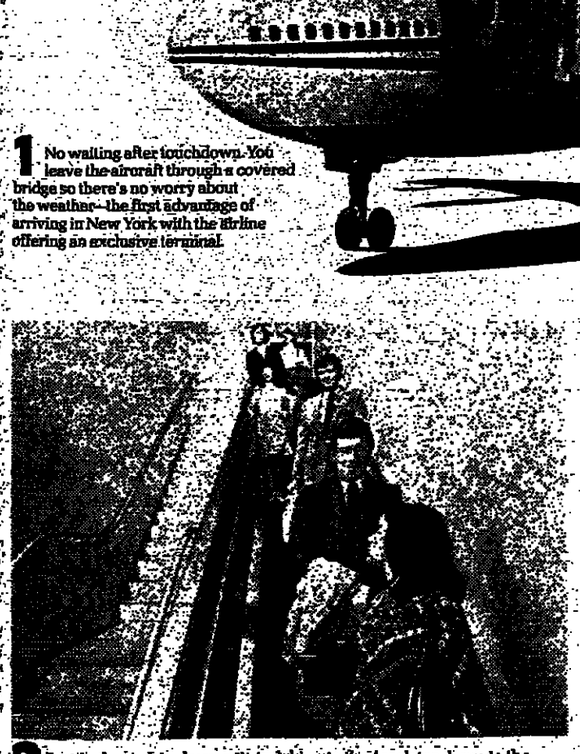
More important, its unique layout allows the combination of maximum efficiency for traffic with the maximum comfort for passengers.



In fact, by the time you leave the plane and reach the front door of the building, having passed through immigration and customs on the way, you will have walked less than 100 yards.

Remember, the next time you cross the Atlantic, you're much better off to fly with the No.1 scheduled airline.

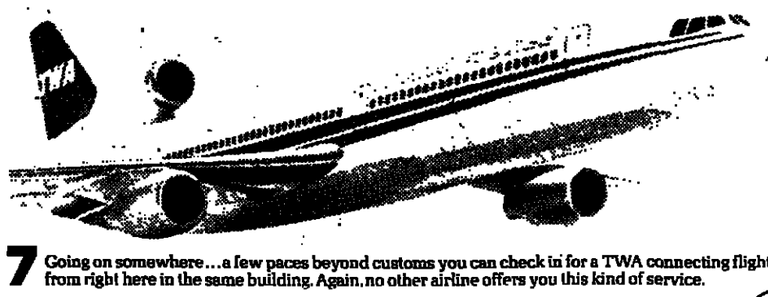
You not only get a nice trip through the air. You get a nice trip through the terminal too.



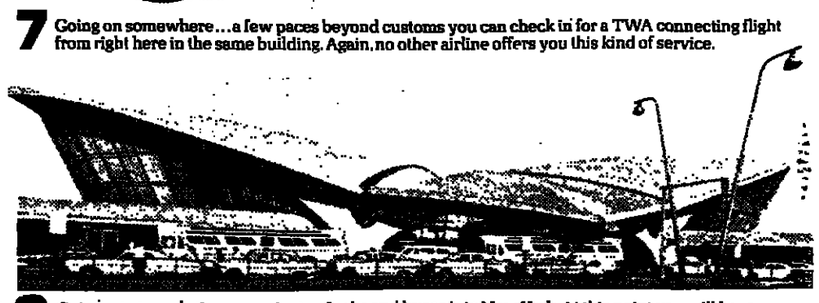
1 No waiting after touchdown. You leave the aircraft through a covered bridge so there's no worry about the weather—the first advantage of arriving in New York with the airline offering an exclusive terminal.

4 When you pass immigration, chances are you'll find your luggage waiting for you for a change. Another advantage of TWA's own terminal is that TWA controls unloading.

5 Exclusive customs channels for TWA passengers. There are 30 benches to get you through faster.



2 Inside the terminal you get straight onto the escalator down to the International Arrivals area which is exclusive to TWA passengers. No other airline offers you this big advantage.



3 You pass through immigration faster because no other airline uses the terminal.

6 Through to the main hall on the moving pavement. Your luggage rides on the conveyor belt alongside and, once again, will be waiting for you.

7 Going on somewhere... a few paces beyond customs you can check in for a TWA connecting flight from right here in the same building. Again, no other airline offers you this kind of service.

8 Going into town... there are plenty of cabs and buses into New York. At this point you will have walked less than 100 yards since leaving the plane.

U.S. Inflation and Guidelines

Suppose that the future President Carter's first major act of policy is a drive to speed up the economy and create jobs. That certainly seems increasingly likely. What does the new President then do to offset fears of a new surge of inflation? Mr. Carter spoke last summer of voluntary guidelines for wage and price increases, following the Kennedy-Johnson model in the mid-1960s. Guidelines are currently under discussion among Mr. Carter's advisers.

But they are a more severe remedy, with wider and more disquieting side effects, than present circumstances warrant. It may eventually be necessary, at some point down the road, to resort to guidelines. For the time being, however, other methods will serve the new administration—and the country—much more satisfactorily.

* * *

The inflation now afflicting the economy is mainly the effect of the past surges of prices. Various sectors are struggling to catch up, to push the injuries of past years off onto someone else and to recoup their own losses. This kind of inflation is not going to be affected by a return to the U.S. economy, after the long summer pause, to a path of normal recovery from the recession. It hardly needs to be said that there is a vast amount of slack in industry and in the labor force. That is what all the anxiety is about; that is what the unemployment figures are reflecting. Economists argue about the precise point at which the growth rate would become a new force for inflation. But wherever that point might be, very few people think that the country is anywhere close to it now. The danger is largely a matter of psychology and anticipation. If people think that moderate tax cuts or additional spending this winter might be the overture to more inflationary policies later, they will take precautions that make the inflation worse. Mr. Carter will need to find a way to reassure the country that he is not leading it back into another round of escalating prices.

Guidelines have a certain seductive appeal in moments like these. They are dramatic, and they are precise. The president who resorts to them is showing active and committed leadership, he is protecting the public by telling everybody not to exceed certain specific limits. The first reaction would doubtless be a round of applause. But they are dangerous exactly because they put the president in a false position. They suggest that he has more direct power over the economy than any voluntary standard can give him. This country periodically gets itself into serious trouble by overestimating the things that a president can accomplish. In the arduous and slow process of bringing down the inflation rate, public cooperation and understanding count for at least as much as executive determination.

Past experience with voluntary guidelines does not offer an unequivocal case for their efficiency or their durability. In 1962, President Kennedy established a figure of 3.2 per cent a year as the acceptable wage increase. This voluntary standard was exploded four years later when, after a highly disruptive strike, the airline pilots' union won a higher figure. Not very far in the background were the pressures being generated throughout the nation by the rising costs, in manpower and money, of the Vietnam war, aggravated by President Johnson's decision not to raise taxes.

Voluntary guidelines can serve a purpose, but only a temporary one. If a country has developed inflationary tendencies, guidelines cannot repress them for very long. Because this country has dealt with guidelines before, the reactions would be quicker the second time. The administration could not count on the four years that the guidelines endured a decade ago. Mr. Carter would also have to consider the speed with which the guidelines' maximum figure becomes the minimum raise; if the president himself has said that any increase up to a given figure *is okay, what union will settle for less?* There is the infinitely harassing political truth—as President Johnson and the men around him learned only too well—that the guidelines entangle the president's personal prestige in minor and obscure wage fights all over this large country.

* * *

For the months ahead, the wisest tactics will probably be systematically and publicly spotlighting inflationary movements, wherever they occur. It means a broader and less inhibited process of surveillance by the government, perhaps through an expanded Council on Wage and Price Stability. Conventional guidelining gives great attention to union wage settlements. But sophisticated analysis might well show steeper rates of increase among the incomes of that four-fifths of the U.S. labor force that belongs to no union—particularly among professionals like doctors, lawyers and accountants. They, unlike the auto workers, generally do not announce the increases in their wage rates. Careful spotlighting of inflationary increases will not only tend to discourage them but will also tell the country quite a lot about the sources of the present trouble. For the present, nothing more is necessary.

THE WASHINGTON POST.

Alternative for Britain?

Even in "normal" times, however they may be defined, the survival of a British government by one vote on a major issue in the House of Commons would touch off speculation about the dissolution of Parliament and new elections. The narrow escape for Prime Minister Callaghan's Labor government on three crucial Commons divisions this week—one of them by a single vote—inevitably sharpens the doubts everywhere that it can endure long enough to revive a floundering economy and a sinking pound.

The votes came on motions to hasten enactment of bills that are irrelevant to Britain's economic recovery and in some instances likely to retard it. They are planks inserted in the Labor party platform by the powerful left wing, and their speedy passage is deemed necessary to keep Labor's restless ranks in line for the government's unpopular economic measures aimed at halting the flight from sterling and turning the economy around.

Mr. Callaghan's close calls came less than a week after Commons by-elections in which Conservatives decisively won seats in two industrial constituencies that had long been Labor strongholds—one of them for 50 years. The elections in turn came a week after the Labor party's National Executive Committee had decisively repudiated the Labor government's plan for additional cuts in public spending in order to qualify for a new $3.9-billion loan Britain desperately needs from the International Monetary Fund.

With the support of four minority party members, the Labor government now has a Commons majority of exactly one over its combined opposition. If the Conservatives could force an early election they would win overwhelmingly. But anyone noting the scarcity of proven talent in Margaret Thatcher's shadow cabinet and recalling how the last Tory government stumbled into costly confrontation with the trade unions would be reluctant to hail a Conservative landslide as the catalyst for Britain's salvation.

It was obviously concern over the paucity of Tory talent and worry about the constant necessity for Mr. Callaghan to appease Labor's irresponsible left wing that led former Prime Minister Harold Macmillan last month to call for a government of national unity similar to Winston Churchill's World War II coalition. Mr. Macmillan clearly said what many Britons of widely varying political philosophies are thinking.

Both Mr. Callaghan and Mrs. Thatcher promptly rejected the idea. As Mr. Macmillan recognized, "coalition" is "a dirty word" in Britain, particularly for the Labor party, which still recalls bitterly the defection of Labor's Ramsay MacDonald to form a national government with the Tories in the Depression year of 1931. The Tories are unwilling to contemplate coalition when they are confident of winning decisively on their own in a year or two.

For the present, Mr. Macmillan's proposal is a nonstarter, and with a bit of overdue British luck a drastic political convulsion may not be necessary. He was right nonetheless to speak his mind, and all political leaders must at least ponder seriously the possibility that the dimensions of Britain's crisis may yet require some kind of unified national recovery effort as an alternative to chaos.

International Opinion

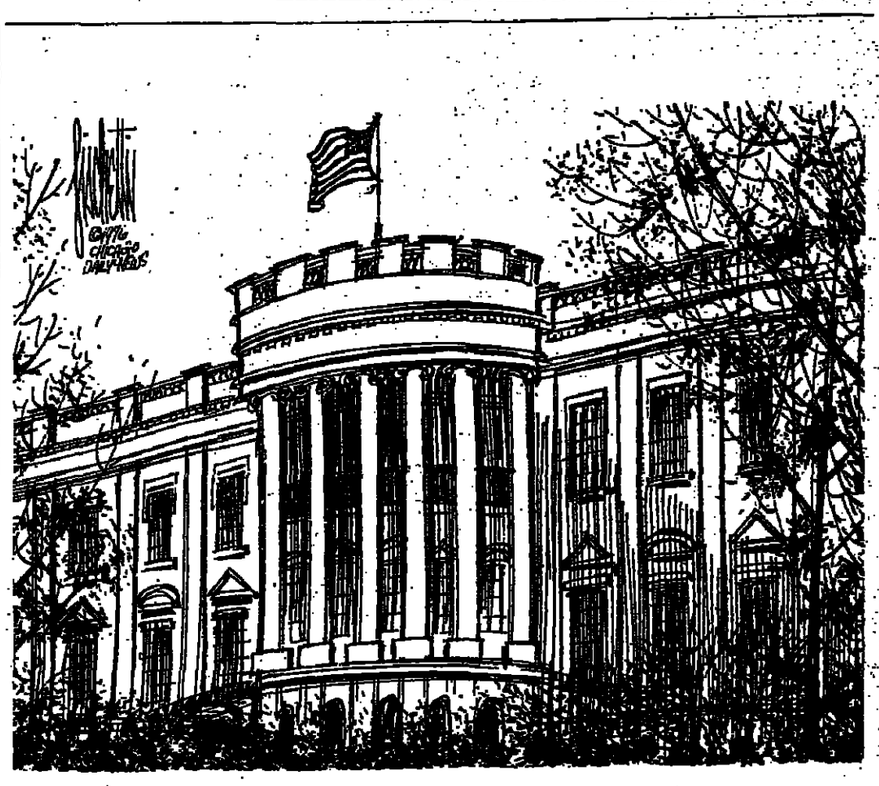
Peking Policies After Mao

Not least in the changed view from Peking could be an approach to both superpowers that would not see improved relations with one matched by worse relations with the other. A balance—yes. And the proximity of the Soviet border will always make that the more delicate. A China that rejects Soviet-U.S. rivalry may not, however, see its relations with either country on a shifting scale from enmity to friendship, much less alliance. China's absolute independence is after all the objective of [its] nationalism.

—*From the Times (London).*

In the International Edition

Seventy-Five Years Ago



November 11, 1901

NEW YORK—The automobile show in Madison Square Garden ended last night. It is estimated that more than $1 million worth of automobiles was sold during the week. There was intense rivalry between the manufacturers. The favorite type for the purchasers was an 8-horse-power machine with "tonneau" body, which could be run without the aid of a professional "chauffeur."

Fifty Years Ago

November 11, 1926

PARIS—From the lead editorial in the Paris Herald yesterday: "The eighth anniversary of the Armistice which ended the World War brings perhaps to Europe today more hope for a durable peace than ever before. British Prime Minister Stanley Baldwin said yesterday 'that co-operation and good will alone can open to Europe an era of peace and stability.' Let us hope the era of peace is at hand."

China Responds to Soviet Feelers

By Victor Zorza

WASHINGTON.—The signals from Peking may seem confusing, but the Kremlin's China watchers have reason to take heart. They advised the Kremlin to drop the ritual anti-Mao remarks which for many years have been a feature of the annual Moscow meeting to celebrate the anniversary of the revolution—and the Chinese diplomats who in the past have always walked out stayed put this time.

True, they had no reason to walk out, in the absence of the usual provocation, but the fact is that a habit born of years of bitter hostility has been broken.

New patterns of restraint are emerging on both sides, even though the two patterns do not match. The Kremlin's attempts to extend to Peking the hand of friendship, described in this column last week, are already beginning to elicit a response. But the Chinese reaction is more difficult to describe because it is less explicit. When Moscow made such attempts in the past, it usually got rapped on the knuckles. This time, while analysts around the world are straining their ears to catch Peking's reply, China maintains a dignified silence on the subject. In trying to detect new patterns in Communist politics, silences can sometimes be more helpful to the analyst than explicit statements. In the Sherlock Holmes story, it was the dog that did not bark that provided the clue the detective was seeking. In our own story, too, it is Peking's failure to bark that provides the major clue.

Less Authoritative

Nor is this the only silence that matters. The major statements made in Peking since the death of Mao have contained occasional anti-Soviet notes, but these are nothing like as angry, explicit, or detailed as in the past. Anti-Soviet attacks are now largely confined to routine press articles, which are obviously less authoritative than policy statements or editorials. Peking's real attitude is probably known to only a few dozen people in the leadership, for it is they who make the policy statements and authorize the editorials.

Other Peking officials, including those directly below the top level, have to guess as we do—and there is some evidence to suggest that even they are uncertain. The official Chinese news agency sent out by radio to Chinese newspapers an article which contained what would appear a routine anti-Soviet remark—and then quickly asked them to delete it. The offending sentence had said that the Chinese people would not allow the tragedy which made the Soviet Union into a "revisionist" country to be repeated in China. The remark itself is not as significant as the fact that it was first put out and then withdrawn, presumably by officials who were not quite sure what the line was.

But the accumulation of signs, small and insignificant as they may be, suggests the existence of a trend. Scores of messages of loyalty to the new leadership have been pouring into Peking from the provinces, where the local leaders have been making policy speeches of their own. But one has to go through hundreds of these lengthy pronouncements to find an anti-Soviet remark—and then it turns out to be the customary assurance from a province bordering on the Soviet Union that its troops would defend China against foreign intrusions. Here too the pattern of restraint is unmistakable. Anti-Soviet remarks figure only in those messages in which they are necessary for policy reasons. They are not, as was so often the case before, strewn indiscriminately throughout the vast output of the Chinese propaganda media.

The new pattern may be traced back to the speech at Mao's funeral by Hua Kuo-feng, the new party chairman, who carefully balanced his moderately anti-Soviet remarks with moderately anti-U.S. ones. The signals which have been reaching Washington from Peking make it clear that the new leadership, having overthrown the radicals, wants to moderate the anti-U.S. policy which they had demanded. But the radicals also wanted Peking to follow a sharply anti-Soviet policy. What the signs from Peking suggest is that not only the anti-U.S. but also the anti-Soviet extremes of radical policy are out of favor.

But since the radicals have failed to impose on Peking the anti-U.S. policy they have been advocating in recent years, no great changes need occur in the China-U.S. relationship. All the radicals managed to do was to slow down the development of relations which began with the Nixon opening to China. If the moderates now consolidate their victory, that process may be resumed and speeded up.

On the Sino-Soviet side of the triangle, however, the anti-Soviet direction favored by the radicals did become Peking's official policy. If that is to be moderated, the small beginnings now evident in both Moscow and Peking could ultimately lead to a major realignment in the world balance of power. That is not to say that Peking would ever rejoin the Soviet camp in a subservient role. But by first reducing and then removing the hostility between the two countries, Peking could create a situation in which both Moscow and Washington would have to court it. It would be in a position to play them off against each other, and to extract material as well as political concessions from them.

As things stand now, Peking can get nothing from Moscow, because the two are not even talking to each other. It can get little from the United States so long as U.S. policy-makers believe that China is frozen into an anti-Soviet stance, that it cannot turn toward Moscow, and that *there is no need to buy it* off. It was Mao who took up the anti-Soviet stance and made sure that it remained China's official policy. It was also Mao who inspired the more extreme domestic policies espoused by the radicals. But with Mao gone, retreat from radical extremism now discernible on the domestic front is also taking place, though so far only under the surface, on the foreign policy front, and it cannot be very long before this too becomes visible on the surface.

The trend, which began when Chou En-lai was still at the height of his power as premier, is gradually beginning to come into the open. Historical trends are not easy to discern, and few people in the West were prepared to accept Chou's moves for what they were, but the radicals in Peking knew what was up. They launched vehement attacks on Chinese officials who 2,000 years ago were willing to make concessions to China's northern neighbor. By the beginning of this year, with Chou's deputy, Teng Hsiao-ping, in charge in Peking, China did make a major concession to the Soviet Union, by returning a Soviet helicopter crew captured nearly two years before. But the process which this was intended to begin was interrupted by the death of Chou, the downfall of Teng, and the radicals' offensive which has only now been beaten back by Hua Kuo-feng. Now history is back on course again.

Happiness for Carter Is Time of Transition

By David S. Broder

WASHINGTON.—We are embarking on a happy period in the life of Jimmy Carter, and the nation will be better for it. No one can tell much about what his presidency will be like, but his prepresidency ought to be terrific.

This is not just guesswork. Everything we have seen about the President-elect points in the direction of this transition period being a good and fruitful time for him and the nation.

First, and most obvious, Carter is at his best when he has won. He may be sore about the "deferential" way television treated his rival during the campaign, and he may have gripes with others who didn't do all they could have to speed him on his way to the White House. But his desire to get even is doubtless curbed by the fact that none of their shortcomings—or his own acknowledged campaign mistakes—deprived him of the prize he so ardently wished to win.

On Top

When Carter feels on top of things, he can relax. And when he relaxes, he is *at his best*—as he was in his first press conference, in Plains, Ga., since the election.

The second reason to think this period will be good for him is that a good deal of work has been done already to assure its success. No one but Carter can judge the quality of the briefing books prepared by Jack Watson's transition team, but the project involved some very good people, and, in its scope, it surpasses anything ever previously attempted.

To the extent that a successful transition involves the cooperation of the departing administration, the auguries are also very good. President Ford and his top aides, Richard Cheney and John Marsh, are plainly dedicated to smoothing Carter's takeover, and that attitude should quickly communicate itself to the departments and agencies.

The third reason that this ought to be a good period for Carter is that the most important decisions he has to make are about people, and he does that very well.

Good Team

As has been remarked here before, the best recommendation for Carter's candidacy in the early days of the people he had recruited to his cause in communities across this country. Men and women, young and old, renowned and unknown, they were the kind of people you'd like to have on your side if you were trying to do anything in that community—build a new school, pass a bond issue, or beat a bribe-taking sheriff.

To a remarkable degree, they were people who had been spotted and recruited by Carter himself, as he traveled the country on behalf of Democratic candidates in the 1974 mid-term election. He had an eye for talent and the ability to enlist good people in what seemed like a long-shot enterprise.

Now that he is President-elect he has a great talent pool from which to fish. He need not confine himself to the big names of the past, for in the past eight years, Democrats have developed whole new reserves of skills in congressional staffs, in state capitols and city halls, in the law firms and the "think tanks" and the movements organized around various local and national issues.

Given that talent pool and Carter's knack of talent-spotting, it will be surprising—and very disappointing—if Carter's cabinet, agency and White House staff appointments do not draw applause and praise in the coming weeks.

The Products

Not only are the products of the talent-hunt likely to be impressive, but Carter will look good in the process. He has already indicated that he will follow the procedures of his vice presidential choice, Sen. Walter Mondale, in picking his principal administration associates.

And that process of orderly interviewing, discussion and testing of reactions should be reassuring to the country about the President-elect's way of doing business.

In fact, the country will be helped if Carter's prestige and public support is enhanced in the two months before he takes office. Despite his efforts to put the best face on it, the voters' verdict was thin and tentative. It will be helpful if there is a stronger display of public confidence in Carter before he takes on the tough job of being President.

For make no mistake about it, governing will be harder than getting ready to govern.

Moscow's Anti-Zionism Campaign

By Rowland Evans and Robert Novak

WASHINGTON.—Escalation of the internal Soviet campaign against "world Zionism" and its "agent," the state of Israel, has reached a new peak which for the first time since the infamous "doctors' plot" of 1952 is posing this grave question: Is a great anti-Jewish purge in the Soviet Union now a serious possibility?

No answer is possible at this time. But the shrillness of the campaign, now becoming known in the West through intelligence transmitted secretly by Jewish activists, has deeply alarmed serious U.S. students of historic anti-Semitism in the Soviet Union. At the very least, it is aimed at stalling U.S. peace efforts in the Arab-Israeli confrontation.

Sen. Jacob Javits, R., N.Y., a leading U.S. guardian of the interests of Soviet Jews, was so distraught by the formalized new Soviet onslaught against Zionism that last September he wrote a confidential letter to the Soviet ambassador here, Anatoly Dobrynin. Javits asked Dobrynin this question: Does the anti-Zionist campaign have the full backing of the Soviet state, as it would appear, or could it partly be unsanctioned harangues from anti-Semitic extremists?

Javits had heard nothing from Dobrynin or the Soviet Embassy as of early this week and quite likely never will. So, the senator has asked the State Department's help in investigating whether the lethal new attack does or does not have official sanction of the Kremlin.

The answer would overwhelmingly appear to be in the affirmative. For one thing, the official state newspapers Pravda and Izvestia have been preaching fearsome anti-Zionism for years. Following the first Brussels Conference on Soviet Jewry in 1971, Pravda labeled Zionism "an enemy of the people"—a phrase echoing the great purge of the 1930s. After a brief respite, the new, more virulent anti-Zionist campaign was triggered by the second Brussels conference.

This new state-supported campaign is manifested by an official Communist party lecturer named Valery Yemelyanov, a candidate of economic sciences and a professor in the prestigious Institute of Foreign Languages. What makes Yemelyanov's anti-Zionist campaign so insidious is that its harshest rhetoric came in a Moscow interview with a newspaper closely connected to the Palestine Liberation Organization.

Yemelyanov delivered opinions that must have startled even anti-Israel PLO activists who are trying to establish a mini-state *of their own on the Israeli-occupied* West Bank. "World Zionism has become a great power in the world," he said, elaborating as follows in a breathtaking spiral of charges:

Propaganda

Eighty per cent of the economy of non-Communist nations is concentrated in the hands of "Zionist capitalists"; 95 per cent of the propaganda efforts undertaken in the capitalist world are concentrated in the hands of the Zionists, 99 per cent in the United States.

In words reminiscent of the notorious "Protocols of the Elders of Zion," Yemelyanov told his PLO interviewers that the world Zionist organization "works in a strictly secret framework" which includes "all the presidents and parliaments of the developed capitalist countries." The only way to fight this "world" Zionist movement is to establish a worldwide counter-movement which the Arabs themselves should lead, "because they are the prime objective of the Zionist movement and the leaders of the world struggle against one of its agents—the state of Israel."

Such nonsense would not be worth a second glance were it not for the likelihood—voiced by Javits's letter to Dobrynin—that behind it is the weight of the Soviet state and its multiple propaganda apparatus.

Yemelyanov's appeal directed to militant PLO members is obviously designed to thwart U.S. efforts to find a political solution to the Arab-Israeli wars. Above all, it plays on the primitive and deep Israeli passions of the Arabs (deeply felt by all Palestinians) in a way calculated to arouse them to highest pitch.

Attacks Parley

Yemelyanov attacked the second Brussels Conference on Soviet Jewry, calling it "anti-Semitic." That was true, he said, because Zionists in the Soviet Union conduct anti-Semitic "*racism" in order to frighten Jews* into leaving the Soviet Union and going "to Palestine (Israel)... and there drive out the Palestinians."

If Palestinian nationalists need more anti-Israeli fervor, that is the way to provide it, at the same time spicing the fare of Zionism and Israel with hate for the United States and the West.

An explanation may lie in the modest successes of U.S. diplomacy in cooling down the Middle East since the 1973 October war. If so, Moscow is once again playing with a fire that could consume not only Israel but the true and understandable national aspirations of the Palestinians; it is doing so by keeping the Middle East in a continuing state of raging tension or semipermanent war.

— *Letters* —

Tried to Vote

I hasten to confirm Rita Maran's letter (IHT, Oct. 30-31) on absentee ballots. I, too, have been denied an absentee ballot from New York State, but for both this election and the 1972 election. In 1972, the Board of Elections of Nassau County sent the application form I requested by surface mail, and it arrived in December, 1972. When I protested, they said that it was too expensive to send application forms by air mail. This year, I duly registered to vote and sent in the application (this time sent to me by air, by my family) in good time. I have not received a ballot yet, and so I have been effectively disenfranchised again.

With Rita Maran, I hope some kind of protest can be made to ensure in the future that those Americans abroad who are entitled to vote can in fact vote in the elections. Considering the huge sums spent on the campaigns, air mail costs for applications and ballots are a drop in the bucket. It is our right to vote, and everything possible must be done to enable us to exercise this right.

EVERETT M. JACOBS.
Sheffield, England.

Aegean Gordian Knot

Re "Cutting the Gordian Knot" by C. L. Sulzberger, (IHT, Nov. 8):

Congratulations are due to Turkey's Foreign Minister Caglayangil for acknowledging the constructive efforts and work of Premier Caramanlis of Greece in the matter of the Aegean continental shelf. But it is generally known that "one swallow does not make a summer."

There must be a more profound understanding by all responsible people in Turkey of this complex question, especially when Turkey is proposing to divide equally the Aegean Sea, drilling rights between the two countries. This complex situation is fully understood and appreciated by everyone in Greece.

I wonder how the population of the eastern shores of the United States would feel or react in a similar situation. Why then should the Greek inhabitants of the Aegean islands feel differently? Surely Turkey can have its share of the continental shelf but within reason and logic.

EC to Act on Bearings from Japan

...arges Exports ...e Being Dumped

BRUSSELS, Nov. 10 (AP-DJ).—...he Common Market Commis... announced today it has ...ned an anti-dumping proceed... against Japanese-made ball ...rings and tapered roller bear... ...said about 15 types of such ...rings are being sold by the ...anese in the EEC at 26 to 52 ...cent below prices charged in ...an.

...he action followed a complaint ...the Federation of EEC Bear... Manufacturers, which claim... that producers in West Ger... ...y, France and Britain are ...ually being hurt by Japanese ...ping.

...Commission spokesman said ...anese manufacturers had al... ...dy been notified of the action ...would have 30 days within ...ich either to correct their ex... prices or explain why prices ...uld remain as they are.

...fter the 30-day period the ...mmunity can decide to apply ...ti-dumping duties.

Could Appeal

...Japan could take the case to ...e council of the General Agree... ...nt on Tariffs and Trade if ...feels anti-dumping duties are ...justified.

...The Commission spokesman ...id that between 1974 and ...6 Japanese exports of ball ...rings to the EEC rose 40 per ...t and those of tapered roller ...rings rose 100 per cent.

...Because of the sharp increase, ...e 5,000 workers in this in... ...stry in West Germany, France ...d Britain had lost their jobs ...many others were forced to ...ke shortened hours, according ...the Commission.

Firm to Cut Exports

...In Tokyo meanwhile, Tokyo ...el Manufacturing Co., the ...rgest Japanese exporter of shap... ...steel products to the EEC, said ...day it has decided to cut its ...ports and raise its prices by an ...nual 5 to 10 per cent.

...Tokuo Iketani, senior managing ...ector in charge of sales, said ...at the company would carry ...t the self-restriction on exports ...light of sharp criticism from ...EEC steel industry.

...In another development, the ...ident of the Iron and Steel ...ation said today that the ...stry group will agree to an ...ension of the current limits ...Japanese steel exports to ...EC nations if proposed by ...man at a meeting with the ...ropean Coal and Steel Com... ...ity in Brussels tomorrow and ...day.

...An official of the Ministry of ...ternational Trade and Industry ...mented that the Japanese ...vernment is awaiting a report ...European market conditions ...ected at the upcoming meet... ...before any final decision will ...taken on continuing the ...untary restraints.

...The Iron and Steel Federation ...d exports to the United States ...European nations rose 33.1 ...r cent in the half year ended ...ptember from the year-ago ...riod to total 16.19 million tons. ...Exports to European nations, ...luding the Soviet Union, jump... ...61.2 per cent from a year ago ...4.08 million tons, while ex... ...ts to the United States rose ...) per cent to total 3.96 million ...ns.

...K. Bankruptcies Up

...LONDON, Nov. 10 (AP-DJ).—A ...al of 10,752 British companies ...t into liquidation during the ...months ended Sept. 30, up ...m 9,294 a year earlier and ...7 in 1973-1974, British Trade ...der Secretary Clinton Davis ...orted.

AEG-Telefunken to Sell Kraftwerk Union Stake

By Darrell Delamaide

FRANKFURT, Nov. 10 (AP-DJ).—AEG-Telefunken took a major step today in its effort to return to profitability by announcing its complete withdrawal from ownership of the power plant manufacturer Kraftwerk Union (KWU).

The other KWU partner, Siemens, is to take over AEG's 50-per-cent share for a price of 618 million deutsche marks. Siemens also is to take over a further 25 per cent of the jointly-owned transformatoren Union (TU) for an additional 80 million DM.

AEG management board chairman Walter Cipa said the overall losses from its KWU participation were likely to total 1.4 billion DM.

But he said that the Siemens payment would cover the 352 million DM of actual KWU losses that have been carried forward as well as the book value of KWU carried on AEG's books. He added that AEG's reserve of 800 million DM should cover potential future losses arising from old KWU contracts.

Actual AEG losses in connection with KWU so far total 600 million DM—350 million DM in capital participation, 150 million DM for operating losses and 200 million DM lost in connection with the nuclear power plant Wuergass. These losses were the main cause for AEG's net loss in 1974 of 663.8 million DM. Last year's net loss totaled 76.9 million DM.

The terms of the agreement with Siemens make AEG liable for deliveries under the so-called "old contracts," but Mr. Cipa said the reserve of 800 million DM for possible losses in connection with these contracts should be sufficient.

KWU, which has an order backlog of 20 billion DM, including large orders from Brazil and Iran, posted a net loss of 40 million DM in 1975. Plagued by environmental regulation and citizen opposition, KWU does not expect to show a profit until the end of the decade.

Mr. Cipa said AEG was not properly constituted to be an equal partner with Siemens in the company because its production facilities were not situated to provide deliveries and its financial structure was too weak to make up this lack in financial backing. Even a minority participation of 25 per cent would have unnecessarily burdened AEG's strained financial resources, he said.

The adjustment in its TU participation was seen as necessary because KWU is TU's main customer. Mr. Cipa said AEG wanted to retain some share in TU because the transformers produced by this unit were an essential component of AEG's plant construction projects.

Regarding AEG's outlook for the year, Mr. Cipa said second-half earnings were considerably improved from the first half but it was still open whether they would be sufficient to offset the losses previously indicated for the first half.

Mr. Cipa explained that the company's current restructuring and retrenchment would continue to have an impact on earnings and that management would have to continue to balance the needs of reorganization with the necessity of paying dividends to shareholders.

Mr. Cipa said that AEG is trying to reduce its dependence on consumers—about half of its world sales are in consumer products—and to improve its debt-equity ratio.

He said the chief criterion in rating product areas was the demand on capital resources and the amount of debt service. Management had decided to give up those areas in which AEG was weak both in competitiveness and in terms of its own capital structure.

In general, he said, AEG would seek to hold consumer products sales steady and expand other areas in the mainstream of its business. Capital spending is to be concentrated above all in the areas of energy and industrial technology and information and transportation technology, Mr. Cipa said.

On the Frankfurt Stock Exchange, AEG, which had posted significant gains in trading prior to today's announcement, slipped .30 to 86 DM while Siemens fell 1.50 to 260 DM.

In Munich, Siemens announced that it would recommend to the annual meeting an unchanged dividend of 8 DM per share for the fiscal year ended Sept. 30.

The company said preliminary figures indicate its world sales rose 9.5 per cent to 20.7 billion DM in the year, and that for the first time foreign sales made up half of overall turnover.

Japan Firm's Profit Soars In First Half

TOKYO, Nov. 10 (AP-DJ).—Toray Industries Inc., the largest maker of synthetic fibers in Japan, said yesterday net profit in the fiscal first half ended Sept. 30 soared to 3.148 billion yen ($10.7 million) compared with 527 million yen in the year-earlier period.

The company said sales in the first half rose to 169.146 billion yen compared with 179.602 billion yen.

A Toray spokesman said the sharply improved profit in the first half was due mainly to streamlining and good sales of plastics and synthetic textiles, and a slight rise in export sales.

Others Report

TOKYO, Nov. 10 (Reuters).—Mitsui Mining & Smelting said today it showed a net profit of 1.05 billion yen in the first half, up from 323 million yen in the year-earlier period.

Sales rose to 107.6 billion yen from 78.6 billion yen. Mitsui will not pay an interim dividend.

Nisshin Steel Co. showed a net profit of 1.1 billion yen in the first half, up from 138 million a year earlier, on sales of 143 billion yen, up from 110.9 billion yen.

Nisshin set an unchanged dividend of 2.50 yen.

Nippon Light Metal Co. reported a loss of 6.6 billion yen in the half following a 5.3-billion-yen deficit in the year-earlier period. Sales rose to 111.6 billion yen from 72 billion yen. There will be no interim dividend.

Ship Line Results

Meanwhile, Japan Line Ltd. and Kawasaki Kisen Kaisha (K-Line), which both depend a lot on tanker operations, suffered deficits for the first half but four other shipping lines registered net profits.

The four lines are Nippon Yusen Kaisha (NYK), Mitsui O.S.K. Lines, Yamashita Shin-Nihon Kisen Co. and Showa Kaiun Co., which all benefited from a recovery in regular liner and container service, reflecting higher exports to the United States and Europe, they said.

Japan Line suffered a net deficit of 1.6 billion yen, against a net profit of 2.1 billion yen in the same period of last year, while K-Line had a net deficit of 3.7 billion yen compared with a deficit of 4 billion yen.

Net profit at NYK rose to 3.2 billion yen from 211 million yen in the same period of last year, those at Mitsui O.S.K. rose to 4.5 billion yen from 1.5 billion yen, Yamashita Shin-Nihon rose to 1.8 billion yen from 1.7 billion yen.

Net profit at Showa Kaiun declined to 142 million yen from 747 million yen because its container division was smaller than those of other lines.

FINANCIAL NEWS AND NOTES

Honda Displaces VW in U.S.

Honda has shoved Volkswagen into fourth place in U.S. foreign car sales during October to give Japanese automakers an unprecedented 1-2-3 lock on the import market. Honda reported record sales of 16,814 cars for the month, an 85-per-cent gain from a year ago, to finish third in import sales. VW, which for 30 years held the No. 1 spot, was fourth with 13,170—an 11-per-cent decline from the year before. Toyota remained solidly entrenched in the No. 1 spot with sales of 33,737 cars in October, up 51 per cent from a year ago. Datsun stayed in second place with sales of 27,842, up 36 per cent. Total import sales last month were 136,600, up 24 per cent. For the year to date, Toyota has sold 292,602 cars, a 19-per-cent gain. Datsun sales of 234,668 were up 3 per cent. VW is third with 167,361 sales, off 31 per cent. Honda is fourth with sales of 132,133, a 36-per-cent increase. Total U.S. import sales in the first 10 months of 1976 are 1.26 billion units, off 9 per cent.

Rhône-Poulenc Sees Balance

Rhône-Poulenc, the French chemical and textile group, expects its consolidated results to be balanced this year, compared with a loss of 879 million francs (about $176 million) in 1975. President Renaud Gillet says the company will pay an unchanged net dividend of 6 francs per share. (In 1974, the group posted net earnings of 1.04 billion francs and paid a net dividend of 10.50 francs.) The group's turnover this year should amount to 21.370 billion francs, up from 17.875 billion. Of this total, exports and sales by foreign affiliates will have accounted for 59 per cent, up from 54 per cent last year. Results of the chemical sector will be "positive" this year, Mr. Gillet says, while the deficit of its film division will be narrowed. Although the textile sector improved, it will still show a deficit of about 530 million francs, he adds, noting that four textile plants were shut since 1973 and that the work force was reduced by 21 per cent. Group investment this year will total 1.36 billion francs, down from the 1.97 originally forecast and from 1.85 billion in 1975. But the group has an "ambitious" investment program for 1977 and 1978, he says.

Canadian Firms Cut Spending Plans

Major Canadian corporations have cut back sharply their capital spending for 1976, but they are contemplating a significant increase in outlays in 1977. A survey conducted in October by the Department of Industry, Trade and Commerce covering about 300 large companies shows that the 1976 increase is now likely to be only 12 per cent—far short of the 23-per-cent advance predicted in an April survey. About 10 per cent of the 1976 increase is accounted for by higher prices. For 1977, the survey predicts that capital outlays by the large corporations would total $Can. 18.23 billion, up 17.5 per cent from 1976. About 8 per cent of the anticipated 1977 increase will result from higher prices, the government says. The companies covered in the survey account for about two-thirds of Canada's non-agricultural business outlays on new buildings, machinery and equipment.

Pechiney Signs Anti-Pollution Accord

Pechiney Ugine-Kuhlmann has signed an agreement with the Environment Ministry to spend 230 million francs (about $46 million) over the next three years on measures to counter pollution. The agreement covers copper, aluminum and chemical activities of the group and adds to a similar agreement signed in July last year for its special steels and electro-metallurgy activities. Chairman Philippe Thomas says that as a result of the two agreements Pechiney is committed to spending over 100 million francs a year in the next three years to improve the environment.

Threatened Withdrawals Worried Officials

Why Data Withheld on Arab Deposits in U.S.

By Dan Morgan

WASHINGTON, Nov. 10 (WP).—Fearful about Arab threats to withdraw their deposits in U.S. banks, a united front of bankers, government officials and several key senators last year blocked congressional efforts to obtain detailed information about these deposits, material just made public shows.

The futile, months-long attempt by the Senate multinational subcommittee to obtain the deposit figures is described in the record of five closed hearings attended by government and banking officials from July to October 1975. The hearing record, which is to be made public soon, was made available this week.

The detailed information was never obtained because all the major U.S. banks refused to provide it and Sen. Charles Percy, R-Ill., led a successful fight to end the inquiry on grounds that it could "do a great injustice to our own national interest."

According to generalized information on deposits published by the Federal Reserve Board, the total deposits of the Middle East oil exporting countries in U.S. banks and their branches abroad was around $19 billion on June 30.

The subcommittee records show that the bankers' refusal to disclose the information on the size of the deposits of individual countries had the persistent support of the Fed and Senators Percy and Stuart Symington, D-Mo. They also reveal a sharp split between those senators and subcommittee chairman Frank Church, D-Idaho, who argued that foreign policy considerations justified getting the information deemed confidential and privileged by the banks.

During executive sessions with top banking officials, the officials repeatedly warned that Arab countries would withdraw their funds if the size of the deposits was revealed.

However, Jerome Levinson, chief counsel of the subcommittee, warned that the concentration of Arab money in a few New York banks gave those countries power "to create an extremely serious disturbance in the U.S. financial system. . . If that occurs, the questions will be asked: How did it occur without anyone knowing that this situation was allowed to develop?. . . Why didn't the Congress know it was developing?"

U.S. Plan Would Raise Big Firms' Taxes

By Peter Milius

WASHINGTON, Nov. 10 (WP).—The Treasury Department has published proposed regulations that a government expert says could raise the taxes of multinational corporations "hundreds of millions of dollars."

Whether they actually will be adopted, or whether the corporations will succeed—as they have before—in having them withdrawn, remains to be seen. If adopted, U.S. taxes paid by the companies would rise between $500 million and $750 million.

The regulations deal with what is called the allocation of deductions between the domestic and foreign operations of multinational companies.

Take, for example, the considerable research and development expenses of drug and chemical companies, two of the industries most involved in the allocation controversy.

Currently, the majority of drug and chemical companies allocate most or all of their research and development expenses to their domestic operations. This makes their domestic profits look lower and their foreign profits higher than would otherwise be the case. Because of the way the foreign tax credit works, it also has the effect of lowering both their U.S. and total, worldwide taxes.

The proposed regulations would make them divide such expenses more evenly between domestic and foreign operations in proportion to such things as gross domestic and foreign income, or domestic and foreign sales.

The theory is that the research was a cost not just in their domestic business, but the foreign business as well, and that part of it should be counted that way. The effect would be to lower foreign profits and raise both their domestic profits and U.S. taxes.

The proposed regulations would require similar splittings of other basic corporate costs—interest and administrative expenses, for example.

The allocation issue has been around for at least 11 years. The Treasury actually got to the point of publishing proposed regulations in 1973, then withdrew them, partly under pressure from the affected companies. Now the proposals have been somewhat softened, and a public hearing has been scheduled for Dec. 16.

Bonn Approves Incentives for Some of Jobless

BONN, Nov. 10 (AP-DJ).—The West German Cabinet approved today a 430-million-deutschemark program to reduce longer-term unemployment by offering incentives and financial help to workers to relocate geographically or change employment fields.

Unemployment is a sensitive domestic issue, with 943,700 persons, or 4.1 per cent of the workforce, reported jobless in October, and the approach of winter likely to bring increases.

The new program will apply to persons who have been jobless for six months. They will be eligible for incentives ranging from 500 DM to 1,400 DM, depending on length of unemployment, if they take a new job or join a training program that requires relocation, reduces their gross income by more than 15 per cent in comparison with their last job or involves a change in type of work that brings no greater income.

The government said that the new program brings to 1.6 billion DM the amount of planned 1977 spending specifically aimed at reducing unemployment.

W. German Price Index

WIESBADEN, West Germany, Nov. 10 (AP-DJ).—The Federal Statistics Office said today that the West German consumer price index in October was 3.8 per cent higher than in October, 1975. The index stood at 141.5, up 0.1 per cent from 141.4 in September, compared with 136.3 in October, 1975.

Gold Rises $4.50

LONDON, Nov. 10 (AP).—A sudden rush of buyers sent gold prices in London up by more than $4.50 an ounce today to its highest level since early this year. Dealers reported buying by the Far East, speculators and industrial users of gold.

Stock Prices Decline For 4th Day in a Row

NEW YORK, Nov. 10 (UPI).—New York Stock Exchange prices, virtually unchanged until early afternoon today, fell across a broad front in late trading to move lower for the fourth straight session.

The Dow Jones industrial average was down 6.73 points to 924.04. Volume totaled 18.89 million shares, compared with 19.2 million shares yesterday. Declines led gainers by about 830 to about 550.

Analysts said two news developments were to blame for the selling. The Commerce Department reported October retail sales were little better than revised September figures and actually lower than the original prior month figures, and General Motors announced rebates on Chevrolet Vegas and Chevettes and Pontiac Astres.

The two taken together, one analyst said, caused concern that consumer spending in general and auto buying in particular might be pointed lower.

General Motors, on news of the rebates, fell 1 3/4 to 69 and Chrysler, which late yesterday announced one-week closings of two assembly plants to balance Volare and Aspen inventories, gave up 1 5/8 to 17 3/8.

Eastman Kodak picked up 3/4 to 84 and Polaroid declined 1 1/4 to 35. A British appeals court canceled a High Court order banning Kodak from instant picture camera and film sales in Britain before a patent suit brought against Kodak by Polaroid is decided.

Interstate Brands gained 1 3/4 to 15 1/4 and DPF eased 1/8 to 6 3/8. DPF, which already owns 49.5 per cent of Interstate Brands, said it plans to buy another 30.5 per cent for $15.50 a share.

Centronics Data, down 1 7/8 at one time, rose 1/4 at 23 1/4. The company said it expects record second fiscal quarter earnings.

Semiconductor stocks were weak all day, with Texas Instruments slipping 4 3/8 to 98 1/2, National Semiconductor 2 1/2 to 25 1/4, Motorola 1 1/2 to 48, Fairchild Camera 1 5/8 to 39 1/8 and—over-the-counter—Intel 1/2 to 47 1/2. Memorex was off 2 7/8 to 17 on the Pacific Stock Exchange following a halt for an imbalance.

American Stock Exchange prices closed lower in moderate trading. The Amex index gave up 0.48 to 98.13.

American Motors Loss Is Record

DETROIT, Nov. 10 (AP).—American Motors, still caught in a small-car sales slump, reported today it lost a record $51.1 million in the July-September quarter to finish its fiscal year with a net loss of $46.3 million.

The quarterly loss was the steepest for any three-month period in its history, surpassing the $47.8 million red ink reported during the first quarter of 1975.

However, the loss for fiscal 1976, which ended Sept. 30, was only the third sharpest. The smallest of the U.S. automakers has now lost $73.8 million in its last two fiscal years.

The company said in the fourth quarter it wrote off $10 million to restructure automotive operations, $15 million of deferred income taxes and $5 million due to the devaluation of the Mexican peso.

Corn, Soybean Crop Estimate Up in U.S.

WASHINGTON, Nov. 10 (Reuters).—The Department of Agriculture raised its estimates of 1976 corn and soybean crop production based on Nov. 1 crop conditions.

The department estimated corn production at 6.064 billion bushels, up from the 5.865 billion bushels estimated Oct. 1. The latest forecast is also above the record harvest of 5.7669 billion bushels in 1975.

For soybeans, the estimated put output at 1.253 billion bushels, up from the 1.2497 billion bushel estimate Oct. 1, but below the 1.521 billion bushels actually harvested in 1975.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. i—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

[S]pecial Car Plates [P]rohibited by France

PARIS, Nov. 10 (AP).—Interior [Mi]nister Michel Poniatowski has [ba]nned any further issue of single-[nu]mber plates, such as 1 KK 75. The newspaper Le Figaro [co]mmented that such plates, [oft]en known as "archbishop's [pla]tes," were seen by the public [as] meaning the owner had polit[ica]l contacts and that police [oft]en were reluctant to give [par]king tickets to owners of such [pla]tes.

EGORO CORPORATION OF AMERICA

and

PARK BRIDGE CORPORATION

are pleased to announce that they have combined their activities under the name of

PARK BRIDGE EGORO CORPORATION

The Board of Directors will be composed of the following:

BARON ERIC DE GOLDSCHMIDT ROTHSCHILD
Chairman

MR. EDUARD WALLACH
Vice Chairman

DR. HANS ADLER
BARONESS RENEE DE BECKER
MR. PATRICK DE GOLDSMITH
MR. ERIC A. HANAU
MR. MAXIMILIANO DE HENCKEL
MRS. EDITH HIRSCH
MR. RENE LOEB
MISS MARIA PANNY

The following have been elected as officers:

BARON ERIC DE GOLDSCHMIDT ROTHSCHILD
Chairman of the Board

MR. EDUARD WALLACH
Vice Chairman

MR. ERIC A. HANAU
President

MR. RENE LOEB
Secretary and Treasurer

BARONESS RENEE DE BECKER
Vice President and European Representative

DR. MANFRED MEYER
Assistant Treasurer

MISS MARIA PANNY
Vice President

MRS. NANCY CORLETO
Assistant Secretary

Can you name the 12TH largest bank in the U.S.?

We're a worldwide banking system with $9.2 billion in deposits, which includes $2 billion in personal savings.

We have $541 million in capital, $80 million in reserves, and $10.5 billion in assets.

We have 316 branches throughout New York State and 29 offices throughout the world. Have you guessed our name yet?

We have our international operations based in New York City's financial district, with key people in the world's major money centers. We have extensive experience in foreign exchange and in foreign currency management. Do you need another clue?

We do business with half of the leading U.S. national and multinational companies on the "Fortune 500" list. And over 750 banks in more than 130 countries.

Now do you know who we are?

We're the Marine Midland Bank.

Ranking based on deposits as of June 30, 1976

INTERNATIONAL EXECUTIVE OPPORTUNITIES

Management Opportunities

Indonesia

This progressive Houston based international oil company is offering unique career opportunities for talented, qualified individuals. Primary responsibilities will include the opportunity to develop and implement systems and procedures required to insure coordination and smooth execution of production, processing, transportation and sale operations of a multi-billion dollar 20 year LNG trade.

Successful candidates will have 10 years international management experience in joint petroleum operations and the ability to interface well with multiple organizations in a developing country.

Commercial and Administrative Manager

Your proven background in business and administrative systems and controls should include demonstrated capability in complex contract administration, systems design/analysis, financial planning and control and auditing.

Planning and Scheduling Manager

Your proven background in petroleum product supply distribution operations should include systems design analysis, production supply, delivery management and shipping operations.

Of course these challenging positions are family status and are accompanied by excellent compensation and benefits package.

These positions are open NOW. Please send resume including salary history in confidence to:

Box D. 5,553, Herald Tribune, Paris.

An Equal Opportunity Employer m/f

MANAGING DIRECTOR

Visnews Limited

Visnews is the leading supplier of international newsfilm to the television industry throughout the world. The present Managing Director Mr. Ronald Waldman retires in May of next year and his successor is being sought.

Although the Company has its headquarters in London, the Board sees this as an international appointment and is prepared to offer a level of compensation that will attract the best possible candidates within the television industry, whether from the U.K. or from overseas.

Essential requirements are:

- experience in managing a profit centre within the industry
- a demonstrable track record in *achieving targets*
- direct exposure to financial and corporate planning and to product development within a technical environment

This is an international appointment involving a fair amount of world travel and it is more than likely that the successful candidate will be cosmopolitan in outlook and will speak more than one language.

Written applications, including a complete resumé, should be sent to:
Andrew Muir (MD/IHT), Spencer Stuart and Associates Ltd., Brook House, 113 Park Lane, London W1Y 4HJ,
who are advising on this appointment.

Spencer Stuart and Associates Ltd.
Management Consultants

EXECUTIVES AVAILABLE

ENTREPRENEURIAL CONSULTANT

MBA; European; 4 Languages; 6 of 17 yrs. in Consulting. Professional competences: International Business/Marketing/Policy + Strategy/Finance/Organizational Design/Info. Systems. European+Latin American *multidisciplinary experience: seeks* international assignment.

Reply: Box 31,755, I.H.T., 28 Gt. Queen St., London WC2.

Are you going to build or rebuild a Hotel?

SAVE MONEY

Enjoy a graduated architect-Hotel manager in fixed or liberal contract to survey your construction.

20. To hear the office news.
(An international call means business.)
"Long Distance is the next best thing to being there.

BE A NEW SUBSCRIBER *and save up to* 47% of the newsstand price.
(Depending on your country of residence.)

International Herald Tribune newsstand prices are always much higher than subscription rates. So when you take advantage of the *Introductory 25% Discount* on a 6-month subscription, you find that, compared to what you have been paying at the newsstand, you save as much as 47%. After the specific introductory period chosen, regular renewal rates will be applied.

These are the special rates after deduction of the introductory offer.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. f—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

*Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

European investment in U.S. securities.

A special report by the International Herald Tribune during the week of Nov. 29, 1976.

European investments in stocks, corporate bonds, government bonds and notes now represent almost 70% of all foreign portfolio investments in the United States.

Stocks constitute the most important part of these investments. In 1975, the U.S. Department of the Treasury estimated European investments in U.S. stocks at $26 billion, an increase of almost 50% over 1974.

To study the reasons for the growing interest on the part of Europeans in the U.S. market, the International Herald Tribune plans to publish for the first time, during the week of November 29, 1976, a special in-depth report entitled "European Investment in U.S. Securities."

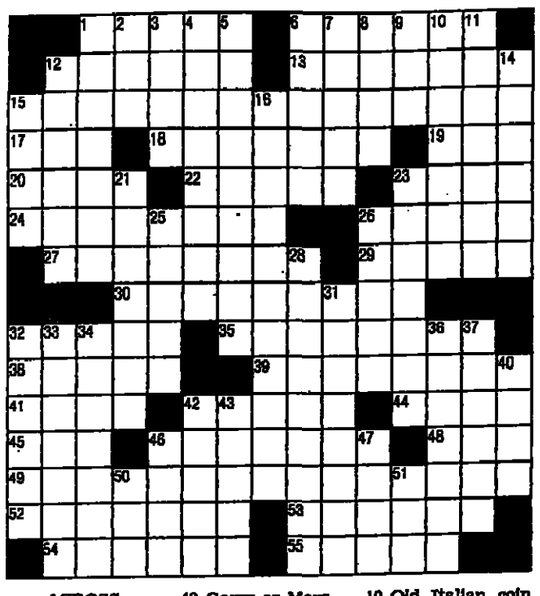
An important section of this report will be devoted to the kinds of investments that appeal to Europeans. At the same time, the report will look at American securities listed on the European exchanges. The report will also examine attitudes toward corporate profits in the U.S. contrasted with views in Europe.

In addition to regular distribution with the newspaper, this report will be sent by the International Herald Tribune to:

900 key investment professionals who act as either heads of U.S. investments, portfolio managers of U.S. securities or analysts with responsibility for following U.S. companies at the major financial institutions in Europe.

800 Eurobond and Eurocurrency money managers in Europe.

300 of the most important directors of business, finance and government organizations throughout the Middle East.



U.S. corporations or European financial institutions interested in advertising information should contact:

BOOKS

NEW LIVES

Survivors of the Holocaust Living in America

By Dorothy Rabinowitz. Knopf. 242 pp. $8.95

Reviewed by Christopher Lehmann-Haupt

NATURALLY, it is painful in the extreme to have to contemplate once again the horrors of the holocaust and the 6 million. Even when fresh details evoke fresh tears one is only reminded of the impotence of weeping. Still, in "New Lives: Survivors of the Holocaust Living in America," it is absolutely necessary for Dorothy Rabinowitz to offer up new or forgotten snapshots of the horror—liberated inmates of Belsen screaming in fear when British doctors tried to approach them with needles for intravenous feedings; Gen. George Patton moving away from an inspection party to vomit at the sights in a labor camp at Ohrdruf, near Gotha.

For the need to remember is the overriding theme of "New Lives"—remembering for the sake of bearing witness, or maintaining vigilance, or fueling anger, or simply keeping one's perspective. And in order to dramatize how her survivors have dealt with their memories, it is essential that the author bring them to life for her readers as well.

Dramatization is the key for Miss Rabinowitz, who is a native New Yorker, a freelance journalist and book reviewer and the co-author of "Home Life," a book about old people in institutions. She gives us no statistics in "New Lives"—no dispersal percentages, no demography. Instead she tells the stories of representative individuals—Jacob Korman (a pseudonym) and Stella, two witnesses at the deportation hearings of Hermine Braunsteiner Ryan, the former vice-commandant of the Maidanek and Ravensbrück concentration camps who turned up after the war as a New York City housewife; Abe Flakier, Leon Jolson and Emil Wolf, all of whom have managed, with wildly diverging degrees of material and spiritual success, to rebuild their lives in the new world that the United States has offered.

These stories are recounted with enough particularity and suspense to engage us in their human drama completely. For instance, early in "New Lives" we are introduced to Leon Jolson just as he has arrived in New York City in 1947 and is about to apply to the recouping of his fortunes the principles of audacity that led to his survival in Europe. (Once, when Jolson was hiding in a train full of gentile Polish prisoners, the SS, suspecting there was a Jew on board, commenced a search for the one man who would be circumcised. Instead of trying to hide, Jolson rushed forward with his hand on the buttons of his trousers when the SS officers arrived at his car, and was at once waved aside as too eager to be worth the trouble of checking.)

At the same time, Miss Rabinowitz writes in a highly reflective, almost ironic, style. (Jolson "saw himself . . . as the man he had been and could yet be again, a man empowered by the experience of survival to even more than he had been; it was in the nature of the holocaust that it bred extremes, and those who survived it had absorbed extremity in their bones.")

The effect of this style is to alienate us from its content (in the Brechtian sense) and thus to universalise the particulars. So what we end up with is not so much a gallery of case studies as a series of illustrations, and these illustrations cover the major preoccupations of holocaust survivors in the United States.

Indeed, by the time Miss Rabinowitz has finished she has touched on all the major issues that have stirred survivors over the last three decades—from the debate over whether it was right to purchase products manufactured in postwar West Germany, to the insult to the honor felt by survivors at the accusation leveled by certain theorists that European Jews failed to resist the Nazi onslaught. Yet to repeat: Miss Rabinowitz's illustrations always remain the people.

Perhaps the best illustration of this is Stella, a survivor of Maidanek and Skarzysko who now lives in New York City. An impulsive person who refuses to analyze her motives (it was an impulse that led to her escape from Skarzysko), Stella decides suddenly in 1974 not only to return for a visit to her native Poland, but also to go and see what remained of Maidanek. Once there, she soon found herself standing before one of the crematoria, which to this day remains filled with human ash as to remind posterity of what happened there.

Suddenly, Stella crossed the small space behind the spectators' railing and crawled into the oven door to fill an envelope with the ashes. For a few terrifying moments she found herself stuck in the door, but with the help of a friend she finally wriggled free with her memento mori. When asked by shocked friends back home in Forest Hills Gardens why she had done such a thing, she shrugged and said that she didn't know.

But we know. Even a fictional novelist would not have dared to write such a scene, but in "New Lives" it is entirely plausible, and Dorothy Rabinowitz makes us understand. One has to recall the horror; one has to go back. Unless one begins with the holocaust in mind, the 20th century is meaningless.

Christopher Lehmann-Haupt is a book reviewer for The New York Times.

BRIDGE — By Alan Truscott

Every expert declarer knows in theory that if only one distribution of the opposing cards will permit the contract to succeed, that distribution should be assumed. But in practice this is not so easy. If the distribution is an unlikely one the declarer may not think of it in the heat of battle, and if he does he may not exert himself to play for a long shot.

With this clue in mind, the reader who likes to test his skill in dummy play should cover the East-West hands shown in the diagram and plan the play in five diamonds. West, who has bid clubs and hearts, leads the heart king followed by the club king. East has raised hearts enthusiastically and eventually doubled five diamonds.

South might have sold out to two clubs, fearing that the opponents had an undiscovered heart fit. However, he reopened with two diamonds, and East was able to find hearts. Four hearts would have failed by one trick, since the defense can take a trick in each suit by playing spades quickly, but North persevered to five diamonds, which East doubled.

The contract would have been hopeless if West had led the club king, but the actual lead of the heart king followed by the club king left an interesting position. South was now in a position to make the contract, since the gods had placed the East-West cards in the only fashion that would help them.

South had to assume in the first instance that the spade ace was on his right and that the clubs were divided six-one. With any other distribution, the defense would have no trouble in taking at least three tricks. Nor the contract to have a chance, West had to be entryless.

Experiment will show that there is no way to divide the spades five-one that offers any hope. The declarer must be able to make use of the spade suit to get rid of losers from the dummy, and should have played for a doubleton J-10 of spades on his left.

On this reasoning, the declarer has now built up a hypothetical West hand that happens also to be a factual picture. Clinging to this faint possibility, he should therefore lead to the diamond king in dummy and finesse the diamond jack. If West has the spades, four hearts and six clubs he must have a singleton diamond, not a doubleton.

After drawing trumps, the declarer then leads a trump honor and is rewarded. By pinning the J-10 with his honor he makes four spade tricks, and discards two club losers and one heart loser from the dummy. He would still have had one trump in his hand to deal with dummy's last heart.

If South had found this play, East would have had reason to complain about the opening lead. But the declarer failed, and North firmly pointed out the unfortunate failure to take advantage of a distributional gift from the gods.

Palmer Gets Cy Young Award a Record 3d Time

NEW YORK, Nov. 10 (UPI)— Palmer, the Baltimore Orioles right-hander who has won games in six of the past seven seasons but was not selected to the All-Star team this year, achieved his niche in baseball history today by becoming the first American League pitcher to win the Cy Young Award three times.

National Leaguers Tom Seaver of the New York Mets and Phil Palmer Sandy Koufax of the Los Angeles Dodgers are the only pitchers to win three Cy Young Awards.

Palmer, whose 22 victories topped the American League this year, won the league's Cy Young for the second straight year, edging Mark Fidrych, the Detroit Tigers' rookie, by 57 points. Palmer, who also won the Cy Young in 1973, was named first on 19 ballots, second on four and third on one by the 24-member panel of the Baseball Writers Association of America Inc. to receive a total of 168 points. Fidrych received five first-place votes, seven seconds and five thirds for 51 points. Frank Tanana of the California Angels was a distant third with 18 points.

Others drawing votes were New York's Ed Figueroa (12 points), Boston's Luis Tiant (10), Oakland's Vida Blue (8), Minnesota's Bill Campbell (7), Oakland's Rollie Fingers (1) and Baltimore's Wayne Garland (1).

Not Surprised

"The Cy Young Award is something you strive to win, especially when you've done it before," said Palmer, who did not seem surprised that he had won again. "Nobody else in the American League has ever won three before and it's nice to know you're in the same company with great pitchers like Sandy Koufax and Don Sutton, even though I don't think I'm that same kind of power pitcher."

Palmer said that one of the keys to his success has been his transition from fastball pitcher to control pitcher.

"I used to be strictly a fastballer," Palmer said. "Now I can use a changeup, curve ball, slider and fastball and mix them up pretty well. I also try to take advantage of the defense of the Orioles and try not to walk too many."

With three Cy Youngs behind him, Palmer said he has only one more goal in baseball.

"I'd like to play on a world championship ballclub again," he said. "I've played on two already, but you never appreciate it as much when you're young."

Palmer, 31, started more games (40) and pitched more innings (315) than any other Al hurler in 1976, while compiling a 22-13 won-lost mark. His six shutouts and 23 complete games ranked second in the league and his earned-run average of 2.51 was fifth best. He also struck out 159 batters.

Since 1970, Palmer has won 20 games every year except 1974, when he was sidelined most of the season with a strained nerve in his pitching elbow.

Irked by Johnson

About the only low moment of Palmer's 1976 season was his failure to be picked for the All-Star team by AL manager Darrell Johnson. At the time of the selections, Palmer was only 10-8, but had openly expressed his desire to pitch in the game.

"Johnson proved what kind of a manager he was by the way he handled his pitchers in the World Series last year," Palmer said after being passed over by the soon-to-be-fired Boston Red Sox skipper. "He's an idiot and maybe this is why the American League never wins an All-Star game."

Although failing to become the first rookie to win the Cy Young Award, the colorful Fidrych, whose mound antics set attendance highs in nearly every American League park this year, is almost certain to be named rookie of the year. The 22-year-old right-hander was 19-9 for the fifth-place Tigers and posted the league's lowest earned-run average—2.34. In addition, Fidrych led the AL in complete games (24).

It was, however, his antics on the field which endeared Fidrych to thousands who came out to see him pitch. Besides talking to the ball between pitches, he would often run over and congratulate his teammates for making good plays behind him.

Cards-Expos Trade

ST. LOUIS, Nov. 10 (UPI).— The St. Louis and Montreal baseball teams have completed a six-player trade that sent Bill Greif, Angel Torres and Sam Mejias to the Expos in return for Steve Dunning, Tony Scott and Pat Scanlon.

Greif, 25, a right-handed relief pitcher, was 1-5 in 47 games for the Cardinals with a 4.09 ERA and six saves. Torres, 22, a left-handed reliever, was 2-5 in 48 games with the club's Arkansas farm team.

Mejias, 23, is an outfielder who batted .323 at the Cardinals' Tulsa farm club. He saw brief action in St. Louis at the end of the season.

Dunning, 27, is a right-handed pitcher who has moved around since signing with Cleveland in 1970, playing for the Texas Rangers, Chicago White Sox and California Angels. He was 2-0 for the Expos' Denver farm team and 2-6 with Montreal after being called up last May.

Scott, a 25-year-old outfielder, played for new Cardinal manager Vern Rapp last season at Denver. He batted .311 and stole 18 bases.

Scanlon, an infielder who also played for Rapp at Denver last season, batted .308 with 18 homers and 78 runs batted in. He also hit .185 in 11 games with the Expos.

NHL Islanders Avenge Defeat by Red Wings

UNIONDALE, N.Y., Nov. 10 (UPI).—The Detroit Red Wings said what can be considered a hockey game on Oct. 22 when they embarrassed the then-winless New York Islanders, 5-0, "Now we know how the Islanders felt," said Detroit center Dennis Hextall following last night's loss to the Islanders. "Everything we did to them that night they did to us tonight. Across the pucks all bounced our way in Detroit, they all bounced against us here."

"It hurts," added veteran defenseman Terry Harper. "Maybe it knocked us into realizing that we can't expect to make mistakes against a team like the Islanders and still think we can win. I guess it teaches us a lesson."

The Islanders got goals from seven players, including two from Bob Bourne, and finished with 40 shots against Detroit goalie Jim Giacomin, who entered the game with a league-high three shutouts and a 2.13 average.

The Islanders managed six breakaways against Giacomin but the Detroit goalie managed to stop four of them, including a third-period solo by Bourne which gained the third-year center of his hat trick.

"You can't get discouraged with a loss like this," Giacomin said. "You can't downgrade a team because of one bad game. We have been playing well and maybe we were just due for a shellacking. The Islanders are a great team. Remember, they're battling for first place and we're trying to get third."

Detroit got its only goal in the second period on a power play by Marcel Dionne and trailed 2-1 after one period. But the Islanders scored three goals in each of the second and third periods, by Bryan Trottier, Jude Drouin, Bob Parise, Denis and Jean Potvin and Clark Gillies joining Bourne in the scoring column.

"We just haven't got enough depth to play like we did tonight and expect to win," said Detroit assistant coach Billy Dea. "We've got to have 18 guys going all the time if we want to win, not four or five like tonight and the other 12 out for a stroll.

"But when you have a young team like ours you can't expect 80 perfect games."

Capitals 4, Canucks 2

At Landover, Md., Washington took a 3-0 first-period lead on goals by Doug Patey, Mike Lampman and Gerry Meehan, then held on for a 4-2 victory over Vancouver.

The Capitals got solid goal-tending from veteran Ron Low, who made 34 saves as the Caps were outshot, 36-22.

The Caps managed to hold their 3-0 lead through the second period, despite playing a man short for eight consecutive minutes when Tony White was assessed a double-major penalty.

The Canucks came back early in the final period on goals by Rick Blight and John Gould, but were unable to get any more shots past Low, despite numerous opportunities.

Guy Charron scored an empty net goal for the Caps after the Canucks lifted goaltender Cesare Maniago.

Canadiens 3, Blues 1

At St. Louis, Pete Mahovlich and Steve Shutt scored two goals each to lead Montreal to an 8-1 victory and snap a St. Louis home winning streak at six games.

Mahovlich scored on a power play with a 15-foot shot and took a pass across the crease from Larry Robinson for the fifth Montreal goal at 12:09 of the second period. Shutt, the leading scorer in the league, scored his 17th and 18th goals of the season.

Robinson, Rejean Houle, Yvan Cournoyer and Guy Lafleur also scored for the Canadiens against St. Louis goalie Ed Staniowski.

The only goal by the Blues past Ken Dryden was on a deflection by Larry Patey of a shot from the point by Rod Selling.

Czech-German Soccer

PRAGUE, Nov. 10 (UPI).— Czechoslovakia will meet West Germany in a friendly soccer match Nov. 17 at Hannover.

NBA Nuggets Remain Undefeated

DENVER, Nov. 10 (UPI).— Denver coach Larry Brown has lots of confidence in the Nuggets, but "I would have thought it was crazy if anyone had said we would win our first eight," Brown said following an NBA 123-117 victory yesterday over the Golden State Warriors.

"It's hard for anybody to envision being 8-0 in a league like this. It's just tremendous, really tremendous. I hope it never stops."

Despite a 43-point performance by Warrior guard Phil Smith and trailing by as many as 14 points in the opening period of play, the Nuggets fought back to a four-point halftime lead, 61-57.

Center Den Issel, playing 36 minutes, hit 13 of 21 field-goal attempts and added eight free throws for a season-high 34 points. Guard David Thompson added 25 for Denver, including 17 in the second half.

The Nuggets were never really able to shake the Warriors, however, mainly because of Smith's play. The 6-4 guard hit 20 of 30 field-goal attempts and added three free throws.

Forward Jamaal Wilkes added 17 points and center Robert Parish had 14. Rick Barry, who leads the Warriors with a 23-point average, scored only 9 points, but spent the evening feeding off the ball to Smith.

"When a man gets a hot hand, you've got to give him the ball," said warrior coach Al Attles, whose team slipped to a 3-5 mark. "Rick plays the game the way it should be played. The man was hot, and you have to get him the ball.

The Nuggets, off to their best start in 10 seasons, including 9 in the old American Basketball Association, still are 7 short of the old NBA record of 15 set by the Washington Caps at the start of the 1948 season.

Trail Blazers 119, Kings 102

At Portland, Ore., the Trail Blazers, with second-half help from guards John Davis and Herm Gilliam, outscrapped Kansas City, 119-102.

The Blazers, the league's highest-scoring team and leader of the NBA Pacific Division, scored their fifth straight victory for a 7-1 record while the Kings dropped to 5-5 for the season and remain in second place in the Midwest Division.

Knicks 106, Bullets 97

At New York, Mo Layton and Walt Frazier led a drive midway through the second half which enabled the Knicks to break away from a 68-68 tie and go on to a 106-97 victory over Washington.

Layton scored 8 of his 14 points and Frazier 6 of his game-high 23 as the Knicks outscored the Bullets, 20-10, to go ahead 88-78 with 3:25 to go. The Bullets never got closer than six points after that.

Braves 121, Lakers 116

At Buffalo, all-star guard Randy Smith, breaking out of a scoring slump, scored 8 points in overtime and the Braves stormed back from a 22-point deficit to beat Los Angeles, 121-116, in a game enlivened by a fourth-period fight.

The Lakers, who led 57-51 at halftime, used Kareem Abdul-Jabbar's 10 points, 10 rebounds and shot-blocking to stretch their lead to 89-87 five seconds before the third period ended.

Spurs 138, Sonics 114

At San Antonio, forwards George Gervin and Larry Kenon combined for 47 points and San Antonio overpowered Seattle, 138-114.

Gervin hit 24 points and Kenon scored 23 as the Spurs took the lead on their second possession and never trailed, leading by 18 points near the end of the first quarter and by 30 points in the third quarter.

Cavaliers 111, Bucks 99

At Milwaukee, Campy Russell scored 25 points and Austin Carr 22 to lead Cleveland to their 9th victory in 10 games, 111-99, over the Bucks.

The Bucks, playing without injured Bob Dandridge, lost their fourth straight and have only 2 victories in 11 games.

Jazz 110, Nets 99

At New Orleans, guards Pete Maravich and Gail Goodrich combined for 52 points and sparked a fourth-quarter rally to give the Jazz a 110-99 victory over the New York Nets.

Trailing by one point at the start of the fourth quarter, the Jazz outscored New York, 36-24, to move their record to 6-3.

Maravich finished with 24 points, 18 of them in the second half, and Goodrich had 28 points, 15 of them in the fourth quarter.

Rockets 111, Bulls 92

At Chicago, Mike Newlan scored 25 points to lead Houston to a 111-92 victory over the Bulls.

It was Chicago's fifth straight loss. The victory snapped a two-game losing streak for the Rockets.

In Hong Kong Tennis

Nastase Survives Strong Bid by Newcomer

HONG KONG, Nov. 10 (UPI). Ilie Nastase, a master of the placement shot, met surprising resistance today from hard-hitting but little-known American Butch Waltz before sweeping to a straight-set victory in the second round of the $75,000 Hong Kong Classic International Tennis Tournament.

Fourth-seeded Corrado Barazzutti of Italy was not as fortunate, going down in straight sets to Henry Paister of the United States, 1-6, 3-6, in the major upset of the day.

The top-seeded Nastase won, 7-6, 6-2, against 21-year-old Waltz, who turned professional this year. The young American had his Romanian opponent running all over the court and fighting for every point.

"I'm too tired," Nastase, who is still nursing a fever, said later. "I haven't played for a whole week. It is too difficult at this stage to say anything about my chances in this tournament."

"Brilliant Game"

He acknowledged that Waltz played a "brilliant game" and predicted a bright future for him.

Waltz, who is reputed to have one of the fastest serves in the game, matched Nastase stroke for stroke in the first set, with neither player breaking serve. But in the tiebreaker, Waltz committed a costly double-fault to give a 4-2 lead to the Romanian.

Once ahead, Nastase played a solid defensive game and polished off the set by forcing the American to hit out a righthand cross-court after a 21-stroke rally.

Having established the lead, Nastase returned to his usual self and at one stage even had Waltz laughing at his antics.

Nastase broke into an early 4-1 lead in the second set by cashing in on some errors by Waltz, who missed a chance to break Nastase's service in the sixth game. When leading 15-40, he netted or hit out four extremely simple shots to give the game to his opponent.

Waltz managed to hold his service in the next game to reduce his deficit to 5-2, but Nastase boomed in with a couple of aces in the next game and took the match with a brilliant backhand cross-court.

In other singles matches, Sashi Menon of India defeated John Whitlinger of the United States, 6-2, 6-4; Paul Kronk of Australia downed John Marks of Australia, 6-4, 6-2; Steve Krulevitz of the United States beat Kim Warwick of Australia, 6-0, 2-1 (retired), and Mike Machette of the United States whipped Brian Fairlie of New Zealand, 6-2, 6-4.

Wightman Cup

LONDON, Nov. 10 (UPI).— Chris Evert, who leads the U.S. bid to recapture the Wightman Cup from Britain, faces Virginia Wade, one of only two players who have beaten her this year, in the opening match tomorrow.

The draw made today pitted the U.S. and British top seeds against each other in the three-day event first contested 53 years ago at Forest Hills. Rosie Casals will take on British No. 2 Sue Barker in the second singles.

Britain has held the cup for the last two years and, with the withdrawal through injury of Billie Jean King, was favored to make it three in a row, a feat the United States has always prevented. The United States has won the cup 37 times and Britain 9.

King, who underwent knee surgery yesterday at Long Beach, Calif., has been replaced by Terry Holladay of La Jolla, Calif. She will meet Briton Glynis Coles in the third singles Friday.

The cup is awarded on a best-of-seven match basis with five singles and two doubles being contested over the three days.

Evert had not been beaten in major competition since April until Wade downed her, 6-2, 6-2, here Saturday to win the Dewar Cup. Australian Evonne Cawley was the only other player to conquer Evert this season.

Daytona, Le Mans Offer Joint Prize

NEW YORK, Nov. 10 (UPI).— The Daytona-Le Mans Trophy, a major new auto racing award totalling $20,000, will be presented by Daytona International Speedway and the Automobile Club de l'Ouest to manufacturers of the fastest U.S. and European cars at the Feb. 5 24 Hours of Daytona race.

A $10,000 check will go to the fastest U.S.-manufactured racing car qualifying for the 24 Hours of Daytona that also enters and races in the 24 Hours of Le Mans. An additional $10,000 will be awarded by the Automobile Club de l'Ouest to the fastest European-manufactured car qualifying for the French race that enters and races in the 1978 24 Hours of Daytona.

N. Ireland Is Defeated By Belgium in Soccer

LIEGE, Belgium, Nov. 10 (Reuters).—Belgium beat Northern Ireland, 2-0, in their European Group Four World Soccer Cup qualifying match here tonight.

The scorers were Van Gool and Lambert.

Close Divisional Races

Playoff Fever Hits NFL Contenders

By William N. Wallace

NEW YORK, Nov. 10 (NYT).— Andy Russell, the Pittsburgh Steelers' linebacker, had to be dismayed the way the Cincinnati-Los Angeles game came out Monday night, the Bengals winning, 20-12, with three touchdowns in the third quarter. But Cedric Hardman of the 49ers was delighted, after his early concern because the Rams so dominated play in the first half.

The Steelers are trying to catch up to their division rivals, the Bengals, who by winning held on to a two-game lead over Pittsburgh. The 35-year-old Russell, playing his last pro season, admits he is scared that the Steelers will not make the Super Bowl after losing four of their first five games.

"What we have to do," he says, "is to stay scared. I worry a lot."

As for Hardman and his teammates, who have lost their last two games, to St. Louis and Washington, the Cincinnati team did them an immense favor by beating Los Angeles.

That left the 49ers only half a game behind the Rams in their divisional race 13 days before those two play each other at San Francisco.

Playoff Pressures

It is the time of year when the pressures on the players of the contending playoff teams go up. Chuck Noll, the Pittsburgh coach who so enjoys pontificating, said the other day, "people don't realize a professional football season is very taxing physically and extremely taxing emotionally. There is the pressure players face when they take the field every week and that's something they have to bear up under. That's one measure of a champion, to be able to do it."

Such pressure brings on the fear that Noll's matured linebacker, Russell, spoke about.

The psyche is of particular interest to coaches who, in November, try to keep the heads of their 43 players together and the bodies, too, if they can. Tom Landry, who has been in pro football since 1949, was talking about why his Cowboys performed so poorly against the Giants on Sunday.

He said, "You can't expect a team to play well after a big game like we had in Washington last week. It's a mark of a good team to win on an off day and we had one today."

The same thoughts were running through the mind of Don Coryell, the coach of the Cardinals, who just got by the Eagles on a similar off day. The week before they had beaten San Francisco in overtime.

St. Louis, one game back, is trying to overtake Dallas, which Coryell admits is "very improbable because of our schedule. We have to win every game we have left, and that would be difficult."

The Cardinals, who may have to go without Terry Metcalf for a while, play the Rams, Redskins, Cowboys and Colts in the next four weeks, while Dallas meets Buffalo, Atlanta, St. Louis and Philadelphia. Seldom are the inequities of the NFL schedule so well contrasted.

Meanwhile, there is Washington, where the Redskins' eminent psychologist, George Allen, predictably said of the 24-21 victory over the 49ers, "We had a gutsy win. It was a game we had to win and we won it. This performance speaks for my team's character. They could have backed off but they didn't."

Chance for Bears

The point is to make the playoffs, either as one of the six divisional winners or as the wild-card qualifier in each conference, American and National. Jack Pardee, the Chicago coach, believes his Bears, who have won four and lost five, still have a chance. "This year," he said, "I think 9-5 will make the playoffs, and usually it's 10-4. So we're not discouraged."

Pardee was speaking of the won-lost expectations for the wild-card teams, the divisional second-place outfits with the best records within their conference.

The mathematical history of the NFL playoff system, which dates to 1970, supported him. Of the 12 wild-card teams over the past six seasons, nine finished at 10-4, one (Cincinnati of 1975) was 11-3, another (Washington, 1971) was 9-4-1, and only one (Buffalo, 1974) had a 9-5 record.

Cleveland 111, Milwaukee 99 (Russell 25, Carr 22; Lloyd 16, Brokaw 16).

Bugner's Hand Injured

LONDON, Nov. 10 (UPI).— British heavyweight champion Joe Bugner told the European Boxing Union today that he would not be able to challenge Spain's Jose Urtain for the European title Dec. 3 in Bilbao because of an injured hand.

In Bears-Raiders Game

Inadvertent Chicago Whistle Continues to Attract Comment

By Dave Brady

CINCINNATI, Nov. 10 (WP).— National Football League Commissioner Pete Rozelle says that Chuck Heberling, whose inadvertent whistle cost the Chicago Bears a touchdown in their 28-27 loss to Oakland Sunday, must be the most embarrassed guy in the world.

"Heberling just blew it, and he admitted it candidly," Rozelle said. "It's a shame. Even Jim Finks [The Chicago general manager] told me he respected Heberling for acknowledging his mistake."

The controversial play occurred early in the fourth quarter with the underdog Bears ahead, 27-21.

Wally Chambers sacked Oakland quarterback Ken Stabler, who fumbled. Chicago's Roger Stillwell picked up the loose ball and ran 40 yards for an apparent touchdown. However, Heberling had blown his whistle, even though the ball was still alive.

"It was an inadvertent whistle," Heberling said after the game. "I blew the whistle when I shouldn't have, so the only thing I could do was give Chicago the ball."

Hurt Chances

The Bears turned the ball right back to the Raiders on an interception. The loss gave the Bears a 4-5 record, hurting their playoff chances considerably.

Heberling's wife, Jane, was cautious about accepting tributes to her husband's integrity. "I hope this is not his death warrant," she said from their home in Ingomar, a suburb of Pittsburgh.

"Art McNally [supervisor of National Football League officials] might be saying, 'Why didn't this dumb jerk wait before telling the press about his mistake.'"

She said she did not know about it because the game was not telecast in the Pittsburgh area. "I was watching the 11 p.m. news with my three sons and that was when I first heard about it," she said. "Then our phone began to ring. I said to myself, I had to be married to one of those . . . one of those honest people. He's so honest.'"

When Heberling came home on Sunday night, she said she asked him. "Why did you blow the whistle so quickly? You had your hand whistle, didn't you?

'Blew the Play'

"He wears one clasped to his fingers instead of on a string around his neck. That way he can take more time to make a decision because he knows he does not have to worry about fumbling for a whistle on a string.

"He said, 'I blew it. I blew the play. I just blew the whistle too soon.'

"I asked him why he told the press and he said, 'I couldn't tell a lie. It would have come out anyhow. No one is without human error.'

"He was not real happy with himself. You can call him this afternoon where he works and he will give you details; he has a meeting this morning."

At the Western Pennsylvania Interscholastic Athletic Association, where Heberling is the secretary, it was reported that he would be in a meeting "all day."

Did the NFL impose a gag?

"When there is an explanation due on a ruling," McNally said, "our officials are instructed to talk to a pool reporter at the game. After that, we think it is best for them to file a report and then let our office handle things. Otherwise, the public might get several different versions in different media.

'Good Referee'

"It is so nice to hear that somebody is admiring Chuck for his honesty," McNally continued. "I talked to him and he was so upset because he figured it caused so many problems. I said to him, 'OK, anybody can make a mistake. Somebody else might not admit it.'

"He's a good referee. It was a human error. You don't crucify a guy for a single mistake. We had a couple calls here in New York from Chicago fans, but there's nothing we can do; it was a judgment call. We had an observer from our office at the game, Jack Reader. He says Chicago had the ball when the whistle was blown."

McNally said there is no provision for fining or otherwise penalizing officials, as there is for players and owners.

Heberling, 50, has been officiating in the NFL for 13 years.

24. Broaden your market.

(An international call means business.)

Long Distance is the next best thing to being there.

Art Buchwald

The Big Loser

WASHINGTON — The biggest loser in last week's election was apathy. For weeks all the pollsters had predicted that apathy in the presidential race this year was going to win by a landslide. When the final returns were in, apathy had been defeated resoundingly.

Buchwald

I went to visit apathy the other day and talk to it about how it blew one of the biggest leads in American political history.

"I'd be lying if I said it didn't hurt," apathy told me. "I wanted to win in the worst way."

"What do you think happened?" I asked.

"I guess my people became overconfident. For weeks the reports came in from every section of the country that Americans were apathetic and weren't going to vote. We heard about apathy in Ohio, apathy in Texas, apathy in California, apathy in New York. We thought we had it in the bag. So we stopped spending money and canceled our television commercials. I was so sure of winning I hardly campaigned in the last two months."

"Do you blame the media for misleading you?"

Apathy glared at me. "As long as you brought it up, I blame the media for everything. The reporters wrote one-sided stories attacking me. They fed a steady stream of lies to the newspapers and on television, saying I was influencing the youth vote, the union vote and the business community. Both the Republican and Democratic parties urged their people to reject me.

* * *

"Companies took out advertisements urging the people to vote, and the TV stations gave free time to voter registration drives. This hurt me in the last week of the campaign. We tried to get equal time to appeal to the people to stay at home, but the networks wouldn't give it to us."

I said, "Then what you're saying is that you believe there was a conspiracy to keep the voters from staying away from the polls?"

"You said it, I didn't," apathy replied. "I'm not saying I didn't make mistakes. I should have cared a little more as the campaign came down to the finish line. But if I had shown any concern, people would have said, 'How can you be apathetic if you're working so hard for support?' "

"Some columnists and commentators have said that you were never serious about what you were doing, that you saw your role as spoiler. What is your answer to that?" I asked.

"Lies, all lies. I wanted to give the people a choice between Ford and Carter and myself. I believe apathy has an important role to play in the political process. I was certain that this year was my big chance. You had two candidates that no one could get excited about. Apathy was on everyone's lips. All over the country you saw bumper stickers which said, 'Vote for Apathy.' Maybe I'm a Monday-morning quarterback, but I think if Ford and Carter had had one more debate, I would have gotten 51 per cent of the vote, plus Oregon and Ohio."

* * *

"I know you didn't win," I said, "but you can take some satisfaction in knowing you affected the election."

"What do you mean?"

"Well, if you had achieved a large non-turnout, Ford could have beaten Carter. The polls were predicting that a low turnout would favor the Republicans, while a large turnout would help the Democrats."

"It wasn't my intention to help either one of the candidates. I was in this for myself. It was my dream that people would be talking about apathy for the next four years. I single-handedly turned them off on government, and I thought the voters would stay that way."

"You don't sound very gracious about losing."

"Would you be if you were the laughingstock of the country? Well, I hope you're all satisfied. You won't have apathy to kick around anymore."

The French Doff Berets In Favor of the Ski Cap

By John Vinocur

PARIS (AP).—Dead: the beret, flat felt cap once worn by millions of Frenchmen. Contemporary of accordion music, the can can, "Inky-Dinky-Parlez-Voo," and bicycle-riding cops; of changing tastes and, perhaps, umbrella wounds.

Almost dead anyway, half the French production gone in 18 years, and two-thirds of the nation's manufacturers disappearing since the end of World War II or recycling themselves.

The Prince of Wales once wore a beret and so did Marc Chagall. When modern jazz was called bebop every hipster had to have one to look like Dizzy Gillespie. And in this country they were everywhere: The recent French passion for documentary films about the '40s shows a world peopled by beret wearers, from schoolchildren mindlessly cheering Marshal Pétain to the Résistance fighters pictured in Nazi wanted posters.

Now, even in the misery of daily November rains, a beret-hunter could spend a day in the Paris Métro without finding more than a handful of them. Maybe a provincial in town for an agricultural show. Maybe a tourist.

The five remaining French beret manufacturers now make about 1.8 million berets a year, 60 per cent of them for men and about half the total being exported. Maybe because of the Black Panthers or the Green Berets, exports to the United States have increased marginally, but not enough to improve a depressed business.

J.V. de Boisseson, director of Laulhère, a manufacturer which accounts for half of the French production, said that without military orders the business would be in worse shape.

"It's no secret that about half the market has disappeared in the last two decades. Things are stabilized now, but the people who wear berets are not exactly trend setters—farmers, retired people. We've thought of ways of promoting sales, you know, weekends in the woods, making them in different colors. But the old, dark one is finished," he said.

Associated Press.

A reminder of other times.

Mr. de Boisseson thinks the reason for the demise of the beret was a general disaffection from headgear among men and a notion that the beret was somehow embarrassingly ethnic. But Xavier Marin, a spokesman for the French Federation of Knitwear Manufacturers, which includes the last five beret makers, blames the umbrella for at least some of the problem.

"Up until about 15 years ago," he said, "Frenchmen just didn't carry umbrellas. Then they started to. The man who used to tuck a beret into his raincoat put the thing in the closet and his wife eventually threw it out. He never bought another. Every boarding school used to have its own beret. That's finished too. The army has hung on to them but I'm afraid they might change too some day. They're always 20 years behind the times. You want some happy conversation? Ask me about ski hats."

PEOPLE: *Teenyboppers Drive Guitarist Out of Top Pop Group*

The newest member of the Bay City Rollers, the top pop group, has quit because, he said, "my sanity was at stake." Ian Mitchell, 18, joined the Rollers in April but the pressure of fending off screaming teenyboppers was too much for him. "I want to have the chance to walk out on the streets or go to the movies without being mobbed all the time," said the guitarist. "When we weren't on stage, we were locked up within four walls. It was enough to drive you insane."

* * *

Prince Charles, heir to the British throne, gets a "sexy glint" in his eye when Barbra Streisand's name is mentioned. Or so says Allan Warren in his book, "Confessions of a Society Photographer," published Wednesday in London. The prince asked who Warren's other sitters had been "and when I told him one of them was Barbra Streisand it brought a sexy glint into his eye and he confessed to always having fancied her. He said he met her once, but never dared to look her straight in the eyes or his hidden fantasies would have been hidden no more." Another royal favorite: actress Lauren Bacall.

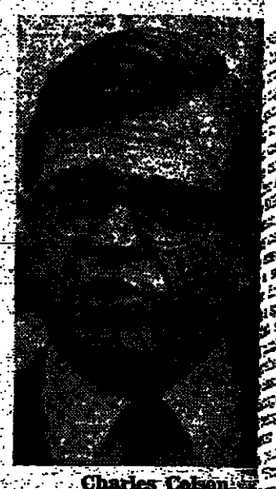
* * *

Muhammad Ali gave one of his better acting performances the other day—not in the ring, not on stage, but in jail. Two policemen in Houston were investigating a shooting when they saw a man running down the street. It was Ali doing his roadwork—he is in Houston acting in a film. After the officers learned who he was, they invited him to the nearby jail to see if he could fool fellow officers by acting drunk. After much shouting and staggering, the heavyweight champ signed autographs for policemen and asked, "Aren't I a good actor?"

* * *

Some Christmas Club. Some Christmas. In Dubuque, Iowa, the computer at the Key City Bank went crazy the other day—the bank said it was "due to a processing error" and everyone knows what *that* means—and Christmas Clubbers got checks in excess of a million dollars. Mary Sweeney, for instance, had $256.25 coming to her. She got $1,000,256.25. Key City bills itself as a small bank "with friendly people who want to be better, not just bigger." Its slogan is "Let's be friends." The bank president thinks that maybe the staff (or the computer) took the slogan too seriously.

* * *



One of the last of the oldtime vaudeville strippers, Ann Corio, has "gone legit," becoming co-operator of a theater. Miss Corio, who is in her sixties but doesn't look it, and her husband, Michael Iannuci, have leased the Playhouse on the Mall in Paramus, N.J., and will present legitimate productions like "Time, Next Year" and "Who's Who" there. However, Miss Corio is not quitting her peripatetic touring. "This Was Burlesque" show (it's going into its 4th year). Early next year it will be filmed in the Playhouse on the Mall, for cable TV presentation. "Rod Rattens, who starred out in burlesque, will be in it," said Miss Corio, "and so am I."

* * *

Charles Colson, who served seven months for obstruction of justice in the Watergate cover-up and the Ellsberg burglary, is in London, flogging his book, "Born Again," to be published in England this week. At a press conference Wednesday, Colson said that he sees a spiritual renaissance in the United States. "It's a making of a real revolution." He said he didn't vote in the election but "I rejoice in Mr. Carter's deeply held belief in Jesus Christ."

—SAMUEL JUSTIN

Muhammad Ali ... acting in Houston.

Charles Colson ... in London.

Editor's Anti-Computer War Is Highly Classified

By Fred Ferretti

NEW YORK (IHT).—Both of the classified advertisements in the Oct. 16 issue of the Saturday Review were, at the very least, intriguing.

The first one read:

"Owing to unfortunate computer error, our company has manufactured 30,000 road maps of New Jersey with wrong U.S. highway numbers and with all cities of more than 30,000 population mistakenly identified by name from Armenian map. We are recalling 1,500 maps already distributed, with apologies to users, and are offering remaining 28,500 maps in single lot to highest bidder. SR Box W.H."

And just a bit below it there was this:

"We sincerely regret error in placing decimal point in our instruction book contained in our home kit: Build Your Own Zeppelin. On page 27, please cross out line: 'It is imperative to keep helium level at 6.42 at all times in order to maintain altitude.' Correct sentence should read: 'It is imperative to keep helium level at 64.2 at all times in order to maintain altitude.' We will be glad to replace parts damaged through unplanned landings owing to unfortunate printer's error. Zeppelin Home-Kit Building Co., Lakehurst, N.J."

So, a curious correspondent wrote to SR Box W.H. and to Lakehurst, N.J.

The envelope to Lakehurst came back stamped "unknown," which was somewhat disappointing to the sender, who had envisioned receiving reports of forced Zeppelin landings in South Jersey.

Guilty Party

More surprising was the reply from SR Box W.H. The response was from Norman Cousins, editor of Saturday Review, who wrote the classifieds as gentle hoaxes. "I'm the guilty party," his letter read. "Each issue contains one or two computer-error items that are pure concoctions. This is my way of getting even with the damned machines."

The "damned machines" were, he said in a subsequent chat, computers that "digested the names of subscribers without leaving a trace when we were starting up Saturday Review again a few years ago." And so, Cousins was, he said, "waging a bloody war, a very bloody war, with computers."

Virtually every issue of the magazine has at least one "computer error" ad, or "funnies," as Cousins's secretary, Emily Suskind, calls them.

Computer errors have been responsible for ads asking to dispose of:

—16,000 dozen Chinese fortune cookies with air-raid instructions printed inside.

—2,000 left-turn signs with the arrows pointing right.

—265,624 Idaho license plates with the letters printed backwards.

—A parrot that imitates George Burns, but only between 3 and 4 a.m.

—329 Marine compasses polarized west.

—Peppermint candy canes with the hoops in the middle.

Cousins's war has entered the "personal" columns as well. Ads have appeared that pleaded for the return of the parrot and the ironing board left at O'Hare Airport; inquired after the health of the pregnant dachshund owned by a lady in Peoria; asked about Adolf Hitler's child bride; and presented a long convoluted correspondence between Wilma and Charlie.

Wilma left Charlie sitting in front of a television set watching football and went off to New Zealand with a new boyfriend and a series of personals concerning them have appeared. Cousins, because of the responses to the Wilma and Charlie series, recently held a Wilma and Charlie party to which all sorts of people were invited because they were able to contribute a reminiscence about either Wilma or Charlie.

Cousins said that occasionally the pixie in him forces him to go beyond the classified. "We ran this book review," he said, "by a 'Polish anthropologist' who proved by carbon 14 tests that the evolution theory was actually the reverse of what we had all thought previously. Apes had actually descended from man. That created some mail."

Cousins feels that he owes answers to readers who respond to his whimsy, so he personally replies to all queries to his ads and placements.

One letter Cousins received, he said, was from a Michigan congressman named Gerald Ford, who wrote that he had got 342 letters from constituents protesting House Bill HR-1642. The first mention of the measure had appeared in a Saturday Review letter to the editor protesting that the bill, reported to be ecological in nature, was actually a sneaky attempt to outlaw golf courses. It generated 19,000 letters to Congress and an editorial in the magazine Golf World denouncing it.

When it was learned that Cousins was the author of the letter to the editor, Golf World suggested that he be barred from all golf courses.

Dissidents Dispute Arrests

Large-Scale Graffiti Baffle Leningraders

By Seth Mydans

LENINGRAD, Nov. 11 (AP).—A great graffiti mystery seems to have baffled both Leningrad's secret police and its dissident community.

On the night of Aug. 4 or 5, somebody painted anti-government slogans on the wall of the Peter-Paul Fortress, and, according to later accounts, in lipstick on a major department store, on the KGB headquarters itself, and even on a couple of police cars, which were driven around town for a while before their occupants noticed.

The KGB obtained two confessions to part of the night's work, which dissidents assert cannot be genuine. Yet they insist they have no idea who the real culprit is.

The dissidents say the secret police were pressured into finding a scapegoat by the public statements of Grigory Romanov, first secretary of the Leningrad region Communist party, in a speech on Sept. 24.

In that address, Mr. Romanov, speaking about dissidents, referred publicly to the slogans, and said the culprits had been apprehended.

The dissidents say it was only after that speech that the KGB managed to obtain confessions from two artists, who are still being held.

Whoever did it, the centerpiece was a slogan in white oil-based paint on the fortress wall, with yard-high letters reading, "You Are Strangling Freedom but the Soul of the People Knows No Bondage."

The slogan, said to have been from 30 to 50 yards long, was painted high on the wall of the ancient landmark and could be seen from the Hermitage museum and up and down Leningrad's waterfront.

Officials quickly painted over the slogan, but the effect was unsatisfactory, so they sandblasted it off, leaving a large clean rectangle on the age-blackened wall.

"Now they've decided to clean the whole thing," said Ilya Levin, a Jew who has been refused permission to emigrate. "It's the first cleaning it's had in 200 years. Soon it will look like the Taj Mahal."

Indeed, a sandblasting operation has been under way on the fortress wall, as the river that flows past it begins to clog up with the first ice floes.

But authorities have done more than sandblast.

In a series of searches of the homes of dissident Jews and artists, they have confiscated a variety of materials: a copy of a book by Nobel Peace Prize-winner Andrei Sakharov, a microfilm of Alexander Solshenitsyn's "Gulag Archipelago," articles on Jewish subjects, photographs of unofficial art, a typewriter.

In the course of these searches, they have made a number of accusations, and four arrests.

Released on their own recognizance after being held three days were a poet, Yulia Voznesenskaya, and a dissident, Natalya Lesnichenko. Still held after signing confessions are artists Yuli Rybakov and Oleg Volkov.

But the dissidents point out that the two artists confessed to the relatively light charge of defacing government property, which they say may have been part of an agreement freeing them of the stiff charge of anti-Soviet activity.

Andrei Sukhin, another Jewish activist, said, "It seems somewhat ridiculous to think they did it. Those letters were very big. There had to be more than two people."

"I know those two," Mr. Levin said. "They couldn't have planned and carried out something like that. And if they had, we certainly would have heard about it."

2 Africans Deny Hints Of Gains At Geneva

GENEVA, Nov. 11 (UPI).—Britain's Ivor Richard, chairman of the talks on Rhodesia's constitutional future, failed again today to get black nationalist leaders to accept a compromise over a date for independence with majority rule.

Despite hints from British officials that a compromise accord might be near, Mr. Richard made no apparent headway in nearly three hours of talks with nationalist leaders Joshua Nkomo and Robert Mugabe, who are allied in the "Patriotic Front."

"No progress, no progress," Mr. Nkomo and Mr. Mugabe shouted in unison as they left the session.

"We are meeting again tomorrow and we are still talking about the date," the two men said.

Mr. Richard did not sound an optimistic note in his brief report to newsmen on his single meeting today.

"We had detailed, intensive and prolonged discussions," he said. "I will see them and the other delegations tomorrow."

Next Issues

British officials, in hinting that a compromise over the independence date might be close, said that after such an accord the conference could get down to bargaining on major legal and constitutional issues involved in a transition to majority rule, starting with the structure of an interim government.

Rhodesian Foreign Minister Pieter van der Byl said he believes that "the date issue has a chance of being solved."

"When that's out of the way we can get down to discussing an interim government, which is what we're here for," he said in an interview.

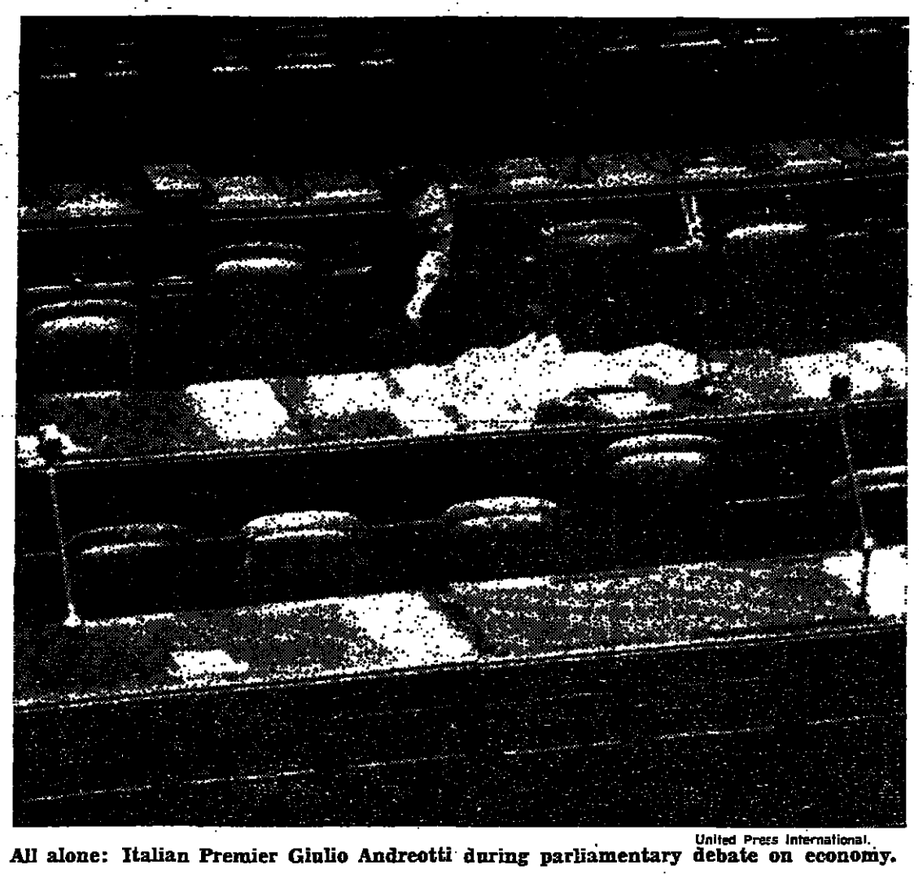
The conference, two weeks old today, has been unable to get down to the major issues because of Mr. Mugabe's and Mr. Nkomo's insistence that the independence date fall within 12 months from the end of November, meaning by Dec. 1, 1977. The white Rhodesians say the transition process could never be completed by then.

Others Less Rigid

The two other nationalist delegation leaders, the Rev. Ndabaningi Sithole and Bishop Abel Muzorewa, also demand independence within 12 months, but conference sources say the two men are not as adamant about it as Mr. Mugabe and Mr. Nkomo.

Britain proposed March 1, 1978—in 15 months—as a compromise, but both black and white delegations rejected that idea.

Mr. Richard is apparently trying to get all sides to accept a compromise formula which would state that independence within one year would be desirable but that it may take longer.



Progress on Namibia

WASHINGTON, Nov. 11 (UPI).—Diplomatic sources said yesterday that steady progress is being made toward independence for South-West Africa (Namibia), with an agreed plan emerging from a series of diplomatic contacts.

The sources said South Africa has suggested three criteria:

• That there be a single state of Namibia, and not a series of splinter states. State Department officials describe this as a signifi-

United Press International.

All alone: Italian Premier Giulio Andreotti during parliamentary debate on economy.

Italian Leftists Reluctantly Back Austerity

ROME, Nov. 11 (UPI).—The Socialists and Communists today said they would reluctantly go along with Premier Giulio Andreotti's program of tax and price increases to satisfy Italy's foreign creditors.

Labor unions scheduled more strikes to register their dissatisfaction.

The Christian Democratic Premier needs Communist and Socialist abstentions to survive a parliamentary debate on his plan to raise 5 trillion lire ($5.7 billion) by means of higher taxes and utility rates in order to offset Italy's foreign-trade deficit.

The Chamber of Deputies debate on the plan got under way today and was expected to end tomorrow, possibly without a formal vote.

Without waiting for the debate to start, the Socialist newspaper said that Mr. Andreotti's policy speech yesterday clearly identified the sacrifices he expected from Italians, but did not say how the money would be used to revitalize the nation's economy. A Communist spokesman agreed.

Following Premier Andreotti's warning on rising labor costs, leaders of three major trade union confederations today offered some wage restraint for next year.

In a communiqué issued after the close of a two-day meeting, they said that unions would not seek local wage increases on top of pay scales established in national contracts signed earlier this year.

But they remained implacably opposed to any changes in the *system of cost-of-living increases* in wages. The wage-escalator system is becoming a major issue in the economic debate as inflation rages at 17 per cent.

Mr. Andreotti gave industry's management and labor leaders a month to reach agreement on reducing labor costs, adding that their success or failure would determine the extent of indirect tax increases designed to finance subsidies needed by industrial organizations.

Parliament Gets Callaghan Fury After Bill Loses

LONDON, Nov. 11 (Reuters).—Prime Minister James Callaghan today bitterly criticized Parliament after a Labor government defeat that wrecked one of its main socialist bills and disappointed some powerful trade union leaders.

The defeat last night on a move affecting dock workers left the government fighting to keep its slender hold on the House of Commons.

But tonight, it weathered another tense evening in the House of Commons, surviving attacks on its key bill to nationalize aircraft and shipbuilding by thin voting margins.

The House defeated all amendments proposed by the House of Lords—which would have emasculated the bill—and the measure appeared likely to receive final parliamentary approval before the end of the session.

Labor came closest to defeat on a vote over plans for consulting unions in the nationalized industry, tying at 309 votes with the combined opposition, and was saved by the casting vote of the chairman.

The Labor party's one-vote majority in Commons had failed to work because a Labor member became ill in the tea-room and did not vote.

In further Parliamentary challenges tonight, the government scored two single-vote majorities—one with the casting vote of the deputy speaker after a tie—on amendments to controversial legislation nationalizing the ship and aircraft building industries.

The government cleared other voting hurdles by majorities ranging from 6 to 31.

Commenting on last night's Labor defeat, Conservative leader Margaret Thatcher said that the government would soon have no authority left. But Mr. Callaghan told his Cabinet that the government would carry on despite the defeat on the bill, and despite last week's by-election losses that cut its effective Commons majority to one.

In the Commons, he said Parliament had made nonsense of a bill aimed at giving work security to Britain's docks, which have a long history of industrial strife. He called for calm among dockers and promised to salvage something from the legislation.

'Potential Dangers'

And he warned the House of Lords, which helped in emasculating what Conservatives regard as an extreme leftist measure, that they must stop adding "to the potential dangers which exist" in Britain's economic crisis.

The government had been trying to overturn a Lords amendment to the dockworkers bill that effectively destroyed the legislation. But the Commons early today voted 311-308 to allow the amendment to stand.

Cargo-Handling Work

The bill would have ruled that all cargo-handling work within five miles of the coasts could only be done by members of the Transport and General Workers Union, which includes dockworkers.

The amendment reduced the limit to half a mile, in port areas only. This will anger dockers, who fear rising unemployment and want their union to have a monopoly of cargo jobs in the whole coastal region.

The bill had been part of the government's obligations in its "social contract" in which trade unions agreed to cooperate in keeping down wages.

Jack Jones, general secretary

Protestants Call for Ulster Independence

9 Extremist Groups Urge U.K. Phaseout

BELFAST, Nov. 11 (UPI).—Nine of Northern Ireland's most extreme Protestant paramilitary organizations today came out in favor of an independent Ulster.

The groups, who have been among the most strident supporters of British rule in Northern Ireland, said at a news conference that British withdrawal should be phased out during the next 10 years.

The 10-year period would give Protestant and Catholic communities time to plan a new government, they said.

The nine paramilitary organizations included the Ulster Volunteer Force and the Red Hand Commandos—thought by police to be responsible for a majority of the sectarian assassinations and bombings carried out by Protestants. The nine-group coalition offered to talk with the Provisional Irish Republican Army if it ends its campaign of violence.

The coalition's Coordinating Committee produced a discussion document that suggested an independent Northern Ireland should have a parliament of 100 members with a cabinet made up of the most talented politicians of both sides.

The document suggested the Cabinet include members of the Catholic Social Democratic Labor party, and its first task would be to draft a bill of rights to protect minority interests.

The Protestant groups want Britain to pay such a new independent nation £300 million ($489 million) during its first 15 years to finance a police force and army of its own. It said the army should be drawn from the Ulster Defense Regiment presently under control of the British Army.

Two Protestant politicians, the Rev. Ian Paisley and Harry West, attacked the coalition's announcement, saying the plan would lead to a united Ireland rather than an independent Ulster.

Meanwhile, a Provisional IRA bomb squad blew up Northern Ireland's National Trust headquarters outside Belfast this morning.

The National Trust is a public organization that seeks to preserve buildings, woodlands and other properties considered part of Britain's heritage.

Meanwhile, a 24-year-old Roman Catholic man was gunned down in Belfast and a Protestant part-time soldier from the Ulster Defense Regiment was murdered outside his home in County Londonderry late today.

Edde, a Christian, Backed Moslems

Syria Foe Survives Murder Attempt

By James F. Clarity

BEIRUT, Nov. 11 (NYT).—Raymond Edde, a prominent Christian politician and the *most outspoken Lebanese opponent* of Syria's dominating military presence in Lebanon, survived a machine-gun attack outside his home here today.

Mr. Edde was defeated last May in a bid for the presidency by Elias Sarkis, the Syrian-supported candidate who is now President. He suggested in an interview in his home tonight that Syria might have been responsible for the attack, in which his chauffeur was seriously wounded.

The attack on Mr. Edde, virtually the only prominent Christian politician who has sometimes sympathized with the leftist-Moslem cause in the 19-month civil war, occurred as Syrian troops and tanks were preparing to penetrate deeper into the capital to separate the combatants facing each other across the line that divides the city.

The Syrians, technically acting as an Arab peace force approved by Arab nations last month, encircled Beirut yesterday and, despite a few sniper exchanges and shellings and the attack on *Mr. Edde, seemed to have helped* maintain the cease-fire now in its 22d day.

'I Don't Like Them'

Mr. Edde said that he could not understand what Syria could gain by trying to kill him. Asked directly if he thought Syria was behind the attack, he shrugged and said: "I don't like them. They don't like me." Among all the politicians, Mr. Edde said, "I am the only who speaks out against Syria."

In recent days, Mr. Edde has asserted that Syria's presence in Lebanon amounts to military occupation. He has accused Syria of wanting to divide Lebanon into two states, one Christian and one Moslem.

Speculating on who was responsible for today's attack, in which a man with a machine gun fired on him from a passing car as his own car parked in front of his opulent home, Mr. Edde said, "Israel? What does Israel care about me? The CIA? That's too easy."

Mr. Edde said that he has now survived seven assassination attempts in 33 years of active political life in this country. The last attack, in which he was *wounded in the foot* allegedly by rightist Christian Phalangists, took place May 25.

"I have no bodyguard," Mr. Edde said. "Of course, I have weapons here in the house, like all Lebanese."

An hour after the attack, Mr. Edde, whose chauffeur was taken to the American University Hospital here with an eye wound,

(Continued on Page 2, Col. 5)

2 More Years for Haig

WASHINGTON, Nov. 11 (UPI).—President Ford has extended for two more years the appointment of Gen. Alexander Haig jr. as commander in chief of the U.S. European Command, the Pentagon announced today.

Communist Given Bodyguards

2 Former Ministers Set Up A Moderate Party in Spain

MADRID, Nov. 11 (AP).—Two former ministers today announced the formation of a moderate alliance as the government prepared to test its political reforms in the face of rightist opposition.

Led by Jose Maria de Areilza, foreign minister in the first post-Franco government, and Pio Cabanillas, who served as Franco's minister of information, the Popular party announced that it would obtain legal status and participate in the elections promised for next year.

A party spokesman said that the party was not connected with Premier Adolfo Suarez's government but he acknowledged that some members of the present Cabinet may eventually join the party.

The Popular party was described as covering basically the center of the political range from Social to Christian Democrat. The party was expected to attract support from big business, liberals and the *middle class*.

A former ambassador to Washington, Paris and Buenos Aires, Mr. Areilza broke with the Franco regime several years ago. In addition to Mr. Cabanillas, who was fired by Franco as information minister two years ago for allowing full reporting of the Portuguese revolution, the Popular party also includes historian Ricardo de la Cierva and Ignacio Aguirre, a high tourism official in the present government.

Both King Juan Carlos and Premier Suarez got indirect support from Belgian Foreign Minister Renaat van Elslande, who said he had the impression that "there is a clear intention to democratize the country."

Meanwhile, Cortes president Torcuato Fernandez Miranda said that the Cortes would probably begin debate next week on Mr. Suarez's plan to replace it with a new, two-chamber assembly. Mr. Fernandez Miranda and government officials were reportedly attempting to have the plan approved before the first anniversary of Franco's death, Nov. 20. It is considered a vital part of the Premier's proposed democratic reforms.

The government ordered the police today to take measures to counter street violence expected tomorrow during a leftist-planned general strike against Mr. Suarez's economic policies.

Labor sources said that the 24-hour strike could idle more than 15 per cent of the country's 13 million workers. Extra police precautions were ordered for Madrid and Barcelona.

Police arrested two Communist labor leaders in connection with tomorrow's strike, the sources said.

The two men, Edsardo Saborido Galan and Juan Marcos Zapico, are top lieutenants of Marcelino Camacho, the Communist chief of the still outlawed Workers Commissions labor union.

At the same time the police assigned bodyguards to Mr. Camacho after he received telephoned death threats.

In the northern town of Santander, about 215 miners emerged today from a 200-meter shaft where they had locked themselves in for the last week in a protest for more pay.

Riot police arrested 12 persons last night in street battles with demonstrators who threw up barricades of overturned cars in support of the miners.

Arabs in Unesco Seek to Condemn Israeli Policies

NAIROBI, Nov. 11 (Reuters).—Arab nations at the Unesco General Conference here today sought condemnation of Israel for its activities in territories occupied after the 1967 Middle East war.

Some 30 Arab and African countries circulated a draft resolution accusing Israel of "systematic Judaization of education and cultural life" in the occupied territories.

The resolution also condemned Israel "contrary to human rights" alleged violations of the rights of people living in the area to a national and cultural life.

While Israeli sources said only that the resolution was "less mild than anticipated," their supporters at the conference said Israel might withdraw its invitation to a Unesco fact-finding mission to visit the occupied territories.

The resolution noted that the invitation had been extended after a period of obstinate non-cooperation" and called on Unesco to send the mission as soon as possible.

Artist's Output Huge, Varied

Alexander Calder Dies at 78; Famed for Mobiles, Stabiles

NEW YORK, Nov. 11 (NYT).—Alexander Calder, the sculptor and son and grandson of distinguished sculptors, died unexpectedly here today of a heart attack. He was 78.

More than any other American artist, living or dead, he penetrated the awareness of the public at large. He was known in particular for the mobile sculptures which hung in public buildings all over the country and in many cities in Europe. The term "mobile" was suggested to him by Marcel Duchamp in 1932.

Since the late 1950s he had become equally well known for the "stabiles"—monumental and *motionless structures in sheet* metal or steel plate—which can be seen outdoors at Lincoln Center and the World Trade Center in New York, on the Empire State Plaza in Albany, N.Y., in the Federal Center Plaza, Chicago, and in open spaces throughout the world.

Mr. Calder had a prodigious and unceasing activity. To the day of his death he drew, painted, illustrated books, designed rugs, designed for the theater and took an informed and outspoken interest in the affairs of his time. He was a complete artist and a complete citizen.

The current show of his work at the Whitney Museum here confirmed his position as a great artist and as one of the best-loved of living Americans. He was loved for himself, but he was also loved for his work, in which an irresistible sense of fun disguised an immense technical skill and a lively sense of what could be done in art that had not been done before.

Born in Philadelphia

Born in Philadelphia, on July 22, 1898, Mr. Calder was the son of Alexander Stirling Calder, best known for his William Penn atop the Philadelphia City Hall, and grandson of Alexander Milne Calder, a Scottish-born sculptor.

He trained as an engineer and got the highest possible grades. His effective life as an artist began with his arrival in Paris in 1926. Thereafter he lived much of his life in France, and the decisive moments in his career came in many cases from contact with major European artists, above all with Marcel Duchamp, with Piet Mondrian and with his close and lifelong friend Joan Miro.

Mr. Calder was accepted in Paris from the first as a force of nature, as a prodigious and original technician, and as a participant who never came into a room without in some way enhancing the life of everyone present. In 1946, his first post-war exhibition in Paris was prefaced by Jean-Paul Sartre. Whenever in later years he came up to Paris from his home in

Sculptor Alexander Calder at 1971 Paris exhibition.

23 Years After It Was Banned

Sadat Announces Resumption Of Multiparty Political System

CAIRO, Nov. 11 (NYT).—President Anwar Sadat announced tonight the reinstitution of a limited version of the multiple political party system that was abolished in Egypt in 1953, shortly after the revolution headed first by Gen. Mohammed Naguib and then by Gamal Abdel Nasser.

Mr. Sadat, in a speech to the National Assembly, said that three political "groupings" that competed in the recent parliamentary election will now be called "political parties."

"We are starting out on a new democratic experience," he said, adding that the parties will be free to conduct their activities with three limitations: They must respect "national unity," they must not act as religious parties, and they must not seek to deprive Egyptian masses of the social gains they won through the 1952 revolution.

The announcement was a major step in Mr. Sadat's policy of gradually bringing limited democracy back to Egypt.

The return of political parties to the Egyptian scene is thought highly significant even though it is not yet clear whether the three parties will have much greater political freedom than the "groupings."

In warning that the parties' organisation and membership must not be based on religion, Mr. Sadat was understood to be acting against the Moslem Brotherhood, an extremist religious organization that is banned from political activity but has recently regained some of the influence it had in the 1940s and and early 1950s.

On Oct. 28, more than 1,600 candidates—including independents as well as members of the three political groupings—competed in the first round of an election to fill 350 seats in the National Assembly. *Runoff contests* a week ago completed the election.

The centrist grouping, headed by Premier Mamdouh Salem, won 280 seats. The leftist grouping, headed by Khaled Mohiedin, one of the original group of Nasser's revolutionary officers, won two seats. The rightist group won 12, and the rest went to independents.

The campaign was unfettered,

Suggests Putting Reds in Cabinet

Cunhal, at Party Congress, Says Soares Regime Failed

By Marvine Howe

LISBON, Nov. 11 (NYT).—The leader of the Portuguese Communist party declared today that the 3 1/2-month-old Socialist government was a failure and that only a Cabinet that included the Communists could solve Portugal's urgent social and economic problems.

The Communist party secretary-general, Alvaro Cunhal, accused Premier Mario Soares and his Socialist government of carrying out a policy opposed to workers and for the "return of capitalism." He warned that the Communist-led workers would oppose this policy.

Addressing the opening session of the Communist party's congress—the first not held clandestinely here—Mr. Cunhal declared that the party would broaden its leadership but indicated that it would retain its strongly pro-Soviet line.

The four-day congress opened with the fervor and conviction of a religious revival meeting. About 1,200 delegates and 5,000 guests attended the session at Lisbon's international fairgrounds.

Tribute Is Paid

Mr. Cunhal paid warm tribute to the 60 foreign delegations present.

The Soviet delegation, headed by Boris Ponomarev, secretary of his party's Central Committee, received enthusiastic applause. Later, the splinter Marxist-Leninist Portuguese Communist party issued a communiqué demanding the expulsion of Mr. Ponomarev, describing him as the leader of the KGB and calling his presence here "an affront to the dignity of the Portuguese people."

There were also shouts of "Brazil, Chile, Spain Will Overcome!" as well as raised fists and cheers for delegations from Portugal's former African colonies and the Palestine Liberation Organization.

Foes Are Named

Mr. Cunhal emphasized that the Portuguese Communist party was opposed to social democratic reformism as well as Maoism. He also said his party would fight the anti-Communism and anti-Sovietism of Social Democrats, Socialists and far leftists.

In a clear divergence with the independent Eurocommunist line, the Portuguese Communist leader said his party would uphold "the principles of Marxism-Leninism and the internationalism of the proletariat."

Appearing firm and self-confident, Mr. Cunhal acknowledged that the Portuguese Communist party had erred in not paying enough attention to the middle classes and miscalculating the balance of power in the armed forces.

Accusing the Socialist government of trying to solve the economic crisis by favoring management and running roughshod over the workers, Mr. Cunhal demanded guarantees for the workers in return for cooperation. He threatened that, if the workers were not satisfied, they would stage demonstrations, strikes and other industrial action.

He predicted that the Socialists, through what he called their unpopular policies, would lose next month's municipal elections. He said that the only democratic alternatives would be a government of the left with Socialists, Communists, independents and military members or an independent-led government with the backing of the Socialists and the Communists.

Brezhnev, Tito to Meet In Belgrade

Soviet Chief's Visit First in Five Years

BELGRADE, Nov. 11 (UPI).—Soviet leader Leoni. Brezhnev will visit Yugoslavia officially for the first time in five years next week for talks with President Tito, the government announced today.

Mr. Brezhnev was scheduled to arrive from Moscow Monday morning and to stay until Wednesday noon, Foreign Ministry and Soviet sources here said. The visit will be spent entirely in Belgrade.

Foreign Minister Andrei Gromyko will accompany the general secretary of the Soviet Communist party to this independent Communist nation, led by Marshal Tito, 84, since World War II. He broke away from the Soviet bloc in 1948.

The Foreign Ministry spokesman said the talks between the two leaders would be "frank and open," diplomatic language for saying that disagreements are to be expected.

The spokesman emphasized that Mr. Brezhnev will be making a return visit to Yugoslavia —a diplomatic nicety for saying he has owed one to Marshal Tito.

Liver Ailment

For Marshal Tito, the visit will mark his most strenuous activity since he contracted a liver ailment Sept. 11. His doctors have been warning him to slow down.

Mr. Brezhnev was previously in Belgrade in September, 1971. Marshal Tito has held talks with him twice since then in the Soviet Union—in 1972 and 1973—and met him again at the Helsinki conference in 1975 and at the East Berlin conference of European Communist parties in June.

The spokesman said Marshal Tito and Mr. Brezhnev, 70, will "exchange a broad area of views" that he said was not likely to focus on a single topic.

"We attach great significance to the visit," the spokesman said. He said the Yugoslav government was convinced the talks "will provide new impetus to the development of Yugoslav and Soviet relations, for which both are interested.

"Bilateral relations have been developing on an upward trend over a number of years."

Yugoslavia, as a leader of the nonaligned nations, has tried to steer an even course between the Soviet Union and the United States, although its foreign policy statements often echo Moscow's. President Ford visited Belgrade in August of last year.

Marshal Tito earlier this year steadfastly opposed the Kremlin's view that it should dominate all European Communist parties and carried out a campaign against hardline Communists here—called Cominformists—who seek to return Yugoslavia to the Soviet fold.

The campaign activity forced Mr. Brezhnev to cancel a scheduled spring visit on grounds it was not an opportune time to come to Yugoslavia.

But the strain has eased. The Soviet press recently has been devoting space to nonalignment and Yugoslavia's unique self-management concept of government and economics, a move Belgrade regards as demonstrating a favorable change in relations.

Mr. Brezhnev was scheduled to return to Moscow from Belgrade and to travel to Bucharest Nov. 22, first for an official visit to Romania and then to stay there for a Warsaw Pact summit. Yugoslavia is not a member of the pact.

Official Offices in Ruins

Classrooms, Bars Deserted In Soweto as Arrests Go On

By Jim Hoagland

SOWETO, South Africa, Nov. 11 (WP).—The once-packed classrooms and speakeasies of this black township of nearly a million residents stand deserted today. Mounds of rubbish and trash mount daily in the streets and the government's administrative centers and liquor stores lie in ruins.

Five months of protest, riots, police raids and simmering internal violence have scarred and shaken this sprawling compound that houses Johannesburg's black workers and their families. Black rebellion and white police efforts to crush it continue to dominate daily life in Soweto.

Student protests and fears of new police raids on classrooms for mass arrests of students have effectively shut down Soweto's schools at final-examination time. Police this week switched to raiding houses and picking up school-age youngsters off the streets in their effort to break the student movement.

New Resentment

Soweto residents report that what they see as the indiscriminate arrests of hundreds of Soweto youths in recent days is fostering new sympathy for the students among previously uncommitted adults and creating dangerous new resentment of the police.

The now clandestine student organization that led the June protests that erupted into widespread racial disturbances still issues proclamations calling on adults to continue the struggle. It is also enforcing the boycott of school examinations and has forced the closing of Soweto's illegal but officially tolerated *shebeens*, or speakeasies.

"The students are the de facto government of Soweto today," the Rev. Manas Buthelezi, one of the community's most important spokesmen, said.

At Orlando High School, teachers who were due to administer year-end examinations sat yesterday morning playing cards or reading novels. None of the school's 1,000 students had turned up.

"They won't be back until the government scraps this insult known as Bantu education," Orlando's principal, T.W. Kambule, said. "They won't give up the struggle."

Warning in Classrooms

At another school, only 19 of the 359 students scheduled to take examinations appeared and they quickly left when another youth came into the classroom and warned them: "You are all in danger. Get out."

An African educator who witnessed the scene said that the youth did not appear to be a student at the school. Several Soweto residents reported that in recent weeks nonstudent political activists, evidently associated with long-outlawed black parties, have appeared in Soweto and joined the rebellion started by students.

These efforts appear to be making good an activist pledge to have students "lose a year" rather than continue their schooling under the government's special curriculum for blacks, called Bantu education.

Equal education for whites and the country's 76-per-cent black population has been the central issue in the student protests. Now, the increasing number of arrests in Soweto has added another—the demand for the release of student prisoners.

"None of the students sleep at home now," a teacher reported.

Few whites venture into Soweto, which is 15 miles southwest of Johannesburg. The first permits for journalists to visit Soweto since the August and September rioting were issued only in recent days.

Most of the government's 22 administration centers, where white bureaucrats collected rents, determined housing assignments and dealt with African problems have been reduced to rubble. White officials, either armed or protected by police, now collect rents at Soweto's community halls.

The government-owned liquor stores and beer halls, the only ones permitted inside the Soweto pound, were also singled out for attack and have been shut down. Students' leaflets warn blacks that "the liquor that is killing us is the white man's weapon against us."

Black Unemployment

JOHANNESBURG, Nov. (UPI).—A South African economic analyst said today that he estimated the country's unemployment at 12 per cent. He suggested that the government subsidize some wage groups to benefit young blacks.

Prof. P.J. van der Merwe, in a nationwide job survey, commissioned by the Federated Chamber of Industries, which estimated 500,000 blacks were unemployed, 12 per cent of the country's African labor force outside the tribal homelands. The survey said 200,000 whites, Asians and coloreds were registered as jobless in addition, a 75-per-cent increase over the 8,000 unemployed in July, 19

Assistant Defense Secre Abraham Stemerdink t parliament that if the a continues using so much munition it will soon hav break into supplies set a for war.

Mr. Stemerdink said du a debate on the defense get that he had ordered a chiefs to use fewer bullets til supplies are replenis next year.

News Analysis

Arab Realignment Points to Talks

By Henry Tanner

CAIRO, Nov. 11 (NYT).—After months of political estrangement, Egypt, Syria and Saudi Arabia have once again aligned their policies and agreed upon a joint Arab strategy aimed at negotiating an overall settlement—in stages—of the conflict with Israel.

This, in short, Arab diplomats say, is the meaning of the realignment that has taken place in the Arab world in recent weeks.

The realignment started when the Saudi royal family imposed a cease-fire on the Syrians and Palestinians in Lebanon last month and summoned Syrian, Egyptian and Palestinian leaders to Riyadh for the first of two meetings of Arab leaders.

The Saudi-Syrian-Egyptian alignment dictated Arab strategy once before, during the months preceding and following the war in October, 1973. It fell apart when Egypt and Syria reacted in sharply different ways to the shuttle diplomacy of Secretary of State Henry Kissinger.

Geneva or Elsewhere

The revival of the alignment has implications for the Middle East peace situation. It means that sooner or later negotiations for an overall settlement may well get under way, either in the Geneva peace conference that convened in 1973 or in some other forum.

The Western-oriented conservatives among the Arab governments appear to have won out. The "progressive" leadership of President Hafez al-Assad of Syria has joined the Saudis and Egyptians and is moving away from such radicals as Libya and Algeria.

The so-called "rejectionists"—the countries that oppose any negotiation for a Middle East settlement—have lost their power to influence Arab strategy for some time to come.

Iraq, the most consistent and most vocal of these, seems more isolated than ever. The Iraqi troops that were sent to Lebanon during the summer to bolster the Palestinians and Lebanese Moslems have begun to withdraw.

Col. Moamer Qadhafi, the radical Libyan leader and another "rejectionist," has been moved by his growing isolation to make overtures for an accommodation with Egypt. A Libyan delegation is expected to arrive in Cairo at the end of the week to prepare for a meeting between Col. Qadhafi and President Anwar Sadat.

President Houari Boumedienne of Algeria has ceased to play an active role in Middle East affairs and is concentrating sullenly on his quarrel with Morocco over Western Sahara, the former Spanish colony.

Isolated Rejectionists

Within the Palestine Liberation Organization, too, the extremist "rejectionists" such as George Habash and his militant Popular Front for the Liberation of Palestine are isolated. With Syrian troops making up nearly all the Arab peace-keeping force in Lebanon, the chance of the "rejectionists" of recouping their strength there are nil and they may be forced to move their operations to Iraq, Libya or Algeria—far from the Israeli borders.

Saudi, Syrian and Egyptian officials have quietly started to lay the groundwork for an Arab diplomatic offensive, according to informed Arab diplomats.

All three members of the new power alignment—Egypt, Syria and Saudi Arabia—are on record as favoring resumption of the Geneva peace conference. They are reported to be studying ways of getting around the Israeli-U.S. veto against the presence of a Palestinian delegation at the conference table.

The idea of a single Arab delegation in which the Palestinians would be included keeps coming up in private conversation.

The schedule for the Arab initiative has been changed by the outcome of the U.S. election. If President Ford had won, the Arabs would have moved quickly. Now the feeling is that President-elect Jimmy Carter must be given time to define his Middle East policy. No real move is expected until late spring at best, Arab diplomats now say.

Cairo Agreement

In the meantime, there will be talks between the leading Arab countries and the Palestinians on a new definition of the so-called Cairo agreement, under which Palestinian armed units in Lebanon are to be confined to the southern part of the country.

Informed diplomats here and in Damascus believe that Saudi Arabia, Syria and Egypt are intent on avoiding a military confrontation with Israel at this time and thus will not send the Palestinians into the border region, where the Israelis have set up a buffer zone by arming and directing rightist Christian militia forces.

But Palestinian units have gone back into the Arkub, near the point where the Lebanese, Syrian and Israeli borders meet. They have also sent reinforcements to the key Moslem district town of Bint Jbail, which the Christians had hoped to take over.

Under the triple influence of Saudi Arabia, Syria and Egypt, the Arab kings and presidents asked the PLO to give up much of its military power and to assume a political role instead.

Mr. Sadat, for one, is known to feel that the Palestinians must be given political compensation for what they lost militarily.

The re-emergence of the Saudi-Egyptian-Syrian alignment with a Western-oriented conservative outlook and a wish to enter into negotiations is seen as giving new opportunities to U.S. diplomacy in the Middle East.

More Problems

For the Soviet Union, it means more problems.

In Lebanon, the Russians were caught between Syria and the PLO, both of which they had supported. Syria pushed ahead with its policy there despite Soviet warnings.

The Syrian-Egyptian accommodation, which is progressing more rapidly than anybody thought possible a few months ago, has led to a resumption of military coordination between Cairo and Damascus.

Soviet influence thus is further narrowed. But this may be offset to some extent by a greater willingness on the part of Egypt to cooperate with the Russians on the international scene. A beginning in this direction was made last week when Soviet Foreign Minister Andrei Gromyko and Egyptian Foreign Minister Ismail Fahmy met in Bulgaria, in their first meeting in more than a year.

OPEC Draws Up Details of Loans To 45 Countries

VIENNA, Nov. 11 (UPI).—India, Pakistan, Bangladesh and Egypt were named today as the major recipients of direct loans totaling $200 million from the Organization of Petroleum Exporting Countries.

Ending a two-day meeting, governors of the OPEC Special Fund decided on details of loan agreements that are expected to be concluded with 45 developing nations described by the UN as those most in need of aid.

Ibrahim Shihata, director of the OPEC fund, said his organization contacted all 28 African, 12 Asian and 5 Latin American nations that qualify, and all are expected to accept the loans.

He said that in effect 70 per cent of a loan's value amounts to a gift, since the loans are interest-free during their 20-year term. Repayments are to start after a grace period of five years.

The size of the loans will range from $1.5 million for Cape Verde up to $21.8 million for India, based on population, per-capita income, decline in reserves, volume of imports and the impact of higher oil prices.

U.S. Says Mail Early

WASHINGTON, Nov. 11 (AP).—Fearing that a United Parcel Service strike may eventually cause a letter jam, the Postal Service has asked the public to mail Christmas packages and cards earlier than usual this year.

Sadat Announces Resumption Of Multiparty Political System

(Continued from Page 1)

with a lot of hot rhetoric, popular demonstrations for and against individual candidates and occasional violence.

Mr. Sadat today said that the success of the election experiment had prompted him to permit the three groupings to turn themselves into "political parties."

He made it clear that, for the time being at least, the three groupings would be the only parties allowed.

The President said that the Arab Socialist Union, which has been Egypt's sole political party for the last 24 years, would retain its supervisory power over the press and mass organizations of women and youth.

The ASU will remain "far above the parties" and will control their budgets, Mr. Sadat said.

Permission to control their own newspapers had been withheld from the three groupings when they applied for it during the election campaign.

The issue of a possible return to the multiparty system was first raised in 1974, in a hearing held by a National Assembly committee. Urban lawyers, politicians and intellectuals from Cairo and Alexandria called for political liberty and the return of parties.

But officials of groups representing farmers, workers, students and women, the "popular" organizations that have wielded power for the last 24 years and represent the political establishment, opposed political freedoms that would have cost them part of their power.

When the debate was over, Mr. Sadat said, in effect, "If the people don't want political reform, we won't have it—yet."

Last January, the President ordered a new, more powerful commission to take up the issue, and during its debate Mr. Sadat made it clear that he thought unlimited freedom dangerous. When more than 40 members of the Assembly applied for permission to create their own separate groupings, he decried political fragmentation.

However, two months later, it was decided to set up the three groupings—center, left and right—in keeping with the President's deliberate gradualism.

—HENRY TANNER.

Foe of Syria Is Target

(Continued from Page 1)

was busy as a host to dozens of Arab politicians and Palestinian leaders who came to see him after learning of the attempted assassination. He also answered phone calls from President Sarkis and Premier Rashid Karami, wishing him continued good health.

An unexpected visitor at the Edde home, was Yassir Arafat, the PLO leader, who keeps his own residence a secret for fear of assassination attempts. Mr. Arafat smiled broadly and kissed Mr. Edde several times on each cheek.

Israeli Bombardments

TEL AVIV, Nov. 11 (AP).—Israeli artillery is bombarding Palestinian guerrilla targets in southern Lebanon in a bid to block a possible resurgence of guerrilla actions on Israel's border, informed sources said today.

The bombardments are also aimed to warn the Syrian Army in Lebanon against moving south to the Israeli border zone, the sources said.

4 Pop Musicians Lose Appeal in Prague Court

PRAGUE, Nov. 11 (UPI).—A Prague court today rejected an appeal by four members of the pop group Plastic People of the Universe, who were sentenced to jail for nonconformist and unruly behavior, court sources said. The four were jailed for terms between eight and 18 months.

A group of dissident politicians and intellectuals has described the closed-door proceedings as a "witch-hunt," protesting in an open letter to the government that anybody with views differing from those of the regime is subjected to "continual abuse of civil rights and liberties."

2 Deaths in Rhodesia

SALISBURY, Rhodesia, Nov. 11 (AP).—Two Rhodesians were reported killed by black nationalist guerrillas today—the 11th anniversary of the white-minority government's declaration of independence from Britain.

Security chiefs said a 56-year-old white civilian working as a mechanic for the police was killed when his Land Rover hit a mine "near the Zambian border" in northwestern Rhodesia. They said a black policeman died in an ambush in another, undisclosed part of the country.

Africans Deny Geneva Gains

(Continued from Page 1)

cant change in the South African policy of surrounding itself by a series of small African homeland states.

• That the structure of the new state be approved by a free vote of all the people living in the territory.

• That the laws of the new state not discriminate against any racial minority. The new state would be overwhelmingly black.

Parliament Is Criticized

Woman Heads Washington Staff

Carter Names Aides for His Transition Office

By Edward Walsh

ST. SIMONS ISLAND, Ga., Nov. 11 (WP).—President-elect Jimmy Carter yesterday named the top officials of his transition operations office in Washington.

Campaign aides and members of his pre-election transition group dominate the staff, and Barbara Blum, Mr. Carter's deputy campaign director, was named director of the Washington transition office.

Mr. Carter's press secretary, Jody Powell, who made the announcement, said the overall transition operation will remain under the direction of Jack Watson, 38, the Atlanta attorney who headed the pre-election transition group.

Miss Blum, 37, is an Atlanta businesswoman and former vice-president of the Restaurant Association of Georgia.

Mr. Powell also announced these other appointments:

• Bowman Cutter, 34, a former assistant to the president of the Washington Post Co., will coordinate the transition office's budget analysis group.

• Harrison Wellford, 38, a former legislative assistant to Democratic Sen. Philip Hart of Michigan, will be in charge of government organization and regulatory reform activities in the transition office.

Talent Scouts

Three men were named to Mr. Carter's "talent inventory program," which will recruit people for appointments in the Carter administration. They are:

• London Butler, 35, who was the political director of the Carter campaign.

• Matt Coffey, 35, a director of White House personnel under President Lyndon Johnson and a former president of the Association of Public Radio Stations.

• Dick Fleming, an urban development specialist.

Three others will be in charge of policy development and liaison with federal agencies, according to Mr. Powell. They are Alfred Stern, a professor at Wayne State University, who was deputy director of Mr. Carter's issues staff during the campaign; Bruce Kirschenbaum, 35, a former Washington representative for New York City, and Curtis Hessler, 33, a Los Angeles attorney and former clerk to Supreme Court Justice Potter Stewart.

Mr. Powell also said that Mr. Carter has named Lawrence Bailey, 35, an assistant director of the U.S. Conference of Mayors, and Jule Sugarman, 49, a chief administrative officer of the city of Atlanta and former aide to former New York Mayor John Lindsay, to the transition planning staff.

Liaison with Congress will remain in the hands of Frank Moore, according to Mr. Powell.

Mr. Moore had that job during the campaign and was criticized by some on Capitol Hill for inexperience and carelessness. But Mr. Powell said yesterday that Mr. Moore was handicapped by lack of a large staff and that he had done "an outstanding job."

Modest Inauguration

Carter aide said meanwhile, that the inauguration Jan. 20 will not be elaborate or high-priced.

"The inauguration will be modest. It will not be extravagant, that much I know," said Bardyl Tirana, who recently discussed how inaugural planners will mark the changing of the government guard from a Republican to a Democratic administration.

Mr. Tirana, 33, a Washington attorney, has been involved in inaugural preparations for the last month. Mr. Carter appointed him as the Democratic liaison to city officials who had some inaugural decisions to make in advance of Election Day.

The cost of Richard Nixon's second inauguration in 1973 was $4 million, the most expensive in history. It included swearing-in ceremonies at the Capitol, the inaugural parade, five inaugural balls, concerts and a reception for Vice-President Spiro Agnew.

Diverse Activity Possible

Kissinger to Open New Talks —About His Personal Future

By Don Oberdorfer

WASHINGTON, Nov. 11 (WP).—Secretary of State Henry Kissinger let it be known yesterday that he plans to meet with "a few people" in the coming weeks about his work after leaving public office.

His statement, issued by State Department spokesman Robert Funseth, superseded an earlier Kissinger assertion that he would consider it "improper" to discuss financial offers while still in the government.

Nobody would identify the people whom Mr. Kissinger plans to meet to discuss his future. However, friends said he expects to write a book within the next two or three years, and is exploring the possibility of fulfilling a quasi-independent role as an adviser and consultant, possibly combined with an academic appointment.

Mr. Kissinger may join corporate boards of directors, according to one friend, but definitely will not take a government post. Those familiar with his thinking said there is little chance that he will accept reported offers to be a television commentator, considering such a post to be beneath his dignity.

Offers Accepted

Former Under Secretary of State Carlyle Maw, who was Mr. Kissinger's personal lawyer before joining the government, said he has been accepting "offers, suggestions and proposals" directed to Mr. Kissinger in recent weeks, but that the Cabinet officer has not yet given them his attention.

Mr. Maw confirmed that Mr. Kissinger has received several proposals related to the projected book. The lawyer said, however, that he has seen no outline and that he does not believe Mr. Kissinger has started drafting a manuscript. Mr. Maw, who returned to private law practice in September, denied a published report that Mr. Kissinger has chosen a literary agent.

A New York literary source said that Mr. Kissinger's memoirs are considered to have potential as "a very big book of our time," although nobody knows what he will cover in his writings, or how frank and incisive he will be. The source said that publishing houses have submitted offers over many months, with no response from representatives of Mr. Kissinger except to acknowledge receipt of the offers.

European publishers are said to be particularly enthusiastic about a Kissinger book. A rumor, subsequently denied, swept European literary circles last week that rights to the book were to be put up for auction in London within a few days.

Lawrence Eagleburger, Mr. Kissinger's executive secretary, said that, like other retired secretaries of state, Mr. Kissinger will arrange to gain access to his government documents after his departure from public service.

Mr. Eagleburger said that extensive "memoranda of conversations" covering talks between Mr. Kissinger and foreign and U.S. leaders are part of this official file, but a legal adviser has ruled that notes of his telephone conversations are "personal papers" which may be taken with him when he leaves government.

Some of Mr. Kissinger's most important exchanges with presidents and foreign leaders are believed to have been conducted by telephone. Some private attorneys believe that records of telephone conversations monitored during Richard Nixon's presidency may be covered by the U.S. court order that requires government retention of the Nixon papers.

According to State Department regulations, no papers that have not been explicitly designated or filed as personal at the time of origin or receipt may be removed when an official resigns.

The line between official records and "personal papers" is the subject of a memorandum, awaiting final clearance, which the National Archives and Records Service plans to send within a few days to all government departments.

Mr. Eagleburger said he expects Mr. Kissinger to be "very conservative" in determining which papers are personal documents. "If there is a question about it, it will stay here," Mr. Eagleburger said.

Absentee Ballot Survey

The International Herald Tribune is making a survey of overseas absentee ballots in the recent U.S. presidential elections. Readers who asked for such ballots but did not receive them are asked to write the IHT, giving their names and the counties and states involved.

After Court Accepted Plea to Die 'Like a Man'

Governor of Utah Stays Slayer's Execution

From Wire Dispatches

SALT LAKE CITY, Nov. 11.—Gov. Calvin Rampton today stayed for two days the execution of condemned killer Gary Mark Gilmore, who had persuaded the Utah Supreme Court to let him die "like a man" on Monday.

The governor's stay will remain in effect until Wednesday, when the State Board of Pardons will take up Gilmore's case and decide whether to grant a further delay, let the execution occur at a new date set by the judge who sentenced him to death, or commute the sentence to life imprisonment.

Gov. Rampton acted less than 24 hours after the Supreme Court listened to Gilmore ask to be allowed to die "with dignity, like a man" on Monday morning.

The court, by a vote of 4 to 1, ruled that he be put to death by a firing squad.

Gilmore—one of 444 persons in death rows in the United States—would be the first person to be executed since 1967.

The decision, which reversed a 3-to-2 decision on Monday that granted a stay of execution, said: "The stay of execution heretofore granted is withdrawn and vacated and any appeal filed on behalf of Gary Gilmore is dismissed forthwith."

The 35-year-old prisoner was convicted last month of the slaying in July of a motel manager in Provo. Gilmore dismissed his court-appointed attorneys last week when he rejected the attorneys' plan to appeal his case and he asked the state's high court to allow his execution to be carried out by firing squad at dawn on Monday, the day set by the trial judge.

Penalty Accepted

Gilmore appeared before the Supreme Court, handcuffed and in white prison garb, and said: "I believe I was given a fair trial, and I think the sentence was proper, and I'm willing to accept it like a man and wish it to be carried out without delay."

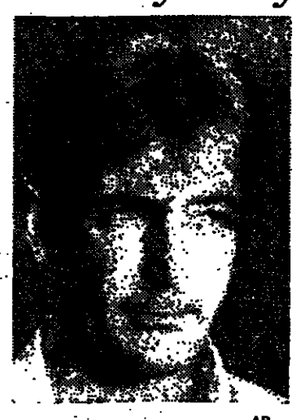
If the sentence is carried out, it will be the first execution since the U.S. Supreme Court handed down a decision July 2 saying that capital punishment was not inherently unconstitutional.

However, that decision said the death sentence had safeguards, and while it upheld the capital-punishment laws of Texas, Georgia and Florida, it struck down those of North Carolina and Louisiana.

The reaction to the court ruling raised the possibility of an appeal to the U.S. Supreme Court that might result in another stay of the execution.

Conflict Suggested

A point that apparently might be raised in an appeal is that one of Gilmore's newly appointed attorneys, Denis Boaz, is said to be a writer as well as a California lawyer and may have a contract to write about the case. Mr. Boaz would not comment on this, other than to say he is a free-lance writer.



This might be construed as a conflict of interest, a possibility raised by David Kendall of the National Association for the Advancement of Colored People, who is considered an expert on the subject of capital punishment litigation.

The decision has sent Samuel Smith, warden of the state prison here, back to the file that contains the names of volunteers who want to man the guns of the firing squad.

The prison phone has been busy since Gilmore, a convict who has spent most of his life behind bars, pleaded with the court to execute him. The callers, more than two dozen of them, were volunteering to shoot him. Their names have been added to a file of volunteers that has been untapped since the last execution was held in Utah 16 years ago.

Now, Warden Smith has begun to review the list, conscious of the burden of selecting five volunteers who can dispassionately perform an act of capital punishment. The warden said he would draw the names from the list of volunteers after he had screened out those who sought participation for "unhealthy" reasons.

"I can't judge everyone's motive," he said, "and I'm not sure what criteria I should use in evaluation. I'm just looking for solid citizens."

14 Countries Meet To Discuss Limits On Nuclear Sales

LONDON, Nov. 11 (UPI).—Officials of 14 Western and East European countries met here today to discuss how to keep nuclear exports from contributing to nuclear proliferation.

The Foreign Office said the meeting will continue through tomorrow. It said the participating countries are Belgium, Canada, Czechoslovakia, France, East and West Germany, Italy, Japan, the Netherlands, Poland, the Soviet Union, Sweden, Britain and the United States.

A 15th country, which a Foreign Office spokesman refused to identify by name, is represented by an observer. The spokesman would not say whether it is Switzerland.

The committee, which has given itself the informal name of the "London Group," started as a group of seven nations early last year and now has grown to 15.

It held a number of meetings here in secrecy last year, refusing even to identify its members. It was only today that the 14 full members were named officially.

Officials said the Soviet Union has cooperated fully with the West on this problem.

Angolan Leader Hints at New Aid For Nationalists

LONDON, Nov. 11 (Reuters).—President Agostinho Neto of Angola said today that his country faced a threat from imperialist "bases for aggression" in South-West Africa (Namibia) and hinted at new concrete Angolan aid for nationalists operating in the neighboring territory.

He was speaking in Luanda on the first anniversary of Angola's independence from Portuguese colonial rule. His speech was broadcast by the Luanda radio and monitored here.

He said the establishment of "bases for aggression" against Angola and Mozambique was emerging as one of the purposes of the attempt to find neocolonialist solutions for Namibia and Zimbabwe (Rhodesia), apparently referring to the South African-sponsored constitutional conference on South-West Africa and the U.S.-British peace plan for Rhodesia.

"Faced by this new tactic of imperialism we must give definite form to our internationalist help for the peoples of Namibia, Zimbabwe and South Africa in their struggle against colonialism, racism and imperialism," he declared.

Moscow Pushes Its Vienna Plan

MOSCOW, Nov. 11 (UPI).—The Soviet Union attacked the West today for lack of progress at the Vienna talks on troop reductions in Central Europe and accused NATO of "circumventing" agreements.

A lengthy commentary by Tass called on members of NATO to accept a Soviet bloc proposal for a two-stage, equal cutback—a position the West has repeatedly rejected because Warsaw Pact forces outnumber the West's in Europe.

Tass said the negotiating positions of the West and the Warsaw Pact in the three-year-old talks are "hardly compatible" and the

W. German Ship Recovers F-14 Jet, Heads for Shore

WASHINGTON, Nov. 11 (UPI).—The Navy announced today that a sunken F14 Tomcat fighter plane which it has been trying to recover for more than a month had been successfully lifted aboard a civilian salvage ship off the Scottish coast.

The salvage vessel secured the airplane late in the day and will head for the Scottish port of Rosyth where the plane will start on a trip back to the United States and an investigation of what caused it to go out of control and plunge into the North Atlantic.

Officials expect the plane to be little more than junk when finally recovered. But they consider recovery important to keep the fighter's sensitive equipment out of Soviet hands. On Oct. 30, the Navy recovered a highly classified Phoenix missile that had fallen from the aircraft.

In its announcement, the Navy said the F-14 "is presently on the surface of the water four miles from the entrance of Westray Firth in the Orkney Islands," suspended by cables from the West German salvage ship Taurus.

Controversial Figure Says He Was Its Guest

Pentagon Denies Inviting Ex-Nazi Air Ace

By Michael Getler

BONN, Nov. 11 (WP).—A World War II German flying ace, whose postwar endorsement of neo-Nazi views stirred a political-military dispute here recently, visited Washington last month, and he says it was at the invitation of the U.S. Air Force. The Pentagon, however, denied any Air Force role in his trip.

The controversial figure is former Col. Hans-Ulrich Rudel, now 60, who was the most decorated pilot in the Nazi Air Force and was known as "Hitler's favorite pilot."

He was personally credited with sinking a Russian battleship and with knocking out 500 Soviet tanks on the Eastern front. As commander of the famous Immelmann squadron of Stuka dive bombers, he also led devastating air raids, notably against Rotterdam and Warsaw.

Mr. Rudel, interviewed by telephone at his home in Austria, said he had visited the United States in October at the invitation of the U.S. Air Force, but said he preferred not to disclose who invited him.

Pentagon Comment

In Washington, the Defense Department said that Fairchild Industries invited him, to evaluate a new Fairchild military plane. The private firm confirmed that it paid Mr. Rudel's travel expenses.

Mr. Rudel, who has no connection with West Germany's postwar Luftwaffe, said he was invited to the United States because of his experience in knocking out tanks from the air.

He said he was taken, along with several U.S. generals, to see Fairchild's new A-10 Air Force jet, developed for knocking out

Just last week, Mr. Rudel was the center of a controversy climaxed by the Bonn defense minister's firing of two top officers of West Germany's Air Force.

The trouble started when Mr. Rudel was invited to an "old timers day" celebration at an air force base. His presence was defended by the commander of the Luftwaffe, Lt. Gen. Walter Krupinski, and his deputy, Maj. Gen. Karl Heinz Franke. They were relieved of their posts by the ministry, which said: "We do not want to see this sort of person at federal military facilities."

Dismissals Explained

BONN, Nov. 11 (UPI).—Defense Minister Georg Leber said today that he fired the two air force generals because no soldier can be permitted to insult a member of parliament.

A spokesman said that Mr. Leber had intended to make that point to parliament yesterday in reply to an opposition motion of censure.

Parliament postponed the debate on the motion after Mr. Leber was hospitalized for an emergency appendectomy.

Mr. Leber's aide said he fired Gen. Krupinski and his aide because they said Mr. Rudel had as much right to visit Luftwaffe troops as a former Communist, Herbert Wehner, has to be leader of Chancellor Helmut Schmidt's Social Democratic delegation in parliament. Mr. Wehner broke with the Communists near the end of the war.

Cuba Denies It Has U-2 Pilot's Body in Ice

WASHINGTON, Nov. 11 (AP).—State Department officials said yesterday that the Cuban government has denied a report that it has the body of a U.S. U-2 pilot in a block of ice.

Members of the Ripon Society, a liberal Republican group, said they were told about the pilot by a Cuban Foreign Ministry official during a visit to Havana last month.

United Press International

TUNNEL TO NOWHERE—Guards inspecting entrance to a 77-foot-long escape tunnel at San Quentin, Calif., prison. Tunnel was 55 feet short of San Francisco Bay when it was discovered.

San Quentin Guards Find an Elaborate Tunnel

SAN QUENTIN, Calif., Nov. 11 (UPI).—Led by escape artist Norman Lucas, San Quentin Prison inmates removed and concealed 260 cubic yards of rock, shale and dirt to dig an elaborate tunnel in an unsuccessful mass escape attempt.

Six inmates are now held in maximum custody and investigators believe many other inmates were involved. The tunnel was discovered Tuesday after authorities received rumors of plans for a "big breakout."

Two-way radios for lookouts, fans powered by small motors in tobacco cans, a water pump for drainage and lock-picking kits were used as well as shovels and hoes.

The tunnel, 2 1/2 by 4 feet, ran 10 feet down from the cell block, housing 400 men, 67 feet horizontally past the chamber. It had 55 feet to get underneath the wall, emerge at a sheltered point San Francisco Bay from which would have been an easy to freedom.

Rock and dirt was moved box sled for distribution the subfloor of the north block, an area where never went. The diggers had four hours a day for work, and needed to clothes afterward.

Poll Shows Quebec Separatists Lead Ruling Party by 2-1

By Jacques Grenier

MONTREAL, Nov. 11 (WP).—Quebec's separatist party got a major boost yesterday in its drive to unseat the French-speaking province's Liberal party government in next Monday's elections.

A poll conducted for a group of Canadian newspapers showed the Parti Quebecois with almost twice as much support as the Liberals, and an extraordinarily large pool of undecided voters—30 per cent.

The undecided voters are expected to swing the balance, and Parti Québecois leader René Levesque has been spending the last days of the campaign reassuring them that his victory will not automatically split Quebec into the abyss of independence.

The disintegration of support for the provincial Liberals would be a major blow to the already embattled federal Liberal government of Prime Minister Pierre Elliott Trudeau. Of the 135 Liberal members of Parliament, 54 are from Quebec. There are 264 seats in the House of Commons in Ottawa.

Power Base

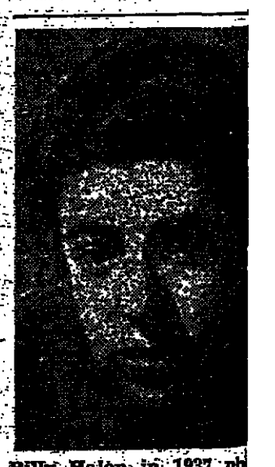
The loss of Quebec as the party's main national power base, even putting aside the volatile question of Quebec separatism, could harm the Trudeau government throughout the country.

Mr. Trudeau's efforts to place French on an equal footing with English in the federal civil service has prompted a backlash against him.

The Quebec provincial government, headed by Premier Robert Bourassa since 1970, has also plummeted in popularity. It has been linked to a series of alleged and proved scandals and has failed to deliver on Mr. Bourassa's main promise—jobs.

Mr. Bourassa said he is confident his party will win despite the poll.

Mr. Bourassa said at a news conference: "I have no doubt that the people of Quebec will support the Liberal party because in the past the population of Quebec has shown common sense."



Federal Aid

Mr. Bourassa came to power with the pledge that Liberal rule in the province would bring in major federal help in creating new jobs. However, unemployment in Quebec is now 10 per cent, compared to about 7.5 cent nationally.

Mr. Bourassa said he w create 100,000 jobs with fe and private investment. He filled the pledge, but it has pr to be insufficient. The growt the Quebec labor force has stripped the creation of new

The latest poll showed the Québecois with 29.5 per ce the vote and the Liberals 15.9 per cent. The Parti Q cois won about that proporti the 1973 provincial election Quebec's National Assembly. the figures show a major de for the Liberals, who won 55 cent then.

Mr. Levesque is not expect win an outright majority bu could win enough seats to fo minority government.

Nuclear Accident In Russia in '50s Laid to A-Reactor

LOS ANGELES, Nov. 11.—U.S. intelligence experts said this week that a major nuclear accident in the Soviet Union nearly two decades ago involved a reactor that went out of control, not an explosion of atomic waste as an exiled Soviet scientist asserted last week.

Two intelligence sources told the Los Angeles Times independently that the mishap occurred in late 1957 or early 1958 and involved a plutonium production reactor at a Soviet nuclear weapons complex located several hundred miles northeast of the Caspian Sea near the southernmost Ural mountains.

One official said the accident, which intelligence agencies detected shortly after it occurred, was the only event in the history of the Soviet nuclear program that could be described as a "disaster."

Dr. Zhores Medvedev, a dissident Soviet scientist now living in exile in England, said a nuclear accident in 1958 had killed hundreds of persons and made thousands ill from radiation.

Dr. Medvedev said the accident was caused by buried nuclear waste that overheated and erupted "like a violent volcano."

Policy Sought by Ford Aides

U.S. Weighs Tying Arms Sale To Iran's Holding on Oil Price

By Leslie H. Gelb

WASHINGTON, Nov. 11 (NYT). —Senior Ford administration officials want the United States to tell the Iranians that an increase in the price of oil would lead to reconsideration of the multibillion-dollar U.S. program of arms sales to their country, according to highly placed sources.

The sources said that on a previous occasion Secretary of State Henry Kissinger had rejected the strategy of threatening to link arms-sales policy to oil-price policy. They said he was likely to do so again, although other officials felt that he might reconsider in view of the continuing worldwide economic deterioration. He is said to believe that threats will not work, serving only to jeopardize the overriding U.S. interest in good relations with Iran.

High officials in the State and Treasury Departments and the Pentagon want the administration to convey privately to Iran a message of this sort: If you increase the price of oil, it will sour attitudes toward Iran in the United States, and even if we wanted to continue selling you arms, it would be virtually impossible to do so.

Mid-December Session

The oil ministers of the 13 nations in the Organization of Petroleum Exporting Countries are to meet in mid-December in Qatar. Iran is regarded as the leader of a group seeking a 10 to 20-per-cent increase in prices, now about $11.50 a barrel, from the Gulf.

Mr. Kissinger and other senior administration officials have been saying that any increase would have catastrophic effects on such nations as Britain and Italy as well as on the developing countries. Nonetheless, he has consistently resisted efforts to use what all agree could be the most effective and most risky bargaining lever—the arms sales to Iran.

U.S. sales to Iran have been averaging $2 billion a year for the last five years; when Mr. Kissinger visited Tehran in August, he talked of $10 billion more in highly sophisticated military systems in the coming years.

Just before the secretary of state was to depart for his meeting with Shah Mohammed Reza Pahlevi, the issue of linking oil prices and arms sales was seriously grappled in the administration for the first time, officials said. Mr. Kissinger agreed to raise the issue, but only in relation to the Shah's intention of buying plants to reprocess spent fuel from nuclear reactors.

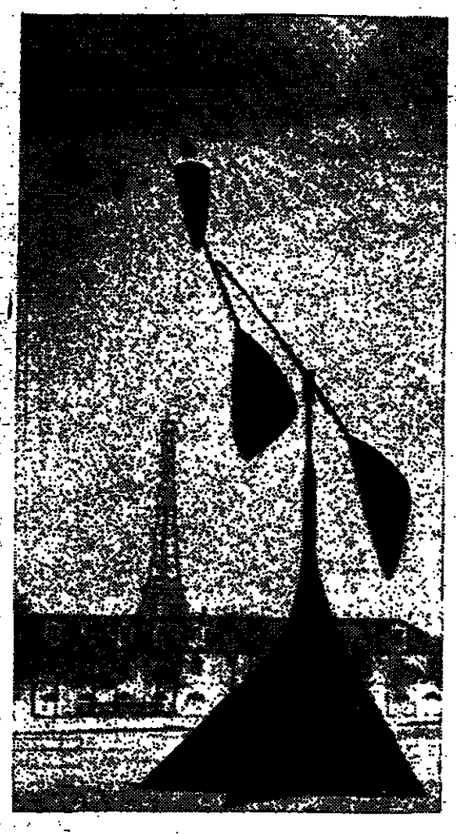
At that time Congress had just passed legislation requiring a cutoff of virtually all forms of aid to any country that purchased reprocessing plants or other facilities that could lead to the production of weapons-grade plutonium for nuclear explosions.

To dissuade the Shah from buying the reprocessing plants and locating them on Iranian territory, the officials related, Mr. Kissinger assured him concerning Iran's importance to the United States as a regional power and pledged that it would have continuing access to the most advanced conventional arms.

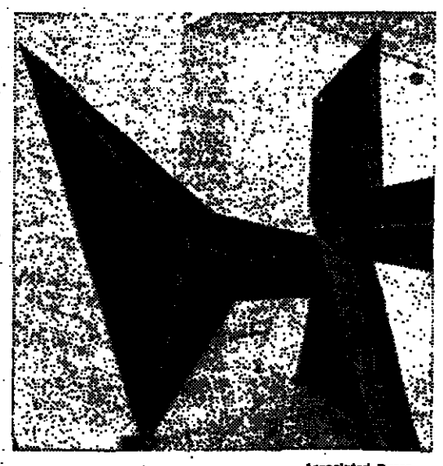
Several weeks later, the administration announced that it had agreed to sell Iran 160 F-16 jet fighter aircraft, regarded as the front-line U.S. fighter of the future, with a price tag of $3.4 billion. Iran is already taking delivery of the F-14 fighter-bomber, the most advanced craft in the U.S. Air Force inventory.

'Call His Bluff'

According to the sources, Mr. Kissinger rejected the idea of threatening to halt the flow of arms because he believed that the United States should continue to supply them even if Iran raised oil prices. "He did not want the Shah to call his bluff," an official explained, "and then have to sell the arms anyway."



Mr. Kissinger, who has called Iran an important stabilizing and anti-Soviet influence in the volatile Gulf area, decided to use economic grounds in making his case to the Shah against a price increase.



The officials said he argued that an increase would wreak havoc on the international economic system and would be as harmful to Iran in the long run as to the oil-importing countries.

White-Collar Crimes At Record, FBI Says

WASHINGTON, Nov. 11 (UPI). —Stepped-up FBI probes into white-collar crime produced a record 4,600 convictions in the fiscal year ended June 30—five times the number obtained in the previous 13 months, the bureau said yesterday.

The investigations turned up financial wrongdoing ranging from land frauds in Arizona, forged securities in Missouri and industrial espionage in Illinois to short-loadings of grain in Louisiana, the FBI said. The investigations resulted in fines, savings or recoveries of misused funds totaling $208 million.

Associated Press.

CALDER WORKS—Part of a stabile (above) that was in 1971 exhibition in Paris, and a large mobile on the Unesco grounds in Paris.

Sculptor Alexander Calder, 78, Dies in N.Y.

(Continued from Page 1)

Saché, near Tours, he was an unmistakable and much-venerated figure as he padded along the Boulevard Saint-Germain in his unvarying red shirt.

Mr. Calder's worldwide popularity was a phenomenon of comparatively recent date. At his New York show in 1955 he sold nothing at all, and in 1956 he said to his New York dealer, Klaus Perls, "What! You think you can get me a thousand dollars for a mobile." When this state of affairs came to an end a year or two later, Mr. Calder in his 60s and 70s proved equal to all the demands upon him, no matter how numerous or how varied these were.

Working in his new cathedral-like studio and at an engineering shop not far from his house in Saché, he completed one gigantic stabile after another and was no less active in the production of major mobiles.

In a small studio set apart for the purpose, he made a habit of producing large numbers of gouaches every year; these paintings with their inimitable air of sardonic festivity proved illimitably popular. One of the largest and grandest of his stabiles was erected in 1974 in Grand Rapids, Mich., where it was later surveyed with some bemusement by President Ford.

Mr. Calder could make anything: toys, tapestries, stage design, cigarette holders, jewelry, wallpaper, portraits in wire that turned out to be astonishingly "like." Asked to paint an aircraft for Braniff Airways or a racing car for BMW, he complied with alacrity. Perhaps the most impressive single work of his later career was the gigantic mechanized mural that he completed in 1974 for the Sears Tower in Chicago.

He died among his family and at the end of a triumphal sojourn in New York, where his retrospective exhibition, "Calder's Universe," at the Whitney Museum is giving pleasure to very large attendances.

—JOHN RUSSELL.

Emirates Unable To Choose Ruler

ABU DHABI, Nov. 11 (Reuters). —A twice-postponed meeting of the Supreme Council of the United Arab Emirates failed last weekend to agree on the seven-member union's next president and put off a decision until Nov. 27.

The council must decide by Dec. 2. It had been expected to ask the present federal President, Sheikh Zayed ben Sultan al-Nahyan of Abu Dhabi, to stay on for a second five-year term.

Earlier this year, Sheikh Zayed, head of the union's largest and richest state, said he wanted to stand down because of his fellow rulers' lack of commitment to federation. Observers said the failure to re-elect him last weekend suggested he was still dissatisfied.

£18,700 in Mint Coins Stolen on U.K. Train

LONDON, Nov. 11 (AP).—Thieves broke into a sealed boxcar in a Royal Mint train and stole coins valued at £18,700 ($29,920), police reported today.

The money, part of a large consignment of coins, was in bags of 50-pence and 10-pence coins.

Envoy, at UN, Also Disclaims Annexation

Turkey Denies Partition of Cyprus Is Goal

UNITED NATIONS, Nov. 11 (AP).—Turkish Ambassador Ilter Turkmen told the UN General Assembly yesterday that his government "does not entertain even the remotest notion of annexation or partition" of Cyprus.

His statement in the debate on the Cyprus question countered a charge that Turkey aimed to annex the northern part of Cyprus and later occupy the whole island.

The charge was made at the opening of the debate Monday by Cypriot Foreign Minister John Christophides, whom Mr. Turkmen kept calling "the Greek-Cypriot representative."

He denied Mr. Christophides's accusation that Turkey was bringing thousands of Turks from the mainland to "colonize" the occupied zone in northern Cyprus.

Mr. Turkmen said the "largest number of people" who had come to Cyprus since the Turkish invasion in July, 1974, consisted of Turkish Cypriots who had emigrated to Turkey, Britain or other Commonwealth countries because of Greek-Cypriot "political, administrative, social and economic pressures" and who now had a chance to lead a normal life on Cyprus.

He said that "skilled technicians and workers" had been imported from Turkey to meet immediate economic needs but this movement had stopped several months ago and most of them had returned to Turkey.

Taking issue with Greek-Cypriot accounts of more than 200,000 Greek-Cypriot refugees in Cyprus, Mr. Turkmen said, "The Greek-Cypriot attorney general, in his book entitled 'The Legal Aspects of the Problem of Refugees in Cyprus,' asserts that there cannot be more than 120,000 refugees in Cyprus."

Concerning Mr. Christophides's assertion that 40,000 Turkish troops were in Cyprus, Mr. Turkmen noted that Turkish Foreign Minister Ihsan Sabri Caglayangil had told the assembly earlier during the general debate that 12,000 Turkish troops had been withdrawn from the island.

Heavy Burden

He said Turkish Cypriots looked forward to a time in Cyprus "when they would no longer need the protection of the Turkish forces" and the Turkish government also was looking forward to being "relieved of this heavy responsibility."

Mr. Turkmen said, "The only political administration in north Cyprus is the Turkish federated state of Cyprus" under "President [Rauf] Denktash, elected by a 76.61-per-cent majority" over three other candidates last June 20.

He said the Turkish-Cypriot community had "hitherto refrained from claiming external sovereignty" in a desire to keep avenues open for reconciliation and "re-creation of an independent and sovereign republic of Cyprus." But the Greek-Cypriot community had abused "this restraint" by a stream of vilification, he said.

Missing Persons

Mr. Turkmen said the Turkish-Cypriot leadership was "responsible to only its people" and the Greek-Cypriot leadership should "accept that its counterpart on the island is exclusively the Turkish-Cypriot community" and take up the question of missing persons, colonization and other issues with the Turkish federated state of Cyprus.

The Turkish-Cypriot community is the Greek-Cypriot community's only negotiating partner in intercommunal talks and "Turkey is not involved in this negotiating process," Mr. Turkmen said.

Exercising the right of reply, Mr. Christophides accused Mr. Turkmen of "half truths, distortions and misrepresentations." He said Greece and the Greek Cypriots had ruled out both Enosis [union of Cyprus with Greece] and partition. He insisted that Turkey controlled the Turkish-Cypriot negotiators in the intercommunal talks.

"It is Ankara that has invaded Cyprus—it is at Ankara's direction that the intercommunal talks are stalemated," Mr. Christophides said.

It's never too soon to change to a Volvo. But any minute it may be too late.

If your car fails to cope with cold mornings, damp weather or steep hills, you can always decide to change it for something better. But if it fails to cope with an emergency there is little time for that kind of decision.

With a Volvo 242, 244 or 245 you will be well prepared for all everyday hardships, as well as emergencies. Apart from superb handling qualities you will have an advanced safety design to protect you. Triangle-split dual circuit brakes with bigger safety margins than required by law in any country. A long engine compartment that takes up collision energy.

A protective framework around the passengers, including separate bars in the doors against side impact. A steering system that yields under impact so that it does not constitute a risk in a collision. Three-point seat belts, front and rear. And the high-impact type of laminated windscreen which is elastic and has extraordinary strength – both qualities add to your protection.

It goes without saying that these safety qualities are built into your Volvo not because we believe you will take any unnecessary risks, but because we think you should have the best kind of safety margins that modern automobile technique can offer you.

More Irrelevancy in the UN

The vote in the UN General Assembly on Tuesday attacking collaboration with South Africa was hard fought. It climaxed two weeks of debate by the representatives of the world at large and involved 10 resolutions. Moreover, it dealt with a problem that is daily becoming more acute—apartheid in South Africa. It has been pointed whole matter, considering the world issues that have already become acute, was astonishingly irrelevant.

The objective of the debate and its ensuing resolutions was to attack Israel and the "imperialists" for their support of apartheid in South Africa. It has been pointed out, accurately, that Israel and the Western countries are by no means the only ones that trade with South Africa. And it can be pointed out that the really critical issue in that general area is Rhodesia's future, which presently is obscured largely by quarrels among the black nationalists and their insistence on winning debating points rather than avoiding a devastating racial war.

In addition, much of the steam for the resolutions came from the Arab states. Since these states have only just succeeded in suspending their own rivalries long enough to back a Syrian spearhead into Lebanon to end or at least bring a truce of sorts in a complex intra-Arab war, it may be questioned whether they are in a position to deliver high moral judgments regarding South Africa. And, too, the Arab relationship with black Africa has its own historic stains. But the Arab nations have been willing to use any pretext to belabor Israel in the UN, and the Israelis gave them an opportunity by a rather blatant assertion of ties with the Vorster government.

As for the Third World generally, it likes to attack "imperialism"—Western style, that is—and of course the Communist states can disregard the fact that Cuban troops with Soviet arms are trying to extinguish the last embers of non-Communist resistance in Angola, because that activity is, by their own definition, "liberationist" not "imperialist."

But the main point of the South African debate is that it will affect the course of events in Africa only remotely; that it doesn't deal with issues that can now be met and leaves many issues—closely related to the South African problem—dependent on the work of forces and agencies outside the international organization and this, unhappily, is characteristic of the way in which the UN operates.

It has often been said that never was the world more interdependent, yet the means of making that interdependence work are unavailable. This is not for lack of institutions—there are now more agencies for global cooperation than at any time in human history, ranging from common markets of various sorts in many places to the UN itself, which has both a charter responsibility and a number of experienced departments covering most areas of world difficulty.

But human greed and human pride, old hatreds and new fears, carry the UN—like so many other international associations—along lines that lead to conflict rather than collaboration. Each group of states, each band of ethnic aspirants, each established government and each faction that would like to be established—they all find it hard to work together, easy to brawl. The world's difficulty lies not with its institutions but with a human condition that has not yet succeeded in making them work effectively, equitably or even with reasonable common sense.

Iceberg Shortage Ahead?

Mention icebergs and most people's minds immediately turn to thoughts of danger, to recollections of the Titanic sinking beneath the sea with terrible loss of life, after crashing into one of those huge, frozen masses in the North Atlantic. Such images begin in elementary school when children learn about patrols that chart the number and paths of floating icebergs to warn ships and prevent repetition of a Titanic disaster.

But in a world where population, living standards, and raw material needs are rising, the pressure on resources grows incessantly. Yesterday's useless or even harmful material becomes today's — or tomorrow's — essential source of human requirements.

So it is now with icebergs, which are being eyed more and more as a relatively cheap source of water for desert and semi-desert areas. Several years ago, Dr. John Isaacs of the Scripps Institute of Oceanography suggested towing icebergs to southern California from Antarctica and using the melted water from this source to supply the rapidly rising needs of Los Angeles, San Diego and neighboring communities.

Now Saudi Arabia has commissioned a study to investigate the practicality of towing 85-million-ton Antarctic icebergs 5,000 miles to the vicinity of the Saudi port of Jiddah where the ice would be melted for drinking water and for irrigation. The price of a glass of iceberg water in Jiddah, it is estimated, would be half the cost of a glass of water obtained by desalting seawater. Off the coast of St. John's, Newfoundland, icebergs are being studied and moved for a completely different reason: to free seabed areas so that drilling can be done for the oil and gas believed to lie under the icebergs.

No doubt the first icebergs to be moved long distances in order to water the deserts and to nourish the humans living there will be considered exotic, even bizarre, experiments. But if these experiments succeed, it will soon be realized that vast quantities of valuable water are frozen in the icebergs and major economic and legal questions will quickly arise. Who owns the icebergs floating in the Arctic and the Antarctic? How much should their owners, if any, be paid per million tons of ice? And sooner or later some imaginative economist will publish a projection forecasting an iceberg shortage by the year 2050 or 2075, the signal perhaps for the nations owning icebergs to get together in a cartel to impose the highest possible iceberg price they can extort from the rest of the world.

To anyone who thinks these prospects are fantastic, we suggest casting the mind back a few years ago to the days when everyone assumed that there were an infinite number of fish in the sea, and a shortage of fish seemed as unlikely then as a shortage of icebergs does now.

THE NEW YORK TIMES.

International Opinion

French-British Talks

In reality, [the talks at Rambouillet this week between British Prime Minister Callaghan and President Valéry Giscard d'Estaing] form part of that great European equilibrium which remains one of the fundamental axes of Mr. Giscard d'Estaing's foreign policy. This year the French leader will have met West German Chancellor Schmidt and Mr. Callaghan twice, and Italian Premier Andreotti once.

Thus West Germany is no longer France's only privileged partner. Thus after the classification of principles and ideas and the creation of more or less effective economic, industrial and agricultural systems, Paris is really making efforts towards European construction . . Thus, by means of multilateral talks, Mr. Giscard d'Estaing will have succeeded, in a way, in setting up the de facto directory which he seems always to have sought.

—*From Le Figaro (Paris).*

Sino-Soviet Relations

Divining the policies and motives of one clamped-up society at a time is hard enough. But two together—in this case the Soviet Union and China, and the problem of how their relations will develop—and the difficulties of guesswork are multiplied fourfold. However, semifacts and official utterances give some pointers. Western Europe is entitled for the moment to preserve its usual complacent view that strains short of war between Peking and Moscow will go on working to its advantage. But if Albania is nervous about what China's future policies might be, so should Europe be, for with Mao gone the possibility of change sometime is there.

—*From the Guardian (London).*

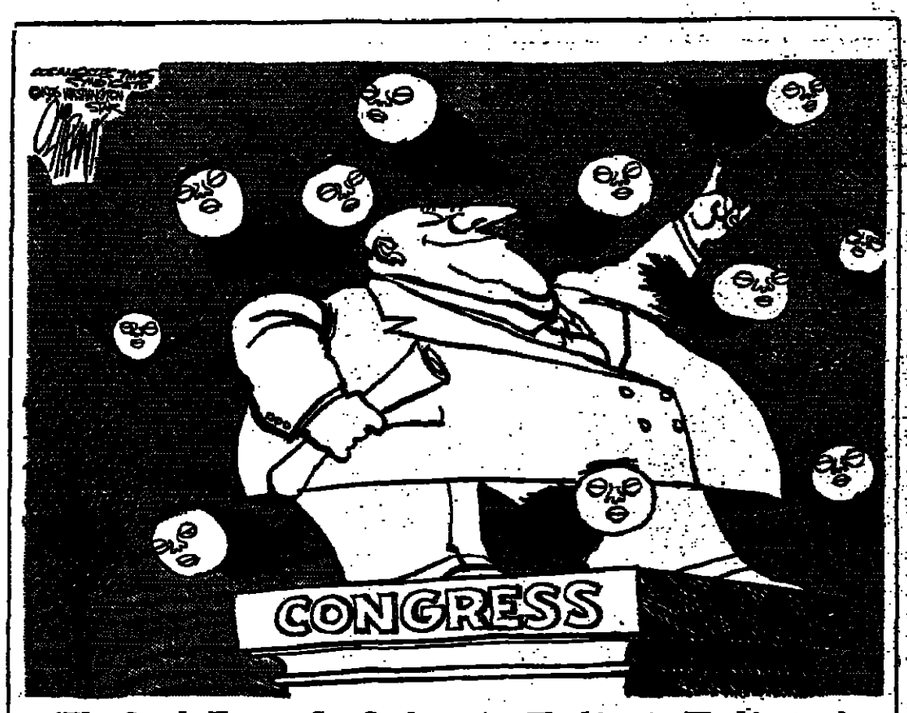
Rhodesia: Prospects Are Dim

Despite the heavy emphasis still being given at the Geneva conference on Rhodesia to a date for independence—the blacks say one year, Mr. Smith 23 months—the real problem lies elsewhere. It centers on what role, if any, Britain could play in a transition period. Merely to appoint an acting governor-general, with a few senior army and police officers and a civil service secretariat, might look like a fine gesture. In fact it would be but one more step into the mire of responsibility without power. The government has probably absolutely ruled out the question of committing any British troops to Rhodesia. If this is the case, the black nationalists have no choice between breaking off the talks or accepting Mr. Smith's offer of majority rule within two years, and getting down to agreeing on details. The prospects are not bright.

—*From the Daily Telegraph (London).*

In the International Edition

Seventy-Five Years Ago



November 12, 1901

NEW YORK—The United States Army is considering the advisability of abandoning the sword as an unnecessary military equipment, owing to the experience of the British forces in South Africa. The weapon is regarded as an impediment instead of a benefit, as it interferes with marching and is an encumbrance to mounted officers.

Fifty Years Ago

November 12, 1926

LONDON—George Bernard Shaw, Irish dramatist, novelist and essayist, was surprised and a little mystified today when he received word from Oslo that the Swedish Academy had awarded him the Nobel Prize in Literature for 1925. Shaw, as quick as ever, said: "I think they awarded it to me because I wrote nothing that year."

'The South Korean Sap-Suckers Are Flocking in Washington.'

Sauce for the Gander

By Anthony Lewis

BOSTON—One of the early problems to confront Jimmy Carter as President will almost certainly be the ripening scandal of South Korean covert activities in the United States. It is a delicate problem with disturbing implications, involving as it does both foreign policy and domestic politics, morals and law.

Agents of Park Chung Hee, the South Korean dictator, have spent millions here in recent years trying to buy influence: that much is already clear from newspaper investigations. What makes it especially awkward for Carter is that leading Democratic congressmen have been among the main recipients of the Korean largesse.

The House Democratic whip, Rep. John J. McFall, of California, admitted after the election—an aide had denied it before—that he got $3,000 from Tongsun Park, a Korean businessman and operator in Washington. The money was not a campaign contribution but went into general office funds for McFall's use. He also got an expensive digital watch and silver tea service.

Warm Relations

The retiring speaker of the House, Carl Albert, has had warm relations with South Korean representatives, and he has on his staff in an influential role a person of Korean birth, Sue Park Thomson. Last summer the House International Relations Committee, in a rare action, voted unanimously for a resolution that among other things criticized the trial in Seoul of 18 opponents of President Park. At the last minute Speaker Albert took the resolution off the House calendar.

There are suspicions, too, about the activities of the Korean evangelist Sun Myung Moon. Recent reports suggest that South Korea's Central Intelligence Agency inspired 1974 demonstrations by Moon's followers against the impeachment of Richard Nixon.

The KCIA has also reportedly been using its physical muscle inside the United States. Its agents are said to operate in a large Korean community in Los Angeles, intimidating and even beating individuals opposed to President Park.

All this offends the most basic U.S. sense of self-respect. For a minor foreign power to treat the United States as a target for bribery and intimidation is humiliating.

Chile and Iran

And South Korea is not the only country to have agents acting here in a brazen way. Chile and Iran are two other examples. The Chilean secret police are believed to have connections with Cuban exiles suspected of various acts of terrorism, including the murder in Washington of the former Chilean foreign minister, Orlando Letelier.

Most Americans must find it repellent to have such things happening in their country. But how many have stopped to think that what has been done here is exactly what we have done unto others? The U.S. CIA has paid politicians and editors in countries around the globe. It has planned assassinations, waged secret wars and encouraged military coups against constitutional governments. All that is familiar stuff after the intelligence investigations of the last two years.

The Korean scandal reminds us how dangerous it is for the United States to act as if its constitutional, legal and ethical standards stopped at the water's edge. If we pay foreign politicians as a matter of course, and wiretap our nationals abroad and plot violence, it is hard to object to other countries behaving the same way.

Cynical Answer

The first step in dealing with the covert South Korean activities is to have a tough official investigation and get the facts into the open. The next is to make clear that the United States will not tolerate dirty tricks here by the secret policemen and agents of other countries—whether their governments are Communist "enemies" or right-wing "friends." But such actions are not likely to be effective unless we convince the world that we are prepared to abide by similar rules ourselves.

When President Ford was asked in 1974 whether it was his policy to "destabilize" other governments, he replied that every country does that sort of thing. It was a cynical answer—and one that is self-defeating for this country because it does not fit our image of ourselves.

The Carter administration should move quickly to do what Ford refused: limit covert operations by law to situations that, in Clark Clifford's phrase, threaten to have "a profound impact on the continued existence of this country." And the administration should underline its commitment to law by bringing to book, at last, those U.S. intelligence officials who lied under oath and committed other crimes.

None of that is easy, but as a matter of simple self-interest it is necessary. And after all, it was Jimmy Carter who said, beginning as long ago as last March, "Our policies should be as open and honest and decent as the American people themselves."

Mideast A-Power Issue

By William Beecher

WASHINGTON.—Although it made the front pages of some major U.S. papers this week that Israel had denied admittance to its secret nuclear facility at Dimona to 13 U.S. senators, it shouldn't have come as much of a surprise.

Israel has barred outsiders from Dimona for at least seven years. It has long since dropped the silly claim that the principal product there was textiles.

Though Israel won't admit it, Dimona is the heart of its most sensitive defense program: The fabrication of what some top U.S. analysts believe to be at least 12 nuclear weapons.

The senators are on a fact-finding mission trying to make up their minds whether to go along with the sale of nuclear power plants to both Israel and Egypt. Their principal stated concern is whether the proposed safeguards are tight enough to prevent the diversion of nuclear material to make weapons.

Irony

Ironically, President Nixon offered the nuclear plants to the two Mideast antagonists in the summer of 1974—barely a month after India surprised and vexed the world with its first nuclear explosion. Nixon linked the offer in such a way that denial by the Congress to one would mean denial to both.

Israel desperately wants to expand its nuclear generation of electricity to diminish its dependence for energy on outside sources in the event of war. Most of its oil comes from Iran; most of its coal from South Africa. A naval blockade of the Bab el Mandeb Strait at the entrance to the Red Sea would choke off both. To try to counter the threat of a blockage there would require very extensive and expensive Israeli naval forces.

Egypt, too, very much wants nuclear power plants. While it is generating considerable electricity at the Aswan High Dam, and has been discovering increasing pools of oil under the Gulf of Suez, nuclear energy is the wave of the future. It offers a hedge against the time when oil is no longer in ample supply. Even Iran, one of the world's largest oil producers, is placing its long-range bets on nuclear energy.

And here the issues begin to get complicated. Even if foolproof safeguards were placed on Egyptian power plants, rendering the possibility of diversion of weapons-grade material infinitesimal, Israel would prefer to see the proposed U.S. sale to Egypt, as currently conceived, fall through—even if that means Israel would fail to get U.S. plants, too.

Look Elsewhere

That might result in Egypt then turning to France, or West Germany, or even the Soviet Union, for substitute nuclear power plants. Israeli sources say they would prefer that. Why?

"The United States," explains an Israeli, "unlike any other country, provides a good deal of nuclear technology with its plants and this technological base is more threatening over the long run in terms of Egypt getting a sophisticated nuclear weapons capability than if it could steal and hide away a small amount of plutonium."

In other words, some Israeli experts fear it more likely that in time Egypt will develop nuclear arms if it builds up a wide base of expertise in nuclear physics and technology. And it is more likely to do that with U.S. plants and assistance.

But if the United States should back off its offer to Egypt, either because of congressional heel-dragging or because of a negative decision by the Carter administration, then the tenuous U.S. influence in Egypt might collapse, forcing Cairo back to dependence on the Soviet Union, not only for nuclear energy, but for arms and economic aid as well.

Proposals

So Israel has privately proposed two things: 1) That U.S. regulations be amended to require an impartial finding that a country has a pressing need for additional energy sources before the United States would agree to provide nuclear power plants; and 2) that if, nevertheless, the United States is to build a plant in Egypt, the first one should be a joint Egyptian-Israeli facility in the Sinai Desert, where joint control presumably would minimize the passing by Americans of much basic nuclear physics information to either side.

Earlier this year, Egyptian Foreign Minister Ismail Fahmy warned: "If Israel explodes an atomic device, Egypt will obtain a similar weapon or manufacture it. We have scientists capable enough to mount a reaction in this field, and there are no scientific or technological barriers in our way."

Jimmy Carter, because of his early training in nuclear submarines, knows a good deal about the technology. But the Mideast power plant issue could provide an early test of his political understanding and skill.

Mr. Beecher, a member of the Washington bureau of the Boston Globe, is a former deputy defense secretary for public affairs.

Chris Matthews From Rome:

By keeping a close watch on Italy today you get a fair idea of what may be happening, next door, tomorrow.

ROME.—The popular myth that Italy ranks in political importance only fractionally above, say, Antigua, survives. And after all, why not? When neither ambiguous, convoluted nor frivolous, Italian affairs are, worse, inconclusive. Long after Lockheed's skeletons have been pulled out of closets in the Netherlands and Japan, Italian parliamentary investigators—who haven't secured a conviction in 30 years—are still shuttling across the Atlantic in search of evidence. Italian justice still hasn't decided whether it was anarchists or Fascists who planted the bomb that killed 16 people and maimed 87 at Milan's Bank of Agriculture in December, 1969. To be on the safe side, representatives of both political persuasions have been sent up for trial.

Another matter is Venice sinking into the sea. Only after huge sums of money have been collected to avert disaster does it transpire that, after all, the pearl of the Adriatic will manage to keep afloat for a few centuries more. And the nation, your morning paper informs you, is facing bankruptcy, a Communist takeover, a right-wing coup. But all that happens is that the price of gasoline goes up again. People soon learn to take their Italian news with a pinch of salt. Then to shrug their shoulders.

Hard to Grasp

And yet Italy is important, and uniquely significant to the international community. The idea is a hard one to grasp, having little to do either with geography, strategy, Realpolitik or the pattern of international alliances. For Italy's real relevance lies in the fact that it represents a living socio-political laboratory where experimental work tends to be far in advance of that done anywhere else.

A few examples: The unification of Italy preceded Germany's by a decade. Italian Fascism served as the model for the Nazi variety. The great social upheaval of May, 1968, happened in February in Italy and, incidentally, left far deeper marks here than it did in neighboring France. The floating of the lira in 1973 set off an international chain reaction that resulted in the floating of all major currencies and the collapse of the Bretton Woods system. Most recently, Italy's version of Euro-Communism has served as a pointer to other European nations, notably France.

The reasons for this defy any simple explanation. It's tempting to resort to the intangibles of national characteristics and say that, somehow, the flashpoint comes earlier here. Be that as it may, Italy has few rivals as a political catalyst and by keeping a close watch on what's happening here today, you get a few ideas of what may be happening next door, tomorrow.

Just now, the Italians are simultaneously trying to grapple with their worst economic crisis since World War II (a term used here whenever the lira goes over 300 to the dollar, but apparently justified in this case) and with the problem of a Communist participation in government. The two questions are closely connected and of enormous relevance to Italy's neighbors. Sooner or later, they too will have to face something of the kind.

Search for Answer

For Italy, newly rich and even more newly poor, is searching for the answer to a riddle facing all consumer-based capitalist economies: How to reconcile increasing demand and expectations with an increasing scarcity of resources. The problem is posed in acute form here not simply because of a national tendency toward hyperbole, but because Italy, more than any other industrialized country, is dependent on imported raw materials. The momentum for growth and consumption—the twin bases of the major European societies—is having to be slammed into reverse. And it is fast becoming clear that this traumatic shift in gears cannot be done without at the same time bringing about the widest possible consensus.

Just as no austerity policy is possible without the consent of organized labor, no economic recovery program is feasible if the capitalists are busy running their loot over the border and stock prices are in a tailspin. If you're going to hurt people, democratically speaking that is, you need their consent. And belt-tightening hurts, especially in a country where people enjoy spending conspicuously and the toiling masses see no reason at all why they should do without steak while their masters are losing fortunes at roulette in Monte Carlo.

Where Italy is concerned, consensus specifically means giving the Communists a hand in government. They represent around 10 million workers and no economic miracles are about to happen without them being cut in. The present ambiguous arrangement whereby the Communist party has a fair-sized share of power, but may not be seen to wield it, is proving not only cumbersome but damaging to all. Government by committee is difficult enough. But imagine what it's like if there's a major row every time the board has to meet.

Compromise

The logic of events is therefore pointing toward a full-scale historic compromise or governing partnership between Italy's two major political forces, the Catholic Christian Democrats and the Communists. And while the stability of this country's politicians is adroitly eludes logic should not be underestimated, one should, at the same, consider that the only alternative to a solution by consent is one imposed by force.

One may further reflect on the fact that the kind of economic chaos resulting from a continued absence of valid answers to current problems is also highly conducive to authoritarian intervention. Put in the starkest possible terms, the dilemma goes something like this: Either the Christian Democrats and their allies accept Communist partnered government or an authoritarian regime rises in to make austerity stick. Or an authoritarian regime intervenes to pick up the pieces.

The way things are going, you never believe this could be so. There's talk of the Christian Democrats defenestrating Premier Andreotti for being too soft on the Communists. There's talk of rebellion against Communist party Secretary Berlinguer for being too soft on Andreotti. There's talk of new elections. Talk.

Dilemma

Yet the dilemma is there and no Machiavellian palace intrigue, nor yet a super-sized foot from the United States will make it go away. Italy's neighbors, nonetheless vulnerable or with more time in hand, would do well to watch closely what's happening here. And learn from Italy's solution, good or bad.

So it would seem. On present form, it may turn out that the tidewaters weren't closing in after all. After that, the IMF, and Bundesbank have been asked into new credit talks.

Italy is important, which is not to say it isn't Disneyland, too.

Letters

'Primer for Losers'

Congratulations to William Safire for his incisive and realistic understanding of the Carter-Ford struggle in "A Primer for the Losers" (IHT, Nov. 6-7).

It is refreshing to read a commentator who looks at the meaning of a political situation and does not promote his own ideology.

SILA CANTAL.

London.

Spoiler Strategy

I write to protest against Anthony Lewis's nasty reference to Eugene McCarthy ("Amazing Grace," IHT, Nov. 5) as a "spoiled child" seeking to "frustrate the popular will." It might perhaps have been unfortunate had McCarthy taken sufficient votes from Carter to tip the Electoral College balance to Mr. Ford. In that event, however, one would have done better to denounce not a candidate, but rather the archaic and undemocratic Electoral College system.

Knowing from the polls that Carter's election was a "sure thing," McCarthy did of course hope to increase the impact of his own candidacy by taking some electoral votes from the Georgian. A similar strategy, I would add, could be attributed to Mr. Ford: A "spoiler" strategy, moreover, is entirely legitimate if one considers how minuscule are the differences between the Republican and Democratic parties. If the latter is the "lesser evil" it still favors militarism, profit for the few at the expense of the many, and a wasteful, overmechanized economy.

And both parties are united in their determination to crush by any available means all but the most marginal political movements hostile to the concepts just mentioned. Whether the sordid deal between Ford and Carter to evade the "equal time" law governing the television debates, and the court injunction brought with Carter's approval to keep McCarthy off the ballot in New York and elsewhere, are the three basic deserving of Mr. Lewis's "spoiled child" epithet, or whether the peoples' will by denying a candidate access to the public, and the latter an opportunity to vote for him?

MILITARY POINT OF VIEW — Chiang Ching, widow of Mao Tse-tung, and three other disgraced radicals were accused of disrupting unity in the Chinese People's Liberation Army at an army assembly in Peking this week.

China Leftists Linked to Movie Attacking Chou

By Fox Butterfield

HONG KONG, Nov. 11 (NYT).—Chiang Ching, Mao Tse-tung's wife, and three other senior leftists helped make a movie this year that symbolically attacked acting Premier Chou En-lai and the new chairman of the Chinese Communist party, Hua Kuo-feng, sports in the Chinese media said.

The movie, called "Atomic Bomb," was scheduled to be released Oct. 1, shortly before the four leftists were arrested on Mr. Hua's orders Oct. 6.

Miss Chiang, who had been China's cultural overseer since the Cultural Revolution in the late 1960s, has come under widespread attack in the last few days for allegedly suppressing movies and operas she did not like and executing a large number of film directors and scriptwriters.

Blacklist Material

In one case, she is said to have harassed a film crew and local party officials who cooperated with it, despite a directive by Mao himself approving its work. According to a series of articles in the party paper Jenmin Jih Pao, Miss Chiang even sent spies to gather "blacklist material" on the people responsible for the movie and ordered them to be brought before her so she could give them a personal tongue-lashing.

At the same time, Miss Chiang, herself a minor movie actress in Shanghai in the 1930s, was charged with having ordered that hundreds of films from Hollywood and Hong Kong be brought secretly to Peking for her own viewing.

In Personal Terms

Miss Chiang is known to have had a passion for Hollywood movies, though she maintained a rigid rule over the production of movies, operas and ballets inside China and forced them to conform to strict political guidelines. Since the beginning of the Cultural Revolution only about 18 new operas have been performed in China, and only a handful of new movies have been made.

The charges about Miss Chiang's mishandling of China's movie industry are part of a growing litany of accusations evidently designed to discredit and vilify her. Although many of the charges involve questions of policy, they are often framed in highly personal terms.

In China, since the time of the ancient sage Confucius, policy has been viewed as an expression of personal character, and thus bad policy can be seen as the product of evil character. As a result, accusations against disgraced leaders frequently are more personal than would be true in Western countries.

Hungarian Wine Output Falls Because of Labor Problems

By Malcolm W. Browne

EGER, Hungary, Nov. 11 (NYT).—To help pay for Western technology needed to modernize this country, Hungarians of many ages took to the vineyards early to pick grapes.

Students were in the fields with factory workers, many of whom had been given a few days off leave by the state enterprises where they work to bring in the grapes.

Throughout the rolling hills of the Eger district, in northeast Hungary, roads were jammed with carts pulling loads of the dark purple grapes used in making Egri Bikaver, or Eger Bull's Blood, a full-bodied red wine increasingly exported abroad.

Wine constitutes Hungary's fifth most important agricultural export, after wheat and corn. Hungarian wine exports are a major source of the hard currency needed by Budapest to buy new machines and industrial knowledge from the West. But the world value of Hungarian wine increases, production is falling.

Hungary's chronic labor shortage, a declining rural population, mismanagement of the vineyards, inexcusable bungling and several years of drought have combined to reduce wine production sharply. When the Communists seized power in this country in 1948, harsh measures were taken to eliminate private ownership of vineyards along with other forms of private agriculture.

Despite the general collectivization of agriculture, private production of grapes has continued to be an important component of the wine industry. The main reason is that a great deal of manual labor is needed for growing and picking grapes, the kind of labor easily provided by farmers in their small private gardens. The picking of grapes has not been mechanized and therefore the collective-farm fields devoted to grapes are less efficient than fields planted to wheat or corn. The small vineyards continue to represent 52 per cent of the country's wine-growing area.

Meanwhile, however, many families that had grown grapes for centuries on ancestral plots have become discouraged by government restrictions and have abandoned their vineyards.

Hungarian newspapers reported last summer that in several weeks about 50 small privately owned vineyards were put on sale and not one found a buyer, despite extremely low asking prices.

The vines in the producing vineyards are said to be old and badly in need of replacement.

But Csaba Szabo, production chief of the 35 workers at the Egri Bikaver plant here, is optimistic that new state subsidies will solve the most serious problems and will put more fallow land into grape production.

"After all, we earn the country a lot of foreign exchange—30 per cent of our production is exported," he said. "The six miles of aging caves we have under this installation stay naturally at the ideal temperature for maturing wine—53.6 to 55 degrees Fahrenheit—all year round. We have rich volcanic soil, plenty of sun, a thousand years of tradition and our grapes and methods are wonderful. There will always be Egri Bikaver."

Swiss Will Try High Officer, Wife As Soviet Spies

BERN, Nov. 11 (Reuters).—A police inquiry has found that the former Swiss air defense chief, Brig. Jean-Louis Jeanmaire, spied for the Soviet Union with the help of his wife, federal prosecutor Rudolf Gerber said today.

The 66-year-old brigadier, chief of air defense troops for six years, is the highest-ranking Swiss officer to be accused of spying.

Mr. Gerber said at a news conference, after a Cabinet meeting, that the inquiry found Brig. Jeanmaire's "main acts of treachery" concerned military affairs. The brigadier and his wife will be tried by an ordinary military tribunal, he added.

In exchange for the information passed to Soviet diplomats and officials in Bern, the Jeanmaires received gifts, including a television set and jewels, Mr. Gerber said. It is not clear whether they also received money, he added.

The exact nature of the information they gave to the Russians is also not clear, but it concerns mainly the Swiss air defense and mobilization systems, Mr. Gerber continued.

Kidnap Victim Freed

CHIAVASSO, Italy, Nov. 11 (Reuters).—Police today freed Roberto Antonioli, 17, the son of an industrialist, after an exchange of shots with kidnappers who had abducted him a few hours earlier. Five persons were arrested.

'Longest Day' Cut Short by Power Failure

RENNES, France, Nov. 11 (AP).—A 14-year-old movie about a 32-year-old event provoked an electricity blackout over the Brittany peninsula of France last night.

Officials said that so many homes were watching the movie "The Longest Day" about the 1944 Normandy invasion that the voltage was sharply reduced and power was cut 30 minutes before the end of the film. The current was restored after the movie ended and the power load reduced.

The state-owned electricity company officials said that the incident emphasized the need for nuclear generating plants in the area. Ecological groups have been protesting plans to build nuclear plants.

Some Are Looking for a New Line of Work

Indians Expect Gandhi 'Emergency' to Last a Long Time

By William Borders

NEW DELHI, Nov. 11 (NYT).—A young lawyer who used to talk about entering politics here to help change what he thought was wrong about India now talks instead of "getting along" in an unexciting corporate practice.

In Calcutta, a bright and promising journalist has concluded that "there's no longer any future in newspapers in India," and so he is quitting his job to move to a dairy farm in the mountains.

And in Bombay, a 76-year-old former judge, Cabinet minister and ambassador named M.C. Chagla declares in a creaky and dispirited old voice:

"I used to have some hope, but now, search as I will, I can see no light at the end of this tunnel."

Like millions of other Indians, all three say they are seeing more and more aspects of permanence in what they had first perceived as a temporary political order, and they have concluded, as one of them put it, "that this so-called emergency will be with us in this country for a long time to come."

'No Going Back'

Sixteen months ago, when the government suddenly suspended civil liberties and began locking up its opponents, Prime Minister Indira Gandhi explained to her countrymen that "we have to impose certain temporary restrictions" to counter threats of internal chaos.

But even backers of the government concede that many of the changes—"the gains of the emergency," as they call them—have become permanent and that, as Prime Minister Gandhi has said repeatedly, "there can be no going back to the old ways," which she says fomented chaos and disorder.

In the move toward a permanent alteration of India's political order, these have been some of the most significant milestones:

• The enactment, early this year, of a stringent code of press censorship. It has nothing to do with the state of emergency, and will remain in effect even if the emergency is lifted.

• The emergence of a dynasty mentality, in which Sanjay Gandhi, the Prime Minister's 29-year-old son, is treated almost like a crown prince, overshadowing most other politicians, even though he holds no elected office.

• The revision of the Constitution, through structural amendments, to concentrate power in the Parliament, which is controlled by the Prime Minister.

• The government's decision to postpone and then postpone again the parliamentary election that was scheduled to have been held by last March.

A Change of Outlook

"But more than any one law or new rule, it is a question of mood," said an opposition politician who was recently released after a year in jail. "For example, I know that I can be put back in at any time they want, with no recourse and no habeas corpus, and that can't help but change my general outlook."

In India's new political order, discipline has become the watchword. It used to be that whenever the authorities of Calcutta tried to raise the streetcar fares, there were riots. Howling mobs would burn the streetcars and block the tracks, often paralyzing traffic for days. But in the stern new mood of today, the fares were raised without a peep of protest, and riders even began standing in orderly queues to pay.

Vote on Constitution

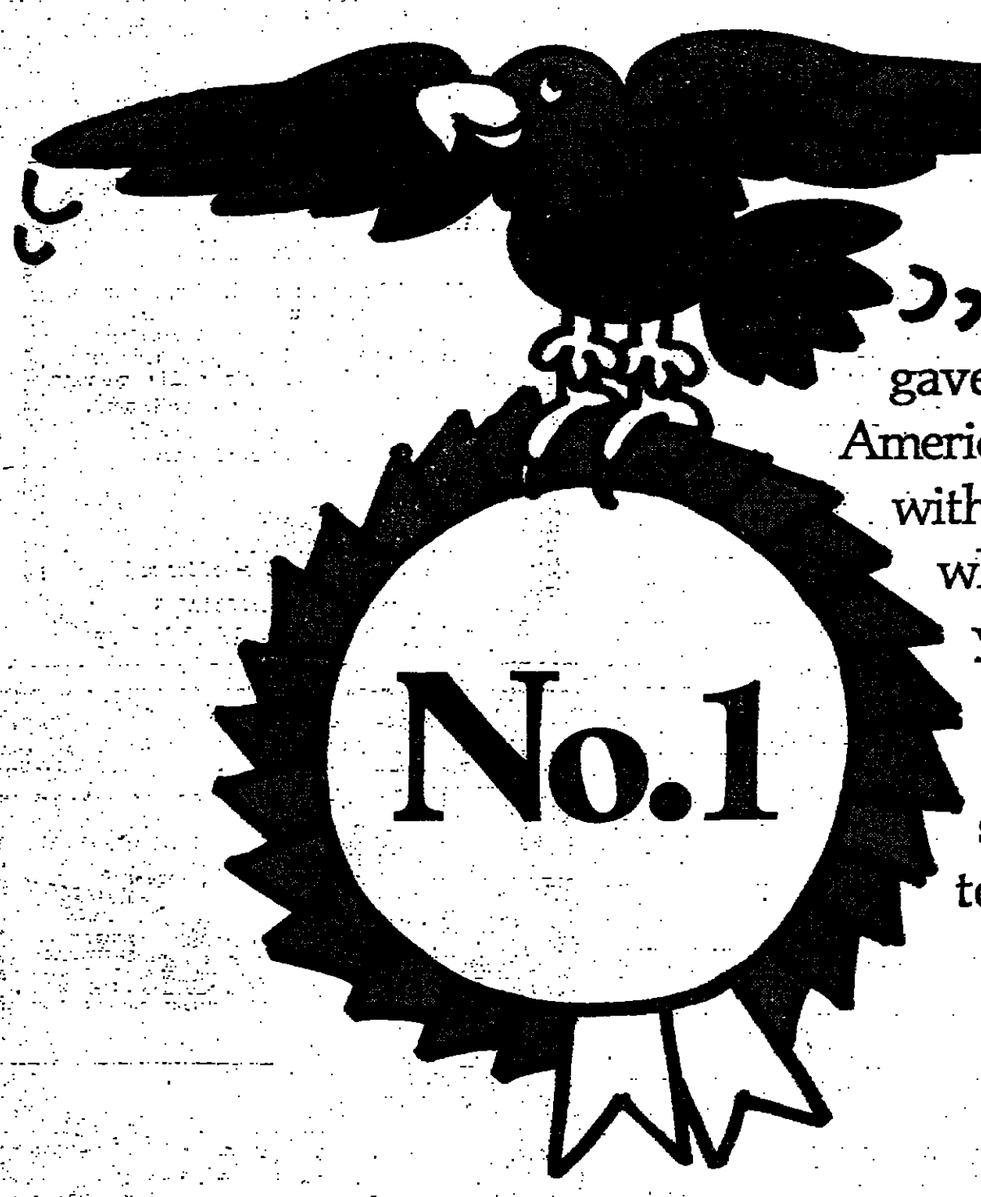
NEW DELHI, Nov. 11 (UPI).—The Indian Parliament today completed passage of major changes in the Constitution that will shift the balance of power toward the executive branch.

The Rajya Sabha (upper house) voted 191-0 in favor of the most sweeping amendments to the Constitution since its adoption in 1950.

The Lok Sabha (lower house) approved the amendments Nov. 2 by a 366-to-4 vote.

Members of most opposition parties boycotted the proceedings in both houses because of censorship on reporting of parliamentary proceedings and the continued jailing of more than two dozen members of Parliament since Mrs. Gandhi imposed the state of emergency.

The bill now must be ratified by more than half of India's 32 state legislatures, which is considered a certainty, before the President signs it into law.



The 20 pages of amendments place numerous restrictions on India's traditionally independent judiciary. They bar the Supreme Court from considering challenges to any constitutional amendments.

Japanese Gangsters Protest Lack of Rights

KOBE, Japan, Nov. 11 (AP).—Japan's biggest crime gang is complaining publicly about a citizens' campaign against it. Leaders of the 10,000-member Yamaguchi-Gumi wrote a letter to police officials and the civilian Crime Prevention Association saying that it does not consider itself an "anti-social group."

The letter complained that gang members are denied "basic human rights" by the citizens' group, which is urging apartment and garage owners to refuse to rent to gangsters.

AMERICA'S MOST FREQUENT FLYERS PUT US IN OUR PLACE.

Schedules, reliability, courtesy, comfort—and most of all, service.

When conducting their latest survey, the Airline Passengers Association of America gave these reasons for again naming American Airlines No. 1 choice for air travel within the U.S.A. Members are people who average 35 flights or more every year, so they know what good airline service is all about.

For your next visit to the U.S.A., see your travel agent and plan to fly American.

Getting Into Tip-Top Shape

By Hebe Dorsey

PARIS (IHT).—Mrs. Valéry Giscard d'Estaing is the first French First Lady to make a serious fashion impact. The other night, at the Comédie-Française's out-and-out glamour gala, the dresses were stunning, all right, but the hairdos, the big and beautiful chignons, made the difference.

The French President's wife is impeccably groomed and always, but always, wears a chignon—a fashion that was going strong 10 years ago but collapsed on the May '68 barricades.

Part of the credit for its revival goes to Yves Saint Laurent, whose big ball gowns cry out for elaborate, romantic hairdos. The designer is responsible for the braids women were wearing the other night—a style he introduced in his last couture collection and a follow-up on his turbans.

Frenchwomen, who for long simply put on an evening dress without bothering much with their hair, are now quickly getting back into tip-top shape.

"Even for small dinner parties, women now ask for chignons," said Christophe Carita, who designs Mrs. Giscard d'Estaing's chignons.

"And when they go to the Elysée Palace, it's almost a must," he added.

Ornaments

The new chignons are quite different from the old, precise, almost stilted ones. They are bigger, softer and emphatically outlined with all kinds of braids. The opulent hairdos have also brought back ornaments—combs, butterflies, flowers or real jewelry such as the two delicate diamond birds that Baronne David de Rothschild had pinned at the back of her hair.

The other evening, you could easily tell which top Paris hairdressers did whose chignon. Carita's were the most feminine and romantic, with plenty of soft curls framing the face. "I'm very influenced by Rossetti and the pre-Raphaelites," he said. For a newer look, he also likes to mix straight and frizzy hair.

Alexandre had the most elaborate compositions, criss-crossed with gold lamé, black velvet or colorful ribbons. The Duchesse d'Orléans had red ribbon woven into her blonde halo braid, to go with her red Grès dress. Dancer Josette Amiel's head was all wrapped around with gold lamé to match her rich-gypsy outfit. Hélène Rochas's neat, fragile blonde chignon emerged from a spectacular Saint Laurent taffeta gown. Maryll Lanvin had left well enough alone—she wore her jet black hair crowned by a huge black braid.

Volume

Maurice Franck's chignons were equally emphatic but there it was a question of volume rather than ornaments. His mai - fan is Anita Hachette, who wore a massive, turbulent chignon, à la Toulouse-Lautrec. Franck now makes sure that customers, asking for streaks in their hair, also get them on the hair at the nape of the neck because "otherwise, when I brush it up, the nape is one big, ugly, dark mass."

Alexandre was heartbroken because Princess Alexandra of Kent, who was visiting from England, did not want anything—"no chignon, no tiara, no nothing," he sighed. As for Princess Grace, who has been wearing spectacular chignons for years, she had just cut her hair.

Chignons are good and they are bad. They are definitely aging, which may explain some sales resistance from the older crowd. But they are nevertheless catching on because, with women spending a lot of time sitting down (either at dinner parties or premieres), they do make their wearers stand out, so to speak, in a crowd.

wednesday, november 10, 1976, thursday 11, friday 12, and saturday 13, from 10 a.m. to 12:30 p.m. and from 4 p.m. to 7 p.m.

sales:
monday, november 15, at 8:30 p.m. - bronzes and carpets.
tuesday 16, at 8:30 p.m. - antique and modern paintings.
wednesday 17, at 8:30 p.m. - furniture, miscellaneous, pottery, chinaware, ivories, hard stones.
thursday 18, at 4 p.m. - silverware - at 8:30 p.m. silver and jewelry.

sealed bids accepted - catalog on the spot.

palazzo muti-bussi, via ara coeli n. 4 - roma, italy.

Washington D.C. Births Are 50% Out of Wedlock

WASHINGTON (WP).—More than half the children born to Washington residents last year were born out of wedlock, according to a report in this city's Department of Human Resources.

It was the first year that the proportion of out-of-wedlock births there exceeded 50 per cent, and according to officials of the National Center for Health Statistics in Washington, it is the first major city where such births [illegible]

[illegible] 4,988 children were born to unmarried women in 1975, the last year compared to 4,798 born [illegible]

[illegible] accounted for about 46 per cent of all out-of-wedlock children. While most of these mothers were aged 20 to 29, there were 200 15-year-old mothers and 115 under age 15, including four girls who were 12.

In some city high schools here there are so many unwed mothers that special courses in child-rearing have been started with [illegible] series that include many children whose mothers are students at the school.

According to the new D.C. government figures, the total number of births in Washington declined last year as it has in more than a decade, but those to married women dropped much more than those to unmarried ones.

Nationwide, about 13 per cent of all children are born to unmarried women, a proportion that has been increasing since 1970. Among blacks, 47.1 per cent of all children were born out of wedlock in 1974, the most recent year for which nationwide data is available. Among whites, 5 per cent of births were out of wedlock.

WAVERLEY ROOT: Roast Kid and a Fall From Grace

IN 14th-century France, an author whose identity is unknown to us except by his own self-portrait—"a man of ripe age who has just married a young girl 15 years old"—wrote for the guidance of his bride "Le Ménagier de Paris." (The Parisian Housekeeper). His laudable purpose was to guide her in fulfilling the whole duty of a wife, which was, of course, to bend all her efforts to "the salvation of the soul and the peace of her husband."

In the development of his text, the author occasionally lost sight of the salvation of the soul in favor of the delectation of the stomach. The house he envisaged seemed to consist mostly of dining room, pantry and kitchen, so his book continues to be cited today as a repository of gastronomic wisdom. Among the pearls, which were the fruit of the accretion of experience and the satisfaction of concupiscence, enshrined appropriately in a menu for a wedding banquet one of whose numerous courses consisted of a quarter of a kid for each guest, was the dictum: "A quarter of a kid is better than a lamb."

Six centuries later an authority of our own times, Elizabeth David, wrote: "Kid is just as good as, and very often better than, lamb." Twenty-three centuries earlier, a Chinese poem, "The Summons of the Soul," had intoned a sort of litany of fine foods, among them "roast kid served with yam sauce." In the Old Testament we find kid gracing the feasts of patriarchs and kings, and figuring also from time to time as a handsome present, though not always (see Genesis XXXVIII: 20) in the most recommendable circumstances; and it was the kid which provided the example for the kosher prohibition against eating milk and meat at the same meal: "Thou shalt not seethe a kid in his mother's milk (Exodus XXIII: 19)." In the first century, Juvenal baited a dinner invitation by promising to serve "a plump kid, tenderest of the flock." In the 10th century, the Arab poet Mahmud ibn al-Husain al-Kushajim, describing a Baghdad banquet, wrote:

First a roasted kid, a yearling,
With its innards firmly [string.
And upon it, well to season,
Tarragon and mint are hung...
Lemons too, with nadd be- [sprinkled,
Scented well with ambergris,
And, for garnishing the slices,
Shreds of appetizing cheese.

Occidentals would, perhaps, have preferred to ambergris and *nadd*, a mixture of perfumes, the "herbs of strong taste, old wine of Spain, fine honey, and good unguents from overseas" with which Jean Leclercq, cook to François I, basted a roast kid for his royal master. "Enough, enough!" the king cried in delight. "Master John, do you want to make us burst with your good cheer?"

In the Middle Ages, kid was so much more popular than lamb in France that unscrupulous merchants used to attach a kid's tail to a lamb's carcass in order to sell it at the higher price commanded by kid, giving rise to a popular description of cheats as "sellers of half-goats." In the reign of Louis XV, kid was still sufficiently familiar to Pierre Poivre, the man who procured cloves and nutmegs from the French islands in the Indian Ocean, so that he could complain, when he reached the French trading counter of Pondichery: "Kids are found here, but their flesh is tasteless. This comes from the great aridity of the country and the poor quality of the soil, which gives livestock only burned-up pasturage, in very small quantity."

Kid is still eaten in France today, though less commonly than a century or two ago, except in some of the provinces, notably Corsica, where it is stuffed with rosemary and garlic. Popular in Italy in Renaissance times, it is still very much on the menu today, though one no longer finds *capretto incaporchiato*, trapped kid, for which the new-born animal was strapped under its mother's belly in a wicker basket, so that it could reach the udder but not the grass, thus insuring authentic exclusively milk-fed kid for the table. Roast kid is considered a worthy dish for a formal dinner in Portugal, while in Greece a whole suckling kid is the traditional plaice de résistance for the Easter dinner. Kid remains a gala dish in Arab countries and graces betrothal banquets in Burma and Cambodia, unless recent events have suppressed such occasions.

How does it happen that kid is shunned in the British Isles and the United States where a familiar phrase which represented the soul of wit in my adolescent days, "I love my wife, but oh, you kid!" was not, unless I am greatly mistaken, a gastronomic pronouncement. Things were not always thus. Boswell recorded that he and Dr. Johnson had regaled themselves on roast kid at Inverness during a tour of Scotland. Kid was often a meat which went into Irish stew in the 19th century, and Mrs. Leslie in her "Directions for Cookery," published in the United States early in the same century gave a recipe for roast kid.

Yet nowadays, kid is in bad odor in the United States—probably because of the popular impression that goats themselves are, quite literally, in bad odor naturally, which is true only of the adult male—and though it may have probably been eaten kid, it has been passed off on you, following the practice of the Middle Ages, as lamb. If kid has acquired a certain local acceptance in Tex-Mex cooking, where it appears chiefly at barbecues, it has not become completely naturalized even there, at barbecues, where the food is often set out in two sets, American style and Mexican style, *the cabrito asado*, kid from animals a year old, weighing between 10 and 15 pounds appears on the Mexican tables.

Otherwise, if you want to eat kid knowingly in the United States—for instance by ordering it for Easter a week in advance in San Francisco, where it can be done—you will have to pay a premium price for it. Perversely, it would seem, this is its rarity results from the contempt in which it is held; nonconformism of any kind has to be paid for. The only gourmet *cabritos* of current consumption in the contemporary American context are white kid.

(c) Waverley Root.

SENIOR EXECUTIVE JOB GUIDE

Published at the end of the week, this is a compilation of senior-level job opportunities from selected publications. Senior level jobs published by the International Herald Tribune through Tuesday automatically appear in this feature.
To place an advertisement in "INTERNATIONAL EXECUTIVE OPPORTUNITIES," contact our office in your country (listed on back page). Any questions or comments concerning this feature can be directed to Mr. Max Ferrero in the Paris office.

West German Banks Expanding in Asia

By Darrell Delamaide

FRANKFURT, Nov. 11 (AP-DJ). —Riding a crest of swelling West German trade and investment, German banks are expanding and strengthening their Asian operations.

Germany's largest bank, Deutsche Bank, transformed in September the Tokyo branch of its overseas bank unit into a branch of the parent bank itself, and in October opened a representative office in Hong Kong. Dresdner Bank, second largest German bank, plans to open a Hong Kong office by early next year.

Berliner Handels & Frankfurter (BHF) Bank announced in September that it intends to strengthen its Asian operations in cooperation with its European partners in the Inter-Alpha group. Earlier this year, Deutsche Genossenschaftsbank DG, the central bank for Germany's 5,100 cooperative banks, opened a representative office in Hong Kong in collaboration with its Austrian counterpart.

"We started later than the Americans," says Dresdner Bank management board member Hans Wuttke of German banking activity in Asia, "but we're determined to catch up—and we will, with all the trade we have with these countries."

Ruediger von Tresckow, managing partner of BHF-Bank and chairman of Inter-Alpha Asia, says, "We can bring a European approach to banking in Asia, particularly the strengths of a universal banking system." Germany's universal banks combine commercial and investment banking operations.

German bankers view the Asian market, as well as that in the Middle East, as the fastest growing market in the world. Factors generally cited by German bankers as favoring Asian economic growth are relative political stability, a work force that adapts quickly to modern industrial technology, and plentiful resources of raw materials and entrepreneurial ability.

Dresdner's Mr. Wuttke says the primary role of German banks in Asia is to finance international trade. He adds this does not have to be restricted to trade with Germany.

German trade with Asian countries, though, has grown dramatically already this year. According to figures compiled by Germany's Federal Statistics Office, the country's trade with Hong Kong in the first eight months of the year rose 40.6 per cent in comparison with the year-earlier period, to 1.957 billion marks.

In the same period, trade with Malaysia was up 45.4 per cent to 800 million marks, trade with Singapore up 26 per cent to 712 million marks, trade with South Korea up 24.2 per cent to 986 million marks, with Taiwan up 19.5 per cent to 1.181 billion marks, with Japan up 17.2 per cent to 4.985 billion marks and with Indonesia up 13.6 per cent to 1.004 billion marks. Overall German trade in the same period was up 18 per cent to 307.6 billion marks.

Meanwhile, figures from the German Economics Ministry indicate that German capital investments showed a net rise in the first half for most Asian countries. The most dramatic increases from the end of 1975 to June 30 were registered for Hong Kong, up to 78 million marks from 53.1 million, Singapore, up to 143.2 million marks from 103.5 million marks, Malaysia up to 46.6 million marks from 39.3 million, and Indonesia, up to 83.9 million marks from 78.6 million.

BHF-Bank's Mr. von Tresckow thinks German capital investment in Asian countries will continue to grow. Felix Viehoff, management board chairman of DG Bank, says even the medium-sized firms who are the staple commercial customers of Germany's cooperative banking system are interested in direct investment in Asia.

Besides trade financing, German banks have made it clear they want to offer the full palette of banking services while fashioning an important link in their money market and foreign exchange dealings.

Mr. von Tresckow observed that German banks could be particularly helpful in private placements, bond issues and other underwriting activities. At the opening of Deutsche Bank's Hong Kong office last month, Wilhelm Christians, co-speaker for the bank's management board, said the office among other things should function as a part of the bank's securities department.

It will be able to provide information and service to Hong Kong investors interested in European securities while likewise providing the bank with a viewpoint to advise its European customers on attractive Hong Kong investments, he said.

A tabulation by the Hamburg HWWA economic research institute indicates that through the end of 1975, German banks had three branches in Asia, 10 representative offices, and capital participation in 31 financial institutes.

This compilation does not include Deutsche Bank's participation with six other European banks in European Banks International (EBIC) subsidiary, European-Asian Bank, which has branches in seven Asian countries.

Use of Petroleum Is Rising Again in U.S.

NEW YORK, Nov. 11 (AP-DJ). —The United States is using more petroleum again after a lull in demand that began in late summer and lasted until late in the third quarter.

Unfortunately, this turnaround comes as the members of the Organization of Petroleum Exporting Countries prepare to set new prices for it at their meeting on Dec. 15. Price increases of between 10 and 20 per cent are expected.

The OPEC members are closely watching the demand for petroleum products in the oil-consuming markets of the United States and Western Europe, for this is the key factor in determining the size of the price increase.

Of course, as demand rises at home, the United States must import ever more of the costlier foreign oil because domestic oil output has been declining since reaching a peak in 1970.

The United States currently imports more than 40 per cent of its oil, compared with only 29 per cent in 1973, the year of the oil embargo.

The reason for the spurt in United States oil consumption is a general rise in production and in the use of electricity. Utilities and industry are being forced to use more oil as natural gas supplies dwindle, or in those areas where the price of imported gas is soaring in relation to oil.

Even where industry has undertaken fuel conservation efforts, production increases are still pushing up the overall use of oil. Only those companies that can use alternative fuels, such as coal, have been able to cut back on the use of oil.

The United States is currently consuming about 16.8 million barrels of petroleum products a day, some 4 per cent ahead of petroleum demand a year ago. For all of 1976, the Petroleum Industry Research Foundation estimates that total demand will average about 17 million barrels a day.

This would still be below the 17.3-million barrels a day consumed in 1973, but next year's demand is expected to rise to as much as 17.8 million barrels daily.

The demand is in all areas of usage. Gasoline is about 4 per cent ahead of 1975 demand at this point. Demand for distillates (including home heating oil) has been surprisingly strong all year, probably due to the natural gas shortage.

Consumption of residual, or heavy, fuel oil (mainly used for industrial purposes, or for generating electricity) also has been heavy this year, rising by nearly 6 per cent in the first 10 months over the like period last year. In October, the American Petroleum Institute estimates, the increase in consumption was more than 13 per cent.

A major reason for the increase in demand for residual oil is the rapidly increasing use of oil by U.S. electric utilities. The Edison Electric Institute estimates that utilities will burn 597 million barrels of oil this year, up from 507 million barrels last year and 560 million barrels in 1973.

This is despite an increase in the use of coal and the starting up of nuclear power plants. Until the oil embargo, electricity output was growing at the rate of about 7 per cent a year. But in 1974 there was no growth in output, and last year it was up by only 4 per cent. This year's growth is expected to be 6 per cent.

Esso Official Warns Britain North Sea Oil Is No Panacea

LONDON, Nov. 11 (Reuters).— Britain's North Sea oil is a "mortgaged bonanza" which can provide only a breathing space for the country to put its economy right, Esso Petroleum Co. managing director Leslie Pincott told the Westminster Chamber of Commerce luncheon yesterday.

While it is true that cash flows will be very handsome after 1980, they will for some years be needed to pay interest, repay loans and provide dividends on the massive capital put at risk in earlier years, he said.

Mr. Pincott warned that if production levels are only 15 per cent less than currently forecast, Britain might not get out of debt until the 1990s.

Esso estimates expenditure between 1975 and 1980 on getting North Sea oil will total over £12 billion, with Esso alone spending £2.5 billion.

He said he was stressing the reservations because the current tendency in some quarters is to regard North Sea oil as a solution to Britain's economic difficulties.

Mr. Pincott said North Sea gas and oil will eventually run out and few experts will predict what reserves will be left beyond the year 2000. Thus it is vital through the 1980s to take full advantage of oil and gas revenues to repair Britain's economy.

On the bright side, Mr. Pincott said North Sea gas and oil will be of enormous benefit to the economy, and by 1980 Britain will be self-sufficient in energy.

Brent Field Starts

LONDON, Nov. 11 (AP-DJ).— Crude oil production has started from the Brent field, considered the largest discovery in the British North Sea, Shell U.K. Exploration & Production Ltd. announced today.

Oil has begun to flow into concrete storage cells and tanker loading of the first shipment is expected to begin later this month, the company said.

Shell U.K. Exploration operates the field which is shared equally by units of the Royal/Dutch Shell Group and Exxon Corp. of the United States.

According to estimates, the Brent field contains about 2 billion barrels of recoverable oil capable of supporting a peak production rate of 550,000 barrels a day for a year.

Brent is the sixth British North Sea oil field to come on stream and current production is about 400,000 barrels a day.

Burns Vows To Work With Carter Team

But Notes That Fed Is Independent Unit

By Hobart Rowen

WASHINGTON, Nov. 11 (WP). —Federal Reserve Board chairman Arthur Burns pledged today to "work cooperatively" with the Carter administration, suggesting at the same time that the independent central bank was not giving the White House a blank check.

The Federal Reserve, Mr. Burns told the Senate Banking Committee, "has a responsibility under law and to our conscience to bring independent judgment to bear on the difficult questions we deal with."

In a wide-ranging testimony on the economy, Mr. Burns also warned that "traditional policies of economic stimulation might (now) well be counterproductive."

President-elect Jimmy Carter has said that a tax cut—one such traditional way of boosting economic activity—will be seriously considered if the current economic pause continues.

Mr. Burns's term as chairman of the Fed expires in February, 1978, or 13 months after Mr. Carter is due to take the oath of office as president. During the campaign, Mr. Carter said he favored legislation that would make the term of the Fed chairman "co-terminus" with that of the president.

Intends to Stay

In such a case, a new president could name his own chairman right away. But Mr. Burns has indicated privately that he intends to serve out his term, and Mr. Carter has never intimated he would pressure Mr. Burns to resign.

Mr. Burns is highly regarded in business and financial circles here and abroad. The Carter transition team knows that a smooth working arrangement with Mr. Burns would reassure the financial world, which is not certain how Mr. Carter will proceed in other policy areas.

Mr. Burns gave a generally optimistic appraisal of U.S. economic prospects, forecasting a pickup in activity in the near future.

He announced a slight reduction in the target range for the basic money supply for the year ending Sept. 30, 1977, to 4.5 to 6.5 per cent. That represents a 0.5-point reduction in the upper limit of the former 4.5 to 7-per-cent range.

Although Sen. William Proxmire, D-Wis., challenged this as a shift to a more restrictive monetary policy, Mr. Burns said that the reduction only reflects a technical situation.

Arthur Burns

His reference is to new banking arrangements which permit the public to keep fewer funds in normal checking accounts. For example, there is increased use of saving deposits for payment of monthly utility bills.

More Expansionary

But in response to repeated prodding by Sen. Proxmire—the only senator to attend the hearing—Mr. Burns confirmed that Federal Reserve policy in the recent past "has been slightly more expansionary." He added that "these (new) targets are not set in concrete," and that if the economy needed more monetary stimulus, the monetary goals would be changed.

Mr. Burns took note of the fact that the unemployment rate has risen recently, as an accompaniment to an economic pause since last spring. "There is a clear need for expansion in the economies of both the industrialized and the developing nations," he said.

But echoing the consensus view at the International Monetary Fund annual meeting in Manila last month, Mr. Burns warned that stimulating demand would intensify fears of inflation "and the seeds of another recession would be sown."

Having ruled out the "traditional" ways of stimulating an economic expansion, Mr. Burns said that the best way to return to full employment is through certain "structural changes in our economy."

Among the ones he suggested are an overhaul of tax policies to stimulate capital investment, and the removal of restraints of trade and other legal impediments to competition that tend to boost prices and wages.

EEC Asks Japan to Extend Controls on Steel Exports

BRUSSELS, Nov. 11 (AP-DJ).— The European Economic Community presented Japan with a three-point proposal for restraints on Japanese exports of steel to the community when two-day talks opened here today on EEC-Japanese steel problems, sources close to the EEC Commission reported.

Officials of the Japanese Ministry of International Trade and Industry met with officials of the European Coal and Steel Community in so-called ECSC-Japanese contact talks.

Commission officials would not comment on the first round of talks, but sources said the EEC presented the Japanese negotiators with three major proposals.

- That Japan should extend its 1976 export restraints to the EEC market into 1977, holding exports at least to this year's level of 1.22 million metric tons;
- That Japan should undertake not to dump its steel products on other European markets, such as Sweden, Switzerland, Spain, Austria and Portugal, where EEC makers have traditionally sold their rolled products;
- And that Japanese steel producers should adjust their prices in such fashion as to avoid undercutting EEC producers, not only on community markets but also on those markets traditionally considered their own by EEC producers.

The EEC is also understood to be seeking some control over shipments of small Japanese steel producers to the EEC and neighboring markets. These small producers are not included in the export self-restrictions to which Japan's six major steel producers agreed for 1976.

The EEC has been campaigning against sharply increasing Japanese steel shipments to the community and neighboring markets. Community officials have made veiled threats that the EEC may have to protect itself if Japanese shipments continued at the current pace.

Steel industries in several EEC member states, especially West Germany, Belgium, France and Britain, claim they are being hurt by Japanese exports.

Industry officials say that imported Japanese steel selling at low prices is aggravating the EEC steel industry's problems marked by slower order inflows and production declines in recent months.

Especially in markets in neighboring third countries, EEC steel makers say, exports of Japanese steel rose four to six times this year.

Prices Firm On NYSE in Quiet Trade

Bargain Hunting Seen After 4-Day Decline

NEW YORK, Nov. 11 (IHT).— Prices closed firmer today for the first time this week on the New York Stock Exchange but trading was very quiet.

Analysts attributed the partial recovery to bargain hunting in selected blue-chip stocks following four declining sessions.

Most institutional investors were absent due to the Veterans' Day holiday.

"Activity today was overwhelmingly technical and entirely related to the internal condition of the market," said Monte Gordon, of Dreyfus Corp.

At the close, the Dow Jones industrial average was up 7.39 at 931.43.

Volume totaled 13.23 million shares compared with 18.9 million shares yesterday.

Declining issues held an edge throughout most of the day, but at the close advances outnumbered declines by about 780 to 550.

Among the blue chips that registered gains were IBM, up 3 1/2 at 264 1/2, Exxon 1 1/8 at 48 7/8, Du Pont 1 3/4 at 126 5/8, and International Paper 1 1/8 at 64 5/8.

Other gains were Disney, up 1 1/8 at 45 3/8, and Koppers 1 1/4 at 22 3/4.

Eastman Kodak rose 1 1/2 at 85 1/2. The company declared an extra cash dividend and raised its quarterly dividend.

Xerox rose 1 5/8 at 57 7/8. It announced the settlement of an anti-trust suit with Dennison Manufacturing.

Milgo Electronic rose 1 7/8 at 22 3/8. The company rejected a merger offer from Applied Digital.

American Stock Exchange prices closed higher in slow trading. The Amex index was up 0.46 at 98.59.

Japan May Put Off Car Emission Curbs

TOKYO, Nov. 11 (AP-DJ).— Japan's Environment Agency has decided to postpone the application of the latest automobile emission control regulations on foreign imported cars from 1978 to 1980, Kyodo news service reported yesterday.

This action came amid concern over possible ramifications that Japan's stringent car emission gas control regulations might have on future Japanese auto imports, Kyodo said.

Japanese car manufacturers have said they will be able to meet this target, but foreign car makers have protested, saying their technology to meet this regulation still is under development.

Markets Closed

All markets and banks were closed Thursday in France and Belgium for Armistice Day.

This financing having been completed, the following appears for information purposes only.

Sales figures are unofficial.

Unless otherwise noted rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

You can afford to talk to Europe's most affluent and influential audience.

An advertising campaign in the International Herald Tribune costs less than in any other international medium.

Washington Post Sets 2-for-1 Stock Split

WASHINGTON, Nov. 11 (WP). —Washington Post Co. yesterday announced a 2-for-1 split of its common stock and indicated that the firm's dividend rate will be boosted significantly next year.

The split takes effect Dec. 15 for stockholders of record that date and applies to both class A and class B common stock.

THE BOWATER CORPORATION LIMITED

U.S. $30,000,000

9¾% Bonds Due 15th July 1986

In accordance with the Trust Deed dated 15th July 1976 made between The Bowater Corporation Limited ("the Company") and Alliance Assurance Company Limited, constituting the above-mentioned Bonds, the Company hereby gives notice that 15th December 1976 has been determined as the Exchange Date as defined in Clause 3(C) of the Trust Deed.

W. E. J. Miles Secretary
Registered Office
Bowater House
Knightsbridge
London SW1X 7LR

12th November 1976

Persons entitled to delivery of any of the above-mentioned Bonds are accordingly advised to obtain from the Brussels office of Euro-clear, from Cedel, or from any Paying Agent, the form of a certificate, to be completed, stating that at the date of delivery of such certificate the beneficial owner of such Bonds is not a national or resident of the United States of America or its territories, possessions or any area subject to its jurisdiction. Completed certificates should be delivered to the Brussels office of Euro-clear, or to Cedel for forwarding to Euro-clear, on or after the Exchange Date when definitive Bonds with Coupons attached will be available in exchange for such certificates.

November 10, 1976

The Commonwealth of Pennsylvania

and

Volkswagenwerk A.G.

have reached agreement on the location and financing of assembly facilities in New Stanton, Pennsylvania.

The undersigned assisted in the negotiations and acted as financial advisor to The Commonwealth of Pennsylvania.

Dutch Output Rises

THE HAGUE, Nov. 11 (Reuters).—The Dutch industrial production index, base 1970, rose a seasonally adjusted 4.6 per cent in September from August to a provisional 114, Central Statistics Office figures show, making a 12-month rise of 1.87 per cent.

A company announcement said directors expect to declare a payout of 36 cents on the split shares on currently outstanding stock for which the dividend rate at present is 50 cents a share annually.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in sock in preceding 12 months, esimaed cash value on ex-dividend or ex-disribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend areshown for the new stock only.

Federal Deposit Insurance Corporation, as Receiver

In the Matter of American Bank & Trust Company

NOTICE Pursuant to Section 620 of the New York Banking Law

WHEREAS, on September 15, 1976, the Superintendent of Banks of the State of New York took possession of the business and property of AMERICAN BANK & TRUST COMPANY, pursuant to Section 606 of the New York Banking Law, and appointed the FEDERAL DEPOSIT INSURANCE CORPORATION as Receiver of the Bank, pursuant to Section 634 of the New York Banking Law, for the purpose of liquidating the affairs of the Bank.

WHEREAS, pursuant to a Purchase and Assumption Agreement dated September 15, 1976, between the FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver, and Bank Leumi Trust Company of New York, all demand, time and savings deposits as and to the extent shown on the books of AMERICAN BANK & TRUST COMPANY at September 15, 1976, have been assumed by Bank Leumi Trust Company of New York and said assuming bank undertook to pay, perform, fulfill and discharge all such liabilities.

NOTICE is hereby given to all persons who may have claims against AMERICAN BANK & TRUST COMPANY, with its main office at 645 Fifth Avenue, New York, New York, and branch offices in the counties of New York, Kings and Bronx, to present such claims to the FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver, and make proper proof thereof, by filing a proof of claim, on the required form, with:

Federal Deposit Insurance Corporation,
as Receiver of American Bank & Trust Company
P. O. Box 5032
F.D.R. Station
New York, New York 10022.

Copies of the required form of proof of claim can be obtained upon written request therefor sent to the Federal Deposit Insurance Corporation, as Receiver, at the address specified above or, after November 15, 1976, at the office of the Federal Deposit Insurance Corporation, as Receiver, 430 Park Avenue, New York, New York. All written requests for the form of proof of claim must be received no later than February 28, 1977.

All claims must be presented, and proof thereof made, no later than March 31, 1977. No claim presented after such date can be accepted. Failure to timely present a claim and make proof thereof may result in waiver of the claim and forfeiture of the right to assert same.

All persons having claims for priority of payment shall make demand in writing for priority in the proof of their claims. Failure to so demand shall be deemed a waiver and abandonment of any right to such priority of payment.

Dated: October 28, 1976.

FEDERAL DEPOSIT INSURANCE CORPORATION,
as Receiver of AMERICAN BANK & TRUST COMPANY
By: R. H. Hoffman, Liquidator-in-Charge.

Invest in a spread of German Companies

Shares in German companies make an attractive investment prospect just now. The reasons are there for all to see:-

* The economy is on an upward trend.
* There is ample scope for share price increases.
* Conditions are good for increased company earnings.
* A country with a strong currency offers foreign investors excellent opportunities.

through CONCENTRA Mutual Fund

CONCENTRA is a large German mutual fund offering the benefits of a wide spread of investment in shares. Launched in 1956 it invests in leading German companies such as AEG, BASF, Bayer, Hoechst, Daimler-Benz, Karstadt, Kaufhof, Mannesmann, VW, Siemens, Thyssen. Its objectives are income and long-term growth.

Performance
Since its inception in 1956, the Fund has achieved a growth of over 405%. The past decade has seen a gain of 93.4%. Foreign investors have fared even better due to the continuous strength of the DM as is shown by the following examples of 10 year performances:
—US $ investors: 205.3%
—£ Sterling investors: 379.6%
—FF investors: 205.8%

The Management
The Fund is managed by Deutscher Investment-Trust, Frankfurt a.M., which has 20 years of experience and almost 4,000 million DM under management. Depositary bank is Dresdner Bank AG, also of Frankfurt a.M.
CONCENTRA makes a yearly distribution, which in 1976 amounted to DM 1.80 per Unit. The current offering price is DM 21.00 (approx.). The net assets amount to almost DM 1,700 million.

CONCENTRA-Units
Units of the Fund, which come in bearer form, can be purchased and redeemed at any time. They are listed on the stock exchanges of Amsterdam, Dublin, London, Luxembourg and Vienna.

CONCENTRA Charges
Loading 6%. Management 0.125% quarterly. Depositary Bank (additional to usual safe custody fee) 0·01% quarterly.
As a German Mutual Fund, CONCENTRA is subject to the German Investment Institutions Act.

Where to purchase CONCENTRA-Units
Germany: Dresdner Bank AG, Bank für Handel und Industrie AG, Bayerische Hypotheken- und Wechsel-Bank, Westfalenbank AG.
Austria: Österreichische Länderbank—Creditanstalt-Bankverein.
Belgium: Banque Bruxelles Lambert—Société Générale de Banque—Kredietbank—Banque de Commerce—Crédit du Nord Belge—Banque Belge pour l'Industrie—Banque Brugeoise.
France: Banque Nationale de Paris.
Italy: Banca Commerciale Italiana—Banca Nazionale del Lavoro—Credito Italiano—Banco di Roma—Banca Popolare di Novara—Banca Provinciale Lombarda.
Luxembourg: Banque Internationale à Luxembourg.
Netherlands: Algemene Bank Nederland—Bank Mees & Hope—Nederlandsche Middenstandsbank—Pierson, Heldring & Pierson.
Republic of Ireland: Bank of Ireland.
United Kingdom: Barclays Bank Limited—Bank of Ireland

To: Deutscher Investment-Trust, Postfach 2685, D-6000 Frankfurt a.M.1
* *Investment Account* I wish to open a CONCENTRA investment account with regular reinvestment of distributions. Please send me the necessary documents.
* *Information* Please send me, without obligation, the free literature on CONCENTRA and the investment account.
* *Please delete whichever is inapplicable*

BOOKS

THE GIRL ON THE COCA-COLA TRA

By Nancy Winters. Dial. 181 pp. $7.95.

Reviewed by Anatole Broyard

Is the complete male chauvinist capable of loving a woman in a meaningful sense of that word? After reading "The Girl on the Coca-Cola Tray," by Nancy Winters, I would be tempted to say no. In the relationship of Feen Feinstein to his wife Jenny Sue, she is almost entirely an exercise of his ego. I remember years ago remarking to a friend of mine that I nearly felt a stab of envy when I occasionally read in the newspapers of a man killing a woman for love. Don't you sometimes wish, I asked him, that you could be that carried away by love? It isn't love that kills, my friend answered; it is the rejected ego. He was right, of course. Killing a woman is the ultimate male chauvinist gesture. Most of the breed are satisfied with torture.

The purest kind of sadism is the subordination of the "loved one," a process in which our beliefs, our values and our tastes are extracted from her personality in much the same way that fingernails or teeth used to be pulled out in medieval torture chambers. Often the male chauvinist is not being consciously cruel: He is merely saving his woman's soul, keeping her from turning into a heretic or a witch. I'm doing it for your own good, he says, if he deigns to explain himself at all. When you see things my way, you'll be much happier.

Oddly enough, as we learn in "The Girl on the Coca-Cola Tray," this once was true. Jenny Sue loved, or thought she loved, Feen because he introduced "order" into her life. In her day, girls were usually taught that their management of themselves was, at best, a form of "pretty confusion" or, at worst, hysteria, which was considered to be a common form of deterioration peculiar to unmarried women. Jenny Sue could not wait to get rid of her autonomy, to escape, as Eric Fromm put it, from the little freedom she had. It is not as surprising as it seems in retrospect. If one were able to take a referendum today of the unconscious wishes of the majority of people, a surprising number, even in our narcissistic age, would probably prefer to live under a benevolent dictatorship rather than assume the full responsibilities of active self-government.

Jenny Sue had been brought up as a well-to-do WASP in the 1940s and '50s. Her education qualified her to be little more than a châtelaine, manor-keeper of the keys and the children. Because she was one of those early, unangry rebels who wanted something a bit broader than that, she married Feen. She saw him as many "typical shiksas" used to see Jewish intellectuals: as that part of their education that had been censored. Feen was not only sexier than the banned Henry Miller books. He was sensitive as well, delighting in poetry, blues and French cooking.

Feen's moral indignation gave him the charisma of a tragic hero. While Jenny Sue saw herself as having suffered nothing more than ballet and tap lessons, Feen, in her eyes, had undergone all the ennobling tribulations to which she imagined the Jew to be heir. His very sexiness, she thought, was a sublimation of his anger. He knew so much because learning had once been almost the only social activity open to him. Jenny Sue regarded Feen as a poet, in the narrowest sense of Robert Frost's dictum that poetry is a way to seize life by the throat. If she surrendered herself to him, he would turn her into the poem that, [illegible] Whitman said of men somewhere about her.

In their married life, [illegible] the theatrical male and [illegible] his applauding audience as men were possessive of women, she was proud of man. He held all their [illegible] al and intellectual capital was not a joint acco[illegible] cleaning out the Angel[illegible] of WASP tradition, Feen [illegible] ed himself first to his w[illegible] manners. Though th[illegible] based more on aesthetic[illegible] Emily Post or Amy V[illegible] he felt that her intro[illegible] titudes condescended t[illegible] When they made love, [illegible] obliged to use words [illegible] known only as epithets [illegible] was approaching orgasm [illegible] to notify Feen so that [illegible] assess her progress.

Jenny Sue admired [illegible] cause he was "always in[illegible] (The fashion has chan[illegible] and heroes must be ou[illegible] trol.) Control for Fe[illegible] ever, spilled over into o[illegible] and even canned goods[illegible] water had to be as[illegible] place in their life to[illegible] Jenny Sue herself. F[illegible] ed the world to stan[illegible] tention before he coul[illegible] at his competitive best[illegible] megalomania, he sugg[illegible] way advertisements w[illegible] "Don't be afraid to de[illegible] of people have manag[illegible] fore you so it can't be[illegible]

Because Feen is a J[illegible] will inevitably be rea[illegible] will accuse Nancy W[illegible] ethnic discrimination, [illegible] one will think of prov[illegible] portrait of Jenny Sue a[illegible] even though both [illegible] suffer the same sting[illegible] What Miss Winters is[illegible] believe, is that, in their[illegible] some Jewish men wer[illegible] uptight as some WAS[illegible] Their uptightness sim[illegible] antithetical forms. Th[illegible] naive nonconformist wa[illegible] "free" than the stereot[illegible] League shiksa.

Perhaps Feen's fall f[illegible] at the end of "The G[illegible] Coca-Cola Tray" was to[illegible] a plunge, just as Je[illegible] ascent to it—was rathe[illegible] But while this is not a[illegible] book on the subject—lik[illegible] land," for example, [illegible] written by Saul Mal[illegible] years ago—it does off[illegible] picture of the way th[illegible] between certain kinds o[illegible] women 15 or 20 years [illegible] in doing this Miss Wi[illegible] does a useful job of re[illegible] of what all the shoutin[illegible] today.

Anatole Broyard is reviewer for The [illegible] Times.

BRIDGE

By Alan

Few post-mortems last more than a minute or two, although tenacious analysts have been known to brood on a hand for a day or two after the event. But the process may take much longer. The reader may care to test the power of his own microscope on the diagramed deal. The contract is six clubs and the opening lead the diamond queen.

The actual bidding is not on record, but it might perhaps have followed the course of the diagram. South should pass three no-trump, a safe game, instead of a hopeless slam. In practice but not in theory.

The opening lead must be the ace, and dummy is drawn ending in dummy. A spade back is ruffed, followed by cover with the queen, ruff, cash the heart ace to reach dummy.

Defeat NBA Lakers

Celtics Make Up for Absent Cowens

BOSTON, Nov. 11 (UPI).—Less than an hour after learning that center Dave Cowens had left the team indefinitely for personal reasons, the Boston Celtics had to go to work last night against the Los Angeles Lakers, a group of seldom-used players and the second-year forward Paul Silas picked up in the attempt to push the defending NBA champions past the Los Angeles Lakers.

Silas, Celtics' prime mover of the Boston fast break, was granted an indefinite leave of absence after talking general manager Red Auerbach that he needed time to sort out some problems. No specific information was available.

Jo Jo Bowell, who played a total of 375 minutes last season, logged 37 minutes against Los Angeles and scored 10 of his 14 points in the final period. The 6-foot-9 cornerman from South Carolina scored six of Boston's first eight points to start the fourth quarter, then scored on his third tip-in attempt with 2:03 left to put Boston ahead to stay at 108-106.

The Lakers' Kareem Abdul-Jabbar fouled out 18 seconds later and Boswell sealed Boston's victory with a basket from in close. The victory broke a four-game losing streak by the Celtics.

"I was sad when I heard about Dave but I figured I might get to play a little more behind [starting center] Jim Ard," Boswell said. "As the game got going, I got excited, knowing that I would be in there, and once I got in I just tried to blend into the flow of the game."

Until Boswell's heroics saved the game, Jo Jo White had been the key player for Boston. He scored 14 of his 28 points in the first quarter and handed out 6 assists. Sidney Wicks added 21 points, Charlie Scott 17 and captain John Havlicek 15 points and 8 assists.

"I was very pleased with this win," said Boston coach Tom Heinsohn, who was ejected one minute into the second half after being assessed his second technical foul. "This is a gutsy basketball team but we'll really have to be gutsy from now on."

The Lakers were led by Abdul-Jabbar's 33 points. Lucius Allen scored 19.

Rockets 99, Sonics 97

At Houston, Mike Newlin's jump shot with 45 seconds remaining broke a tie and lifted the Rockets to a 99-97 victory over Seattle.

Seattle, which lost its sixth road game without a victory, surged from 14 points back at halftime and took the lead for the first time on rookie Bob Wilkerson's 20-footer early in the fourth period.

76ers 103, Bulls 88

At Philadelphia, George McGinnis scored 27 points and Doug Collins added 22 to lead the 76ers to a 103-88 victory over Chicago, the Bulls' sixth straight loss.

The 76ers led 78-70 with 8:26 remaining but outscored the Bulls 12-2 in the next three minutes.

Pistons 123, Cavaliers 112

At Detroit, Bob Lanier scored *36 points in leading the Pistons* to a surprisingly easy 123-112 victory over Cleveland, only the second loss for the Cavaliers in 11 games this season.

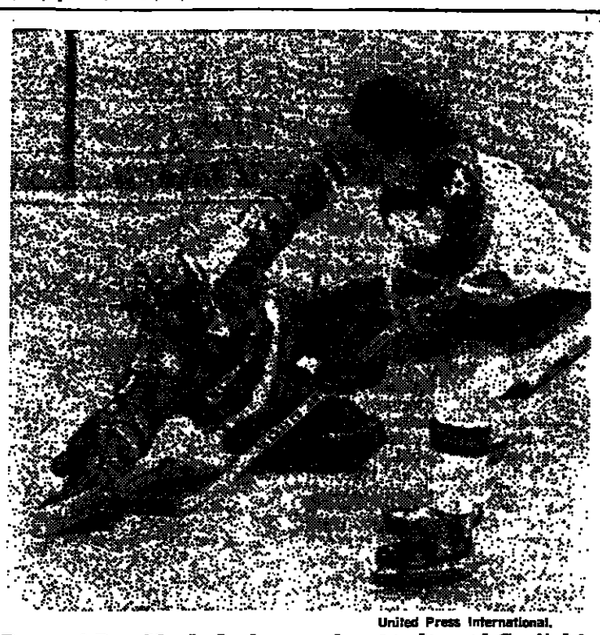
The 123 points were the most Detroit has scored this season and the most permitted by Cleveland, which had the best defensive average in the NBA entering the game.

Campy Russell scored 22 points while Jim Chones added 18 and Austin Carr 17 for Cleveland.

Bullets 116, Jazz 103

At Landover, Md., Elvin Hayes scored 30 points and Phil Chenier 26 to lead Washington to a 116-103 victory over New Orleans.

Dave Bing, who didn't start the game, entered in the second half and ignited a third-period explosion with 13 points and seven assists.



Wednesday's Games

Houston 99, Seattle 97 (Tomjanovich 28, Newlin 17; Watts 25, Green 17).
Philadelphia 103, Chicago 88 (McGinnis 27, Collins 22; Love 22, Johnson 19).
Washington 116, New Orleans 103 (Hayes 30, Chenier 26; Maravich 33, James 13).
Detroit 123, Cleveland 112 (Lanier 36, E. Porter 18; Russell 22, Chones 18).
Boston 117, Los Angeles 112 (White 28, Wicks 21; Abdul-Jabbar 33, Allen 19).

In NHL Action

Perreault Scores 200th Goal As Buffalo Shuts Out St. Louis

BUFFALO, Nov. 11 (UPI).—Gerry Desjardins recorded his second shutout of the season last night to give him the lowest goals-against average in the National Hockey League. And Rick Martin scored two goals to give him six for the season. But it was Gil Perreault who commanded the attention in the dressing room and had the crowd buzzing on its way out of Memorial Auditorium after the Buffalo Sabres' 5-0 victory over the St. Louis Blues.

Perreault, the classy center on the Sabres' French Connection, scored his 200th career goal midway through the third period and it appropriately came on one of his patented rushes.

He says he doesn't remember his first NHL goal, nor his 100th, and probably won't remember his 200th. But anyone who saw number 200 won't likely forget it.

The fleet center took the puck at the St. Louis blue line, skated around a defenseman, and put on a handful of moves before flipping the puck over the sprawled and helpless goalie, Ed Staniowski.

"You're not going to see a much better one than that," said the admiring Blues' coach, Emile Francis. "He sort of took our defenseman out for a cup of coffee. I think he gave him about 42 feints, he looked like he had it on a string."

"It was pretty to watch even from where I was standing," added Sabres coach Floyd Smith.

"Just another goal," commented Perreault, with a wide grin on his face and a twinkle in his eye.

Perreault admitted he knew it was No. 200 and said, "the goalie went down on the first move, so I had to make another move to make sure.

Better Souvenir

"I guess I don't have too many bad years—30, 40 goals a year and you catch 200 pretty fast," the six-year veteran added. "It's a lot of goals, but when a guy plays 14 or 15 years and gets 500 he has a better souvenir than 200. I'll probably forget this one."

Desjardins, meanwhile, faced 25 shots in marking his 11th NHL career shutout and lowering his goals-against average to about 1.50.

Capitals 7, Rangers 5

At New York, left-winger Mike Lampman scored two of Washington's four goals in the third period to extend the Capitals' longest winning streak to three games with a 7-5 victory over the Rangers.

New York rookie Don Murdoch gave the Rangers a 4-3 lead on his 16th goal of the year late in the second period but the Capitals, who set a team record with 22 shots in the middle period, wasted little time in coming back in the final period.

Bruins 6, Red Wings 4

At Detroit, Pete McNab scored two goals and assisted on another as Boston defeated Detroit, 6-4, for their third straight victory.

The Bruins, front-runners in the Adams Division, extended their lead to nine points over second-place Buffalo. The Red Wings remain in the cellar of the Norris Division.

Canadiens 2, Flames 2

At Atlanta, defenseman Serge Savard scored on a shot from the blue line midway through the second period, giving Montreal a 2-2 tie with the Flames in a game highlighted by spectacular goaltending.

Atlanta launched 43 shots toward goaltender Ken Dryden and the Canadiens fired 38 at goalie Daniel Bouchard.

Maple Leafs 2, Kings 2

At Los Angeles, Darryl Sittler's power-play goal midway through the third period lifted Toronto to a 2-2 tie with the Kings.

The first two periods were free of penalties. The Kings were two men short at the time of the tying goal. Sittler took a pass from Lanny McDonald and fired a 25-footer over goalie Rogie Vachon's left shoulder.

North Stars 3, Penguins 2

At Bloomington, Minn., two goals by Dean Talafous and a goal and two assists by Tim Young enabled Minnesota to hold off Pittsburgh, 3-2.

Talafous's second goal, his eighth of the season, gave the North Stars a 3-0 lead at 8:56 of the second period.

Barons 2, Rockies 1

At Denver, rookie defenseman Greg Smith scored his fourth goal of the season late in the second period and Cleveland defeated Colorado, 2-1.

Two apparent goals by the Rockies were disallowed, one in the second period on a high-sticking call and one in the third period on an offside whistle.

Black Hawks 2, Flyers 2

At Chicago, John Marks scored a 45-foot slap shot with less than six minutes remaining to give the Black Hawks a 2-2 tie with Philadelphia.

Wednesday's Games

Toronto 2, Los Angeles 2 (Weir, Sittler; Williams, Berry).
Buffalo 5, St. Louis 0 (Martin 2, Robert, Spencer, Perreault).
Cleveland 2, Colorado 1 (Abera, Smith; Paiement).
Minnesota 3, Pittsburgh 2 (Young, Talafous 2; Keboe, Stackhouse).
Philadelphia 2, Chicago 2 (Dornhoefer, Kindrachuk; Harrison, Marks).
Boston 6, Detroit 4 (McNab 2, Middleton, Ratelle, Schmautz, Cashman; Polonich, McKechnie 2, Harvey).
Montreal 2, Atlanta 2 (Lafleur, Savard; Simpson, Clement).
Buffalo 5, St. Louis 0 (Martin 2, Robert, Spencer, Perreault).
Washington 7, N.Y. Rangers 5 (Charron, Sirois, Monahan, Lampman 2, Bailey, Lynch; Vickers, Dillon, Esposito, Murdoch, Gilbert).

In Tennis Tourney

Connors and Ramirez Advance in Stockholm

STOCKHOLM, Nov. 11 (AP).—Top-seeded Jimmy Connors, aiming for his second final in a row here, breezed into the quarterfinals of the $150,000 Stockholm Open Tennis Tournament tonight, defeating Balacz Taroczy of Hungary in straight sets.

The sellout crowd included King Carl Gustaf and Queen Silvia at the Royal Tennis Hall, where Connors was upset by Italian Adriano Panatta in last year's final.

In tomorrow's quarterfinals, Connors meets Raul Ramirez, the Mexican who beat the American in a decisive North American Zone Davis Cup match last year on clay in Mexico City.

Ramirez and Manuel Orantes of Spain also swept to easy straight-set victories in their third-round matches earlier today.

Ramirez, the fifth-seed, who leads the Grand Prix, defeated 11th-seed Tom Okker of the Netherlands, 7-6, 6-1, and third-seed Orantes scored an impressive 6-1, 6-2 victory over Yugoslavian Nikki Spear.

Okker, twice a finalist here, gave Ramirez a fight in the first set. Forcing a tiebreaker, the Dutch veteran led 4-2, but missed some easy volleys and eventually *lost it*, 7-5.

Evert Beats Wade

LONDON, Nov. 11 (UPI).—Chris Evert defeated Virginia Wade, 6-2, 3-6, 6-3, today to give the United States a 1-0 lead over Britain in the Wightman Cup.

Evert, playing well below her best form, had to dig deep into her reserves to give the United States the first blood in the best-of-seven match.

The United States is attempting to win back the cup, which Britain has held for the last two years.

Hong Kong Event

HONG KONG, Nov. 11 (UPI).—Gene Mayer, who nearly failed to make the qualifying round because of a severe cold, overcame a sprained ankle today to upset defending champion and fifth-seeded Tom Gorman, 6-4, 3-6, 6-1.

The victory by the American over his favored countryman was another in the series of upsets at the $75,000 Hong Kong International Tennis Classic.

"I am surprised I even played," Mayer said. "I was just one point away from defaulting [after spraining his ankle]. I now think my chances are very good." Mayer also was recovering from a bad cold he caught in Japan.

Mayer took advantage of Gorman's overstroking on even simple drop shots to whip his opponent in their third-round match, making Gorman the fifth seeded player to be eliminated of the eight originally seeded here at the Victoria Club.

Mayer's victory over Gorman in a sense was revenge: Gorman won his title last year by defeating his brother, Sandy Mayer.

The three other surviving seeds, however, had no trouble earning quarterfinal berths.

Top-seeded Ilie Nastase of Romania made short work of Indian Davis-Cupper Sashi Menon with a 6-0, 6-2 victory and remained the favorite for the $10,500 winner's purse.

WHA Results

Wednesday's Games

Indianapolis 3, Phoenix 3 (Scinski, Parizeau, Harris; Hall 3, Lariviere).
Cincinnati 4, Edmonton 2 (Sterle, Leduc, Larose, Stoughton; Campbell, Sheehy).

With Subtle Program

Rutgers Emerges as Sports Power

By Gordon S. White Jr.

NEW BRUNSWICK, N.J., Nov. 11 (NYT).—Oklahoma, Indiana, North Carolina State and Rutgers are prestigious state universities that dress their varsity athletes in bright red and white uniforms, and considerable state funding and are dedicated to similar goals but sometimes profitable pursuit of intercollegiate athletic glory. The Sooners, Hoosiers and Wolfpack arrived as superpowers in college sports many years ago.

The case of Rutgers, however, is not many Jerseyites are aware that the state university has been traveling in the same class for nearly four years, making its trip to athletic supremacy seem so subtle and controlled that Rutgers has avoided most of the pitfalls.

Rutgers wants big-time athletics and all of its spin-off advantages. But Rutgers does not want to be embarrassed by recruiting violations to gain those advantages as were Oklahoma, Indiana, North Carolina State in the last 20 years.

Edward Bloustein, president of the University said: "This move into bigger time intercollegiate athletics is a danger. It's a positive process."

Legitimate Outlet

Fulbright, the 51-year-old Fulbright scholar said: "Is it worth it? It is worth it. Athletics identifies us as a state university in the minds of everyone's mind. There are many places we can make error. The point at which this help to the university and its education becomes a means for its own ends is that critical point. But an athletic program is part of the legitimate cultural outlets of the people of the state and I think this is a cultural as well as educational function for the State of New Jersey."

The results of this drive to excellence in athletic status have already been evident. Rutgers is riding a 36-game winning streak in football. The Scarlet Knights won the Eastern basketball championship last season and finished fourth in the National Collegiate Tournament.

And the women's swimming team has been undefeated in 30 straight seasons in dual-meet competition.

Many things happened because Rutgers coaches went out and successfully recruited athletes with the encouragement of and under the direction of Bloustein. Nate Toran, as a defensive end as there is in the nation, and his sidekick at defensive tackle, John Skorupan, are New Jersey athletes who remained in their home state to play college football. A few years ago athletes of comparable ability such as Rich Glover, Richard Todd and Franco Harris, left their home jersey to play for out-of-state powerhouses.

The change in direction for the Rutgers, the poor sister to Ivy League teams is unusual in major college athletics. Without making any hidden and obvious moves, Rutgers is dipping its big toe in the water to test the temperature, knowing full well it will eventually take the big plunge. Its schedules, for instance, have not changed drastically just because the Scarlet can take on anyone. They can't. Seven of the victories in the football streak were achieved against small-college teams. But Rutgers will play Penn State Saturday night, and is scheduled out Penn State and Pittsburgh for future games. That is some measure."

The disparate personalities are largely responsible for the decision to move with caution into the major leagues. They are Bloustein and David (Sonny) Werblin, the Rutgers alumnus who is chairman of the New Jersey Sports and Exhibition Authority (Meadowlands complex) and a member of both the board of governors and board of trustees of Rutgers University. Werblin, a showman, and Bloustein, a tweed-jacket educator, have disagreed at times on the approach to Rutgers athletics. But each has made a deep impression.

Bloustein said: "Our differences were of pacing and style. I'm less a flamboyant man and more paced to what a university is. Sonny is more attuned to organization. He says, 'This is what is going, so let's go.' We have clashed at times. But we have, I think, reached a sense of mutual agreement."

Bloustein became president of Rutgers in 1971. Shortly after that, he said, "The mind is willing for bigger time athletics but the pocketbook is weak." Since then, purse strings have been loosened and Bloustein's program began with approval of the board of governors and board of trustees.

New Personnel

First came Bloustein's changes in personnel that had considerable to do with the school's success. Fred Grunninger became the athletic director, and he controls a budget of $1,250,000 for varsity, intramural and recreation sports. Frank Burns became the football coach and Tom Young the basketball coach with Bloustein's approval.

Baseball and the Kapstein Ten

By Dave Anderson

PROVIDENCE, R.I., Nov. 11 (NYT).—Across from the conference room, soft bells signal the arrival of elevators as secretaries shuffle quietly along the beige carpet. Copies of business magazines adorn the coffee table surrounded by four chairs and a plastic plant in the waiting area.

In the office cubicles, bankers with vests and attaché cases mull investments. Inside the conference room, Jerry Kapstein sits in a purple chair at a gleaming rosewood table and discusses investments with baseball club officials sitting in similar chairs.

But outside there is no secretary, no name on the door, no identification—only a small, unobtrusive sign, "Conference Room 4B—in use." And it's in almost constant use. Jerry Kapstein, intense, deep-voiced, black-haired, short, slim, 33 years old, is handling the negotiations for 10 of the 14 most coveted baseball players now available as free agents—Joe Rudi, Gene Tenace, Bert Campaneris, Bollie Fingers, Don Baylor, Don Gullett, Dave Cash, Bobby Grich, Wayne Garland and Doyle Alexander.

Call them the Kapstein 10.

"I've rented this room for the next few weeks," Kapstein was saying. "I've got two phones in here but only my players have the numbers."

The Expos delegation had departed.

"We had a good three-hour meeting," he said. "John McHale and Harry Reynard of the Expos were here along with two men representing Mr. [Charles] Bronfman, the Expos' owner. Mr. Bronfman owns Seagram's and they flew down and back in the Seagram's jet."

Official Visits

Officials of the Angels, White Sox, Red Sox, Indians and Brewers had visited conference room 4B since last Thursday's draft. None of the Kapstein 10 is here, but some may drift in later.

"I've talked to most of the other teams on the phone, and they will be here by the weekend or early next week. The general managers' meeting in Palm Springs ends Friday and quite a few will be coming here after that. Six clubs have been here already, including the White Sox twice. I've got appointments with 13 more. The other five I don't have appointments with, but that doesn't mean I won't.

'The most intelligent owners will sign the most quality players because that way they're telling their fans they went all out for a winning team.'

There are only three teams I haven't talked to—the Twins, the Astros and the A's. I called the Twins and the Astros, but they haven't called back. I haven't talked to Mr. [Charles] Finley."

"Do you expect to?"

"It's up to him."

Of the Kapstein 10, six chose to desert Finley following contract disputes. But none of the Kapstein 10 are likely to sign until this weekend at the earliest. Bill Campbell, who had 17 victories and 20 saves for the Twins last season, joined the Red Sox last weekend. But many baseball people were surprised that the right-handed pitcher, not a Kapstein client, made such a quick decision rather than letting the bids escalate.

New York Interest

"The Yankees' interest is strong," Kapstein said. "Gabe Paul or George Steinbrenner, sometimes both, have stayed in touch with me every day by phone. We have started serious negotiations over the phone but the Yankees haven't made an appointment yet. I've talked to the Mets once. I got a telegram indicating interest in my clients. I called Joe McDonald [the Mets' general manager] and we had a pleasant conversation but we haven't talked since."

The Mets were the only team that formally sent telegrams to Kapstein and the five clients they chose—Rudi, Grich, Baylor, Gullett and Campaneris. The Yankees have negotiation rights to Grich, Baylor, Gullett, Garland, Campaneris and Cash. In all, the 24 teams selected Kapstein's clients a total of 129 times—as many as all 10 by the A's, as few as one (Gullett) by both the Reds and the Braves, one (Tenace) by the Astros. The average is about five per team.

Kapstein is conducting an auction—but no more than two players to any one team except possibly three to the Angels because the Angels lost three. He knows the club owners can afford the price of liberty. In all their dealings with the Major League Players Association, the club owners wisely never pleaded inability to pay higher salaries. If they had, their books would have been subject to inspection by federal labor authorities.

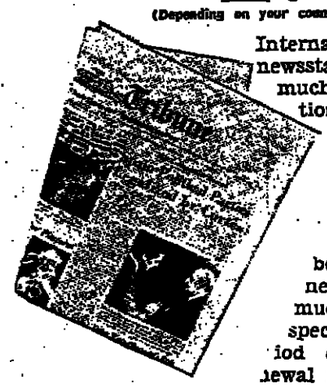
"Owners are businessmen," Kapstein said. "The player gets only what the owner feels will create a return far more than the player gets—in increased attendance, higher TV and radio rights, increased value of the franchise. The most intelligent owners will sign the most quality players because that way they're telling their fans they went all-out for a winning team."

Family Affair

Kapstein, an attorney out of Harvard and Boston College Law School, has an apartment in Springfield, Va., but he's conducting the auction here where he grew up and where his family lives. His husky 28-year-old brother, Dan, briefly a punter with the New England Patriots, often sits in on the negotiations along with their father, the executive director of the Rhode Island Teachers Association, while their mother answers the phone at home.

"I've tried to create the same family atmosphere among my players," Kapstein said. "I think I have."

But some baseball people wonder if representing 10 players might create a conflict of interest. The rules regarding free agents stipulate that "teams may not act in concert with each other and players may not act in concert with each other." If three of his players were to prefer to join, say, the Yankees or the Dodgers, which two would he choose?



"But that's just it," he said. "I don't choose, the ballclubs choose. I don't set the priorities, the ballclubs do. Just like in the draft last week, the ballclubs chose the players—the players did not choose the ballclubs. Different ballclubs have different interests. There's been so much interest shown in everybody so far, I can't see that problem coming up. The players understand that the ballclubs are choosing the priorities."

The phone behind him rang, and Kapstein picked it up, listened, then put it down.

"Somebody must have this number," Kapstein snapped. "We'll have to get it changed."

BE A NEW SUBSCRIBER *and save up to* 47% of the newsstand price

(Depending on your country of residence.)

International Herald Tribune newsstand prices are always much higher than subscription rates. So when you take advantage of the *Introductory 25% Discount* on a 6-month subscription, you find that, compared to what you have been paying at the newsstand, you save as much as 47%. After the specific introductory period chosen, regular renewal rates will be applied.

These are the special rates after deduction of the introductory offer.

Observer

Misquote

By Russell Baker

NEW YORK—Here is a disagreeable letter from Mrs. T.L. of Flogmere, Pa. "Dear Mr. Big-Shot Know-It-All," she begins, "How come we gentle readers still have no explanation of your thundering mistake in forecasting the late unlamented election? I refer to your column of Nov. 2, 1975, in which you predict—I have it right here in black and white—that the Republicans would run Treasury Secretary William Simon for president and the Democrats would run Morris Udall, and that Udall would be elected. If this idiotic prediction had turned out to be right, I bet you would already have written six columns congratulating yourself on your wisdom. As things turned out, you now have a splendid pretext for confessing publicly to your stupidity. I daresay, however, that like most of your ilk, you will discreetly ignore the opportunity."

Baker

Mrs. T.L.'s testy attitude reflects a common public misunderstanding about political experts. I have never known a political expert who was loath to acknowledge error. When I am wrong—and I was wrong once—I come right out and say so.

I said so in 1946 after I had wrongly predicted a Republican defeat in the congressional elections. Even though I was only 11 years old and had never before done political-expert work, I did not try to hide behind youth and inexperience. I came right out and said, "This political expert was wrong." Unfortunately, because of my youth, inexperience and lack of union card, no newspaper would publish this confession, and since I have not been wrong since, I have had no chance to demonstrate the modesty with which I bear my political expertise.

"But Mrs. T.L.'s letter!" someone will say, "Mrs. T.L. says you predicted a Simon-Udall campaign followed by a President Udall. Has Mrs. T.L. distorted the facts of that ancient column?"

Let me say this: I have reread the column Mrs. T.L. cites. Only the most superficial reader could possibly conclude that I was predicting a Simon-Udall race. All I wrote was: "I am now putting my bets... on William Simon, Republican, and Morris Udall, Democrat, with Udall to take the final."

It is perfectly clear from this what I was doing at the time. I was misquoting myself. And deliberately.

Why? Why would a perspicacious political expert with a newspaper column of his very own deliberately misquote his own forecast of the campaign?

Dear Reader, let me answer the question with a question. Dull though the campaign was, would it not have been 10 times as dull if, on Nov. 2, 1975, one full year before Election Day, I had revealed that it was going to be a Ford-Carter year?

If everybody had known this as early as last November, when this political expert first realized it, we might have had nobody at all with sufficient spirit left to vote by Election Day. One owed it to his nation—nay, to the very survival of Western democracy—not to be too explicit in that early forecast. And so, I misquoted myself. Simon and Udall, I said, misquoting myself.

I anticipate some lintpicker, some captious caviler, some budding prosecutor of the Hamilton Burger mode leaping up with a cry, "Aha, weaseler! Just because you didn't want to give your secret away was no reason to predict two wrong guys. Instead of deceiving everybody, you could have skipped the predicting and written about crabgrass!"

This of course is precisely what no respectable political expert could have done. The column was for Nov. 2, 1975, one year to the day before the election. To write on such a day about crabgrass, unpaid bills, his dogs, his children, or any other crutch to the columnist's survival would disqualify the author for further political commentary.

Moreover, I saw a splendid opportunity to spread a little genuine political wisdom. Observe: I would predict the outcome of the campaign wrongly, deliberately concealing what I knew about the inevitability of Ford and Carter. My wrong prediction would deliberately be made so ridiculously wrong (Simon and Udall, for heaven's sake; no child would have taken it seriously) that a year later people would still remember it, and would write scornful letters mocking the author of such prediction.

These naive letters would provide the text wherewith to teach their foolish authors an important lesson about politics. It is this: The political prediction lives only today to create interest in tomorrow, and those who persist in remembering yesterday's are almost as annoying to the experts as those who can't forget last year's.

Visitors to the (Eastwood, England) cemetery often mistakenly think (Lawrence) is buried there because that is what it says. But he is not and never has been.

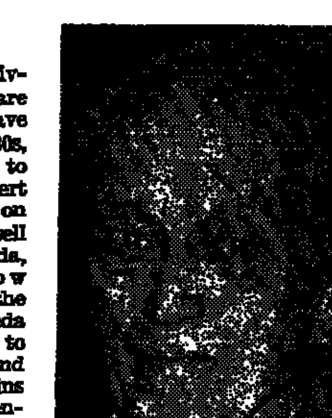
The D.H. Lawrence Tombstone Mystery

By Jeffrey Robinson

VENCE, France (IHT).—Living in Vence today are some English ladies who have been here since the early 1930s, and they are only too glad to talk about David Herbert Lawrence, who died here on March 2, 1930. They will tell you about his wife Frieda, whom they knew; how Lawrence was buried in the village cemetery; how Frieda sent a "Mexican colonel" to have Lawrence disinterred; and how after Lawrence's remains were gone, his tombstone eventually disappeared.

But what happened to Lawrence's tombstone is not the mystery. It is in Eastwood, Nottinghamshire, in the heart of "Lawrence Country". The real question is how it got from here to there.

There is a great deal of misinformation about Lawrence's tombstone. The Manchester Guardian claimed that it once lay in a Vence potter's shop.



It didn't. It was taken from the cemetery by a woman who put it in a tea room.

The New York Times said it was made by a Vence farmer.

It wasn't. The gray and brown-stone pebble mosaic showing a phoenix rising was made by a young Italian boy named Nicola who worked at the Villa Robermond where Lawrence died.

Fascination

"D.H. Lawrence holds a great fascination for people around the world, but particularly here, because he died here and there are still people here who remember him, who remember Frieda, and who wonder about the mystery of his tombstone," says Prof. Emile Delavenay, who lives in the valley below Vence and is considered an authority on Lawrence. He has taught at Cambridge, London and Nice Universities, and is the author of, among others, three books on Lawrence, including "D.H. Lawrence: The Man And His Work — The Formative Years."

Emile Delavenay

"Over the years I've gotten to know a number of people who knew Lawrence well," he says. "Including Frieda. I never cared for her because she was a terrible snob who smoked too much. She was always watching her step not to say the wrong thing, then somehow managing to say exactly the wrong thing. And doing the wrong thing. Once she locked her own daughter in a room with that Italian boy Nicola because she felt her daughter's depression would disappear if she had a man. Frieda was very conscious of men."

While it is difficult to say just what the attraction was between Frieda and Lawrence, Prof. Delavenay feels that she married him with the idea that it would never last, and that their marriage became one of mutual bondage.

Model for Mellors

"Some people believe that had Lawrence never married Frieda, while he still would have been one of the great writers of this century, he never would have written 'Lady Chatterly's Lover.' We'll never know. But their marriage was a turbulent one. Toward the end, Lawrence was impotent and Frieda was jealous of his first love, Jessie Chambers. Frieda was never very faithful but while they were living in Italy she took up with a man named Angelino Ravagli.

Almost certainly the model for the gamekeeper Mellors in "Lady Chatterly's Lover," Ravagli was a captain in the Bersaglieri division of the Italian Army. Years later he married Frieda and was the "Mexican colonel" who had Lawrence disinterred.

"Following his death, Lawrence was buried in Vence and the tombstone that Nicola made was placed on the grave," Prof. Delavenay said. "It lay there until 1935, when Ravagli returned from Taos, New Mexico, where he and Frieda were living. Ravagli was actually quite a character. He was married in Italy and had several children but couldn't get a divorce there, so he got one in Mexico and never told his first wife. Once Lawrence was disinterred, he took the remains to Marseilles for cremation, then sailed with the urn back to the States."

There, a number of Lawrence's friends in New Mexico tried to steal the urn from Frieda. She had Ravagli place it in cement, thus creating the Lawrence shrine in Taos. Those same friends, upon Frieda's death, saw to it that she was buried outside the shrine instead of next to her husband.

"Once the body was gone from Vence," Prof. Delavenay continued, "the tombstone sat against a wall in the cemetery. At that time there was an Englishwoman in town named Mrs. Gordon Crotch who ran an antique shop and tea room called Le Pigeonnier. On her own volition she took the tombstone and put it just inside the front door of her tea room where it sat, until one day it wasn't there anymore. It reappeared after the war on display in Eastwood."

The Broxtowe District Council in Eastwood, which recently made Lawrence's birthplace into a museum, said it acquired the tombstone from the late Prof. V. De Sola Pinto, a Lawrence scholar at Nottingham University. The council added that Lawrence's name appears on the family tombstone in the Eastwood cemetery, which has created some confusion about his actual burial site.

Visitors to the cemetery often mistakenly think he is buried there because that is what it says. But he is not and never has been.

Surprised

Prof. Delavenay does not know how Prof. Pinto obtained the tombstone. Neither do any of the English ladies in Vence who knew the Lawrences. Many of them, in fact, seemed surprised to learn that the tombstone was not as they had always believed, lost forever.

In Eastwood, the resident Lawrence expert is Lucy Edwards, a retired librarian. She is certain that Prof. Pinto was contacted by Mrs. Crotch about the tombstone.

Checking back with the ladies in Vence about Mrs. Crotch, Mrs. Phyllis Cahill, widow of a former British consul in Nice, says she remembers that Mrs. Crotch left Vence for England just before World War II, although she eventually returned to Vence.

That timetable coincides with what Prof. Pinto's widow remembers. Reached by phone at her home in Sussex, she said she could not recall the name of the person who wrote her husband about the tombstone, but that it was a woman who at the beginning of the war brought it from Vence where she had been keeping it.

Mrs. Pinto added, however, "My husband didn't get the tombstone until after the war. The woman left it at a hotel outside London and after the war, when the woman had died, the hotel wrote us to say that we could have it if we came to pick it up. The first time the woman offered the tombstone to my husband, he had to refuse it, even though both he and the woman felt that it should be put on view in Eastwood. My husband had to refuse it the first time because the woman insisted that it was a literary souvenir, and that the going price would be £200."

PEOPLE: England's Ben Travers Takes Time Out for Bi[rthday]

British playwright Ben Travers celebrated his 90th birthday Thursday—a day before the event. There was a champagne party for the hit writer at the Lyric Theatre in London. He said he is so busy that he wanted to be sure of fitting the party in even if it was slightly premature. "I won't have time to retire," he declared. "I am writing a play at the moment and that will probably be my last one—I shall be dead after that."

Former President Richard Nixon will begin taping the first of 12 two-hour television sessions with David Frost on March 23, a spokesman for Frost says. The interviews will be broadcast internationally—the BBC is among the networks that have agreed to show them. Frost won't say how much Nixon will be paid.

Jacques Arpels, head of the Van Cleef and Arpels jewelry firm, was interested in the 40-carat yellow diamond which was to be auctioned by Christie's in Geneva Thursday. It was valued at $1.2 million by the auctioneers. "But something seemed strange to me," said Arpels, "and I asked for another expert opinion." The color had been faked by bombarding the stone in a cyclotron to turn it yellow. The stone was withdrawn from the sale.

Oil Producers Meet Next Month

U.S. Acts to Avert OPEC Price Increase

By Don Oberdorfer

WASHINGTON, Nov. 12 (WP).—The State Department announced yesterday a diplomatic campaign, quietly under way for weeks, to persuade oil-producing countries to forgo the next price increase threatened for next month.

State spokesman Robert Funseth said the campaign involves "intensive consultations" with other industrial nations and expresses "strong opposition" to a price increase in discussions with all of the oil-producing states.

In Brussels today, Reuters reported that Common Market officials welcomed as timely the United States' denunciation of further oil price increases and said it will probably be discussed by European Economic Community foreign ministers here Monday.

[OECD experts said that the risk of a price increase was a permanent concern for the community and it was in constant contact with its main partners, including the United States and Japan.]

December Meeting

Unofficial reports from the Middle East and elsewhere have anticipated a price increase of as much as 10 to 20 per cent to be decreed by the Organization of Petroleum Exporting Countries in a meeting scheduled for mid-December in Qatar.

U.S. officials involved say they are nearly certain that no decision has been made yet by the oil-producing states, despite rumors and reports to the contrary.

The officials are unwilling to concede that there will definitely be an increase, saying that the potential worldwide economic effects are so serious that at the last minute OPEC may be dissuaded.

"We are very much opposed to any new increase in oil prices at this time," Mr. Funseth said. "We do not believe it is justified. We believe that any increase would be contrary both to the best interests of the world economy (for which OPEC must accept a major responsibility) and the interests of the oil-producing countries themselves," he said.

Government economic projections cabled around the world maintain that each 1-per-cent rise in petroleum prices would add $1 billion to the total oil bill of the "big seven" importing countries (the United States, Japan, West Germany, France, Britain, Italy and Canada) with serious effects there and in the economies of many poorer countries.

A 15-per-cent OPEC increase, adding $15 billion to the "big seven" oil bill, would cause a rise of about 1.5 per cent in the inflation rate of these countries

ANSWERING QUESTIONS—British Prime Minister James Callaghan and French President Valéry Giscard d'Estaing meeting with newsmen after their semi-annual talks.

Thousands Strike In Spain Against Austerity Moves

By James M. Markham

MADRID, Nov. 12 (NYT).—Several hundred thousand industrial workers across Spain today staged stoppages, held political assemblies in factories or walked off their jobs in a one-day protest against a government-decreed package of austerity measures.

The protest, which only leftists termed a general strike, was strongest in Barcelona, the industrial belt around Madrid, Seville, the Basque country and the northern mining center of Asturias.

Called by an umbrella organization of Spain's three main, illegal labor unions, the strike rallied an impressive number of industrial workers but scarcely affected the nation's transportation system or its white-collar and agricultural workers.

Life continued as usual in the principal municipal centers and, aside from sporadic confrontations between strikers and police, there was little violence.

Marcelino Camacho, the Communist chief of the Workers Commissions, who found himself with a police bodyguard, claimed 2 million has participated in the strike; the government issued a figure of 480,000 out of what it called a "salaried work force" of 8 million.

[The walkout appeared to be the biggest show of national labor strength since the death of Generalissimo Francisco Franco a year ago, AP reported.]

Labor informants said that more than 200 pickets and union organizers were detained today. In the last two weeks, the police have been actively disrupting leftist organizations, arresting a number of their militants.

The umbrella organization, which groups the Communist-dominated Workers Commissions, the Socialist General Union of Workers and the smaller Workers Syndical Union, appeared to have called the strike to demonstrate its growing strength and to channel discontent into a single day.

Speakers at factory assemblies attacked the government's economic program, which limits collective bargaining and wage increases and facilitates layoffs. They demanded an $85 monthly raise for all workers as well as recognition of the still illegal unions.

Responsible, Peaceful

In preparing the strike, organizers stressed that it should be "responsible and peaceful" and instructed militants at the factory level to try to negotiate the holding of assemblies with employers.

Keystone.

Marcelino Camacho

Strikers were urged to avoid holding outside meetings that could lead to incendiary situations.

For its part, the government massed police in the main urban and industrial centers, where they periodically charged pickets and set off smokebombs to disperse them. A Madrid afternoon newspaper half-humorously pronounced "both the government and the strike organizers satisfied."

The unions' theme of responsibility seemed intended, in part, to avoid upsetting the passage of the government's political reform bill through the rightist-dominated Franco-era parliament, which will convene Tuesday to consider it.

Today, a parliamentary drafting committee issued its own version of the bills, which made only minor linguistic adjustments of the government's text and, thereby, rejected ultra-rightist amendments. The bill paves the way for democratic elections to a two-chamber legislature next spring.

...ael Lays ...as to U.S. ...n UN Vote

By H.D.S. Greenway

JERUSALEM, Nov. 12 (WP).—Foreign Minister Yigal Allon today accused the United States of contradiction because of its support for a United Nations Security Council declaration criticizing Israel's administration of the occupied Arab territories.

Mr. Allon summoned U.S. Ambassador Malcolm Toon for what the U.S. Embassy described as a "serious exchange of views."

Allon asked the ambassador to express to Secretary of State Henry Kissinger Israel's "deep concern at the discrimination displayed by the United States in this case," according to a Foreign Ministry spokesman.

Last night's Security Council declaration has caused shock and consternation here, not so much because of the declaration itself, but because of U.S. support for it. There have been other moves in the United Nations to condemn Israel for its policies in the occupied territories, but Israel thought it could count on the United States to either dissociate itself from these moves or to...

...Facilitate Return

The Security Council declaration called on Israel to insure the safety of the inhabitants of the occupied territories and to facilitate the return of those who have fled because of war. It called on Israel to abide by the terms of the fourth Geneva convention and to refrain from changing the demographic composition of the occupied territories through the establishment of Jewish settlements, a practice the Security Council said it "strongly deplored."

The declaration also expressed the UN view that the Israeli annexation of East Jerusalem following the 1967 war was illegal and it asked Israel to recognize that any "encouragement or connivance" in the "profanation of the holy places" was a danger to peace.

The U.S. delegate told the Security Council that the debate had been "one-sided and excessive against Israel, but that the United States was associating itself with the consensus statement because it affirmed several important principles in regard to occupied territories."

Mr. Allon today told Ambassador Toon that, although Israel was aware that there were differences of opinion with the United States over the occupied territories, the United States had chosen an unfortunate time and place to express these differences.

According to the Foreign Ministry spokesman, Mr. Allon expressed his appreciation for the positive things that the U.S. representative had said on Israel's behalf, but that on balance the negative aspects of both the discussion and the conclusion had outweighed the positive in Israel's opinion.

Mr. Allon told Mr. Toon that Israel feared that the content and timing of the Security Council...

...rition Observed ...or Monkey Virus

LONDON, Nov. 12 (Reuters).—...esearch worker was hospitalized here yesterday after handling the green monkey virus, ...ce of a disease that has killed ...dreds of persons in Africa.

Health Department spokesman said that the unnamed researcher had been working on the virus in southern England when a protective glove was damaged. The man's wife and two children and all known contacts had been placed under close observation, the spokesman said. But he stressed that there was no evidence that the man was actually suffering from the virus disease, which recently killed more than 400 persons in the Sudan and Zaire.

CRACK IN THE DOOR—Samuel Gammon (left), leader of the U.S. delegation, and his aides were met by one of the Vietnamese delegates when they arrived at the Vietnamese Embassy annex in Paris for talks Friday.

Washington Policy Remains Firm

U.S. and Vietnam Hold Talks, First Since the Fall of Saigon

By Flora Lewis

PARIS, Nov. 12 (NYT).—U.S. and Vietnamese diplomats met here today in the first formal talks since the fall of Saigon last year.

Although the goal of the new series of talks has been said to be normalization of relations, today's contacts were considered preliminary to test whether conditions are favorable for full-scale Washington-Hanoi negotiations on the aftermath of the war and postwar issues.

Secretary of State Henry Kissinger has issued firm instructions that all U.S. comment on the meeting, beyond a bare announcement that it took place, must come from Washington.

Even a U.S. Embassy statement—that "issues of interest to both countries were raised with the missing-in-action issue our primary concern" and referring further questions to the State Department—was drafted in Washington.

No Change

[In Washington, State Department spokesman Robert Funseth said the talks produced no change in the U.S. policy calling for a veto of Vietnam's application for membership in the United Nations, the Associated Press reported.

[He called the two-hour meeting a "substantive discussion" conducted in a "correct" atmosphere. Asked whether the reaffirmation of the U.S. veto policy meant there was no progress on the missing-in-action issue, Mr. Funseth said, "That's a fair statement."

[Mr. Funseth said the U.S. negotiator emphasized the need to resolve the question of missing U.S. servicemen before there could be any improvement in relations between the two countries, the AP reported. Mr. Funseth said he could not characterize the Vietnamese reaction to the negotiator's statement.]

The reason for renewal of the secrecy that surrounded the negotiations Mr. Kissinger held leading up to the 1973 Paris peace accords was not explained. The talks were deliberately held at the level of second-highest ranking embassy officials in Paris, it was understood, in order to make clear their tentative, probing nature.

U.S. officials made no effort to contact a higher level delegation of Vietnam's deputy foreign minister and former ambassador to Paris who visited here last week, it was learned. Nor, diplomatic

(Continued on Page 2, Col. 4)

Full Session Called to Solve Geneva Snag

GENEVA, Nov. 12 (UPI).—Britain today convened a full plenary meeting of the Rhodesia conference for tomorrow in a make-or-break effort to get a compromise on setting a target date for independence of the territory under black majority rule.

The conference chairman, Ivor Richard of Britain, scheduled the plenary session for tomorrow morning after a day of intensive bilateral talks with the four black nationalist leaders and the white-minority government delegation.

Mr. Richard, Britain's ambassador to the United Nations, plans to present the plenary with a "statement from the chair" that will be a compromise formula attempting to resolve the date issue, which has stalled the conference for two weeks.

Nationalist leaders, however, said they are sticking to their demands that Mr. Richard set a maximum period of 12 months for independence under majority rule.

"We have not been given any new evidence that convinced us to change our position . . . we are still insisting on 12 months," Bishop Abel Muzorewa, a nationalist leader, said after his meeting with Mr. Richard.

Satisfaction Sought

"We may ask for adjournment of the conference if the chairman does not satisfy our position that independence can be arranged within one year," a spokesman for another black leader, Joshua Nkomo, said.

Mr. Richard, according to high conference officials, is trying to resolve the deadlock by saying that while independence within 12 months would be desirable, the legal and constitutional procedure may take longer, perhaps 15 to 18 months.

The Rev. Ndabaningi Sithole, another nationalist leader, after his meeting with Mr. Richard blamed Britain for the deadlock.

"If the conference collapses it will be Britain's fault for insisting on 15 months," the Rev. Sithole said.

Issue of Date

Mr. Richard was abrupt with newsmen at the end of the day. "There will be a plenary tomorrow at which the issue of the date will be discussed," was all he would say.

British spokesman David Brighty said there "has been progress" and Britain "thinks it is worth going on."

Mr. Richard has suggested 15 months as a realistic period while the white-minority government of Prime Minister Ian Smith has said 23 months would be required.

But the white Rhodesians have said they consider the date issue to be "peripheral," and they want to get down to basic issues, starting with the composition of an interim government.

After Giscard, Callaghan Meet

France Promises to Support Britain in Its Search for Funds

By James Goldsborough

PARIS, Nov. 12 (IHT).—France pledged today to support Britain in its search for international financial aid to help end the British economic crisis.

Following talks with Prime Minister James Callaghan, President Valéry Giscard d'Estaing said that French representatives on the International Monetary Fund would view the British requests for aid with "comprehension and reasonableness."

Britain is seeking a $3.9-billion loan in talks with the IMF to help an economy plagued with inflation, a deteriorating balance of trade, a depreciating currency and a slow recovery from recession. The main question about the talks has been how stringent the IMF would be in imposing conditions on Britain.

EEC Promise

Preliminary talks on both sides of the Atlantic have been under way for several weeks on how to help the British economy and solve the sterling problem. Last week, in Brussels, the British won a commitment from the European Economic Community for additional help beyond the $3.9 billion expected from the IMF.

In a statement today, Mr. Giscard d'Estaing said that France "approved the intention of the British government to seek a solution to the sterling balances problem, since this would contribute both to improved internationay monetary stability and to the strength of the British economy."

France has urged Britain since its negotiations on entry into the EEC began seven years ago to solve the sterling balances problem. Britain now has indicated that it would seek help in the general funding of the sterling balances—that is, giving credits in other denominations for foreign balances now held in pounds. The sterling balances, about $8 billion when Britain began its EEC negotiations in 1970, are now estimated at about $5 billion.

This summit was the first of the regular annual contacts between French and British leaders that were agreed to last summer during Mr. Giscard d'Estaing's visit to London. They represent an attempt to put French-British contacts on the same footing as French-West German contacts. The French and Italians hope to initiate the same sort of meetings sometime soon.

Mr. Callaghan called the talks today a "great success" and said it was the first meeting of a "close working relationship."

British sources indicated that the French pledge of support was somewhat more than they might have expected. Mr. Callaghan is under pressure, not only from the IMF, but also from various economists and experts in the United States and West Germany to take far more stringent austerity measures if Britain is to expect help.

Two questions that were left

(Continued on Page 2, Col. 1)

Trade Deficit Smaller

British Inflation Rate Is Up to 14.7%

From Wire Dispatches

LONDON, Nov. 12.—Britain received another economic setback today with evidence of worsening inflation for the third month in succession.

But the nation's trade gap showed some improvement in October, despite fears that recent falls in the pound's foreign exchange value would make matters worse.

The inflation rate edged to an annual rate of 14.7 per cent last month, reflecting food, furniture, fuel, cars and clothing prices.

The pound's weakness has forced up the price of imports.

A month ago, inflation, as measured over the previous 12 months, stood at 14.3 per cent.

The retail price index for October showed an increase of 1.8 per cent, compared with a 1.3-per-cent rise in September.

The latest economic statistics were issued while the Labor government was in the midst of delicate discussions with a team from the International Monetary Fund about terms for its requested $3.9-billion loan.

Before the loan is approved, the IMF wants to be sure the government is pursuing policies capable of restoring economic health.

Today's figures showed Britain's trade with the rest of the world last month to be £360 million ($583 million) in deficit—a drop of £16 million from the September deficit.

Special Factors

But all but £1 million of the improvement was being put down to special factors in oil, food and in the tobacco trade, leaving the underlying picture virtually unchanged.

Taking invisible earnings from things such as banking and tourism into account, the overall deficit for October was exactly £200 million compared with £216 million in September.

In the long term, the figures seem a little more encouraging.

The latest three months, August through October, showed an overall deficit of £558 million compared with £777 million in the previous three months.

But even this comparison is distorted by the July trade figures, which were freakishly bad.

The best thing that can be said for today's figures is that they are no worse than in previous months, financial experts said.

October saw both imports and exports at record levels.

Imports rose by £74 million to £2.582 billion, while exports rose by £90 million to £2.222 billion.

On the foreign exchange market, the pound gained a little ground at the news, trading at $1.6260.

Deputies Approve Andreotti's Plans

ROME, Nov. 12 (Reuters).—Premier Giulio Andreotti's minority Christian Democratic government won a vote of confidence as expected in the Chamber of Deputies here tonight, but with more members abstaining than supporting it.

The vote—249 in favor, 37 against and 267 abstaining—came at the end of a two-day debate on Mr. Andreotti's austerity measures and strategy to pull Italy out of its economic crisis.

The most important abstentions were those of the Communist party—Italy's second biggest political group—and the Socialist party.

For the Communists, Giorgio Napolitano voiced reservations about the government policy but said his party was abstaining in the national interest.

Socialist spokesman Enrico Manca said the government's response to the crisis was totally unsatisfactory and that if the circumstances had not been exceptional, his party would have voted against the plan.

Greek Communists Are Trickling Home to Bleak Prospects

Legal Woes and Unemployment Cloud Return for Many

By Mary Anne Weaver

ATHENS, Nov. 12 (WP).—Twice a month, expectant relatives gather in the Port of Piraeus or, more often, travel to the Yugoslav border by car. The last of Greece's Communist refugees are trickling home.

Driven into exile by their defeat in the 1946-49 civil war, 10,000 resettled throughout the Eastern bloc and the Soviet Union. The largest group, of 22,000, has lived in the bleak landscape of Soviet Tashkent.

The government of Premier Constantine Caramanlis has agreed that they may return after individual screening. The parliamentary opposition, after only 6,800 approvals, is demanding that there be a blanket repatriation en masse.

"The first step was resistance to the Nazi occupation," said Dr. Epominonis Tsankanlarion, his eyes beginning to brim with tears. "Then the steps continued. It was an odyssey of 26 years."

The doctor returned to Greece last summer, from exile in Tashkent. He believes strongly that the civil war scars must be forgotten and buried. It has been nearly 30 years.

A small man, alert and forceful, who left Greece when he was 50, Dr. Tsankanlarion was a doctor with the Communist forces in the Grammos mountains. In a small village in remote Central Asia, near the Uzbek city of Tashkent, he remained stateless throughout his exile.

Emotional Return

"But," he said in a recent interview, "I never stopped being Greek. Returning was highly emotional. Then the practical considerations set in. I had considerable landholdings outside Salonika. During my exile, they were all expropriated by the state. I'm 73 and have no pension, even though I was considered the top tuberculosis specialist in Greece. Now I've got to begin from the beginning, re-establish a practice here."

Beyond such personal considerations, there are complex questions of pensions and property rights. And a host of post-civil war laws must be repealed or rewritten, including those governing the restoration of citizenship and the writing off of hastily passed convictions for alleged civil war crimes.

The Caramanlis government thus balks at massive repatriation, claiming that it would unsettle the economy and the legal system, force up unemployment and provoke housing shortages in already cramped urban centers and towns.

Michalis Papadimitris, president of the refugee committee, counters that, far from causing social and economic chaos, repatriation would aid the country's development. More than half the refugees are scientists, technicians, students and skilled industrial workers, badly needed by the state. He also claims that many refugees are tied to homes and families in Eastern Europe and therefore would not return.

But, though economic and legal considerations are being invoked officially, government sources concede privately that internal security and the political balance are also very much at stake. Twenty per cent of the applications submitted have been rejected, all on security grounds.

There is official uneasiness that two-thirds of the refugees are under 40, presumably dedicated Communists today. And the country's two-year-old democratic government is still walking a tightrope with the conservative military establishment, whose mentality grew out of the civil war years.

"It's an unfair criterion," said Dimitrios Moukas, a 35-year-old biologist whose father fled across the border when Dimitrios was only nine. "There is a very large group of refugees who were either born abroad or were much too young to bear any responsibility for a war that's been over for 27 years."

Too Educated

Moukas and his wife, Niki, a pathologist, his mother, father, brother and 4-year-old son, returned from Tashkent this summer. Other than his brother, a mechanic, the family is unemployed.

"This is one of the biggest problems," said Mr. Moukas. "Jobs are impossible to find, especially for scientists and intel-

News Analysis

Britain's Body Politic Shaken By Odd Sights in Parliament

By Robert B. Semple Jr.

LONDON, Nov. 12 (NYT).—London is something of a political circus these days, full of odd happenings. There is, for example, the spectacle of a Prime Minister fighting like a tiger for five pieces of legislation to which he does not seem emotionally attached and which, in themselves, are clearly secondary to his main concern, the British economy.

The votes in the House of Commons, meanwhile, are abnormally and excitingly close.

The House of Lords awakes, surprising everyone except itself. Talk of a constitutional crisis fills the air.

But there are edifying aspects. The outsider is seeing two things. One is a government fighting for credibility. The other is a renewal of an old question about Britain's parliamentary democracy: Does it accurately reflect the attitudes and aspirations of the average citizen?

At the center of the confusion lie the five pieces of legislation. *In rough order of the controversy* they inspire, they are as follows:

• A bill that would nationalize the aircraft and shipbuilding industries.

• A bill that would give dock workers a monopoly on cargo-handling jobs up to five miles from the point at which goods are actually unloaded from ships.

• A bill that would increase government powers to end a selective education system and mandate "comprehensive" schools in local school districts.

A bill that would gradually remove facilities for private patients in state-supported hospitals.

• A bill that would increase security of tenure for farm workers who live in cottages that can now be taken away from them if they leave the farm to work elsewhere.

There are reasons to doubt that the public is genuinely excited about some of these bills, even though they were part of the government's manifesto when the Labor party regained power in 1974. Despite Conservative opposition to the measures, thousands of normally pro-Labor voters switched to the Conservatives in three parliamentary by-elections last week, which reduced Prime Minister James Callaghan's working majority in Commons to a handful.

But there is no doubt that at least two of these bills—the dock workers bill and the nationalization bill—are regarded with dismay by many people in the international financial community who have been lending Britain money and who have much influence over the fate of the pound.

The nationalization bill is regarded as an unnecessary new burden on the public treasury; the dock workers bill, rightly or wrongly, *seems to reflect an unhealthy government subservience* to the wishes of Jack Jones, whose Transport and General Workers Union includes the dock workers.

Then why does Mr. Callaghan persist in pushing legislation that seems to make him a captive of the left? The superficial answer, although it is an important part of the equation, is that these bills are the price he must pay to keep the left wing of his party at bay while he pursues an essentially conservative economic strategy of wage restraint, high interest rates and *some cuts in public spending.*

A better answer is that, having pledged himself to the legislation, he cannot afford defeat. To lose on a major vote in the House of Commons is to invite a *vote of confidence; to lose a* vote of confidence—no small possibility, given the government's shaky majority—is to invite a general election. The Conservatives and Margaret Thatcher might well win such an election today.

Until Wednesday night, when it suffered a sharp reversal in the Commons, the government had been squeaking through. Commons approved the measures this summer, and sent them to the Lords, a far more conservative body that soon amended all the bills and changed some beyond recognition.

The Lords—which is still making changes in the hospitals bill—sent the four others back to Commons. They are now being considered under a "guillotine" motion that sharply *limits* the time available for debate.

It had been expected that Commons, by narrow margins, would delete the Lords' amendments and send the measures back to the upper chamber in their original form. The most the Lords could do then would be to delay the legislation for a year, at which point it would take effect in the form approved by Commons.

But Wednesday night, helped by a few calculated abstentions by moderate members of the Labor party, Commons upheld the Lords' revision of a crucial section of the dock-worker bill. The defeat was not of sufficient magnitude to require a vote of confidence—other sections of the bill passed—but it was a stunning *setback for the Prime Minister*, a demonstration of how precarious his parliamentary position is, and a triumph for the Lords.

Although the Lords amendments on the nationalization bill were defeated in the Commons last night, some margins were as thin as one vote, and the Lords are clearly giving the government fits. There have been complaints that the upper chamber is "thwarting the will of the people" and should be abolished.

Should the Lords be abolished? Or should it—as others have suggested—be strengthened through *reform*? The answer depends largely on how one thinks the present system could be made more "representative."

The House of Lords, still dominated by hereditary peers, is not a *representative institution. It* is capable of giving controversial bills a close second look and making even the proud House of Commons sit up and take notice. But it is undoubtedly more conservative than the nation as a whole.

At the same time, there are those who feel that the Commons is not a great improvement. Complex bills are routinely rammed through on the basis of party loyalty, while individual members seem more responsive to their party's manifesto than their own sense of what the public really wants.

Accordingly, there has been some talk here of making the Lords part of a system of meaningful checks and balances by giving it more than the nuisance value it now has. One method, suggested by Lord Carr, a former Conservative home secretary, would be to elect the Lords on a proportional basis.

This is not a new idea. But the fact that it has emerged again suggests that at least some Britons think that complex issues deserve more methodical examination than they are now getting in the bitter, politically charged atmosphere of Commons.

Finnish Trains Rolling

HELSINKI, Nov. 12 (AP).—A strike by 700 traffic controllers at the Finnish railways ended yesterday following intervention by President Urho Kekkonen.

Associated Press.

ONE THING LED TO ANOTHER—Israeli Foreign Minister Yigal Allon telling U.S. Ambassador Malcolm Toon that he was very disappointed by the U.S. stand during UN debate on Israel's occupation policies. The conversation started, Mr. Allon said, when he told the ambassador he was *"only saying good morning out of convention."*

Discrimination in UN Vote Is Laid to U.S. by Israel

(Continued from Page 1)

cil declaration would "encourage *extremist tendencies" both in the* occupied territories and in the Arab world at large. He said that Israel rejected the Security Council declaration and would "continue to carry out its responsibilities in the administrated territories."

Privately, Israeli officials expressed their dismay that the United States should have chosen this time *to criticize* Israel in such a way and that the move only gave the Arabs the advantage in what Israel sees as the opening of a new season of diplomatic maneuverings toward a *Middle East* settlement.

Israelis are particularly angry about the admonition regarding the holy places because the Security Council debate, called by Egypt, concerned the disturbances at the Cave of the Patriarchs in Hebron last month. It is still not clear which side started the disturbances, but the throwing of the Moslem holy book, the Koran, on the floor was followed by the destruction of Jewish Torahs. The Israelis feel, as their UN ambassador Chaim Herzog said, that the Security Council debate concentrated on the alleged desecration of the Koran without mentioning the desecration of the Torah.

Israeli officials also expressed privately bitterness toward Mr. Kissinger, whom they suspect of having personally directed the U.S. action at the Security Council.

Israeli radio today reported an undiplomatic exchange between Mr. Allon and Mr. Toon in which Mr. Allon said: "Good morning. I say good morning only out of convention. I am very disappointed by the American vote."

Mr. Toon reportedly replied: "Let's talk about it later." The exchange has been officially denied by the Israeli foreign minister.

Syrian Units of Peace Force Postpone Entry Into Beirut

BEIRUT, Nov. 12 (UPI).—The Syrian-dominated Arab peacekeeping force delayed its generally expected thrust into the center of Beirut today as shelling of the divided city killed and wounded dozens of civilians.

Two Syrian brigades waited at the edge of the capital, consolidating their positions and digging in for the second stage in the security plan of President Elias Sarkis, overall commander of the 30,000-man Arab force that is supposed to enforce the cease-fire in Lebanon.

"Our main concern now is to reinforce our positions in order to insure that security prevails in areas already occupied," said a spokesman for the Arab force.

Plan Evolving

"The security plan is evolving hour by hour, but there will be no movement today. Tomorrow, the forces will move either into Beirut or to north Lebanon and south to Sidon," he said.

Sources close to the force's high command said that the delay was "administrative, technical and military" and added that the troops were awaiting an *additional 4,000 to 5,000 men from* Arab countries other than Syria to arrive.

The Syrians have deployed 4,000 men and 600 tanks, armored cars, mobile heavy artillery pieces and rocket batteries in a wide arc just outside Beirut.

Within Beirut, the rival Lebanese factions continued to attack each other's areas, sending civilians running for cover as mortar shells slammed into the pavement.

In the West Beirut area of the Aisheh Bakkar Mosque, shelling killed at least seven persons and wounded 55, according to the American University Hospital.

The area had been unusually crowded because of people who had come to pray on Friday, the Moslem sabbath.

Meanwhile, according to a report published today, the Lebanese industrial sector has lost $1 billion in the 19-month civil war.

The report, by the Lebanese Industrial Association, was submitted to Salim al-Hoss, an economic adviser to President Sarkis.

The association estimated the cost of reconstruction and repair of damages at $800 million and said that the losses from looting were about $240 million.

U.S. and Vietnam Hold Talks, First Since the Fall of Saigon

(Continued from Page 1)

sources said, did the Vietnamese use that visit to pass any messages to the Americans through the French, although they have passed such messages on similar occasions.

Today's session had been expected to consist only of an exchange of prepared statements by each side, although there was no confirmation of this afterward.

However, the U.S. Embassy statement said, "We can confirm that today our deputy chief of mission met with the counselor of the Embassy of the Socialist Republic of Vietnam."

That is the new name for the *whole country adopted in* Hanoi after the formal unification of North and South Vietnam earlier this year. U.S. use of this official name for Vietnam implied recognition of the change and of *Hanoi's right to speak for* the nation.

Initial Positions

The initial positions of each side as they resumed formal contact were well known. *The United* States has maintained that it must have a full account of the fate of about 800 U.S., servicemen listed as missing in action before any other issues can be discussed.

The Vietnamese say they are willing to do their best to fulfill this obligation under the 1973 accords, but only on condition that the United States fulfill its pledge of postwar reconstruction aid at the same time.

Both president Ford and President-elect Jimmy Carter said during the election campaign that *they would veto Hanoi's* admission to the UN unless the missing-in-action issue was cleared up. Vietnam's application for membership comes up before the UN Security Council again next week. When it first came up two months ago, the United States used its veto.

However, both the United States and Vietnam are aware that their initial rigid positions are hopelessly incompatible, and a first series of talks is bound to be a probing operation in which each seeks to test the real limits of concessions the other side may *be prepared to make.*

Gesture of Interest

No substantive moves are considered likely before the new U.S. administration takes office, although Hanoi has released a few names in the past from time to time as a gesture of interest in negotiating and may do so again before Mr. Carter's inauguration Jan. 20. So far as was known, *no date was set today for the* next Paris meeting.

The U.S. representative was Samuel Gammon, 52, a career diplomat from Texas. Mr. Gammon has served in a number of European embassies and was in the State Department from 1970 until he came to Paris in September of last year.

During his final two years in Washington, his title was deputy executive secretary of the Executive Secretariat in the State Department, which means he worked on Mr. Kissinger's staff.

No Experience

Mr. Gammon has had no experience in the Far East or the earlier Vietnam negotiations. He was accompanied to the meeting by Mark Pratt, a political affairs officer of the embassy here who has long been a specialist in Indochina affairs and who has occasionally been used for informal contacts with the Vietnamese officials in Paris.

The Vietnamese delegation was headed by Tran Hoan, in charge of political affairs in his embassy and a participant in the previous U.S.-Vietnamese negotiations.

During the early period of those talks, he served on the delegation of Xuan Thuy, who attended the official four-sided negotiations. Later, he served with Le Duc Tho, who negotiated separately and secretly with Mr. Kissinger and shared the Nobel Peace Price in 1973 with the U.S. secretary. Le Duc Tho rejected his half of the prize.

Pontiff Assails Marxist Group

VATICAN CITY, Nov. 12 (AP).—Pope Paul said this week that Christianity could not be an instrument used by Marxism as a *means to serve its aims and purposes.*

Speaking during his general weekly audience, the Pope referred to the Communist-backed movement Christians for Socialism.

"Christianity," the Pope said, "cannot be intentionally used as an instrument for a conception of life which ideologically contradicts Christianity."

"Today," the Pope added, "there is a lot of talk about Christianity which must serve socialism. Christianity for socialism is a contradiction . . . as Christianity serves itself—and if it serves socialism it does so for its [socialism's] good ends. However, this cannot be accepted as if it were a great discovery and a new formula for our times."

South Africa Restricts Rights Group Official

JOHANNESBURG, Nov. 12 (AP).—A white South African woman was placed under five years' house arrest yesterday and banned from receiving visitors, going to nonwhite areas or going to educational institutions.

Justice Minister James Kruger ordered Sheila Weinberg, 31, secretary of the Human Rights Committee, restricted to her home from dusk to dawn each weekday, for 18 hours on Saturdays and all day Sundays.

But an Immediate Rise Is Doubtful

China's Leaders Optimistic on Foreign Trade

By Ross H. Munro

PEKING, Nov. 12.—The Chinese officials who make their country's foreign trade policy seem like new men these days.

In the wake of the purge of the radical "gang of four," they are talking frankly, realistically and optimistically about the future.

What they have been saying to visiting businessmen and journalists during the past few weeks boils down to this: It's going to be easier to do business with China in the future, and there's going to be more business to do.

A senior Chinese trade official, for instance, recently told a group of visiting businessmen that China's trade with the outside world will be "flourishing" three years from now. *Li Hsien-nien*, who may become China's new premier, has told journalists that China's imports will be determined by what the country needs and can pay for. Li Chiang, the foreign trade minister, has said that China will increase its purchases of foreign technology.

Boom Unlikely

Now that these and other economic policymakers do not have to worry about being second-guessed by radical ideologues, as they were until recently, there is every reason to believe that imports and exports will grow at a steady pace. But to go beyond that, and predict that a big boom in China trade is around the corner would be rash, given some of the realities.

First of all, the Chinese show no signs of deviating from their conservative financial policy of buying only what they can pay for. Second, the moderates who now prevail are nationalists, for whom self-reliance is still much more than a slogan.

In a recent discussion with a foreigner, for instance, Chairman Hua Kuo-feng spoke emotionally about the old China that relied on the outside world for nearly all its manufactured goods. There is still a strong consensus among the moderates that China must strive for economic self-sufficiency and that the importation of foreign technology is a necessary and, they hope, a short-term evil.

Fair Quiet

The political turmoil of the past year *combined with the destruction* caused by the Tangshan earthquake of July 28 has put a crimp in economic growth that will be felt for some time to come. Foreign businessmen who attended the recent Canton trade fair report that while there is a new mood in the air, there has been no surge of offers from the Chinese to buy or sell.

When he met with a group of French journalists last week, Li Hsien-nien said that, while China is committed to a policy of self-reliance, this does not mean it will close its doors to the foreign *technology it needs.*

He said that the government's ministries want to import more capital equipment. He mentioned petrochemical technology, oil and mineral-exploration equipment, steel-making technology and power-generating systems—the sort of foreign technology China has been importing in recent years.

The trouble is, he said, "one needs foreign currency to buy all those things." With that comment he pointed out a key factor limiting any import boom in the near future: China's adherence to that old rule that one should not live beyond one's means. Chi imported more than it exported 1974 and last year and it seen determined not to make that habit.

HOMEWARD BOUND—A huge container with a Soviet MiG-25 inside being loaded aboard a Soviet timber carrier Friday in Hitachi, Japan, to be sent back to Soviet Union.

Japan Returns Soviet MiG-25 Without Fanfare on a Pier

HITACHI, Japan, Nov. 12 (NYT).—With a fleet of Soviet vessels standing offshore and more than 2,000 armed policemen standing guard onshore, Japan today returned to the Soviet Union the controversial MIG-25 jet fighter that has strained diplomatic relations between the two nations.

The aircraft, which was flown here Sept. 6 by a Soviet Air Force officer defecting to the United States, was returned without ceremony on a lonely, windswept pier in this port city 100 miles northeast of Tokyo.

Crowds gathered on the cliffs overlooking Pier 2 today to watch a crane lift 13 silver crates from truck beds and lower them into the hold of the freighter Taigonos. There, Soviet and Japanese officials will check off each piece.

Nearby, *Takako Suzuki*, a local shopowner, smiled warmly. "This," she said, "is going to be a big weekend for tourists."

Soviet "sailors," wearing business suits, immediately began peering into the packing crates. If all goes according to schedule, after a detailed inventory of the disassembled parts, the world's fastest jet fighter will begin its *homeward journey to Siberia on* Monday inside a Soviet freighter—at about 16 miles an hour.

The plane is no longer a top-secret weapon. Japanese and U.S. experts have pored over the craft piece by piece almost from the moment Lt. Viktor Belenko landed his twin-engined craft at Hakodate's civilian airport on the northern island of Hokkaido.

The plane was disassembled and flown to Hyakuri air base. It is a well-made, high-altitude interceptor whose technology is, however, inferior to that of U.S. counterparts. Although faster than *U.S. counterparts*, its "look-down" radar is said to be of poorer quality than American versions.

But while the first Western look at the MiG-25 was an intelligence bonanza, it proved to be at least a brief diplomatic headache for Japan.

At first the Soviet Union issued almost daily demands for the plane's immediate return. One strongly worded statement called Japan's retention of the plane an "unfriendly" act which clouded the friendly relations between the two countries.

The Russians hinted darkly that "a third nation," presumably the United States, was intervening in the affair and obstructed the pilot's wish to return home, possibly by using drugs.

Relations between officials of both governments became chilly. The seizure of Japanese fishing boats for violating Soviet territorial waters seemed to increase. Some trade and economic meetings were postponed. The Soviet visas of some Japan Air Lines crew members were found to be improper.

The Soviet Union refused to exchange ceremonial congratulatory telegrams on Oct. 19, the 20th anniversary of the resumption of diplomatic relations between both nations. A Japanese women's volleyball team was unable to obtain Soviet travel documents.

But the protests appeared carefully scaled to avoid a serious or lasting disruption of relations, which would cost the Soviet Union more economic harm than propaganda gain. For continental trade, the Japanese can always turn to China, to which they have always been drawn historically and culturally.

Nonetheless, in long private talks with Japanese businessmen last summer at his Yalta vacation retreat, Soviet Communist party chief Leonid Brezhnev spoke of his strong desire for large-scale Japanese loans over *the next 10 to 15 years to help* develop the vast, rich natural resources of Siberia.

The Japanese for their part treated the incident as unrelated to any other Japanese-Soviet issues in hope of minimizing the impact. They maintained it was a violation of air space and have demanded compensation for damaged runway lights at Hakodate. *Officials say privately they* expect the affair to blow over quietly.

Navy Plane Recovered

LONDON, Nov. 12 (AP).—The F-14 Tomcat that went to the bottom of the North Atlantic carrying a supersecret missile has been raised by a West German salvage ship, ending a two-month effort that cost the U.S. Navy $1.7 million.

The $20-million jet fighter had lost its landing gear and right wing and was "scraped, dented, rusty and wet" when the salvage ship *Aurus brought it to the* surface yesterday, the Navy said.

U.S. Drives to Force OPEC To Forgo a Major Price Rise

(Continued from Page 1)

as a whole and reduce their combined growth rate by about 1 per cent, according to the projections.

The most serious effect would probably be in Britain and Italy, which are already afflicted with serious economic woes and are seeking large international loans. There is some fear that these countries or others with shaky economies—Mexico, for example—would be unable to pay their international bills or to obtain additional credit, triggering an economic crisis for them and perhaps for the world economic system as well.

The U.S. economy, which is better able to adjust than most, would be hit by a $5.5 billion increase in its oil bill—in effect an "oil tax" raise—if the OPEC price increased by 15 per cent.

Unless compensated for by additional U.S. tax decreases, more deficit financing or other costly policies, this would add an extra percentage point to the current 6 per cent U.S. inflation and reduce the present economic growth rate of 4 per cent by 0.6 per cent, according to the projections.

U.S. policy has sought closer economic, military and political ties with the major OPEC countries, particularly Saudi Arabia and Iran, over the last 18 months.

Officials denied reports that the United States is considering the explicit threat of an arms sale reduction as pressure on Iran, but they said the overall relations built up with the Arab world are at stake in the OPEC decision-making.

U.S. officials have been aware for many months of the possibility of an OPEC increase and have been conducting a low-level "educational" campaign with the oil producers, according to officials. This activity is said to have been stepped up in September in intensive talks with Saudi Arabia and other producers, and simultaneous discussions on a quiet basis with Japan and European countries.

Alps Slide Claims 4

GAP, France, Nov. 12 (AP).—An avalanche killed four expert skiers on an 8,450-foot peak in the French Alps yesterday.

N. Ireland Co To Call for Independenc

BELFAST, Nov. 12 (AP) Political groups on both sides the Northern Ireland conf give a chilly response today Protestant organization's prop to make the province indepen from Britain.

"We discarded this idea party annual meeting some ago," said a spokesman for Social Democratic and party, which represents mod Catholic opinion. "No these latest proposals will be cussed shortly, but we see future in them."

On the side of Ulster's 2-1 p estant majority, a spokesman the Official Unionist party de ed, "There is no place in Unionist philosophy for any of Republicanism" whether Ca olic or Protestant.

Debate Urged

The Ulster Loyalist Central ordinating Committee links several Protestant military groups, introduced proposal yesterday, calling public debate on its sugge that independence be phase over four years with Britain viding economic support for years. The ULCCC also sug ed a parliament with guaran representation for the Ca minority.

In general, political groups peared not to take the prop seriously. There was no rejec from extremists of the m Catholic Republican move who want to force Britain of Ulster and reunite Ireland.

The middle-of-the-road Alli party, which includes both gious denominations, said pendence would lead to an crease in the paramilitary vio that has killed at least 1,662 sons since 1969.

The Ulster Defense Assoc a hard-line Protestant group does not belong to the UL did not comment. But Un ficials indicated general op in the group favors local government in association Britain.

The province is under rule from Britain becau political factions in Ulst been unable to agree on lament conforming to Briti quirements. These include sharing between the nearly 000 Catholics and the nea million Protestants.

In Pastoral Letter

U.S. Catholic Bishops Affirm Traditional Teaching on Sex

By Kenneth A. Briggs

WASHINGTON, Nov. 12 (NYT). —The Catholic bishops of the United States yesterday approved an extensive pastoral letter on morality that strongly reaffirms traditional teachings on sexual ethics in the face of rising discontent within the church.

The letter repeats the moral stands taken in the Vatican's Declaration on Sexual Ethics earlier this year.

The letter ran into unexpectedly stiff opposition, however, from bishops who argued that it lacked sufficient compassion for Catholics who experience difficulty obeying church proscriptions against artificial birth control, divorce and abortion.

By upholding those prohibitions in the final day of their semiannual meeting, the bishops explicitly rejected pleas for changes in church law and growing evidence that Catholics are increasingly at variance with church principles.

A recent Call to Action conference in Detroit, which brought together a widely diverse gathering of Catholics under the auspices of the bishops, called for many alterations in church policy, including removal of excommunication from divorced and remarried Catholics and emphasis on the right of couples to decide about birth control on the basis of conscience.

While spokesmen for the bishops emphasized that the pastoral letter was not a response to the Detroit proposals, having been written over the course of two years, some of the criticism of the letter clearly stemmed from the desire to be sensitive to those suggestions.

The intensity of the debate over the letter's tone reflected not only the impact of the Detroit proceedings but also the widening gulf between two groups of bishops who take different views of the exercise of authority.

One perspective is more conventional and understands leadership essentially as a magisterial and dogmatic process that requires little consultation with other elements of the church.

The other style is more pastoral, places high value on developing consultative processes and stresses the need to take seriously the sufferings of those who try unsuccessfully to follow church moral law.

Bishop Francis Mugavero of Brooklyn introduced a motion to refer the pastoral letter back to committee by declaring his support for its substance.

Lack of Understanding

"However," he continued, "since this is a teaching document and we want to reach the widest number of people, I think the pastoral is lacking in one aspect, in terms of tone and understanding of the thousands of people suffering and anguishing in their striving to maintain the moral laws of the church."

For 45 minutes, the bishops engaged in the sharpest debate of the four-day meetings, injecting emotional language seldom heard in public hierarchical councils.

One bishop called the statement "pedantic" and "unimaginative," asserting that it appealed "neither to the head nor the heart." Another, in defense of the statement, said its rejection would represent "a woeful lack of courage" on the part of the hierarchy.

"It's been mentioned that there are weary people for whom the moral practices of the church are difficult to follow," said Bishop Joseph McNicholas of Springfield, Ill. "But I would propose that there are people looking for the courageous leadership that we and those who have gone before us have given."

Two prelates—Bishop Maurice Dingman of Des Moines and Bishop John Cummins of Sacramento—told the body that the pastoral letter could benefit by postponement until the results of the Detroit meeting had been carefully assessed.

The final vote against postponement was 162 to 65, a closer margin than many had expected. Discussion on ten pages of amendments continued for three hours, leaving the final text in virtually the same form.

The statement, which Bishop Joseph Francis of Newark predicted "could possibly be the most important document ever issued by this conference," undergirds a broad range of moral positions with theological reasoning.

Noting that sexual intercourse has both "love-giving" and "life-giving" functions, the letter says artificial birth control is "wrong because it severs the link" between those "meanings."

"Pastoral sensitivity requires that we be understanding toward those who find it hard to accept this teaching," the statement says, "but it does not permit us to change or suppress it."

Stand on Sex

The document also stands firmly against extramarital or premarital sex, maintains opposition to divorce (though it encourages couples to utilize annulment procedures) and reiterates the church's anti-abortion position.

On homosexuality, the document reinforces the view that such sexual acts are wrong but that homosexual orientation itself is not sinful. It goes further to stress that "homosexuals should not suffer from prejudice against their basic human rights" and asserts that "the Christian community should provide them with love and pastorale care."

For the nation's 4 million divorced Catholics, many of whom have remarried and are therefore technically excommunicated, the statement offers little prospect for an easing of church discipline.

A Tragic Fact

"It remains a tragic fact that some marriages fail," the statement says. "We must approach those who suffer this agonizing experience with the compassion of Jesus himself."

Continuing, the letter calls for recognition of Jesus's "prophetic demands concerning the indissolubility of the unions to those who marry in the Lord."

"The church," it said, "must ever be faithful to the command to serve the truth in love."

The letter also covers other social issues, including a condemnation of racism, housing discrimination, euthanasia that is directly induced as well as an endorsement of equal rights for women.

The final vote to adopt the letter was 172 to 25.

Pardon Panel Choice Slight In Utah Case

May Only Be Able To Reset Execution

SALT LAKE CITY, Nov. 12 (AP).—The Utah Board of Pardons may have little choice when it meets on Wednesday but to grant killer Gary Mark Gilmore's request to die before a firing squad, the board chairman indicated yesterday.

"If a person comes there and says he doesn't want it [clemency] and no reason is presented to us for it, what can we do?" said George Latimer, chairman of the three-member board to which Gov. Calvin Rampton sent the case after staying an execution scheduled for Monday.

In a letter to Mr. Latimer, Gov. Rampton, who leaves office in January, said he wanted the board at Wednesday's public hearing to "review the decision of the trial judge" to determine whether capital punishment would be "appropriate."

Utah law does not grant the governor clemency powers, and Gov. Rampton, a supporter of capital punishment, made no recommendation in delaying the execution.

Gilmore, 35, has said repeatedly he wants no delay in carrying out his death sentence for the murder of a motel clerk during a robbery last July. When told of Gov. Rampton's action yesterday, Gilmore complained he was being subjected to "cruel, unusual and inhuman punishment."

Two Alternatives

Mr. Latimer said that under state law the board has two alternatives: to commute Gilmore's sentence to life in prison or to ask the trial judge to set a new execution date.

The governor acted after the Utah Supreme Court first stayed the execution and then, on Wednesday, reversed itself when it heard a personal appeal from Gilmore to die "like a man." Gov. Rampton said he felt the Utah Constitution required him to intercede.

Gilmore would be the first man executed in the United States since 1967, and many of the more than 400 death-row inmates around the country fear the consequences of his rush to death.

In Utah, for example, lawyers for other condemned prisoners said they feared that allowing Gilmore to go to his death without an appellate court review would be a de facto ruling upholding the state's death penalty law. The law was re-enacted after the U.S. Supreme Court found most state capital punishment statutes unconstitutional.

The American Civil Liberties Union and the NAACP Legal Defense and Educational Fund, Inc., both said they were considering an appeal of Utah's untested law

Continuing Electrical Strike Major Problem for Argentina

BUENOS AIRES, Nov. 12 (Reuters).—A continuing strike by state electricity workers that could widen labor unrest has turned into a major problem for Argentina's military rulers.

Almost daily power cuts, attributed by the state's SEGBA company to sabotage, are hitting two or three districts of this capital of 8 million people.

The 7,000 SEGBA workers started their sit-in strike on Oct. 5 in protest against the dismissal of 206 colleagues. Army troops and policemen have been deployed around the main SEGBA offices and power stations, but this has failed to stop the workers' go-slow policy and there are reports that electricity output is now down to less than half the normal levels.

The layoffs were part of the government's avowed intention of trimming the administration payroll down to manageable size.

Most of those dismissed had records of union militancy under the ousted Peronist government.

After persuasion failed, Gen. Jorge Videla's government warned on Oct. 29 that strike instigators would be arrested.

That night, 40 electricity union leaders were arrested, according to union sources. Under regulations recently decreed they may face up to 10 years imprisonment.

But the go-slow adopted by the workers continues whenever SEGBA offices and power stations are not closely inspected by the police or army, according to union sources.

Advertisements are regularly flashed on television urging electricity workers not to yield to instigators and to carry on their jobs normally.

They are believed to be aimed at the labor front, where signs of unrest are beginning to show, as frozen salaries melt away in the face of prices rising by around 10 per cent monthly.

Unrest Is Spreading

Labor unrest has spread to the dockyards and this has cut activity in the capital's ports by two-thirds with most vessels sailing half-loaded. The dockers, estimated to number 9,000, started their own go-slow toward the end of October to protest cuts in fringe benefits.

Central Cordoba city, traditionally Argentina's political flash point, also faces labor unrest following recent demands by provincial light and power union delegates for increased salaries.

The delegates urged the government to implement "a policy of salaries aimed at meeting the workers' basic needs in order to pave the way for peace and national reorganization."

The military supervisor of the Cordoba General Labor Confederation, Navy Capt. Atilio Viber, admitted that the purchasing power of salaries was dropping, but urged workers to continue their sacrifice "in order not to frustrate plans that are now being executed."

Economy Minister Jose Martinez de Hoz emphasized that there would be no salary increases until 1977.

For Re-Education and Labor

Thousands in Laos Reported Prisoners in Harsh Camps

By Bernard Gwertzman

WASHINGTON, Nov. 12 (NYT). —Thousands of former rightist and neutralist Laotians are confined in harsh, repressive internment camps throughout Laos, according to accounts received here.

The reports, mainly in interviews from escaped o. released prisoners and from letters from within the camps sent to relatives in Laos, said that the camps differed widely in their levels of severity.

Some, on islands in the Mekong River near Vientiane, the capital, are apparently short-term "re-education" facilities to provide such former "undesirables" as prostitutes and wayward teenagers with Communist indoctrination. These camps have been visited by foreign diplomats and journalists.

Forced Labor Camps

But 40,000 to 50,000 former members of anti-Communist army units in Laos are said to be in what amount [illegible]ced labor camps, livir[illegible] minimal food rations and medicine. These inmates are reportedly given such tasks as cutting lumber and building canals; their death rate is said to be high. These labor camps were set up after the takeover last December by the pro-Communist Pathet Lao and the collapse of the neutralist government, which was supported by rightists and led by Premier Souvanna Phouma.

The former Premier lives comfortably in Vientiane, but has no influence on the government headed by President Souvanouphong and Premier Kaysone Phomvihan, the Pathet Lao secretary-general.

U.S. officials said that in September, Mr. Souvanna received medical treatment in Paris, where he also visited one of his sons who had fled the country, then he returned to Laos.

The most repressive conditions are reportedly at Phong Saly, Sam Neua and Attopeu, all long-time Pathet Lao strongholds used for internment of high-ranking civil servants and military men of the former government who had not escaped before the Communist take-over.

Conditions are also described as "brutal" and overcrowded for political prisoners at Sam Khe, in Vientiane Province, were 750 to 1,000 are reported incarcerated. Reports state that those attempting to escape from camps or prisons are subject to execution.

The U.S. government has received many of these reports but is reluctant to discuss conditions in the camps publicly for fear that the Laotian authorities may retaliate against the staff of 25 still at the U.S. Embassy in Vientiane, which serves as a listening point on Communist activities in Indochina. There are no U.S. missions in Vietnam or Cambodia.

There have been only fragmentary newspaper accounts of the camps in Laos and many articles on the fairly mild "re-education" camps near Vientiane, but virtually nothing about the more repressive camps. One report received wide circulation earlier this year when about 500 prisoners were said to have escaped from Sam Khe prison.

Absentee Ballot Survey

The International Herald Tribune is making a survey of overseas absentee ballots in the recent U.S. presidential elections. Readers who asked for such ballots but did not receive them are asked to write the IHT, giving their names and the counties and states involved.

West Virginian Loses in Bid to Keep House Seat

WASHINGTON, Nov. 12 (AP). —Rep. Ken Hechler, D-W. Va., conceded defeat yesterday in his re-election bid, giving House Democrats the same number of seats they had in the last Congress—290—with three elections still undecided.

A Democrat was leading in one of the undecided races and Republicans were a head in two. In another race, a Democratic victory was so close it could be changed in a recount. Republicans have won 142 House seats.

Nick Rahall, also a Democrat, became the clear winner in West Virginia when Rep. Hechler conceded defeat in his effort to keep his seat by virtue of a write-in vote.

Rep. Hechler had given up the House seat to run for governor. After he lost the gubernatorial primary, he launched a write-in campaign to try to stay in Congress.

In the three undecided races, Rep. Abner S. Mikva, D-Ill., is barely winning re-election; Rep. Lloyd Meeds, D-Wash., is narrowly trailing and a Republican, Carl Pucsell, had a thin lead for a Michigan seat.

Democrat Bob Gammage defeated Republican Rep. Ron Paul in Texas by 94 votes, but a recount being conducted at Rep. Paul's request could change the outcome.

Seniority Drives Aged Out of Job

BURLINGTON, Iowa, Nov. 12 (AP).—The Southeast Iowa Area Agency on Aging has fired five drivers of vans that transport senior citizens because the five are too old.

The men, aged 65 through 78, were fired from their $2.30-an-hour jobs after the National Indemnity Co. of Omaha cancelled insurance on them. "Our agent called insurance companies for four days and no one would take us because of our drivers," said Bill Holvoet, director of the agency. "It's ironic—an agency on aging can't hire the aged."

The agency uses the vans to transport up to 400 elderly a week to meals, doctors and shopping. The program has been suspended while Mr. Holvoet looks for five drivers under 65.

State Department Lists Moscow as Unhealthful Post

MOSCOW, Nov. 12 (AP).—Moscow is being designated an "unhealthful post" for U.S. Embassy employees, and existing overall hardship benefits are being increased.

An administrative notice circulated at the embassy today said that effective Dec. 1, Moscow will be considered an unhealthful post.

The notice said that "the determination for such a designation is based upon the [State] Department's evaluation of reported environmental conditions regarding sanitation and disease, medical and hospital facilities and climate."

An earlier action increased the "post differential," also referred to as a hardship allowance, from 15 to 20 per cent. That is, employees will receive, as of October, 20 per cent more in salary. The maximum post differential is 25 per cent, usually given for wartime or other top hazard posts.

Embassy officials said one element of the worsening conditions in Moscow is the prevalence of giardiasis, a rare intestinal disorder that is believed to be spread in drinking water. The officials did not include persistent microwave radiation of the embassy as a reason for the unhealthful post designation.

Morocco Encouraging Return Of 230,000 Native-Born Jews

RABAT, Nov. 12 (AP).—The Moroccan government has embarked on a campaign to persuade about 230,000 Moroccan-born Jews to return from Israel, France, the United States and other countries to share in the future prosperity of their "real homeland."

The invitation, first addressed last March to Moroccan Jewish communities abroad by King Hassan II and Premier Ahmed Osman, has resulted in a small but steady flow of Jews back to Morocco.

Officials said about 1,000 Jews have returned this year and several hundred more are expected early next year. Following the end of French rule in 1956, all but 17,000 of the about 250,000 Moroccan Jews fled for fear of persecution and pogroms. The Moroccan population is 98 per cent Moslem.

The government has promised to help find jobs for all Jews of Moroccan origin or assist them in re-establishing small businesses here. Big companies are encouraged to hire technically qualified Jews in high-level executive positions. A recent advertisement in the government-owned newspaper Le Matin explicitly asked for Jewish applicants to fill a vacant job as factory manager.

The departure of many Jewish technicians left a gap in Moroccan industry. Replacing the Jews with U.S. or European technicians proved a serious drain on the Moroccan economy.

Peace, Harmony

Morocco has no anti-discrimination laws and Islam is the official state religion. But Moroccan officials like to point out that a Jewish minority has lived in peace and harmony among the Moroccan population since biblical times and was never subject to persecution. Tensions between the communities arose only when newly independent Morocco joined the Arab front against Israel.

In the 1960s, and following two unsuccessful coup attempts against King Hassan II in 1971 and 1972, there was an exodus of Jews from Morocco. Small traders, businessmen and industrialists quietly sold out and slipped out of the country with everything they could take along. Currency restrictions barred the export of funds.

Moroccan officials estimate that 145,000 Jews went to Israel; 50,000 to France; 25,000 to North America, and smaller numbers to other countries. Among the Arab countries, Morocco alone allowed native-born Jews to come back on a visit—even with Israeli stamps in their passports—and return to Israel. The government had drawn a line, however, at admitting persons with Israeli passports, which were not recognized as valid documents.

To overcome this problem, the Moroccan Embassy in Paris has now been instructed to issue Moroccan passports to any Moroccan-born Jew, even if he has no identification other than a passport issued by Israel.

A Moroccan source said, "We think we are also contributing to a solution of the Middle East problem by proving that Moslems and Jews can live together in harmony despite the existence of a state called Israel."

Moroccan Elections

RABAT, Nov. 12 (UPI).—Moroccans voted today in their first elections since 1970.

About 43,000 candidates are running for 13,362 seats in 830 regional and municipal assemblies, government officials said. The officials said 6.5 million voters had registered by the Sept. 30 deadline.

Honor System To Be Reformed At West Point

WEST POINT, N.Y., Nov. 12 (WP).—The corps of cadets at the U.S. Military Academy voted overwhelmingly this week to reform and liberalize its controversial honor system in the wake of the academy's biggest cheating scandals in 174 years.

In a referendum approved by about 85 per cent of the 3,962 cadets voting, honor review boards of officers were abolished and responsibility for trying alleged honor code violators was placed solely in the hands of the student body. The academy has 4,044 cadets.

Also, cadets accused of cheating, lying or stealing will be investigated by student honor committees comprised not only of senior and junior class members who now serve in that capacity but also by lower classmen selected at large.

Not included in the reform package approved by a 3,358-to-604 vote was a proposal that would have given the honor committees the discretion of granting convicted cadets a second chance through a form of social probation. Presently, the penalty for honor code violations is expulsion.

Danes to Protest Soviet Radio Jam

COPENHAGEN, Nov. 12 (Reuters).—Denmark has told its ambassador in Moscow to protest over powerful shortwave radio signals, believed to emanate from the Kiev area, which are disrupting international communications, the Foreign Ministry said today.

A spokesman said it was decided to take the matter up with the Soviet government after a report by the Danish state postal-telegraph company.

The high-powered transmitter, believed to be part of a research project, has interfered with radio communications with Denmark's Arctic Province of Greenland and ship-to-shore traffic. Norway and Sweden are also reported to have had communication problems in recent months because of the Soviet transmitter.

2 Trampled at Concert

JAKARTA, Nov. 12 (Reuters). —Two boys were reportedly trampled to death and 30 persons injured when a crowd stampeded at the start of a concert by Indonesian singing star Omma Irama in West Java.

IRS Again To Query on Funds Abroad

By Robert L. Jackson

WASHINGTON, Nov. 12—Bowing to pressure from Congress and the Department of Justice, Internal Revenue Service officials have shifted ground and will again ask U.S. taxpayers next year if they have funds in a foreign bank account.

Congressional sources said that two questions dealing with foreign accounts are being restored to the individual income tax return, slightly more than a year after a similar question was ordered deleted by IRS Commissioner Donald Alexander.

Advance copies of the 1976 tax forms, which have been distributed to congressmen concerned with tax laws, show that U.S. citizens will be asked to check a yes-or-no box to designate if they have money in a foreign bank or trust account.

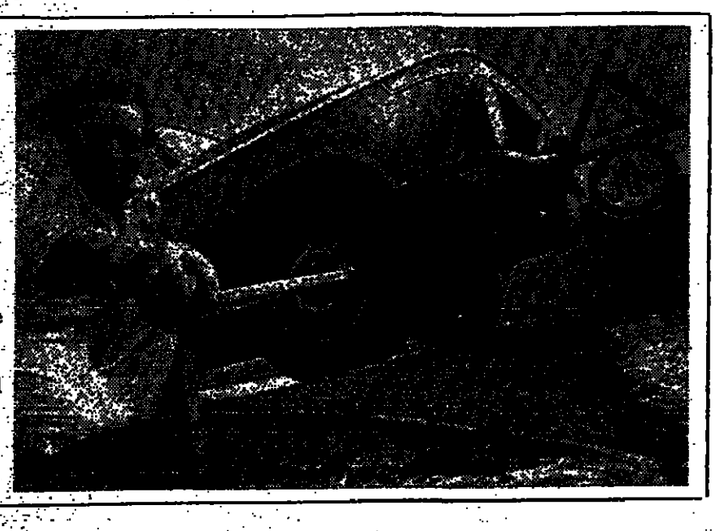
Many law enforcement officials, including veteran agents in the IRS Intelligence Division, have called this question an important tool in investigating the misuse of Bahamian and Swiss bank accounts for tax-evasion purposes.

The foreign bank question, which must be answered under penalty of perjury, first appeared on tax forms for 1970. It resulted from congressional pressure to control the mushrooming abuse of overseas bank accounts by tax evaders, organized crime figures and narcotics traffickers.

However, Mr. Alexander ordered the question deleted for the 1975 year, contending there was insufficient space on the form in view of new Census Bureau questions ordered by Congress. His action added to an existing controversy over his alleged downgrading of criminal tax investigations.

The two new questions, which require "yes" or "no" answers, are: "Did you, at any time during the taxable years, have any interest in or signature or other authority over a bank, securities or other financial account in a foreign country (except in a U.S. military banking facility operated by a U.S. financial institution?)"

"Were you the grantor of, or transferor to, a foreign trust during any taxable year, which foreign trust was in being during the current taxable year, whether or not you have any beneficial interest in such trust?"



A "yes" answer requires the taxpayer to attach details in a separate schedule.

U.S. Navy Women Sue to Get Sea Duty

WASHINGTON, Nov. 12 (AP). Four Navy women say the legal prohibition against their assignment to sea duty deprives them of "the core experience of Navy life." They filed suit this week to overturn the prohibition.

The suit is a class action on behalf of all present and future females in the Navy. Navy women currently are allowed to serve on hospital ships and harbor vessels like tugboats.

What Next in the Mideast?

The unopposed entry of Syrian peace-keeping forces into Beirut should finally mark the end of the worst of Lebanon's long agony. Though sporadic violence will no doubt continue, the country can finally set about trying to restore the political, economic and communal conditions in which a reasonable national life can go on. What hope exists that Lebanon can manage this Augean task hinges on a display of restraint and tolerance, by Lebanese and by foreigners, altogether out of keeping with the selfishness and brutality that have torn the country to shreds over the last year and a half. Yet there is no feasible alternative. The new President, Elias Sarkis, is a decent man who will be taxed to the utmost in coming months. He deserves the international community's full support.

Is it just a coincidence that Lebanon's agony ends as a new U.S. administration prepares to begin? Or did the U.S. election, with its promise of a resumption of active diplomacy, help subdue Lebanon's furies? We suspect the latter. The other Arab states were eager to move on. Especially was this so of Saudi Arabia, which in recent weeks has brought its great economic influence and its inter-Arab prestige to bear in order to promote a truce in Lebanon and to restore working harmony between Syria and Egypt. Virtually everyone agrees that no further diplomatic progress can take place while either Syria or Egypt stands apart from the process and criticizes the other for engaging in it.

Yet another Saudi achievement has been to keep Yassir Arafat afloat atop the Palestine Liberation Organization. He is diminished and sobered, or so one must hope, by the Lebanese experience. Replacing him promises more trouble than rescuing him. Mr. Arafat has not been saved, however, simply in order to be unleashed to launch the next wave of raids on Israel—and to invite the next wave of Israeli counter-raids. Such a sequence would be sure to spoil diplomacy. Somehow Mr. Arafat and the PLO must be fitted into a serious effort for an Arab-Israeli peace. How do we know this will happen? We don't. But we think it represents the best available reading of the Saudi purpose, and the one that all the parties ought to do their best to make come true.

The tip-off could come in the next month or two when the PLO evidently will hold the first meeting of its governing National Council since just after the PLO's 1970 debacle in Jordan. The broad question before the house will be whether to exchange fantasy for reality and undertake to negotiate a settlement on the basis of recognition of Israel's right to exist.

In anticipation of the Palestinians' new turning point, the ideal next step would be for the current administration to consult as promptly as possible with President-elect Carter's transition team and then to proceed with measures to encourage a commensurate Israeli hospitality to coexistence with a Palestinian state. This is essential so as to avoid giving the nonrecognizers on each side the opportunity to cite the other's nonrecognition to justify its own. This tendency on both sides to reinforce stalemate is the familiar, tragic and unacceptable Mideast pattern—unacceptable, because inevitably, given enough time, it leads one way or another to resumed hostilities.

* * *

The trouble with this ideal, of course, is that the U.S. government is to some considerable degree immobilized by the transition. The Ford administration has responsibility, without great authority. And the Carter administration will be understandably reluctant to commit itself to anything until after its installation. Even then, it will want to be careful in picking its way. Meanwhile, the Israeli government will be reminding the new President of his heat-of-the-campaign ardor for its cause, and no doubt contending that the Israeli elections scheduled for next October preclude any heavy pressures for movement on the diplomatic front. Diplomatic stress anytime soon, it will be argued, would play into the hands of the hard-line Israeli right wing.

Nothing comes easily in the Mideast. But history also tells us that doing nothing—which is to say, accepting festering stalemate—does not promote stability. At the least, some U.S. initiative to revive efforts toward a comprehensive settlement in the Mideast is going to have to be one of the urgent foreign policy priorities of the Carter presidency.

THE WASHINGTON POST.

The Future of the GOP

After the recent election, the Republican party—at the grassroots level—would seem to have no place to go but up. Although Mr. Ford managed in the end to turn the presidential campaign into a close race, his party suffered a severe disappointment at every other level.

The hard-fought Senate contests ended in a standoff, with the Democrats retaining their 62-to-38 margin. Democrats will once again have a 2-to-1 majority in the House of Representatives.

In the voting for governors and state legislators, the results were equally poor. The GOP in this election continued its post-Watergate slide and now has one less governorship than before Nov. 2 instead of making the net gain of two or three that many observers had expected. Beginning in January, the GOP will have only 12 governorships instead of the 17 it held 12 years ago, after the Goldwater debacle.

Throughout the Middle West from Ohio to Iowa, Republicans began losing town and county offices and state legislative seats in 1964—and many of them have never been regained. This trend has now spread to New York and California, where in the aftermath of the Rockefeller and Reagan administrations, the party is weaker than ever before.

What do these grim statistics portend for the GOP? For the immediate future, they mean that the party heads toward 1980 with aging, battle-scarred leaders. At 65, Ronald Reagan would seem too old to contemplate another presidential race in four years' time; but with the defeat of Sens. William Brock of Tennessee and James Buckley of New York, he is still the only widely known conservative.

His chief rival is likely to be ex-Democrat John B. Connally. Although he was hurt by his inability to carry Texas for the Ford-Dole ticket, Mr. Connally convinced his new party that he—unlike Mr. Reagan—did make a maximum effort to achieve victory.

The 1976 election proved, however, what moderate Republicans had long contended. With a good campaign, their party can still win at the presidential level, or at least make a close race in the East and the industrial Middle West. Mr. Ford carried Connecticut, New Jersey, Michigan and Illinois, and came very near in New York and Ohio. Had he adopted somewhat more progressive policies in the last two years and chosen a more sympathetic running mate, he might easily have reversed the outcome. If Mr. Ford, a drab campaigner, was able to do as well as he did, the opportunity obviously exists for a more exciting and constructive candidate making a moderate appeal.

But the ideological fanaticism of conservative Republicans is so intense that such moderate conservatives as Senator Percy of Illinois and Secretary of Commerce Richardson have become stigmatized in many party circles as hopelessly liberal. In these circumstances, a totally new figure such as Gov.-elect James R. Thompson of Illinois probably has better prospects.

If President-elect Carter can turn his personal triumph in the South into a viable biracial coalition, the Republican Southern strategy will stay wrecked for a long time to come. In that event, Republicans will have to emulate Mr. Ford's course in the recent campaign, building upon GOP strength in the Great Plains and the Mountain States and trying to pull out victory in the East and Middle West. That would augur well for a genuinely competitive two-party system.

But a "big state" strategy can succeed only if Republicans prove themselves responsive to the actual problems of the declining cities and the inflation-strained suburbs. As the defeat of President Ford and Sen. Buckley demonstrated, neither an amiable personality nor an orthodox conservatism is sufficient to rebuild the decayed bases of the once-dominant GOP.

THE NEW YORK TIMES.

International Opinion

Italy's Crisis

Italy continues to compete with Britain for the title of sick man of the European Community. This situation is an unenviable one for the minority Christian Democrat government, but ironically enough it is perhaps even more so for the Communist party, caught as it is in a kind of limbo between government and opposition. Mr. Berlinguer, the Communist leader, is the victim of the very success of his own strategy. What is hard to see is how the traditional supporters of the Communist party can accept a classic deflationary policy applied somewhat half-heartedly by a minority Christian Democrat government. . . .

—*From the Times (London).*

In the International Edition

Seventy-Five Years Ago

November 13, 1901

PARIS—The delay accorded to "chauffeurs" for affixing numbers to their automobiles (capable of a speed of over 30 kilometers an hour on the level), expired last evening, in accordance with the new regulations in France. The number of automobiles submitted to the operation will amount to about 700. But from now on, all cars will have to be so affixed.

Fifty Years Ago

November 13, 1926

NEW YORK—The mysteries of the miraculous escapes of Harry Houdini, which for years amused and entertained the public and royalty in all parts of the world, will probably be never known. For the will of the master conjurer, who died recently in Detroit, filed today gives all his secrets as well as his paraphernalia to his brother Theodore Weiss, who must destroy it upon his death.

Israel and South Africa

By Moshe Decter

NEW YORK—An ominous impression is gaining currency that there exists a sinister relationship between Israel and South Africa. This charge is being disseminated by forces in the Third World, egged on by the Soviet Union. It focuses on Israel's trade and arms sales to South Africa, as evidenced by the controversial resolution adopted by the UN General Assembly on Tuesday that condemned Israel.

It may be deplorable to have commercial dealings with South Africa and it is surely morally intolerable to engage in arms traffic with the apartheid regime. But to single out Israel as the main culprit bespeaks rank cynicism, rampant hypocrisy and anti-Semitic prejudice.

For the truth is—and it can be documented despite determined, systematic efforts by governments to suppress it—that scores of countries trade with South Africa, *including 19 black African states;* the economic worth of the Africans' dealings, amounting to many hundreds of millions of dollars annually, far outweighs Israel's.

The 19 are Angola, Botswana, Central African Republic, Chad, Congo, Gabon, Ghana, Ivory Coast, Lesotho, Liberia, Malagasy Republic, Malawi, Mauritius, Mozambique, Nigeria, Senegal, Swaziland, Zaire, Zambia.

Growing Trade

Their economic dealings with South Africa are flourishing and growing: large-scale imports and exports of raw materials, building equipment, pharmaceuticals and foods; airline passenger and freight connections; railway projects; shipping lines; construction of office buildings, hotels and housing; tourism; technical aid in disease control; construction, engineering and metallurgical equipment for copper and diamond mines; financial investments, development loans and long-term credit arrangements.

Mozambique is the most striking instance of this symbiotic relationship. Despite the militantly anti-apartheid, anti-Western, Marxist ideology of this newly independent country, its economic relations with Pretoria are varied and thriving. South Africa is its second-biggest customer and the largest source (nearly one-half) of its total foreign-exchange earnings.

The most astounding aspect, economically and morally, of black Africa's relations with South Africa concerns the blacks who work in South African gold, diamond, platinum, uranium and coal mines.

Hundreds of thousands of migrant laborers from neighboring countries—Botswana, Lesotho, Swaziland, Mozambique, Malawi, Angola and others—work under arrangements that can only be described as sweetheart contracts between the black governments and South African companies.

Gold Payments

The nearly 180,000 Mozambican gold miners are paid, for example, only 40 per cent of their wages in South African currency. The remaining 60 per cent is paid not to the workers but to their government, in gold bullion. Only when the miners go home after contracts have expired does their government pay them the rest of their wages, but only in local currency, while the state keeps the gold. This deal gives Mozambique a profit of over 200 per cent on the sweat of its citizens: a subsidy to the black Marxist state for supplying indentured servants to the white apartheid state.

Israel's dealings with South Africa are outweighed by black Africa's. But if it is wrong for Israel, why not for black Africa? And if it is right for black Africa, why not for Israel?

Such are the ironies of the double standard that it will surprise no one to learn that such principled Arab friends of African liberation as Saudi Arabia, Kuwait, Jordan, Egypt, Dubai and Abu Dhabi traffic with South Africa in oil, tourism, foods, and even arms. Nor are those progressive champions of human rights, the Soviet Union and Eastern Europe, averse to dirtying their hands in South Africa trade. A recent International Monetary Fund study shows that in 1974 South Africa exported goods worth some $5 million to the Soviet bloc, and imported nearly $25 million worth from it.

The same report shows that South Africa has trade relations, amounting to millions of dollars, with *four members of the UN Special Committee Against Apartheid* (which recently issued a report *condemning Israel for its* relations with South Africa): East Germany, Haiti, Hungary, Peru—two rightist dictatorships and two Communist regimes, united in cant and opportunism.

India Cited

As for Israel's small arms trade (six patrol boats and a missile system for them)—which I do not condone—it is dwarfed into insignificance by the South African arms traffic of other countries. France above all, but also Britain, the United States, West Germany, Italy, Belgium, Switzerland, Canada, Jordan, the Soviet Union and Czechoslovakia have been involved over many years in the sale, licensing or construction of a vast array of military-related equipment amounting to many billions of dollars.

Who are Israel's accusers? India, a leading member of the UN Apartheid Committee, is typical. It brazenly points the finger at Israel while it secretly makes atom bombs out of nuclear materials furnished for peaceful uses, destroys its people's civil liberties, and practices its own version of apartheid in the treatment of its 50 million wretched untouchables.

What price hypocrisy? Nothing less than peace and justice.

Italy's Changing View On Immigration to U.S.

By J.W. Anderson

ROME—Italians still think that the United States is a fine place but, increasingly, they wouldn't want to live there. The evidence is in the most sincere sort of poll: The numbers in which they are applying for immigration visas.

It is all part of a deep and subtle change in Europeans' views of the United States. It has dawned on them that, after the long boom of the 1960s and two recessions in the 1970s, life now in the United States is hardly any pleasanter or richer than in most of Western Europe.

As recently as five years ago, Italians applied for immigration to the United States at a rate of about 14,000 a year. Currently the number is running about one-fourth that many.

Why? After all, by Italian standards, unemployment is rather high here. But Italians know that it's about twice as high in the United States.

Home for Christmas

If you are a young Italian, prepared to leave home and seek your fortune in a rich country despite a slack labor market there, why not try West Germany? If you can get a job, wages there are nearly as high as in the United States—and you can take the train home for Christmas.

The overseas grapevine among families and friends operates very efficiently. A university professor here speaks of a cousin, an engineer, who went to live in the United States years ago and for a long time did well. But then came the recession and he was out of a job for six months. Now, the professor says his cousin is working in Iran.

Europeans also appear to worry a good deal about violence in the United States—an astounding idea to any American who remembers the 1930s, when the United States was the sanctuary for a generation of European exiles.

Europeans have always known that there was a lot of random violence in North America, but until recently they (like the Americans) tended to wrap it in the mythology of the Wild West. In the course of the 1960s U.S. perceptions of street violence changed, and that change has filtered across the Atlantic.

No Tuition Woes

It's not only the Italians. The West German middle-class family, to take another case, knows that it pays higher taxes, and takes home less pay, than its U.S. counterpart. But it also knows that it doesn't have to save money for the children's college tuitions. If the kids are bright enough and competitive enough to get into the universities, the state pays for it. (But admission is, of course, far more restrictive than in North America, which spends a substantially higher share of its wealth on education than France, West Germany or Italy do.)

Europeans have learned that the comparison with the United States has become less a matter of absolute differences in living standards than of divergent national tastes and values.

The new European view is often the mirror opposite of the conventional one that prevailed at the beginning of this decade. As the young immigrant's ideas have changed, so have the experienced businessman's.

West German economists worry that the rise of the deutsche mark has left West German labor overpriced. Although rapid productivity gains in West German industry have totally offset the rise in wages there, at least some businessmen have concluded that they can get even more for their money by putting it into U.S. labor.

Ten years ago, Europeans commonly complained that an overpriced dollar was financing a U.S. takeover of European industry. Today there is a current concern among economists on this side of the Atlantic that an underpriced dollar—together with high European wages—will divert European investment capital to North America when it is needed here to create jobs and expand markets.

Comic Ironies

To an American, this sudden reversal is full of comic irony. But the Europeans who note these trends seem, on the whole, to find them less amusing.

It's quite true that Volvo and Volkswagen are hardly going to find cheap labor to man their new U.S. factories. But it's also true that, without a sharp reduction in the traditionally high transatlantic wage differential, they would never have decided to start manufacturing cars in the United States.

As the gross disparities in wealth disappear between North America and Europe, their economies no longer behave as they used to. But perhaps it's more important that people have begun to think differently about their own countries.

It's conceivable that Italians, no longer dazzled by the legend of a golden United States shimmering on the horizon, will eventually drop the habit of national self-depreciation that, in the past century, has deeply corroded and weakened their political tradition.

Pistol-Packing Turk Students

By C. L. Sulzberger

ANKARA—Although the nationalist revolution here started more than half a century ago it has never gained sufficient headway. One result of this sad fact is a growing realization that Turkey is not yet economically qualified to join the European Community, much as it would like to do so for political reasons plus a recognition that mass social inequalities continue long after the death of Ataturk, father of the modern republic.

There is continual apologetic reference by its leaders to Turkey "as a developing country." This is, of course, true but is nevertheless puzzling when one considers that it emerged from one of the world's great empires (Ottoman) after World War I and has a long, distinguished tradition of an educated elite.

Yet Turks resent the fact that even in terms of association with the EEC they are disfavored as compared with former African colonies of France and Britain. Yet some of the latter, which were indeed once colonies of Turkey, are advancing more speedily than their ancient administrators.

Islamic Intrusion

One is often told that women in contemporary Turkey hold a very emancipated position for a Moslem country. This is plainly true. But it was true even before World War II. Ataturk also decreed total separation between church and state and banned religious intervention in political affairs.

Even at this moment one can visit backward Anatolian villages near Ankara where women dress as they did a century ago. And there is evidence of growing Islamic intrusion into certain political factions. Moreover, the same kind of violence is growing in the student body at universities that produced the brink of anarchy and army intervention a few years ago in order to restore order.

Last week, when the academic year began—tardily because of previous disorders—newspapers reported among other things: "Three students were apprehended for possession of handguns and three other guns were found with apparently no owners. The police also found sticks of dynamite during the search.

"Also in Istanbul six students carrying firearms were taken into custody. . . Four students suffered gunshot wounds today when armed clashes broke out. . . The Gazi Educational Institute had more police officers parked in front than students. . . A police 'panser' awaited near the gate, just in case."

The atmosphere is sufficiently uneasy to alarm both intellectual and business elements and to weaken governmental efforts to solve critical foreign policy problems like relations with the United States, relations with Greece, Cyprus. A national election will be held in 11 months and neither of the two main parties in the contest seems ready to agree to any settlement favored by the other—in the hope of fanning chauvinistic vote appeals.

Bulent Ecevit, former premier and leader of the opposition Republican People's party (with 190 out of 400 deputies) told me: "From next March on there will be a heated political campaign. The main problem of Turkish politics is the irreconcilability of the two big parties. I can see no possibility of a strong, effective government before the 1977 elections."

More than this, he accuses the government of Premier Demirel, who is head of the Justice party (160 deputies), of encouraging student violence and ordering police only to oppose left-wing extremists. Demirel, of course, vigorously denies this. The premier is in coalition with 46 National Salvation rightists and four even further right wingers.

The widening rift seemingly excludes any chance of a national government based on Republican People's party-Justice party cooperation, which would represent almost nine-tenths of the vote and give Turkey a strong emotional interim regime to face and solve pressing problems abroad that now poison relations between this vigorous nation and the West.

Verges on Disaster

From an international viewpoint it would be obviously sensible for Demirel and Ecevit to pool their governmental energies and specifically assuage a bad emotional situation sentiment against the United States, provoked by the stupid U.S. congressional arms embargo, and a relationship with Greece that sometimes verges on disaster.

Yet, while politicians here admit such a national coalition would be logical and give Ankara the cohesion needed to negotiate calmly with the strongly-based Caramanlis administration in Athens and possibly also to cool off some of the emotional anti-Americanism growing among the masses, those same politicians exclude all chance of such a solution.

Instead they dicker privately about potential future collaboration with supernationalistic minorities—should next year's vote produce another dead heat. And in the meantime, students pack pistols in their book bags.

Letters

Dame Flora MacLeod

Re the obituary on my kinswoman, Dame Flora MacLeod, who for 37 years was the only woman among Scotland's 82 clan chiefs (IHT, Nov. 6-7). The obituary just didn't add up.

If, in fact, she was born at 10 Downing Street in London (she was)—but . . . as you say . . . "in the home of Sir Stafford Northcote, who was father-in-law of Dame Flora's mother" . . . then, if you figure it all out, she was a Northcote. Impossible! I telephoned relatives in Scotland to get it straight: No, Sir Stafford was her maternal grandfather. Fine, she's a MacLeod—her father was Sir Reginald MacLeod, who married Miss Northcote, who moved into her father's temporary home to give birth to Flora, the couple's only child.

But if Dame Flora was born a MacLeod, then how did she remain a MacLeod and still have the grandchildren featured in her obituary? As a general rule, a woman has to marry to have children, and therefore grandchildren. Did the inheritor of Dunvegan Castle, "the oldest continually inhabited castle in Scotland" according to the Encyclopaedia Britannica—simply create her grandchildren out of thin air? But if not, why is her surname still MacLeod?

No, it seems that Dame Flora MacLeod was plain Mrs. [Hubert] Walter for many years. About the time her father, Sir Reginald, died [1933], leaving her the tax-ridden Dunvegan Castle, her husband, Mr. Walter, also died. So she cheerfully changed her name from Walter back to MacLeod, and proceeded to make her white elephant of a castle into a major tourist attraction in the northern Scottish isles.

News Analysis

Welcome in Moscow Dispels Doubts on Support for Gierek

By Peter Osnos

MOSCOW, Nov. 12 (WP)—Polish Communist party leader Edward Gierek was effusively embraced by Soviet leaders during his visit to Moscow this week, probably to resolve doubts in Warsaw, Washington and elsewhere about his favored place in the Kremlin inner circle.

Polish and Soviet sources do not acknowledge that this was the main purpose of the trip, but it seems a reasonable conclusion when comparing the fuss made over the occasion with the cursory treatment accorded Czechoslovak party leader Gustav Husak last week during a shorter stay here.

Mr. Gierek's position is especially topical now because of the extreme sensitivity of the current situation in Poland, certainly the most volatile of the moment in Eastern Europe.

Since worker riots last June forced the leadership to rescind announced increases in food prices, Mr. Gierek and his colleagues have been casting around for ways to relieve the tension—and, of course, for means to solve the urgent economic problems that the planned price boosts reflected.

Caution Is Shown

That there has been no renewed violence is primarily attributable to the remarkable caution shown by Polish authorities in not increasing food prices alone and in displaying relative tolerance toward supporters of jailed protesters.

A major question posed anxiously by many Poles and interested foreigners has been how the Soviet Union would react to such restraint. Can the Kremlin really indulge its closest allies when they bend to public sentiment? Will concessions in one country lead to trouble elsewhere?

Mr. Gierek had already met twice since last June with Soviet party leader Leonid Brezhnev—at the Berlin summit meeting of European Communists and at a Crimea resort where party chiefs gather in August. So private assurances of continuing Soviet backing for Mr. Gierek have doubtless been given.

Now public affirmation has been provided. "We greatly value," Mr. Brezhnev said at a Kremlin banquet Tuesday, "our very close relations with the Polish [Communist] party, led by that faithful son of people's Poland, leading figure of the international Communist movement and great friend of the Soviet Union, Edward Gierek."

High Price

The high price of that vigorous support was also evident in the speeches and other proclamations associated with the trip: Closer economic ties to the Soviet Union and even greater dependence on Soviet raw materials and other goods essential to maintaining stability in Poland.

"Never before," Mr. Brezhnev said, "has there been such scope and effectiveness in our economic relations." He added moments later, "We understand how complicated" the development of Poland as a "socialist society" is and "we know of the difficult problems that you must decide."

There is no doubt, the Soviet leader asserted, of the party's ultimate success.

In the Polish crisis of 1970-71—when worker turmoil over prices and other grievances led to the fall of Wladyslaw Gomulka and his replacement by Mr. Gierek—the Soviet Union came up with $100 million in gold, it is generally believed, to help the regime get started on a program of upgrading living standards. That sort of outright gift has apparently not been made this time.

Drawn Into Sphere

Exactly what the Russians are prepared to do is not clear. But the thrust of statements this week was that Poland will be drawn even more into the Soviet sphere and perhaps away from the expanding Western contacts that made it vulnerable to inflationary pressures.

"Fruitful discussions took place," the Soviet press agency Tass said, "on the forms and methods of improving interaction between the two countries in various spheres of socialist and Communist construction." That means that a vast new steelworks, under construction at Katowice with Russian help, has a direct railway link to the Soviet border.

Moscow may also be willing to parcel out some of its bumper grain crop to Poland—which had its third bad harvest in a row—and payment for other raw materials, particularly oil, could be postponed or partly offset. In return, Poland would be expected to send more finished goods and machinery to the Russians—which means that there would be less available for sale in the West.

Hint Given

Mr. Gierek hinted as much in his speech at Tuesday's Kremlin banquet when he spoke of the "growing coordination" of economic planning with the Soviet Union and the quest for "higher forms of integration."

Moscow has potentially a great deal to lose because of the impact that further unrest in Poland would certainly have on other countries. The trauma of armed intervention would be profound.

For the time being, Mr. Gierek is clearly seen here as the Kremlin's main hope for calm in Poland.

U.K. Taxes: Sovereign Remedy

LONDON, Nov. 12 (Reuters).—A small manufacturing firm here has discovered an unusual tax dodge for its staff—they are all paid in gold sovereigns.

Technically, the coins are worth only £1 (about $1.60) each as legal tender, but they now fetch between £25 and £30 on the coin market.

For income tax purposes, the seven employees of St. James Plates declare their wages in terms of the technical value of the sovereign, which means that in theory, at least, they are paid too little to be liable for tax. British tax officials are investigating.

T. Besterman, 71, Dies; Briton Was Voltaire Scholar

LONDON, Nov. 12 (AP).—Theodore Besterman, 71, a British scholar who devoted much of his life to studies of Voltaire and the 18th-century enlightenment, died Wednesday at Banbury in Oxfordshire, it was reported today.

Mr. Besterman was the founder and director of the Institut et Musée Voltaire in Geneva, where the poet and philosopher lived in exile from his native France. Mr. Besterman was the editor of the letters and complete works of Voltaire, and in 1969 he wrote an acclaimed biography of him.

Jacques-Jean Rat

PARIS, Nov. 12 (AP).—Jacques-Jean Rat, 59, office manager of the Paris bureau of the Associated Press, died today after a long illness.

The Rev. Martin P. Harney

NEWTON, Mass., Nov. 12 (AP).—The Rev. Martin P. Harney, 71, professor of history at Boston College for more than 40 years, died Wednesday in Weston.

Daggett Harvey Sr.

CHICAGO, Nov. 12 (AP).—Daggett Harvey sr., 69, the former owner of the Fred Harvey restaurant chain, died Wednesday night.

Neto Calls Battle Still On in Angola

KINSHASA, Zaire, Nov. 12 (AP).—Angola radio reported that President Agostinho Neto told a crowd celebrating the first anniversary of Angolan independence today that fighting against opposition guerrillas is continuing.

The broadcast quoted the Marxist Angolan leader as saying: "The defense of the country's sovereignty and security remains one of the most important preoccupations for the People's Movement for the Liberation of Angola" (MPLA).

The opposition forces are the guerrilla fighters of Holden Roberto's pro-Western National Front for the Liberation of Angola (FNLA). It was vanquished by the MPLA with the help of Cuban forces. The FNLA is reported to be still making hit-and-run attacks against MPLA forces and Cubans.

Colombo Student Slain

COLOMBO, Nov. 12 (Reuters).—One student was shot dead and about 50 were injured when thousands of striking students and staff clashed with police at a university campus 70 miles east of here today.

United Press International.

BRENNER PASS BLOCKED—Rockslide blocked the rail link between Italy, Austria and West Germany in the Brenner Pass Friday. A highway was cut, but another stayed open.

'Black Rule Need Not Mean Chaos'

Kenya's Racial Calm: A Model for Rhodesia?

By Michael I. Kaufman

NAIROBI, Nov. 12 (NYT).—Over cocktails in his lovely garden, a middle?aged white lawyer was saying that the anguish and anxiety expressed by Rhodesian whites over the imminence of black government gave him a sense of déjà vu.

"We were all saying the same things here back in 1962,' said the lawyer, who was born and educated in Kenya. "What would happen to all our efficiency? What would happen to our way of life? Almost everybody truly believed that decline, horror and violence would replace our lovely, comfortable civilization."

The lawyer laughed at what he conceded had been his views, too. He recalled that his wife, now a physician, was taught to shoot a pistol to protect herself from what were imagined as independence-maddened blacks intent on raping and looting. "We thought it would be the Congo," the lawyer said.

With the tone of one telling stories on himself, he related that as an 18-year-old district commissioner during the British struggle with the Mau Mau insurgents in the 1950s, he spent weeks chasing a particular nationalist. "Today," he added with a smile, "the man is one of my partners and a friend."

In Kenya, the worst fears of the whites never materialized, and despite some dislocations, particularly among planters, the pleasures and privileges remain for the whites, who now number perhaps 70,000—most of them transients or expatriates—in a population in excess of 13 million. No longer are schools, restaurants and clubs racially segregated, but they have not changed much because only a sprinkling of socially mobile blacks have made an appearance.

A Suggested Tour

A black who teaches at the university here commented: "In a way, it is a pity that we Kenyans haven't allowed Rhodesian passport holders, black andw hite, to come here. If we did, maybe they would realize that black rule need not mean chaos."

The professor acknowledged that he was less than optimistic about the Rhodesians' chances of following Kenya's example. Kenya was an exception to the pattern in Africa, which saw white colonials fleeing in imagined panic or real fear, often after having sabotaged farms, factories, transport and telephones. Before the Belgians left the Congo, it exported food; now-independent Zaire imports food. In Angola and Mozambique, the departure of Portuguese technicians and professionals has caused great dislocation and hardship.

Still, the Kenyan professor said, there are parallels between Kenya and Rhodesia that, even at this late date, offer some hope for the same sort of transition that prevailed here.

Like the Rhodesian guerrillas, the Mau Mau fought a war of terror against white domination, though they did not have foreign backing so they had to make or steal their weapons. Again like the Rhodesian guerrillas, the Mau Mau took heavy losses at the hands of white-led forces. Despite the inflamed reports of Mau Mau barbarism that spread beyond Africa, the death toll of whites during what was called "the emergency" was 32; the number of whites killed in the four-year Rhodesian conflict is about twice that.

As in Rhodesia, the leaders of the rebellion, not least Jomo Kenyatta, now the revered President of Kenya, spent many years in prison. With independence in 1963, the possibility of recriminations against whites was considerable. Instead, the direction taken was pretty much set by the title of one of Mr. Kenyatta's books, "Suffering Without Bitterness."

All residents of the country—there was a substantial community of people of Indian descent among the blacks and whites—were given the chance of becoming citizens. (Some whites and many Asians declined, preferring to retain British Commonwealth passports.) White planters were encouraged to sell their vast holdings to blacks at fair market prices. Some 1,400 white families sold more than 2 million acres in a program financed by British grants and loans totaling $50 million.

In all, 15,000 of the 55,000 whites who lived here before independence work for foreign businesses, teach or are involved with international agencies. Others, like the lawyer, adopted Kenyan citizenship. Some of the old planter families have invested here and control hotels, touring companies, manufacturing plants and import and export concerns. The whites live well.

Most black politicians agree, at least privately, that the whites' presence has benefited the country as a whole. The theory invoked is that whites, with their education and administrative and technological skills and, perhaps most important, with their links to overseas investment sources, have helped consolidate and increase the country's capital and that the effects are increasingly sifting down to ordinary people in the form of jobs, education and business opportunities.

Can this pattern apply in a black-governed Rhodesia? In terms of minerals and agriculture, Rhodesia is far richer than Kenya. Its 270,000 whites, with the advantage of a plentiful supply of cheap labor, have built a prosperous and diversified economy. The question then is, will those tools of production be scuttled by the whites or will the black leaders encourage whites to stay, not as overlords but as partners, increasingly sharing the wealth with the 6 million blacks.

But the Lyrics Are Loaded

Red Cambodian Radio Plugs 'Sing Along With Phnom Penh'

By Denis D. Gray

BANGKOK, Nov. 12 (AP).—Radio Phnom Penh is broadcasting the Cambodian government's revolutionary message in song and rhyme.

The music and poetry take up about half of the radio's six hours of daily broadcasting.

The constantly changing repertoire includes children's voices singing about the country's leaders and its nonaligned foreign policy. One ballad tells of the 1975 U.S. helicopter evacuation of the Cambodian capital with Americans "shaking with fear, weeping and losing face."

Im Proum, a Cambodian linguistics expert fro Cornell University in Ithaca, N.Y., suggests that the songs into which the revolutionary slogans and orders are embedded stand a much better chance of making an impression on the country's peasantry than dull oral reports. He is here to compile a Cambodian dictionary.

Music has apparently been chosen as a key propaganda and teaching tool by the new Communist rulers. Refugees from Cambodia say they have seen no newspapers in the country.

Refugees and diplomats have reported that broadcasts are piped into the ricefields over loudspeakers.

Occasionally, an accordion and piano will strike up a martial tune, but most of the songs are folk tunes known to Cambodians for generations. The songs are sung to the accompaniment of reed oboes, wooden xylophones, two-stringed Oriental violins and other traditional instruments.

In the pre-Communist past, the words to traditional songs were about love, moonlit nights and religious-philosophical broodings. Others were humorous songs.

Im Proum says the language now is clipped, strong and spiked with newly coined "revolutionary" vocabulary that Cambodians outside the country find difficult to grasp. The lyrics of the songs have, however, retained their complex rhyme schemes of old.

The songs invariably portray an idealized, peasant-led society. There are no hints of refugee stories of disease, executions and forced labor. One lyric goes:

There was an old saying: We farm with water.
We make war with rice.
It fits the present time perfectly
We should drive to plant every inch of ground.

This lyric is perhaps the essence of Communist Cambodia.

Cambodia's Angka, the organization that rules the country, is frequently praised. Children vow in song to "walk the right path, the glowing red path of the excellent organization."

But individual leaders are never mentioned by name, substantiating refugee stories that most persons in Cambodia do not know the top leaders—believed to number about half a dozen—and that the powerful ones do not want the masses to know them.

One song tells children not to miss their parents too much, an apparent reference to the separation of the young from their parents in an attempt to produce a new, revolutionary man and woman.

Even women's lib is mentioned: "In the old regime, women were belittled; they were nothing and cheap. People stepped on women workers for more than 1,000 years."

The United States and the fallen U.S.-supported government are often denounced. Cambodia's history is seen as fading in comparison to the present and future.

Heroic legends are being woven, often built upon the hardships of the communist guerrillas in the war:

We took the jungle as our home.
Munlight never reached us, only mosquitols and land leeches.
Weak with malaria, we were tree vines.
All bones and white, but our hearts were still bright red.

One typical song form takes a section of Cambodia and for as long as 20 minutes details its farming output, irrigation canals, the type of soil and vegetation. Im Proum says the minute details in these types of songs indicate the central government has good knowledge, and possible control, of the outlying provinces, a scenario not accepted by some Western analysts here.

Radio Phnom Penh represents an interesting contrast to the official media of neighboring Communist Vietnam. The Voice of Vietnam—broadcasting from Hanoi and Saigon—also reels out heavy revolutionary doses, but its musical offerings also include American favorites, Italian opera and Chopin.

Anglican Church Plans to Drop 'Obey' From Bride's Obligations

LONDON, Nov. 12 (AP).—The Church of England, bowing to movements for sexual equality, is planning to change the lines that since 1662 have been spoken by millions of couples as they joined in matrimony.

Proposed changes in the church's marriage ceremony include making optional for the bride the words "to obey," referring specifically to the role of sexual relations in marriage, and generally updating the idiom.

"It puts women on an equal footing," explained a spokesman for the General Synod, the governing body of the church.

Provisional approval of the plans is expected. If accepted by the General Synod, the new liturgy is expected to go into use early next year in the established church of Great Britain.

For those who wish, the Synod spokesman said, the old liturgy will still be allowed. The bride may promise to "love, cherish and obey," if she wishes.

The most delicate problem that faced the 17-member Liturgical Commission, which included a bishop and four women, was the best way to refer in the service to sexual intercourse. The present ceremony makes no specific reference to sexual intercourse. The version now up for consideration says:

"Marriage is given, that husband and wife may comfort and help each other, living faithfully together in need and in plenty, in sorrow and in joy. It is given that with delight and tenderness they may know each other in love, and, through the joy of their bodily union, may strengthen the union of their hearts and lives."

"We have sought to present sexual intercourse in its proper Christian context," explains the committee's report, "as part only of the whole union of human life in marriage."

THE ART MARKET

Breaking Up a Persian Masterpiece

By Souren Melikian

LONDON (IHT).—Next Wednesday, Christie's will sell seven leaves from one of the most beautiful illustrated manuscripts executed in 16th-century Iran, a copy of the 10th-century epic "Shah-Name" (The Book of Kings) by Ferdowsi.

The manuscript to which the leaves belong was commissioned by the founder of the Safarid dynasty, Shah Isma'il (1499-1524), given to his son in 1522 and completed in the royal atelier at Tabriz during the son's reign (1527-1528). Thus a key work of Iranian art, one of the few royal manuscripts that have come down virtually intact—it has 258 miniatures—is being deliberately mutilated.

At present it is the property of Arthur A. Houghton jr., of Queenstown, Md., onetime trustee of the Metropolitan Museum of Art in New York and former curator of rare books for the Library of Congress. He gave the museum 78 leaves in 1972. Mr. Houghton, according to the catalogue, acquired the manuscript in 1959.

Little is known of its early history. It was given to Sultan Murad 3d of Turkey by Shah Tahmasp just before his death in 1576, according to Stuart Welch in his "A King's Book of Kings," a popular, lavishly illustrated book about the manuscript.

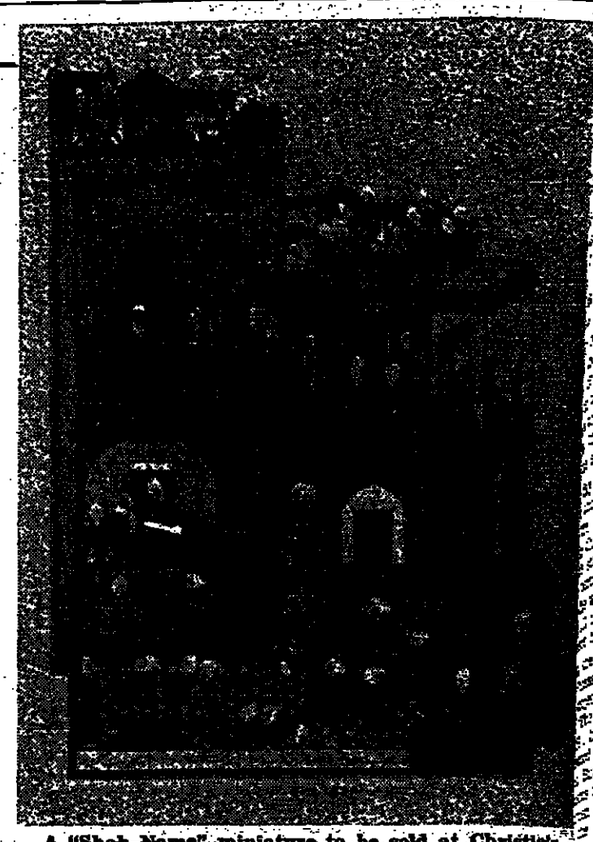
In 1800, it was still in the Turkish imperial library. Around the turn of the century, it found its way into the collection of *Baron Edmond de Rothschild*. Its superb condition—hardly a trace of damp or worm damage, and, more telling, the glittering appearance of most of the paintings—bears witness to the care with which it was handled in the East. In 1800, the sultan's librarian took the trouble of writing a synopsis of each miniature on a protective sheet.

Exhibited

The manuscript was first taken apart after it was acquired by Mr. Houghton. In 1962, some leaves were exhibited separately at the Grolier Club. Further exhibition of a few leaves took place in 1968 at M. Knoedler and Company, the well-known old-master gallery in New York, and in 1970 at Asia House, again in New York. The first major step toward dismembering the royal manuscript came in 1970 when Mr. Houghton gave 78 leaves to the Met. His generosity was hailed. No one paid much attention to the defacing of the splendid work.

From 1974, rumors spread among Iranian dealers that the "Houghton Shah-Name" was on the market and that agents of the Iranian court had been approached. Nothing substantiated the rumors. Then Christie's issued a press release, saying that Mr. Houghton was selling seven "folios" in order to assess the value of his property.

It is hard to believe that a monument of world painting loaded with historical significance could be tampered with in an era which prides itself on protecting cultural heritages. That it should go unnoticed and be sanctioned by persons of good will, or so one assumes, is equally incredible. Imagine what the reaction of the Western art world would be to the news that the Book of Kells now at Trinity College, Dublin, would be divided up and sold or that a Flemish polyptych such as Rogier van der Weyden's "Doomsday" at Beaune in the old "hospital" was going to be broken up and sold piecemeal.



Given the Iranian context, the present case is worse. The manuscript has tremendous significance with regard to the history of Iranian painting. In it, the styles developed in the 15th century by the Eastern school of Herat and the Western school of Shiras are merging into the style that characterized 16th-century painting in the new royal capital, Tabriz, in northwestern Iran. The fusion of the styles and their respective parts vary in degree according to the images and can be appreciated by comparing and contrasting them. This requires the preservation of the manuscript as a whole.

Moreover, several masters, including two of the most famous 16th-century painters, Mir Mosavver and Dust Mohammad, whose names are inscribed on two miniatures, contributed paintings to the book. In order to verify attributions of other miniatures to them and to measure the affinities or differences of these respective artists working on a joint project, the preservation of the work is indispensable.

More important perhaps than art historical considerations is the complex rhythm of this manuscript, which makes its preservation imperative. The rhythm of the succession of paintings in Iranian manuscripts affects the composition of the painting and even the format. This rhythm is part of the work of art as such. To scatter the paintings is to destroy the rhythm. The individual image was never intended to be looked at alone. It faces a page of text arranged in columns with headings cutting across the columns and the format of the image must be considered in relation to the page of calligraphy that it faces.

An Iranian scholar, Chahriyar Adle, has recently demonstrated how the modules—the architectural term being the mot juste in this case—of the calligrapher were used to determine both the format and the key elements of the composition of paintings in a given manuscript.

These rules have remained unknown to the West because most Western art historians who have studied Iranian painting do not read Persian and are therefore not familiar with calligraphy and, last, but not least, have no access to the Persian sources, particularly treatises on painting and calligraphy, excepting the single translation of a rather unsatisfactory order. But ignorance is hardly an excuse for destruction.

A "Shah-Name" miniature to be sold at Christie's.

Manuscript's Owner Replies

WASHINGTON (IHT).—Arthur A. Houghton jr., who is putting seven leaves from the "Shah-Name" up for auction at Christie's Nov. 17, defended the sale, saying, "A manuscript such as that cannot be handled—if you turn the pages over many times, you will destroy the whole thing."

Mr. Houghton said on the phone from his home in Queenstown, Md., that the manuscript "had been re-backed once, and none of the leaves were cut out. It was unstitched. All the leaves are completely intact."

Asked to comment on the suggestion by Souren Melikian (see article on this page) that selling the leaves amounted to cultural vandalism, Mr. Houghton said, "Every man has a right to his own opinion. I will leave it up to someone else to decide whether Mr. Melikian's opinion is better than anyone else's."

LONDON THEATER

Itinerant Players Score With Story of a Migrant

By John Walker

LONDON, Nov. 12 (IHT).—There are great benefits to be gained from watching the best of small touring productions. Itinerant theater groups often display ensemble skills that shame larger, more secure companies. And, from convenience and necessity, they are encouraged to stretch their imaginations, to achieve dramatic effects by simple and limited means.

Foco Novo's production at the Hampstead Theatre Club of "A Seventh Man" is an excellent example of this type of theater near its best. Its author, Adrian Mitchell, has based it on the book by writer John Berger and photographer Jean Mohr on the life and hard times of migrant workers in Europe.

Mr. Mitchell has used the photographs as much as the text to create a tough, play, ironically cool in tone, that follows one worker from the poverty of a Turkish village to the depersonalized existence of a German construction camp and back a year later, a richer and sadder man, to his home—where he discovers that he is as much a stranger as he was in the hard, strange world of the city.

In a succession of short acts, the play movingly traces the disorientation of Georgiou, who leaves his home because he wants to buy a tractor to work his family's barren land and finds himself sold into an indirect slavery, in which he is treated as less than human—living in crowded barracks which he leaves only to work long hours on the machinery of a production line.

Information

Along the way, Mr. Mitchell, without writing a propaganda tract, manages to convey a great deal of information on this huge vast labor force, numbering in the millions, that helps prop up Europe's industrialized society, providing cheap workers to do the dirtiest jobs at the cost of the brutal dislocation of individual lives.

That may make "A Seventh Man" sound like a dreary experience. But it has a continuing fascination, not only in the glimpse of a contemporary hell but in the sharp observation and wit of the writing.

The play's weakness lies, perversely, in its most popular element—the many songs that decorate the text. There is nothing wrong with them in themselves; the music, composed and played by Dave Brown, is fine. But the songs serve merely to soften the force of the play and add nothing in compensation. Their presence suggests an unnecessary failure of nerve by the playmakers.

The cast—Joan-Ann Mayne, Stefan Kalipha, Stafford Gordon, Stewart Preston, Aviva Goldberg, Alan Hnlse, Terry Jackson and Paddy O'Hagan—act well in a variety of parts. Roland Rees' direction is excellent and Ralph Steadman's set, consisting mainly of gray wooden boxes and some simple, evocative backdrops, clearly suggests the cramped monotony of the migrants' lives and the surrounding wide-open spaces which they cannot enter.

The play is necessarily more specific, though less factual, than Mr. Berger's book. And its point is wider than that, reminding us of a continuing colonial exploitation within cities. It suggests not merely the corruption of capitalism. It confronts a problem that concerns not merely migrants but all workers—the alienation of man from his occupation and from his environment that is part of urban existence.

* * *

At the National's Lyttelton Theatre is the first English production of Austrian playwright and novelist Thomas Bernhard's "The Force of Habit." It does little to show why Mr. Bernhard's reputation stands so high in Europe.

The play, offering us a circus owner attempting to rehearse Schubert's "Trout Quintet" with a motley crew of acrobat, juggler, clown and drunken lion tamer, is an excuse for some pretty philosophical speculation on life and death. It is not helped much by Elijah Moshinsky's direction or the heavy-handed playing of Philip Locke, Geoffrey Bayldon, Brenda Bruce, Oliver Cotton and Warren Clarke, all of whom overact in a grotesque manner.

ON THE ARTS AGENDA

William Walton's "Troilus and Cressida," first heard at Covent Garden in 1954, returned to the repertory of the Royal Opera in London on Nov. 12 in a new production staged by Colin Graham and designed by Christopher Morley. André Previn conducted and the cast was headed by Janet Baker and Richard Cassilly in the title parts, Elizabeth Bainbridge as Evadne, Gerald English as Pandarus, Benjamin Luxon as Diomede and Richard Van Allen as Calkas. Later performances are scheduled for Nov. 17, 24, 27 and 30.

* * *

A large-scale group of exhibitions devoted to commemorating the 75th anniversary of the 1901 Darmstadt Jugendstil exhibition is being held in several places in that West German city until Jan. 30. "Art and Decoration—Precursors of Art Nouveau" is at the Hessisches Landesmuseum; "Academy — Secession — Avant-Garde in 1900" is at the Kunsthalle, and the "Darmstadt Artists' Circle, 1899-1914," is at Mathildenhöhe.

* * *

En route to a 15-concert tour of Eastern Europe, the Los Angeles Philharmonic Orchestra, under Zubin Mehta, will give a concert Nov. 19 at Royal Albert Hall in London that will include Ives's Four Orchestral Pieces, Mozart's Sinfonia Concertante with Glenn Dicterow and Alan de Veritch as violin and viola soloists, and Mahler's Symphony No. 1. In addition, on Nov. 18, a chamber music recital by members of the orchestra will be given at the Banqueting House, Whitehall, with Sidney Harth conducting Mozart's Wind Serenade in C minor (K. 388), and with works by Berg, Ravel, William Kraft and Schumann.

* * *

Mstislav Rostropovich will conduct the Orchestre de Paris in the first two series of concerts in Paris since the orchestra's return from a tour of the United States. On Nov. 18, 20 and 23, the soprano Galina Vishnevskaya will be the soloist in works by Prokofiev, Rimsky-Korsakov and Shostakovich, and the principal orchestral works will be Shostakovich's Symphony No. 8 (Nov. 18 and 20) and Brahms's Symphony No. 1 (Nov. 23). On Nov. 24, 25 and 27, along with the Brahms symphony, the programs include Haydn's C major Cello Concerto and Mozart's C minor Piano Concerto, with Rostropovich and Vasso Devetzi as the respective soloists.

* * *

Bern Alois Zimmermann's "Die Soldaten" will be mounted for the first time by the Hamburg State Opera on Nov. 27 in a staging by Götz Friedrich, with sets by Josef Svoboda, costumes by Allute Meczies and with choreography by Fred Howald. Hans Zender will conduct and the cast includes Gabriele Fuchs as Marie, Hanna Schwarz as Charlotte, Harald Stamm as Wesener, Franz Grundheber as Soltzius, Toni Blankenheim as Obrist and Thomas Herndon as Desportes. Later performances are scheduled for Nov. 30, Dec. 4, 12, 16, Jan. 9 and 18.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

GENERAL MANAGER

Grains and Oil Seeds

Up to U.S. $25,000

A North American company engaged in the export marketing of grains and oil seeds wishes to appoint a General Manager for European operations.

This appointment carries responsibility for the expansion and development of new markets in Europe and related trading and sales negotiation. The establishment of close relationships with buyers, Governments and the business community will be important.

Candidates should have a good knowledge of the grain industry as well as E.E.C. rules. They must have experience in commodity trading and/or sales and be skilled in related customer relations. Ideally, candidates will be bilingual in English and French.

Salary in the range of U.S. $25,000 is anticipated but applications are invited from highly qualified candidates exceeding this level. Location will be discussed at an interview.

Please send a comprehensive career resumé, including salary history, and quoting ref. 841/IHT, to:

W.L. Tait, Touche Ross & Co.,
Management Consultants,
4 London Wall Buildings, London, EC2M 5UJ.
Tel.: 01-588 6644.

A multinational corporation with European Headquarters in French-speaking Belgium has an opening for a

SENIOR FINANCIAL ANALYST

Responsibilities to include forecasting, budgeting and financial analysis of the various European sales operations.

Candidate must be aggressive and have potential to take on greater responsibilities in headquarters or sales subsidiary finance.

Candidate should be 28-32 years old, fluent in English, have at least 5 years accountancy and analysis experience and professional accountancy qualifications.

Reply in confidence with résumé and salary requirements to:

Deloitte, Haskins and Sells (ref. KMS),
Centre International Rogier,
Bureau 1,701,
1000 Brussels, Belgium.

MERCHANT BANKING

S. G. Warburg & Co. Ltd.

With the continuing growth of our international issuing business, we are now seeking one or two additional young executives with the potential to make a significant contribution to our business.

Successful applicants are likely to be graduates, aged between 24 and 32, who have already acquired first-class experience of international issues or corporate finance in London or an overseas financial centre. Alternatively, they may be professionally qualified in accountancy or law, with some relevant post-qualification experience. Fluency in one or more foreign languages would be an advantage and willingness to travel is essential.

Applications, enclosing a concise curriculum vitae, should be sent in confidence to:

G. E. J. Wood, S. G. Warburg & Co. Ltd.,
30 Gresham Street, London EC2P 2EB.

For Our Equipment Leasing Operations in

EUROPE

We Require An Experienced, Multi-Lingual

CREDIT and COLLECTIONS DIRECTOR

A broad spectrum of commercial credit and collections background in Northern and Western Europe, and fluency in English, German, and French are major qualifications. You will join a large, American-owned leasing company, and travel from a base in Amsterdam, one of today's most attractive cities. Reporting to the Director of Finance, this position involves supervision of a staff of 8 persons.

INTERVIEWS IN EUROPE OR U.S.

Please send resumé detailing experience and language ability, including salary history, in confidence. Convenient interviews will be arranged.

Box D 5,554, HERALD TRIBUNE, PARIS.

SENIOR INTERNAL AUDITOR

for INTERNATIONAL NON-PROFIT ORGANIZATION

Duties consist mainly of auditing field offices located in developing countries to review controls and accounts, the input components into assistance projects and making selected management audits. At Headquarters, audits of financial statements and management appraisals of organizational units are performed. Based in New York, travelling consists of 2 or 3 trips per annum of about 6 weeks' duration each. Minimum experience of ten years in auditing, EDP auditing knowledge and knowledge of French and Spanish desirable. Salary range approximately U.S. $31,000 - $40,000, plus employee benefits.

Send detailed resumé to Room A-5166, P.O. Box 20, Grand Central Station, New York, N.Y. 10017, U.S.A.

EXCEPTIONAL OPPORTUNITY, UNLIMITED INCOME POTENTIAL FOR AN EXECUTIVE SALES MANAGER

Seasoned and qualified Executive Sales Representative experienced in handling a premium product at a premium price. Prime Florida land offered for the first time in Europe, to an exclusive clientele.
This is not an opportunity for everyone, but it is most unique because of the "Bank Guaranteed" commission paid immediately upon acceptance of the sales contract by the Home Office. In addition, you will be assured of a "VIP BONUS" after the first year on the job. Money to pay this bonus is already in an Escrow Account in a Swiss Bank and this will be documented to you at interview time along with the impressive percentage figures.

The product, a West Coast Florida community, Deep Creek Park, being developed by Punta Gorda Isles, Inc., can be checked out through your Chamber of Commerce, your Bank or any other accredited source.
Only seasoned, experienced, top-earning, licensed sales representatives are urged to respond to this unique and extremely profitable opportunity never before offered. A good man will not expect a salary or a draw.
Our International Agent, Mr. Gerard Zappa, will be in your country shortly and will contact you personally to schedule an interview.
We urge you to *airmail* your resumé today, to:

Gerard Zappa, International Agent
PUNTA GORGA ISLES, INC.
1625 West Marion Avenue,
Punta Gorda, Florida, 33950 U.S.A.
All inquiries will be confidential.

The Picasso Legacy—Photographer's Essay

By Grace Glueck

EW YORK (NYT).—"Jacqueline nearly perished after asso died in 1973," reports the otographer David Douglas ncan, an old friend of the late ist and his widow.

For nearly two years she lanished in total seclusion at tre-Dame de Vie [Picasso's dio-home on the Riviera] with nthly visits to the Château de uvenargues [the mountain es- where the artist is buried].

But one day recently, after death of another old friend, said to me, 'There'll be no re tears in this house.' She's ed Picasso's studio with flow- and the portraits he did of , opened the windows and let eo music fill the house. She's m to accept the future."

he woman, the house and the rk that Picasso left behind a are the subjects of Duncan's west book, "The Silent Studio" rton, $12.50), his fourth photoraphic record of Picasso's rvided world. But this time, as camera roams the studio, the on, the garden and the cans left by the artist, the silence is deafening.

There is, of course, the studio h its empty easel and abanned chair. There is the table ere Picasso welcomed friends ith buttered toast and honeyed ." There is a Louis XIII sofa ed high with books devoted to work, two blue-period portits and Jacqueline's garden , untouched since the day he d. And there is Jacqueline self, a brooding figure who sits ssing a dachshund puppy ught by friends and "staring o the past."

No Captions

I've tried to compose it as a sical work, an opera or a symony," says Duncan of his texts book. "When you go, you n't talk during the performance, so there are no captions. ecome your host in this house, t I want you to look at it in asso's terms."

ind Duncan, who estimates t he has made some 50,000 otographs of the artist and his rk, adds: "I found in doing other books that when Pi- so was in front of me, he was strong photographically that dominated his own environnt. Now that he's not there ically, but spiritually, I can him more clearly as an artist. an even see him at his work e, sitting up very straight and lling the brush like a stylus."

photographs for "The Studio," Duncan notes, were ring 10 days in his role ficial documentary photogher for the artist's heirs—Jacline, his children Maia, ude, Paloma and two grandren—and for Maurice ine, the court-appointed art er, appraising the value of object in the artist's vast te.

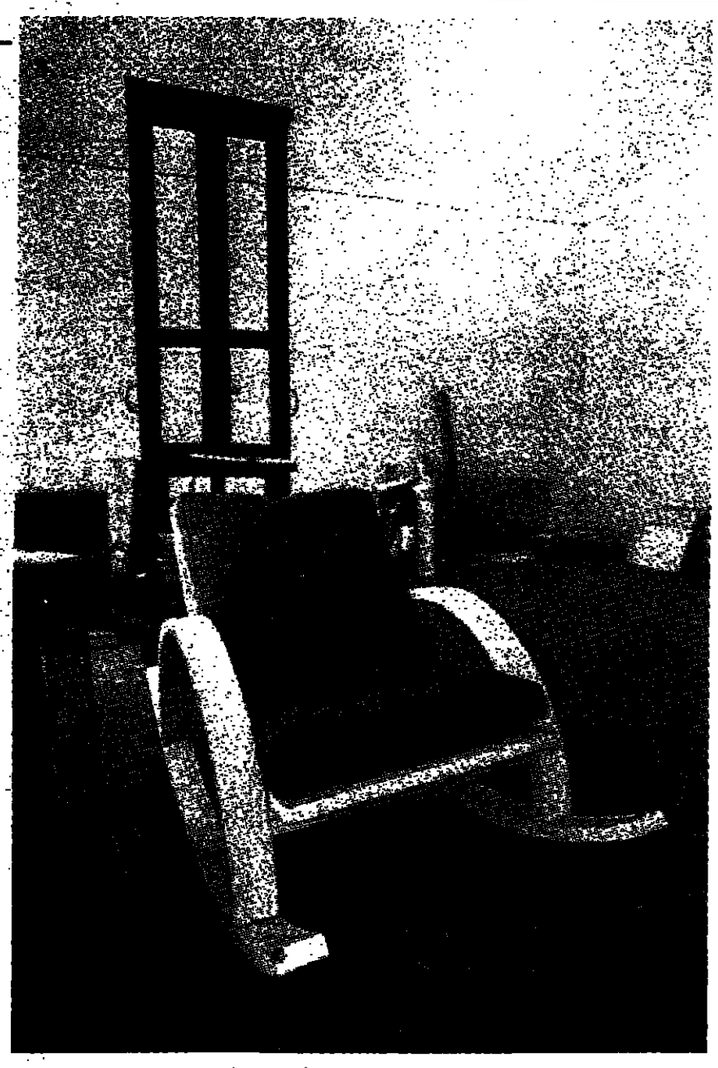
Jacqueline was upstairs the e time," Duncan writes in preface to the book. "She ared when her health perted or when she was needed ently by the experts. Everytried to shield Jacqueline m the obvious agony of hav professionals, court-ordered, de her home cataloging everyg, even the contents of Pa- and her clothes closets. The ris have now returned to s. Now it's over. She seems relieved and exhausted."

he estate, consisting of Pi- o's works, two residences, two ios and the artist's bank acnt, has been valued at $1.1 on by the experts. The artist's w, who by French law is led to a major share of the te, will, according to Duncan, ually come into several dred million dollars.

Life of Memory

w 50, Mrs. Picasso lives e in the villa at Mougins with housekeeper and Picasso's secry, often going barefoot und the house. "There are guards, no chauffeur," notes can. "She has no materialis desires whatever. She leads simplest life, in devotion to memory."

hen the artist died on l 8, 1973, Duncan recalls, his w took his body to the feudal e they owned at Vauvenarand closed the gates there 10 days. Picasso lay in a et in front of the baronial lace, while outside, men dug crypt in the circular garden runt of the chateau. There no funeral."



e grave, a grassy mount surded by a low rim of stone vines, is unmarked except a Picasso sculpture of a pri-

mpeii Thieves Take corated Wall

APLES, Nov. 12 (UPI).— ves have removed a decorat- aster wall from a 1,900-year- ouse in the nearby ruins of peii, the police reported. ficers said the stolen sec- of wall measured 4 meters e and was decorated with a ding of Medusa. The wall was of a house that belonged to s. Poibius, a first-century ician.

er Tributary Bursts

OME, Nov. 12 (Reuters).— men had to use boats yester- to rescue people from ed streets here when a tary of the Tiber River burst anks, police said.

David Douglas Duncan photo of Picasso's silent studio.

meval woman holding a Grecian torch, a duplicate of one that Picasso himself had earmarked as a gift to the Spanish Republic.

One of the few intimates with whom Picasso discussed art, Mrs. Picasso is described by Duncan as "the only person I've ever met who gave herself completely to another person, adopted a totally consuming, self-effacing role. She was always there—his wife, housekeeper, cook. And when people like Rubinstein, Braque, Harry Truman, came to the villa, she was a miracle of hospitality and graciousness."

Although they are not unfriendly toward one another, Mrs. Picasso and the other heirs "don't seek each other out," Duncan reports. "I think Jacqueline is determined to be the final defender of the Picasso image, her last gift to him. I think her only wish would be health and a chance to pursue whatever dreams she has of making a Picasso museum of her own heritage—perhaps at Vauvenargues."

ART IN PARIS

The Russian 'Avant-Garde' and Its Enemies

By Michael Gibson

PARIS (IHT).—"Most of the painters shown here were made members of the Artists' Union in the Soviet Union one week before the exhibition opened," said Mihail Chemiakin, "which is why the show is entitled 'Contemporary Russian Art' rather than 'Unofficial Russian Art,' which would now be inaccurate."

We were walking through the display of some 500 works by 58 Russian "avant-garde" artists, some of them in exile and others living in the Soviet Union, where they have, in the past, been subjected to various forms of harassment. With us came a young woman serving as interpreter (Mr. Chemiakin preferred to speak Russian), her dog (a borzoi, naturally) and Christine de Callanges, who has a gallery in the Palais des Congrès and who made all practical arrangements for the show, which is being held in the same Palais (Porte Maillot, to Nov. 21).

"I've done my utmost to prevent this from becoming a polemical show," she said. "We were solicited and pressured from one side and the other, but I did not want to make this an anti-Soviet manifestation. I just want to show Russian artists whose style does not fit into the official mold."

Mihail Chemiakin, who is 34, left the Soviet Union five years ago. He is a painter himself with a reputation in Paris (his works are to be seen here, too) and he is the artistic director of the present show.

Dismantled

About half the works belong to Alexander Gleser, who organized avant-garde shows in the Soviet Union on several occasions, the most newsworthy being one that took place in a vacant lot in Moscow in 1974 and which was dismantled with the help of bulldozers and fire hoses. Mr. Gleser, whose polemical disposition seems to cause some discomfort to the organizers of the present show, was apparently offered the alternative of going to a rather cold region of his own country or going abroad. He preferred the latter and by cautious dickering also obtained permission to take about half of his personal collection with him.

Mihail Chemiakin

"People are always talking about the KGB," said Mr. Chemiakin, "but the No. 1 enemy of the avant-garde painter is the Artists' Union, which has the authority to call out the militia. These artists, who work according to the canons of socialist realism, are well aware of the fact that they are defending their privileges: money, studios, trips abroad. If those they have been harassing were allowed to show their works and sell them, then their own stuff would very soon lose any value it may now have."

The government itself, he adds, has too many other problems to worry very much about a few marginal artists and therefore gives the union a free hand.

"I had an exhibition with official approval, in the Hermitage in 1964," he says, "and it was closed by the KGB after the union had complained."

Treatment

Like all the nonconforming artists who began about that time, he adds, he passed through a psychiatric hospital where he was subjected to a treatment that was intended to take away his desire to paint.

"But I left the country five years ago and things have changed since then. Painters today do not have to undergo that sort of thing anymore."

The show itself is uneven but includes works by a number of forceful, eloquent artists. The choice of what was to be shown (aside from the Gleser collection) was very much determined by what it was possible to get out of the country. Nor should one forget that this is an art developing pretty much on its own. An occasional and specific Western influence may seem to appear here and there. But even that is not absolutely certain. One should bear in mind, too, that styles which no longer seem very relevant here are still meaningful in the Soviet context.

Two main groups are represented: painters active in Moscow and those living in Leningrad, which Mr. Chemiakin in his gentle tone refers to as "Piterboor" (St. Petersburg).

Prime Mover

The Moscow group seems to have taken Oscar Rabine, 48, as a sort of leader. Mr. Chemiakin himself, when he was living in Leningrad, was the prime mover of a group of artists who developed a common style with reference to the art of the icon and indeed to prehistoric art. Thus we have Makarenko, whose style is extremely close to that of Mr. Chemiakin himself, although the content is in many subtle ways quite different. Both artists are of outstanding quality. Another striking painter in a totally different vein is Vladimir Yankilevski, who, perhaps in the spirit of Gogol's story about a nose, does very expressionistic drawings showing parades of weird anatomical hybrids—an arm surmounted by a leg (or vice versa) and preceded by a huge scowling and complacent mask.

Ernst Neyzvestny, a sculptor who is represented here by his drawings, made news some years ago when he faced down one of Khrushchev's shows of anger and ultimately became one of his friends. The confrontation nonetheless resulted in a forfeiture of his oportunity to show his work and this year he moved to Switzerland.

Another recent emigrant (to France) is Victor Koulbak (born in 1946), who has developed a fantastical world represented by portraits of strangely hooded figures. They have a strong, slightly amusing, and rather haunting presence.

None of the works shown manifest an overt or an implicit political intention. Even Boris Svechnikov, who spent some time in detention camps and did his drawings there (they are shown in the present exhibition) under bad lighting conditions which ultimately harmed his eyesight, did not, even in such extreme conditions, see cause to do any polemical work. Their gin, in the view of those who represent "orthodoxy," is that they do not reflect the sort of flat-footed optimism which is de rigueur in so-called socialist realism (it is by no means the exclusive prerogative of this style—witness such thoroughly non-Russian a publication as the Reader's Digest).

Even under these stunting conditions one senses a specific Russian quality in these works, a quality of which the artists themselves are well aware.

How does Mr. Chemiakin perceive the difference in the approach to art in Russia and in the West?

"Well, as a good patriot," he says, "I prefer the art of my own country, because I find much more humanity and soul in it. What I see in France is much colder and seems dead to me despite the often extraordinary technical ability."

Ancient Greek Tomb Held Golden Objects

ATHENS, Nov. 12 (UPI).—Archaeologists excavating a cemetery at Pella, the birthplace of Alexander the Great, unearthed a tomb containing gold objects, according to the Archaeological Service.

The tomb held rings, a gold mirror, gilded ornaments for a chest and a gold coin struck with the head of Alexander's father, Philip of Macedon. The ruins of Pella, capital of ancient Macedonia, extend over 1,000 acres near Salonika.

Around the Galleries in London and Paris

London

Merlyn Evans, New Art Centre, 41 Sloane St., London, SW1, to Nov. 20.

Forty-one drawings by Merlyn Evans (1910-1973) readily divide into three separate kinds—portraits, including that of Giorgio di Chirico; nudes, most done while he was teacher of engraving and life drawing at the Central School of Arts and Crafts in London; and a variety of metamorphic drawings. His paintings in the latter genre are better known than his drawings. As a pendant, there are two paintings, a straightforward "Recumbent Figure" of 1928, and perhaps the most famous of the metamorphoses, the "Chess Players" of 1940, emblematic of the German/Soviet Pact.

* * *

Anselmo, Bedford House Galleries, 106 Kensington Church St., London, W8, to Nov. 20.

Under the title "Man and His Space," the Italian artist Anselmo (Francescon) shows a collection of 23 recent images in painting, drawings and engravings. All but two use the human face or figure as subject and most strongly emphasize dramatic, emotional and emotive overtones in the human condition. This is finely sensitive work, showing for the first time in England.

* * *

Peggy Goldstein, Gottesman & Partners, Aldwych House, Aldwych, London, WC2, to Dec. 3.

This is the first London one-man show of an American sculptor now living in Paris. The sculpture here is of three kinds—slightly jokey portrayals of birds such as penguins; more representational animal sculpture as the twin giraffe heads in bronze; and elegant small abstract sculptures based on Chinese calligraphy. An innovation in her work is Chinese ink drawings of animals and birds, on rag paper. These splendidly capture the clownish aspects of such creatures as marabou storks, hippopotamuses and ostriches, as well as the gentle remoteness of the oryx and the long-suffering melancholy of the elephant.

Edward Seago, Marlborough Fine Art, 6 Albemarle St., London, W1, to Nov. 27.

Born in Norfolk, and therefore a latter-day representative of the great East Anglian tradition of landscape painting, Edward Seago (1910-1974) has always been vastly popular with conservative English collectors. This exhibition of 29 oils and a small collection of watercolors and drawings in addition, makes clear why this should be so. Nothing could be more evocative of the spirit of place than, for example, his painting of a Gloucestershire valley, cottages on the common in Norfolk, or the Bicester Hunt, in which the tiny splash of color of the two huntsmen's coats, and the enfilade of liver and white foxhounds in the foreground leads one's eye into the grandeur and opulence of the Oxfordshire landscape.

* * *

Photography: The First 80 Years, P.&D. Colnaghi, 14 Old Bond St., London, W1, to Dec. 1.

More than 5,000 images make up this exciting survey of photography from Fox Talbot to Stieglitz, of whose magazine 291 there is a complete set in the exhibition. In addition there are fine examples of Fenton's photoreportage of the Crimean War; Nadar and Carjat's portraits of their French contemporaries, George Sand, Edmond de Goncourt, Baudelaire; H.P. Robinson's Welsh village life in the 1880s; Julia Cameron's portraits of the Victorian great—Tennyson, Carlyle, Watts, Wilberforce; Robert MacPherson's "Views of Rome"; Eadweard Muybridge's studies in animal locomotion; and a great range of work by Stieglitz and his colleagues of the Photo-Secession group.

* * *

Rosie Lee, Piccadilly Gallery, 16a Cork St., London, W1, to Nov. 27.

In this ninth one-man show, Rosie Lee still uses the formal garden ambience for her paintings, but now there is a strange ambivalence, birds and predatory fish invading ghostly rooms, or spread out in a Bosch-like array on the flat sward surrounded by high hedges.

—MAX WYKES-JOYCE.

Paris

Reigl, Pincemin, Buraglio, Magritte, ARC2, Musée d'Art Moderne de la Ville de Paris, 11 Avenue du Président Wilson, Paris 16, to Dec. 5.

There is a fine ascetic sensitivity in Judit Reigl's work. Large, sober surfaces painted on industrial cotton of the sort used for making sheets. A horizontal trace, sometimes muted, sometimes incandescent, cuts across the surface like the vestige of a smudged and faded text. The paintings are big: 2 meters high and sometimes as much as 6 meters wide. Both the soberness and the scale here convey the implicit possibility of a philosophical statement.

Pincemin is manifestly preoccupied with a number of pseudo-Eleatic paradoxes about art (as is Buraglio too). The outcome is nonetheless that Pincemin has a certain love for color that is visible in his large paintings done on vast rolls of tar paper and that these paintings are authentically handsome. Buraglio is more obviously producing "art as art criticism" by displaying a collection of window frames, picture frames and canvas stretchers, occasionally painted over. A theoretical text compares this procedure with that of Brecht, who desired that the public be able to see the stage machinery so that it would not forget that this was theater. The difference, of course, is that Brecht was not content to display the machinery.

Magritte is represented by a collection of photos, done as entertainment with family and friends, and also as studies for some of his paintings. They are undistinguished in technique and good-natured.

—MICHAEL GIBSON.

Get a little homesick once a week.

To The New Yorker Subscription Dept., Condé Nast Publications Ltd., Belmont Road, London W4 5UJ.

I should like to be informed, entertained, illuminated by The New Yorker's views on all aspects of contemporary life.

Please air-deliver 52 weekly issues. I enclose my cheque for $38 or local currency equivalent (payable to Condé Nast Publications Ltd.).

PARIS, SATURDAY-SUNDAY, NOVEMBER 13-14, 1976

Growth Rate Cut

loomy Outlook for '77 Seen for OECD Area

RIS, Nov. 12 (Reuters).— economists at the Orga- on for Economic Coopera- and Development have ced gloomy forecasts for recovery in major indus- countries next year. in if the oil-exporting coun- refrain from raising prices month, economic perfor- will be below earlier ex- ions.

rmed sources said the D has scaled down its pre- ns for economic growth its 24 member nations in first half of 1977, from 5.25 per cent.

ECD experts believe that in six months from next July th in real gross national uct will decline to a meager per cent. Real GNP is the e of goods and services allowing for inflation.

organization has already ed its estimates for the last of this year from the 5 per published in July to 3.5 per

OECD groups the United s, Canada, the countries Western Europe, Australia, Zealand and Japan.

Basic Assumption

forecasts are always based he assumption that govern- policies will remain un- nged.

hey therefore make no al- lowance for any decision to raise prices by oil ministers of the Organization of Petroleum Exporting Countries when they meet in Qatar on Dec. 15.

The sources said that if OPEC decides to raise prices by more than 10 per cent, the OECD forecasts are likely to be even more drastically revised.

Leading OPEC countries have spoken out for a price increase, and the oil consuming countries are bracing themselves to meet heavier bills.

10-25% Rise Seen

Expectations are that the rise will be anything between 10 and 25 per cent. The Shah of Iran has said the increase must be 15 per cent at least, and he is likely to be supported by Venezuela and several other OPEC members.

Saudi Arabia—the biggest producer—will probably appeal for moderation.

The OECD sources said world economic prospects would depend heavily on what the OPEC nations decide.

They believed the non-Communist industrial nations could probably accommodate an increase restricted to 10 per cent or less. Anything above that figure would endanger the already hesitant recovery.

The latest OECD forecasts are due to be published on Dec. 20. They are still subject to amendment by the organization's short-term forecasting group and its economic police committee.

One reason for the more pessimistic view of economic prospects is that personal consumption in the OECD area has not been rising as quickly as expected earlier.

Stock-building, which gave an early stimulus to recovery from recession at the beginning of this year, now appeared to be over, the sources said. Furthermore, there is no sign of significant export-led growth.

Another worrying feature of the present outlook is that the most powerful economies, notably West Germany and Japan, are drawing further and further away from weaker performers like Britain and Italy.

Long-Term Weak Pound Expected

By Bhushan Bahree

GENEVA, Nov. 12 (AP-DJ).—The pound should see better days soon, but its long-term trend is downward, economic advisers to major Swiss banks say.

For the short-term, the economists say that the following ingredients are necessary for a formula that would help the pound up: a neutralization of the sterling balance overhang; the asked-for loan of $3.9 billion from the International Monetary Fund, and the requirement that a stable Labor government stay at the helm, because it alone can pursue the conservative policies that are necessary to prop up the economy.

To these three, Hans Mast, economic advisor to the Swiss Credit Bank, would add the requirement that the money supply be better managed.

The economists are generally agreed that there is reason to be optimistic about the short term, because these requirements will be met in sufficient measure to help the pound rise slightly. But the long-term prospects are dark, for these economists think that there must be a radical change in British thinking, both economic and social, and they are uncertain that this will happen. "Almost a revolution is needed," says Christian Lutz, chief economic advisor to Basel-based Swiss Bank Corp., the country's biggest.

"The emphasis has to be shifted from preoccupation with distributing the national product to increasing it," says Mr. Mast. To do this, Britain needs a "consistent economic policy for some time," says Union Bank of Switzerland economist Georg Wyler. What is needed is a "solid conservative government," says Mr. Wyler. He chuckles and adds: "And Labor right now has the better chance of providing that."

The Swiss economists point out that there is no floor where the pound would find a spot to lodge for a while. "There is a misconception," says Swiss Bank Corp.'s Mr. Lutz, "that the decline of the pound will at some point overcome the shortcomings of the economy. Not true. The pound can carry on declining, as it well might."

Mr. Mast says that floating rates have a diverging influence, separating the stronger from the weaker and pulling them farther and farther apart. "So the weaker currencies, say the pound, will continue to be driven down and away from the purchasing power parity while the stronger will be driven upward from it. The pull of exchange rates isn't toward correction, but beyond it, on and on," Mr. Mast adds.

North Sea oil certainly will help in that heavy investments that had to be made have been made, and although "this oil is already mortgaged, no more mortgage payments need be made," says Mr. Mast. But to bring about a stronger pound requires an about face in the economy, and the thinking among these economists is that to get back on course, Britain must improve productivity while holding down inflationary forces. To brighten long-term prospects, the change in course should involve the following:

- Measures that would encourage new investment for improved productivity and growth. This is absolutely necessary, says J. van Troostenburg, an economist at Swiss Credit Bank, because Britain must become competitive. "They're already so far behind Europe," he says. These measures could include tax cuts.
- A cut in public spending, because such spending is the least productive. This does not mean that social services should be reduced, but requires an end to nationalizations that use the taxpayers' money to preserve jobs.
- A continued check on wage increases. However, the economists say that British wages already are very low compared with Continental countries, and holding them down is a temporary arrangement.

Mr. Mast says the Labor government's social contract will probably break down after two or three years. "You can't squeeze the British worker much more," says Mr. Van Troostenburg. But labor productivity can and should be raised.

Stocks Decline in Low Volume

NEW YORK, Nov. 12 (IHT).—New York Stock Exchange prices surrendered some of yesterday's gains today to close lower for the fourth time this week in extremely slow trading.

Analysts said the market resumed its defensive mood, interrupted by a technical rebound yesterday, amid sluggish signals from the economy. They cited slow car sales and production cutbacks in major industries.

The Dow Jones industrial average closed at 927.69, down 3.74, after being off more than 8 points. Last Friday the index stood at 943.07.

Volume totaled 15.55 million shares compared with yesterday's 13.2 million shares, which reflected a holiday for some U.S. business. Declining issues outpaced gainers by about 620 to 740.

General Motors, traded actively, lost 1 7/8 at 67 1/2 and Ford was down 1/2 at 55. Chrysler, however, rose 3/4 at 17 7/8 following announcement it was selected to make the Army's XM-1 tank. Avco, an Army contractor, rose 7/8 to 13 7/8.

Steel company shares were also lower, reflecting industry-wide sluggish demand causing layoffs. U.S. Steel was down 5/8 at 46 1/8, Inland Steel 7/8 at 46 1/8 and National Steel 3/8 at 42 3/4.

Among losing issues were IBM, off 1 1/4 at 261 1/4, Itt 3/4 at 30 1/8, Textron 1 1/4 at 24 5/8, and Borg Warner 1 at 25.

Among retailers, J.C. Penny was down 3/4 at 51 while Sears Roebuck fell 1/4 at 66 1/2.

United Brands was up 5/8 at 7 7/8. ASA gained 5/8 at 21 7/8.

Among some actively traded issues, Duke Power was off 1/8, at 31 5/8, Middle South Utilities closed unchanged at 15 5/8 and Many Department Stores was up 1/8 at 32 7/8.

Berkey Photo was up 3/8 at 3 3/4. Textron ended the day at 24 5/8, off 1 1/2 and Leeds & Northrop closed up 1 5/8 at 22 1/8.

Cabot traded to 34 1/8 ,up 1 1/4 after reporting a turnaround to profitability, raising its dividend and saying it planned to repurchase some of its shares.

American Stocks Exchange prices closed lower in slow trading. The Amex index was down 0.04 at 98.55.

U.S. Urges Export Tax Study After Trade Report to GATT

GENEVA, Nov. 12 (NYT).—The United States called today for a general examination of dubious tax practices affecting exports following a finding that Washington and three nations of the European Economic Community were violating internationally-agreed fair-trade rules.

The finding was the outcome of a complaint filed by the community against the United States in 1973 that tax relief given American exporters establishing domestic international sales corporations (DISCs) amounted in effect to an export subsidy, and a counter-complaint by Washington.

In this complaint, the United States claimed that special corporate income tax measures in force in Belgium, France and the Netherlands, members of the nine-nation community, were tantamount to the subsidizing of exports.

An international panel of experts found that the incriminated tax practices contravened rules of the General Agreement on Tariffs and Trade. In effect, these ban measures that enable manufacturers to sell their products abroad cheaper or for a greater profit than at home.

Formal Submission

Although already known, the verdicts of the five-man panel, which took up each case separately, were submitted formally today to the GATT council of permanent representatives.

In each of the four cases the decisive finding was that the incriminated practices resulted in a "nullification or impairment of benefits" that other members of the 83-nation GATT were entitled to expect from their subscribing to this organization's fair-trade rules.

No action on the reports was taken by the GATT council. Members called for time to study them. Informal discussions are expected to be held to prepare the way for a decision on further tive action.

Because the challenged U.S. tax deferment arrangement was established by Congress, Washington can do nothing to meet criticism that it violates international obligations without legislative action.

U.S. Seeks Talks

Robert Brungart, the U.S. representative, repeated in the council the announcement already made in Washington by Frederick Dent, the President's special representative for trade negotiations, that the United States wants to initiate consultations with its trading partner on a "mutually satisfactory solution to the problem of trade distortive effects of tax practices."

The community, however, takes the view that the DISC legislation has a far greater impact on trade than any of the tax breaks given some firms under long-standing Belgian, French and Dutch legislation.

For this reason the community does not want to merge the DISC issue with a general examination of tax legislation that may assist exports in contravention of the GATT. The community wants the question of the aid provided exporters by DISC to be handled separately.

Japan to Relax Curbs on Loans Abroad by Banks

TOKYO, Nov. 12 (AP-DJ).—The Ministry of Finance has decided to ease its tight restrictions on dollar-based medium and long-term syndicated loans—which were imposed in July 1974—made by Japanese banks to overseas borrowers, an official of the ministry said today.

The easing of curbs on such dollar based loans, introduced as Japanese banks' short-term foreign liabilities soared, indicates that Japanese banks have improved their short-term foreign positions, he said.

Japanese commercial bankers have become involved in a number of loans in recent months, and the ministry gave case-by-case approval to two syndicated loans earlier this year.

The easing of restrictions does not mean that Japanese banks will be allowed to lend abroad in dollar syndicated loans freely, however. The Ministry of Finance is still considering the exact terms under which such loans will be approved, the official said.

"We intend to relax the regulations by giving approval on such loans," the official said. "But we won't change the policy all at once."

Market Closed

The Brussels stock exchange was closed Friday for a local holiday.

Money Supply Up In U.S. in Week

NEW YORK, Nov. 12 (NYT).—The U.S. money supply, called M-1 and defined as demand deposits and currency in circulation, averaged $310.6 billion in the week ended Nov. 3, up $200 million from the previous week. The broad money supply, known as M-2 and including consumer-type time and savings deposits at commercial banks, rose $1.6 billion and averaged $729.3 billion in the latest week.

During the four weeks ended Nov. 5, the money supply averaged $310.1 billion, which represented an 11-per-cent annual rate of increase from the average level during the four weeks ended Oct. 6.

The broader money supply averaged $726.8 billion in the four weeks ended Nov. 5, which represented a 14.1-per-cent annual rate of increase from the average level in the four previous weeks.

For Government Role in OPEC Accords

Data Sought on U.S. Oil Firms' Alien Deals

By Edward Cowan

WASHINGTON, Nov. 12 (NYT)—Federal Energy Administrator Frank Zarb is moving to require oil companies to disclose to Washington the major details of their agreements with foreign governments.

In a request for comment about to be published, Mr. Zarb disclosed that he is disposed to require reports not only of agreements that have been signed but also of "significant negotiations in progress."

Such a mandatory regulation under the Federal Energy Administration Act would move the government in a direction that liberal Democrats have recommended—a more active, assertive role in relationships between big oil companies and the 13 members of the Organization of Petroleum Exporting Countries.

It is not certain that the energy agency can satisfy all the procedural requirements of adopting a final regulation before the Ford administration and presumably Mr. Zarb leave office on Jan. 20. However, in light of the interest of congressional Democrats, Mr. Zarb's successor could be under considerable pressure to sign such a regulation.

"The problem doesn't change because the administration does," one energy planner commented

Drawback Seen

To the extent that the government disapproved of a pending agreement, officials concede, it would tend to supplant the company as the negotiator. Mr. Zarb and his associates regard this as a drawback and for that reason are not proposing a formal regulation, only an idea.

The companies are expected to contend, as one oil executive did yesterday, that the industry voluntarily gives Washington all essential information and that a formal reporting requirement would unnecessarily complicate future negotiations.

Officials in the Federal Energy Administration and the State Department agree that they get a lot of information—"It comes unsolicited in the mail," one official said. But, added another, "You're always wondering whether there are other side agreements."

Mr. Zarb is depicted by associates as the driving force for a prenotification requirement, despite the opposition of some of his associates. His feeling that the government may not be adequately informed, especially for policymaking and strategic planning, took shape during trips this year to the Middle East.

Saudi Control

He has said that he found that the Saudi government "had control" over American oil companies "in a way that I never thought they had."

The commitments of oil companies to buy oil from other governments is one of the key pieces of information that all officials believe Washington should know.

Energy planners fear that the companies' commitments to buy oil from foreign governments may weaken their incentive to look elsewhere for oil and thereby retard diversification of America's sources of supply. A company's commitment to invest its own money in exploration and development could have a similar inhibiting effect.

Diversification is very much on Washington's mind because of growing American dependence on Saudi oil, a trend that shows no sign of stopping.

A "request for comment" by Dec. 6 that the energy agency sent to the Federal Register yesterday for publication states that the oil cartel's big price boosts since 1973 and the member states' tighter control of production "have generated increased public concern about the impact on U.S national energy interests and objectives" of arrangements between companies and foreign governments.

"The public lacks confidence the government knows what's going on," an official said. "Zarb isn't sure, either."

Other officials dispute that, but virtually none, including some in the State Department who worry about how the government would use the data reported by the companies, seems ready to oppose mandatory disclosure.

PEOPLE IN BUSINESS

Graham Hulse

Peter Bennett

Graham Hulse has been appointed as director, Europe-Africa, for the new Monsanto Chemical Intermediates Co. **Herman Fonteyne** will be the company's director, Europe-Africa for agricultural products. Mr. Fonteyne succeeds **Dale MacDonald** who is returning to the company's headquarters in the United States. Mr. Hulse was previously business director, petro-chemicals—Europe and Mr. Fonteyne field sales director, Europe-Africa for agricultural products.

* * *

W.H. Smith & Son (Holding) has announced that **C.H.W. Troughton** will retire as chairman of the company on Jan. 31 next year. He will be succeeded by **Peter Bennett**, who has been deputy chairman since 1974. **D.A. Acland**, present chief executive of the main operating company, will become chief executive of the group.

* * *

J.H.C. Baarns has been appointed director of technical services for Memorex Europe, the Middle East and Africa. He was previously technical director with Technicon and Singer Business Machines.

Gaetano Vicinelli, vice-president of Morgan Guaranty Trust, has been named general manager of the bank's Italian operations. Previous assignments of Mr. Vicinelli have included the post of deputy general manager of Bank Almashrek SAL in Beirut, and responsibility in the Western European group of Morgan Guaranty for its business in Italy, Spain, Portugal and Greece.

* * *

Citibank has announced the appointment of **Rafael Moreno Valle**, vice-president, as area corporate officer responsible for all the bank's operations in Italy and for supervision of the Italian branch of Citicorp Leasing International. Mr. Valle has also been appointed chairman of Citicorp Finanziaria Cififin, a finance company wholly owned by Citibank. Prior to this appointment he was senior officer in the field for the Belgian branches of Citibank.

* * *

Wesley Winfree has been named a vice-president in the London office of Girard Trust Bank. He was formerly a manager of the bank.

Japan Agrees o Extend eel Curbs

USSELS, Nov. 12 (AP-DJ). officials of Japan's Minis- of International Trade and stry promised today to en- that Japanese exports of products to the European nic Community will not ex- 1.4 million metric tons in

e-Minister Naohiro Amaya, resented MITI at contact with the European Coal and mmunity, said his minis- ll advise the six major steel makers to hold shipments to the 1.23 on ceiling they agreed to

ition, Mr. Amaya told orters after the talks, MITI se its influence on about 50 Japanese steel producers to their shipments of shaped products to EEC markets to 160,000 tons in 1977.

additional 20,000 tons of l steels will be exported by Japanese next year, bringing total 1977 steel shipments to unity markets to 1.4 million Mr. Amaya explained.

Other Complaints

his pledge settled only some he complaints the ECSC, sented by the EEC Commis- 's industrial department chief, hus Losff, had raised at the a *EEC had also sought Japa-* restraints on steel shipments rd countries in Europe, such pain, Switzerland, Sweden Portugal. It also suggested price adjustments by the ese for the products, argu- hat Japan's steel prices are derably below those of com- y producers.

semi-annual trade talks ng Monday the EEC will ss concern over its increasing t in trade with Japan.

ommission spokesman noted the EEC expects its trade t with Japan to widen to $4.2 billion this year from illion in 1975 and $2 billion 4.

these two-day consultations, EC will seek more balanced exchanges with Japan.

Japan Cabinet Adopts Plan To Boost Economic Recovery

TOKYO, Nov. 12 (NYT).—The Japanese government adopted today a seven-point program to accelerate the slowed pace of economic recovery.

The business-stimulating measures call for spending $3.45 billion on public works, private housing construction and increased financing for smaller businesses.

An expenditure of more than $1 billion is provided under the program to carry out construction projects for the national railways.

Low-interest loans are also provided to finance construction of 20,000 more houses, in addition to the 210,000 planned for the current fiscal year, ending March 31, 1977.

The economic incentive program also provides increased plant and equipment investments and larger exports of industrial equipment.

In addition, the government has unfrozen the oil industry's program to increase its refining capacity by 1 million barrels as a means to stimulate the sluggish economy.

Surge Ends

The Japanese economy surged sharply in the first quarter of this year, when exports recorded an impressive 15.7-per-cent increase from the preceding quarter. However, the economy began to slip after the second quarter.

The government's Economic Planning Agency said that despite the current business slowdown the basic tone of business recovery remains unchanged and the economy will keep expanding slowly but steadily in the latter half of this fiscal year.

The agency predicted the gross national product would grow about 5.7 per cent this year as against 3 per cent registered in 1975.

Analysts have pointed out three major factors which, they believe, are responsible for the sluggish economy.

First, the government's spending in public works has been curtailed drastically as a result of a marked delay in parliamentary action to approve a bill to authorize the floating of deficit-financing national bonds.

Heavy shortfalls in revenues caused by the worst postwar recession have compelled the government to rely on the national bonds to cover the deficits equal to one-third of its budget for fiscal 1976.

Secondly, consumer spending which accounts for more than half of Japan's gross national product, has remained inactive. While people's nominal incomes have climbed slightly, taxes and premiums for social security programs have sharply increased. As a result, consumers have kept their pursestrings tight, holding back on their spending in leisure activities.

The Labor Ministry said that the total monthly wage of workers averaged $539 in September, a drop of 0.8 per cent in real terms from a year earlier. The September figure was the third consecutive monthly decline in workers' real wages.

Thirdly, exports in terms of value registered a slight increase of 3 per cent in the second quarter over the first quarter—a sharp fall from a gain of 15.7 per cent recorded in the previous quarter. Gains in shipments dropped a further 2.7 per cent in the third quarter.

Exports Level Off

Exports of automobiles and household electric appliances, which played a major role in overseas shipments during the first half of the year, have leveled off. As a result, inventories have shot up, compelling manufacturers to curtail production to adjust their stockpiles.

In the second quarter, growth in the gross national product dropped 1.1 per cent from 3.2 per cent in the first quarter. The mining and industrial production index also declined more than 1 per cent in both August and September.

European investment in U.S. securities.

A special report by the International Herald Tribune during the week of Nov. 29, 1976.

European investments in stocks, corporate bonds, government bonds and notes now represent almost 70% of all foreign portfolio investments in the United States.

Stocks constitute the most important part of these investments. In 1975, the U.S. Department of the Treasury estimated European investments in U.S. stocks at $26 billion, an increase of almost 50% over 1974.

To study the reasons for the growing interest on the part of Europeans in the U.S. market, the International Herald Tribune plans to publish for the first time, during the week of November 29, 1976, a special in-depth report entitled "European Investment in U.S. Securities."

An important section of this report will be devoted to the kinds of investments that appeal to Europeans. At the same time, the report will look at American securities listed on the European exchanges. The report will also examine attitudes toward corporate profits in the U.S. contrasted with views in Europe.

In addition to regular distribution with the newspaper, this report will be sent by the International Herald Tribune to:

900 key investment professionals who act as either heads of U.S. investments, portfolio managers of U.S. securities or analysts with responsibility for following U.S. companies at the major financial institutions in Europe.

800 Eurobond and Eurocurrency money managers in Europe.

300 of the most important directors of business, finance and government organizations throughout the Middle East.

U.S. corporations or European financial institutions interested in advertising information should contact:

In Europe:
Larry Sears

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.
